GENERAL AVIATION AIRCRAFT

Engine development toward lower energy consumption and reduced environmental impact
[AIAA PAPER 78-307] 18 p0178 A78-24008
General aviation energy-conservation research programs at NASA-Lewis Research Center --- for non-turbine general aviation engines 18 p0216 A78-29330

General aviation energy-conservation research programs at NASA-Lewis Research Center
[NASA-TN-73884] 18 p0247 A78-17060

GEOCHEMISTRY

Thermal alteration experiments on organic matter in recent marine sediments as a model for petroleum genesis 17 p0097 A78-18784

Hydrothermal alteration in active geothermal fields
[VPI-SU-5103-3] 19 p0339 A78-38770

Evaluation and targeting of geothermal energy resources in the southeastern United States
[VPI-SU-5103-3] 17 p0162 N78-15585

Analyses of natural gases, 1976
[PB-272735/2] 18 p0238 N78-16419

Geochemical characterization of Devonian gas shale
[MLM-2467(OP)] 19 p0434 N78-25719

Physiochemical characterization of Devonian gas shale
[MLM-2466(OP)] 19 p0434 N78-25720

Hydrogeochemical and stream-sediment survey of the National Resource Evaluation (NORE) program: Western United States
[UCID-16911-77-2] 19 p0434 N78-25722

GEOGRAPHY

Data bank for the geographical allocation of future US energy supply facilities by county
[BNI-50754] 19 p0463 N78-27590

GEOLOGICAL SURVEYS

Industrial use of geological remote sensing from space 17 p0075 A78-14787

Landsat detection of hydrothermal alteration in the Ngal Canyon Cauldron, New Mexico 17 p0075 A78-14815

Geothermal energy resources map of the western United States 19 p0362 A78-40535

Geology and gas content of coalbeds in vicinity of bureau of mines, Princeton, Pa.
[PB-271875/7] 17 p0145 N78-13624

Analyses of natural gases, 1976
[PB-272735/2] 18 p0238 N78-16419

Preliminary study of the favorability for uranium in selected areas in the Basin and Range Province, Nevada
[GJBY-74(77)] 19 p0391 N78-22534

GEOLOGY

Bibliography of earth science reports for 1976
[UCID-17476-76] 17 p0149 N78-14451

Application of remote sensing to geothermal anomaly mapping in the Caldas Novas County, Goiás
[INPE-1129-TPT/070] 17 p0149 N78-14610

Borehole gravity survey to determine density variations in the Devonian shale sequence of Lincoln County
[MERC/CB-77/7] 17 p0157 N78-14729

Evaluation and targeting of geothermal energy resources in the southeastern United States
[VPI-SU-5103-3] 17 p0162 N78-15585

Geological and geothermal data use investigations for application explorer mission-A: Heat capacity mapping mission
[E78-10092] 18 p0263 N78-19570

Bibliography of New Mexico geology and mineral technology, 1971-1975
[PB-278348/8] 19 p0451 N78-26699

Introductory workshops on remote sensing as related to geological problems in Georgia
[E78-10152] 19 p0455 N78-27482

GEOMORPHOLOGY

Thermal surveillance of active volcanoes using the LANDSAT-1 data collection system. Part 4: Lassen volcanic region
[E78-10123] 19 p0394 N78-23499

GEOPHYSICS

Evaluation and targeting of geothermal energy resources in the southeastern United States
[VPI-SU-5103-3] 17 p0162 N78-15585

Use of the method of one-dimensional nonlinear transformations to forecast the natural model of an oil stratum 18 p0290 N78-21693

GEORGIA

Solar total energy system, large scale experiment, Shenandoah, Georgia. Volume 2, Section 3: Facility concept design 19 p0409 N78-24672

Solar total energy system, large scale experiment, Shenandoah, Georgia, volume 3
[ALC/3987-1/3-VOL-3] 19 p0409 N78-24673

Solar total energy system: Large scale experiment, Shenandoah, Georgia. Volume 1. Section 1: Conclusions and recommendations. Section 2: Systems requirements
[ALC/3987-1/1-VOL-1] 19 p0431 N78-25644

Environmental effects of energy
[PB-278169/8] 19 p0449 N78-26620

Introductory workshops on remote sensing as related to geological problems in Georgia
[E78-10152] 19 p0455 N78-27482

GEOS SATELLITES (ESA)

Implementation of extreme-purity specifications in the case of solar generators, taking into account, as an example, the satellites GEOS and ISEE-B 17 p0085 A78-16852

GEOTHERMAL ENERGY CONVERSION

Capital and electrical production costs for geothermal power plants 17 p0010 A78-10744

Prospects for geothermal energy applications and utilization in Canada 17 p0067 A78-13343

Non-electrical uses of geothermal energy 17 p0082 A78-16635

Economics and projections for geothermal development in the Northwest --- Washington, Oregon and Idaho 17 p0082 A78-16769

A parametric study of a heat exchanger designed for geothermal power plant application
[ASHE PAPER 77-HT-1] 17 p0088 A78-17476

Evaluation and design considerations for liquid-liquid direct contact heat exchangers for geothermal applications
[ASHE PAPER 77-HT-2] 17 p0089 A78-17477

Application of direct contact heat exchangers in geothermal systems
[ASHE PAPER 77-HT-3] 17 p0089 A78-17478

Testing of direct contact heat exchangers for geothermal brines
[ASHE PAPER 77-HT-4] 17 p0089 A78-17479

Operational limitations of direct contact boilers for geothermal applications
[ASHE PAPER 77-HT-5] 17 p0089 A78-17480

Advances in liquid fluidized-bed heat exchanger development --- using geothermal water
[ASHE PAPER 77-HT-66] 17 p0090 A78-17498

Finite-element solutions for geothermal systems 17 p0094 A78-18097

Geothermal well stimulation with a secondary fluid 17 p0104 A78-19625

Investigation of hydrodynamic flows of a heat transfer fluid in zones of artificial porosity 18 p0172 A78-22537

Study of the driving forces of heat and mass transfer in a nozzle reflux device for heating air by water 18 p0172 A78-22543

Geothermal energy utilization --- Book 18 p0198 A78-27824

An analysis of an early hybrid fossil-geothermal power plant proposal 18 p0218 A78-29998

Engineering aspects of geothermal development with emphasis on the Imperial Valley of California 18 p0228 A78-31742

A scenario for geothermal electric power development in Imperial Valley 18 p0228 A78-31743

Making use of moderate temperature geothermal resources 18 p0232 A78-32117

SUBJECT INDEX

HEAT SOURCES

Heat pipe with dual working fluids
[NASA-CASE-ARC-10198] 18 p0248 N78-17336

Heat pipes and their use in technology
[NASA-TM-75148] 18 p0254 N78-18357

High temperature heat pipe research at NASA Lewis
Research Center
[NASA-TM-78832] 19 p0393 N78-23384

Reactor technology --- including heat pipe
specifications
[LA-6931-PR] 19 p0400 N78-23899

Heat pipes, volume 2. Citations from the
engineering index data base
[NTIS/PS-78/0303] 19 p0417 N78-25382

Heat pipes, volume 3. Citations from the
engineering index data base
[NTIS/PS-78/0304] 19 p0417 N78-25383

Heat pipes, volume 3. Citations from the NTIS
data base
[NTIS/PS-78/0302] 19 p0417 N78-25384

Stirling engine heater tube failures
[GHR-2690-SECT-3.101] 19 p0438 N78-26285

Stirling engine heater tube failure
[GHR-2690-SECT-3.102] 19 p0438 N78-26286

Evaluation of stresses in tubes with external heat
flux and internal pressurization
[GHR-2690-SECT-3.204] 19 p0439 N78-26294

Performance of a thermionic converter module
utilizing emitter and collector heat pipes
[NASA-TM-78941] 19 p0454 N78-27174

HEAT PUMPS

The heat pump in relation to solar energy
17 p0004 A78-10618

Comparative residential energy consumption and
fuel costs with various types of systems - oil-,
gas-, electric-furnaces and heat pumps
17 p0033 A78-11118

Evaluation of an energy conserving research house
involving multi-modal operation of solar and
heat pump systems
17 p0046 A78-11244

Heat pump application in houses
17 p0068 A78-13452

Air source heat pumps
17 p0068 A78-13453

Solar energy economizes on heat pump current ---
in house heating system
17 p0071 A78-14091

The first 'solar hotel' in Germany
17 p0072 A78-14096

The Tritherm House of Bosch-Junkers in Wernau ---
solar heating for private homes
17 p0072 A78-14097

The sun satisfies two thirds of the heat
requirements
17 p0072 A78-14098

A prefabricated-house series with solar technology
17 p0072 A78-14099

Tritherm heating --- synthesis of solar, heat pump
and fossil fuel heating
17 p0074 A78-14421

Solar energy and economic considerations
17 p0078 A78-15407

Solar absorption system for space cooling and
heating
17 p0078 A78-15409

Ground as a heat source --- for house heating
17 p0097 A78-18816

Unconventional types of power-heat coupling
17 p0102 A78-19246

The use of heat pumps in reducing fuel consumption
for nonsolar climate control of buildings
18 p0174 A78-22842

A short summary of present applications and hopes
for the development of heat pumps in France
18 p0197 A78-27789

Integration of heat pumps into solar-heating systems
18 p0213 A78-28592

Energy savings through combining of operation of
heat pump and air conditioning systems
18 p0232 A78-32115

Operational dynamics of coupled flat plate solar
collector and adsorption cycle heat pump system
with energy storage
19 p0295 A78-33037

A comparison of some alternative domestic energy
systems --- solar, heat pump and conventional
space and water heating
19 p0316 A78-35361

Study of liquid-metal heat pipes characteristics
at start-up and operation under gravitation
[AIAA 78-434] 19 p0318 A78-35614

Use of heat pumps with solar collectors for
domestic space heating in the United Kingdom
19 p0341 A78-38571

Performance potential of the energy separator
without mechanical energy recovery
[PB-269721/7] 17 p0116 N78-10601

Investigation of an ejector heat pump
17 p0124 N78-12361

Investigation of methods to improve heat pump
performance and reliability in a northern
climate. Volume 3: Appendices B, C, D
[EPRI-EM-319-VOL-3-APP-B] 17 p0139 N78-13565

Investigation of methods to improve heat pump
performance and reliability in a northern
climate. Final report, volume 1
[EPRI-EM-319-VOL-1] 17 p0139 N78-13567

Survey of research and development activities in
the Netherlands on heat pumps for residential
heating
[CTI-76-09497] 17 p0156 N78-14684

HYC50S: A chemical heat pump and energy system
based on metal hydrides
[ANL-77-39] 18 p0238 N78-16334

Evaluation of a large capacity heat pump concept
for active cooling of hypersonic aircraft
structure
[NASA-CR-145301] 18 p0248 N78-17339

Liquid flat plate collector and pump for solar
heating and cooling systems: A collection of
quarterly reports
[NASA-CR-150599] 18 p0275 N78-20614

Preliminary design package for solar collector and
solar pump
[NASA-CR-150630] 19 p0389 N78-22472

Design study of an experiment cooling system with
liquid/air heat exchanger for Spacelab payloads
(ECLA) --- control system for fluid loop with
heat pump
[P+W-FO-1378] 19 p0404 N78-24511

Waste heat utilization in industrial processes
[NASA-TM-75210] 19 p0413 N78-25012

Performance evaluation of a Stirling cycle heat pump
[GHR-2690-SECT-7.110] 19 p0441 N78-26336

Methodology for predicting the demand for new
electricity using goods
[EPRI-EA-593] 19 p0445 N78-26570

Analysis of the impact of heat pump technology on
the Irish energy system to the year 2000.
Energy case study series: no. 2
[CONF-770956-2] 19 p0448 N78-26599

Solar energy and the heat pump in a northern climate
[EPRI-EA-407] 19 p0462 N78-27583

HEAT RADIATORS

Air source heat pumps
17 p0068 A78-13453

The Tritherm House of Bosch-Junkers in Wernau ---
solar heating for private homes
17 p0072 A78-14097

High temperature heat pipes for terrestrial
applications
[AIAA 78-435] 19 p0318 A78-35615

Conceptual design of a heat pipe radiator
[LA-6939-MS] 18 p0273 N78-20471

HEAT RESISTANT ALLOYS

High temperature materials for space power systems
18 p0218 A78-29954

Material selection considerations for fluoride
thermal energy storage containment in a sodium
heat pipe environment
[AD-A042389] 17 p0112 N78-10563

HEAT SHIELDING

Temperature sheaths on probes or electrodes in HED
plasmas
19 p0336 A78-38108

Evaluation of a large capacity heat pump concept
for active cooling of hypersonic aircraft
structure
[NASA-CR-145301] 18 p0248 N78-17339

HEAT SOURCES

Economic energy utilization by means of remote
heating
17 p0093 A78-18025

Nitric acid cycle process for extracting thermal
energy from low-level heat sources --- for Ocean
Thermal Energy Conversion
19 p0315 A78-35171

Investigation of methods to improve heat pump performance and reliability in a northern climate. Final report, volume 1 [EPRI-EH-319-VOL-1] 17 p0139 A78-13567

An analysis of alternative residential heating systems in terms of three criteria: Energy conservation, environmental impact and life-cycle economics 18 p0239 A78-16423

SIMS prototype system 1: Design data brochure --- solar heating system [NASA-CR-150534] 18 p0250 A78-17484

Installation package - SIMS prototype system 1A [NASA-CR-150524] 18 p0255 A78-18523

Design data brochure: SIMS prototype system 2 [NASA-CR-150558] 18 p0268 A78-19649

Prototype solar heating and hot water system [NASA-CR-150575] 18 p0268 A78-19653

Installation package maxi-therm S-101 heating module [NASA-CR-150512] 18 p0274 A78-20602

System design package for SIMS prototype system 2, solar hot water [NASA-CR-150521] 19 p0388 A78-22465

Prototype solar heating and combined heating and cooling systems [NASA-CR-150693] 19 p0420 A78-25542

Solar energy in high-rise buildings [DSE/1963-1] 19 p0431 A78-25641

Total energy systems for buildings. Citations from the engineering index data base [NTIS/PS-78/0306] 19 p0432 A78-25657

Total energy systems for buildings. Citations from the NTIS data base [NTIS/PS-78/0305] 19 p0433 A78-25658

Support testing and design study evaluation of regenerative air heaters [FE-2254-5] 19 p0441 A78-26398

Design method for heat loss calculation for in-ground heat storage tanks [COO-2939-3] 19 p0441 A78-26402

Helium heaters of the helium turbine unit of the Oberhausen energy supply [DOE-TR-35] 19 p0455 A78-27440

Closed gas turbine heater program [TID-28200] 19 p0455 A78-27441

Dynamic models of house heating based on equivalent thermal parameters 19 p0456 A78-27517

Stirling total energy systems study [HCP/T2947-1] 19 p0461 A78-27570

HEAVY ELEMENTS

Heavy metal interactions with natural organics in aquatic environments 18 p0244 A78-16479

HEAVY WATER

Study of the potential for improving the economics of hydrogen liquefaction through the use of centrifugal compressors and the addition of a heavy water plant [NASA-CR-145282] 17 p0159 A78-15564

HELICAL WINDINGS

Kine-Pak: A self-contained, electrical power generator system --- using a helical spring to rotate a rotor and generate electric current [NASA-CASE-LAR-11551-1] 19 p0389 A78-22468

HELICOPTER DESIGN

Helicopters and energy savings 17 p0076 A78-15020

HELICOPTER ENGINES

Research needs for U.S. Army aircraft propulsion [AIAA PAP-78-45] 18 p0172 A78-22558

HELICOPTER PERFORMANCE

Some aspects of offshore operations in the Netherlands 18 p0262 A78-19135

HELICOPTERS

Some aspects of offshore operations in the Netherlands 18 p0262 A78-19135

Helicopters and energy savings [AIAA-PT-77-25] 19 p0401 A78-24128

HELIOS SATELLITES

Improved Helios cell output --- solar generator power efficiency 17 p0019 A78-10995

HELIOSTATS

Results of experiments with heliostats for central receiver power plants 17 p0053 A78-11326

Subsystem research experiments on a central receiver collector --- for solar thermal power plant 17 p0053 A78-11327

An analytic evaluation of the flux density due to sunlight reflected from a flat mirror having a polygonal boundary 17 p0053 A78-11328

A cellwise method for the optimization of large central receiver systems --- solar collectors 17 p0053 A78-11330

The linear Fresnel lens - Solar optical analysis of tracking error effects 17 p0059 A78-11375

Structure of a beam reflected by a heliostat 18 p0214 A78-28888

Automating the control of the optical system of a tower-type solar power station --- heliostat servocontrol 18 p0215 A78-28891

Solar thermal test facility 18 p0216 A78-29227

Steering a field of mirrors using a shared computer-based controller --- for solar array and heliostat application 19 p0312 A78-34516

A cellwise method for the optimization of large central receiver systems 19 p0314 A78-34937

A 400 kW high temperature solar test facility 19 p0384 A78-42894

Parameter study for a central-receiver power station [SAND-77-0667C] 17 p0154 A78-14664

- Central receiver solar thermal power system.
Phase 1, CRDL Item 2: Pilot plant preliminary design report. Volume 3, book 2: Collector subsystem
[SAN/1108-8/3] 19 p0398 N78-23587
- Modal analysis of the first production design heliostat used at the Solar Thermal Test Facility (STTP)
[SAND-77-1393] 19 p0410 N78-24686
- Central receiver solar thermal power system pilot plant preliminary design report. Volume 3: Collector subsystem
[SAN/1111-8/2] 19 p0422 N78-25565
- HELIUM**
Implosion experiments with D₂, He-3 filled microspheres 18 p0235 A78-32440
- Preliminary performance tests of a GPU-3 Stirling engine on hydrogen, helium, and nitrogen
[GHE-2690-SFCT-1.206] 19 p0428 N78-26256
- Helium heaters of the helium turbine unit of the Oberhausen energy supply
[DOE-TR-35] 19 p0455 N78-27440
- HELIUM PLASMA**
Cryosorption pumping of 95% deuterium-5% helium on molecular sieve-5A at 4.2 K 19 p0359 A78-40112
- HELIUM-NEON LASERS**
Response of a solar cell partially illuminated by a nonuniform light source 18 p0192 A78-26614
- HETEROJUNCTION DEVICES**
Photoelectric and electric properties of nSiC-nCds heterojunctions 19 p0330 A78-36855
- Thin film Cds-CuI heterojunction photocells 19 p0333 A78-37260
- SnO₂/Si solar cells - Heterostructure of Schottky-barrier or MIS-type device 19 p0338 A78-38550
- Comparative radiation resistance calculation for graded- and constant-composition n Al/x/Ga/1-x/As-p Al/z/Ga/1-z/As solar cells 19 p0338 A78-38551
- Photocells based on AlGaAs heterostructure with a transition layer 19 p0341 A78-38941
- n-CdS/n-GaAs voltage-enhanced photoanode 19 p0344 A78-39467
- Low-resistivity ZnCdS films for use as windows in heterojunction solar cells 19 p0369 A78-41913
- Evaporated Cds film based heterojunction solar cells 19 p0372 A78-42122
- HEURISTIC METHODS**
Finite Larmor radius equations in an arbitrary near-theta pinch geometry 19 p0582 A78-42491
- HEXAGONS**
Hexagon solar power panel
[NASA-CASE-NPO-12148-1] 19 p0456 N78-27515
- HIGH ACCELERATION**
Acceleration of one ampere negative ion beams to energies up to 120 keV 19 p0348 A78-39832
- HIGH ASPECT RATIO**
Classical diffusion in large-aspect toroidal plasmas 19 p0382 A78-42482
- HIGH CURRENT**
Direct conversion of CO₂ laser energy to high-voltage electrical energy using a laser-produced plasma 17 p0078 A78-15788
- Numerical methods for studying compressed magnetic field generators 17 p0102 A78-18908
- Optimization of the current profile in HED generators 19 p0364 A78-40834
- High-voltage high-current breaker and closer for power systems with inductive storage devices
[UCRL-TRANS-11310] 19 p0454 N78-27344
- HIGH ENERGY ELECTRONS**
Intense relativistic electron-beam trajectories and their effect on beam heating of toroidally confined plasma 19 p0310 A78-34237
- Reversed-field configuration generated by a rotating relativistic electron beam 19 p0382 A78-42492
- HIGH ENERGY FUELS**
Shock-tube combustion of high density hydrocarbon fuels 18 p0222 A78-30512
- HIGH ENERGY INTERACTIONS**
Fusion energy applied to synthetic fuel production: A report to the DOE Division of Magnetic Fusion Energy based on a preliminary study by an ad-hoc advisory group
[CONF-770593] 19 p0393 N78-23251
- HIGH FIELD MAGNETS**
TPT Toroidal Field coil design --- Tokamak Fusion Test Reactor 19 p0345 A78-39785
- Computational model for superconducting toroidal-field magnets for a tokamak reactor 19 p0350 A78-39905
- Fast ramp superconductor for ohmic heating coils --- of Tokamak Next Step reactor 19 p0356 A78-40009
- Superconducting energy storage coils 19 p0356 A78-40010
- First wall surface treating in the Frascati Tokamak FT 19 p0380 A78-42245
- HIGH PRESSURE**
Mathematical model for the gasification of coal under pressure 18 p0184 A78-25323
- Catalytic gasification of coal with high-pressure steam 18 p0227 A78-31497
- A novel dry coal feeding concept for high-pressure gasifiers 17 p0132 N78-13257
- High pressure rotary piston coal feeder 17 p0133 N78-13261
- The use of twin screw extruders for feeding coal against pressures of up to 1500 PSI 17 p0134 N78-13269
- High pressure rotary piston coal feeder
[MERC/SP-77/6] 19 p0417 N78-25443
- HIGH TEMPERATURE**
Hydrogenation of phenanthrene over a commercial cobalt molybdenum sulfide catalyst under severe reaction conditions --- hydrocarbon fuel from coal liquefaction 18 p0190 A78-26580
- What's new in high temperature sulfur removal systems for fluidized-bed coal gasification 18 p0233 A78-32217
- Combined cycles for operation on coal derived fuels with high temperature combustion turbines
[ASME PAPER 77-WA/ENER-14] 19 p0298 A78-33152
- Evacuated-tube solar collector - Effect of control on efficiency at high operating temperatures 19 p0317 A78-35560
- High temperature heat pipes for terrestrial applications
[AIAA 78-435] 19 p0318 A78-35615
- Thermal optical surface properties and high-temperature solar energy conversion
[AIAA PAPER 78-903] 19 p0324 A78-36021
- Assessment of high temperature nuclear energy storage systems for the production of intermediate and peak-load electric power
[ORNL/TN-5821] 17 p0115 N78-10588
- High-temperature desulfurization of low-Btu-gas
[PB-271008/5] 17 p0124 N78-12246
- High temperature turbine technology program.
Phase 1: Program and system definition.
Topical Report: Overall plant design description, low Btu combined cycle electric power plant
[FE-2290-18] 17 p0148 N78-14419
- High temperature turbine technology program.
Phase 1: Program and system definition.
Topical Report: Overall plant design description liquid fuel combined cycle electric power plant
[FE-2290-19] 17 p0149 N78-14420
- High temperature turbine technology program.
Phase 1: Program and system definition. Topical report: Phase 3, preliminary turbine subsystem technology readiness verification program plan
[FE-2290-21] 17 p0149 N78-14421

SUBJECT INDEX

HOT SURFACES

Coal gasification valves, phase 2
[FE-2355-2-REV-D] 19 pC394 N78-23441

High temperature turbine technology program. Phase 1: Combined cycle electric power plant with coal derived low Btu gas or coal-liquid fuel, book 2
[FE-2291-18-BK-2] 19 p0417 N78-25442

Metallurgical studies of high temperature alloy capsules after long time cyclic corrosion tests as containers for lithium fluoride
[GMP-2690-SECT-7.109] 19 p0440 N78-26335

HIGH TEMPERATURE AIR
Analysis of a new concept for a high temperature direct coal-fired falling particle air pre-heater for MHD power generation
[ASME PAPER 77-HT-60] 17 p0089 A78-17492

MSFC hot air collectors. Phase 1: Test report
[NASA-CR-150495] 18 p0249 N78-17471

Thermal performance of MSFC hot air collectors under natural and simulated conditions
[NASA-CR-150506] 18 p0256 N78-18525

Indoor test for thermal performance evaluation of the Solaron (air) solar collector
[NASA-CR-150572] 18 p0268 N78-19652

Design data brochure: Solar hot air heater
[NASA-CR-150697] 19 p0421 N78-25548

HIGH TEMPERATURE ENVIRONMENTS
Silicon solar cell development for concentrated-sunlight, high-temperature applications
17 p0022 A78-11020

HIGH TEMPERATURE GAS COOLED REACTORS
The Gas Turbine HTR plant with a binary cycle
17 p0029 A78-11083

HIGH TEMPERATURE GASES
A low-risk approach to the high-temperature turbine
[ASME PAPER 77-WA/ENR-10] 19 p0298 A78-33148

The utilization of high temperature gas turbines in integrated coal-derived fuel combined cycles
[ASME PAPER 77-WA/ENR-12] 19 p0298 A78-33150

High Temperature Turbine Technology Program. Phase 1: Program and system definition. Topical report: Low FTU gas combustor technology development plan
[FE-2290-26] 18 p0282 N78-21480

Analysis of a high-temperature coal combustor according to a one-dimensional flow model
[AHL/MHD-77-2] 19 p0422 N78-25568

HIGH TEMPERATURE NUCLEAR REACTORS
Uses of nuclear heat at high temperatures for energy conversion processes
17 p0101 A78-18852

Survey of atomic energy planning taking into account the production of energy in addition to electricity
18 p0227 A78-31474

Electrofluid gasification of coal with nuclear energy
19 p0338 A78-38407

High-temperature, high-power-density thermionic energy conversion for space
[NASA-TN-73844] 17 p0147 N78-13890

HIGH TEMPERATURE PLASMAS
Ionization equilibrium and radiative cooling of a high temperature plasma
18 p0227 A78-31423

Plasma engineering problems associated with superthermal fusion products
19 p0358 A78-40081

Protection of walls from hard disruptions in large tokamaks
19 p0379 A78-42214

HIGH TEMPERATURE RESEARCH
Processing the results of experiments on the U-25 unit by means of an information measuring system --- MHD generator
17 p0002 A78-10246

The contemporary state of studies on controlled thermonuclear fusion --- Soviet plasma research
18 p0166 A78-21350

High-temperature materials for MHD generators --- Russian book
19 p0328 A78-36551

Effectiveness of spectrally selective surfaces for exposed, high-temperature solar absorbers
[SAND-77-8300] 19 p0444 N78-26563

HIGH TEMPERATURE TESTS

The design and performance of high temperature turbines in turbofan engines
17 p0093 A78-18023

Thermal alteration experiments on organic matter in recent marine sediments as a model for petroleum genesis
17 p0097 A78-18784

Testing and evaluation of MHD materials and substructures
[FE-2246-3-REV-A] 19 p0446 N78-26581

HIGH VACUUM
TFTR vacuum system --- Tokamak Fusion Test Reactor
19 p0325 A78-36046

HIGH VOLTAGES
Development of inductive storage for generation of high voltage pulses
17 p0007 A78-10699

Direct conversion of CO2 laser energy to high-voltage electrical energy using a laser-produced plasma
17 p0078 A78-15788

Sodium vapor heat pipe laser cell
[AIAA 78-392] 19 p0317 A78-35587

Application of homopolar generators for high voltage plasma experiments
19 p0348 A78-39848

Potential damage to dc superconducting magnets due to high frequency electromagnetic waves
19 p0350 A78-39902

The design philosophy and use of high voltage power systems for multimewatt ion beam accelerators
19 p0354 A78-39974

The TFTR neutral beam power system --- Tokamak Fusion Test Reactor
19 p0354 A78-39976

High-voltage high-current breaker and closer for power systems with inductive storage devices
[UCRL-TRANS-11310] 19 p0454 N78-27344

HIGHWAYS
Investigation of the feasibility of a dual mode electric transportation system
[LBL-6301] 17 p0157 N78-14954

Photovoltaic highway applications: Assessment of the near-term market
[NASA-TN-73863] 18 p0252 N78-17935

Estimated highway fuel savings in 1975
18 p0257 N78-18539

HISTORIES
Resource, technology, and environment at the geysers
[LBL-5231] 19 p0430 N78-25637

HOLOGRAPHIC INTERFEROMETRY
Measurement of a theta-pinch plasma by holographic interferometry
18 p0192 A78-26624

HONEYCOMB STRUCTURES
An approximate equation for predicting the solar transmittance of transparent honeycombs --- flat plate collector efficiency
17 p0044 A78-11231

Convective heat transfer effects within honeycomb structures for flat plate solar collectors
18 p0200 A78-27857

Experimental performance of flat plate solar collectors with various cover materials with and without transparent plastic honeycomb
[AIAA PAPER 78-899] 19 p0324 A78-36018

Solar and infrared radiation properties of parallel-plate honeycomb
[AIAA PAPER 78-901] 19 p0324 A78-36019

HORIZONTAL TAIL SURFACES
BOD-1 WTC dynamic analysis
18 p0265 N78-19618

Some alternative dynamic design configurations for large horizontal axis WECs
18 p0266 N78-19634

HORSEPOWER
Weight propagation and equivalent horsepower for alternate-engined cars
[SAE PAPER 780348] 19 p0366 A78-41225

HOT SURFACES
Catalyzed combustion in a flat plate boundary layer. I. - Experimental measurements and comparison with numerical calculations
[LBL-6841] 18 p0230 A78-31953

HOT WEATHER

SUBJECT INDEX

HOT WEATHER

Analysis of solar space cooling systems suitable for tropical climates 19 p0375 A78-42159

HOT WORKING

Hot forming of silicon sheet, silicon sheet growth development for the large area silicon sheet task of the low cost silicon solar array project [NASA-CR-155934] 18 p0255 A78-18517

HOT-WIRE FLOWMETERS

Flow-measurement using solar radiations 19 p0374 A78-42141

HOUSINGS

Solar and wind home heating and domestic hot water systems: Energy and economics study 17 p0111 A78-10555

HUBS

The effect of hub fairings on wind turbine rotor performance 18 p0219 A78-30039

HUMAN FACTORS ENGINEERING

The use of natural resources - Solar energy applied to the construction of human habitats 17 p0065 A78-12908
Industries in space to benefit mankind: A view over the next 30 years [NASA-CR-155203] 17 p0118 A78-10973

HUMAN RESOURCES

Conference proceedings: A critical economic balance: Water, land, energy, people [PB-274089/2] 18 p0253 A78-17944

HUMIDITY

The effect of ambient temperature and humidity on the carbon monoxide emissions of an idling gas turbine 17 p0065 A78-12557

HUNGARY

Translations on eastern Europe: Scientific affairs, no. 566 [JPRS-70283] 17 p0147 A78-13849

HYBRID COMPUTERS

Magdalen Islands wind turbine hybrid computer model 19 p0340 A78-38781

HYBRID PROPULSION

Computer simulation of an advanced hybrid electric-powered vehicle [SAE PAPER 780217] 19 p0307 A78-33378
Decreasing on-board fuel consumption in heat engine/battery electric hybrids by battery depletion [SAE PAPER 780295] 19 p0308 A78-33386
Hybrid drive for motor vehicles with a preponderantly intermittent method of operation [NASA-TN-75215] 17 p0124 A78-12418

HYDRATES

Properties of some salt hydrates for latent heat storage 17 p0075 A78-14691

HYDRAULIC EQUIPMENT

Hydraulic container pipelining - A future transportation system to conserve energy 17 p0030 A78-11091
Implanted energy conversion system [PB-272609/9] 18 p0243 A78-16464

HYDRAULIC FLUIDS

LLL gas stimulation program [UCRL-50036-77-3] 19 p0445 A78-26575

HYDRIDES

Some rate and modeling studies on the use of iron-titanium hydride as an energy storage medium for electric utility companies [BNL-50667] 19 p0409 A78-24676

HYDROCARBON COMBUSTION

Autothermal gasification of liquid hydrocarbons by partial oxidation 17 p0002 A78-10320
Polycyclic aromatic hydrocarbons in the exhaust gas of motor vehicles 17 p0061 A78-11459
Coal pyrolysis at fire-level heat flux 17 p0079 A78-15835
Fluidized-bed combustion technology - A review 17 p0079 A78-15836
Pollutant measurements in a methanol furnace [WSS/CI PAPER 77-8] 17 p0081 A78-16339
Modelling and experimentation of sample probe effects on pollutant gases drawn from flame zones [WSS/CI PAPER 77-6] 17 p0081 A78-16340

Combustion treatment of smoke and odors of industrial origin - Energy recovery 17 p0082 A78-16475

Nitric oxide formation in hydrocarbon-air flames 18 p0199 A78-27834

Universal formula for the electroconductivity of a plasma formed from the combustion products of a hydrocarbon fuel --- in MHD generators 18 p0204 A78-28120

Formation and growth of thermal NOx in hydrocarbon combustion 18 p0227 A78-31498

Fuel hydrogen content as an indicator of radiative heat transfer in an aircraft gas turbine combustor 19 p0296 A78-33114

In-situ laser retorting of oil shale [NASA-CASE-LEW-12217-1] 17 p0149 A78-14452

HYDROCARBON FUEL PRODUCTION

The U.S. Navy's Ocean Food and Energy Farm Project 17 p0007 A78-10657
Devonian - Ohio Shale productive potential 17 p0030 A78-11090

Application of special fluidized bed techniques to coal gasification 17 p0031 A78-11096

Biomass as a long range source of hydrocarbons 17 p0034 A78-11122

Methane production from waste 17 p0037 A78-11144

U.S. energy conversion research needs 17 p0069 A78-13624

Energy - Fluid fuels from solids 17 p0069 A78-13625

Combustion processes in in situ coal gasification: Phenomena, conceptual models and research status. I - Overview and continuum wave descriptions [WSS/CI PAPER 77-3] 17 p0081 A78-16337

Fuels and energy from renewable resources; Proceedings of the Symposium, Chicago, Ill., August 29-September 2, 1977 17 p0107 A78-20524

An evaluation of in-situ recovery of tar sands 18 p0189 A78-26250

Liquid fuels from coal; Proceedings of the Symposium, San Francisco, Calif., August 29-September 3, 1976 18 p0189 A78-26576

Biogasification using NaOH treated pig faeces 18 p0194 A78-27550

Possibilities of biomass from the ocean - The Marine Farm Project 18 p0208 A78-28362

A critical analysis of bioconversion with microalgae --- methane production 18 p0208 A78-28364

Fuel gas production from selected biomass via anaerobic fermentation 18 p0208 A78-28366

Multi-stage digestion of municipal solid waste to fuel gas 18 p0218 A78-29868

The production of substitute natural gas by oil gasification 18 p0225 A78-31272

H-Gas process for production of fuel gas from heavy oil 18 p0225 A78-31273

New concepts and results concerning the mechanism of carbon monoxide hydrogenation. I - Organic oxygen compounds produced during medium-pressure synthesis with iron catalysts. II - Evolution of reaction steps on the basis of detailed product composition and other data 19 p0337 A78-38404

Residence time measurements in a coal hydrogenation process 19 p0337 A78-38405

Electrofluid gasification of coal with nuclear energy 19 p0338 A78-38407

Engineering development of a short residence time, coal hydrolysis process 19 p0362 A78-40592

Economic evaluation of synthetic natural gas production by short residence time hydrolysis of coal 19 p0363 A78-40593

SUBJECT INDEX

HYDROGEN FUELS

Viscosity of coal-derived liquids 19 p0363 A78-40595

Process variable effects in the conversion of methanol to gasoline in a fluid bed reactor 19 p0365 A78-41223

Catalytic hydrosolvation process converts coal to low-sulfur liquid fuel 19 p0368 A78-41817

HYDROCARBON FUELS

Alternative hydrocarbon fuels for aviation 17 p0077 A78-15400

Exergy of gas fuels and their combustion gases 17 p0088 A78-17425

Characteristics of water-emulsion fuels --- combustion of hydrocarbon emulsions 17 p0102 A78-18949

Future aviation turbine fuels [AIAA PAPER 78-268] 18 p0165 A78-20781

Reactions of fuel-nitrogen compounds under conditions of inert pyrolysis 18 p0173 A78-22822

Liquid fuels from coal - From R & D to an industry 18 p0175 A78-23561

The detection of hydrocarbon sheets on the sea 18 p0209 A78-28395

The emission characteristics of liquid-fuel flames 18 p0222 A78-30496

Shock-tube combustion of high density hydrocarbon fuels 18 p0222 A78-30512

Pyrolysis of subbituminous coal in relation to in-situ coal gasification 18 p0229 A78-31750

Compact gas generator for fuel gasification aboard motor vehicles 18 p0236 A78-32509

Electrical conductivity of a plasma composed of the combustion products of hydrocarbon fuels with alkali additions 19 p0341 A78-38965

Three-region world dynamics of fossil/hydrogen energy systems 18 p0239 A78-16427

Alternative fuels for transportation: Implications of the broad-cut option [UCRL-52313] 18 p0281 A78-21322

An evaluation of the national energy plan [END-77-48] 19 p0396 A78-23566

Characteristics and combustion of future hydrocarbon fuels --- aircraft fuels [NASA-TN-78865] 19 p0403 A78-24370

Optimization of pyrolytic conversion of coal to clean fuel --- computer programs [PB-2253-5] 19 p0427 A78-25609

HYDROCARBONS

Analysis of petroleum type hydrocarbons in marine samples using gas chromatography and mass spectrometry 17 p0065 A78-12844

Materials and energy from the sun 17 p0071 A78-14025

Hydrocarbons via photosynthesis 17 p0074 A78-14688

Isoprenoid hydrocarbons produced by thermal alteration of *Nostoc muscorum* and *Rhodospseudomonas spheroides* 18 p0167 A78-22008

Products from two-step coal liquefaction using three different first-step reactor packings 18 p0190 A78-26578

Kinetics of chemical processes involved in the decontamination of seawater with respect to oil hydrocarbons 18 p0193 A78-26818

Hydrocarbon group type determination in jet fuels by high performance liquid chromatography [NASA-TN-73829] 17 p0130 A78-13233

Energy sources of polycyclic aromatic hydrocarbons [CONF-770130-2] 17 p0148 A78-14181

Hydrocarbon pollutants from stationary sources [PB-272784/0] 17 p0163 A78-15605

Effect of hydrocarbon composition on oxidant-hydrocarbon relationships. Phase 2. Blend of total hydrocarbon emissions [PB-273219/6] 18 p0244 A78-16483

HYDROCYANIC ACID

Reactions of fuel-nitrogen compounds under conditions of inert pyrolysis 18 p0173 A78-22822

HYDRODYNAMICS

Investigation of hydrodynamic flows of a heat transfer fluid in zones of artificial porosity 18 p0172 A78-22537

Synthoil hydrodynamics [COO-0056-4] 18 p0273 A78-20473

HYDROELECTRIC POWER STATIONS

Wind energy - A supplement to hydro-electric energy using the Columbia River Valley as an example 17 p0052 A78-11317

Underground hydroelectric pumped storage - A practical option 17 p0063 A78-12221

Economic load distribution in the hybrid hydrothermal power system 17 p0092 A78-17949

Design and cost analysis of turbine penstocks for hydroelectric power plants located at the bottom of the dam 18 p0222 A78-30571

Problems of electrical energy generation / Some results of the International Electrotechnology Congress - Moscow, 1977/ 19 p0325 A78-36127

Hydroelectric solar energy conversion 19 p0368 A78-41813

Cost-effective electric power generation from the wind - A system linking wind-power with hydroelectric storage and long-distance transmission 19 p0381 A78-42418

Digital load control for hydroelectric powerplants [PB-274027/2] 18 p0251 A78-17492

HYDROGEN

Stoichiometric calculations concerning the Fischer-Tropsch synthesis 17 p0077 A78-15101

An electrochemically regenerative hydrogen-chlorine energy storage system for electric utilities 17 p0095 A78-18412

Safety in hydrogen transport and storage installations 17 p0101 A78-18856

Production of ammonia using coal as a source of hydrogen [PB-271916/9] 17 p0130 A78-13237

Kinetics of thermochemical decomposition of hydrogen sulfide for the purpose of generating hydrogen 18 p0247 A78-17166

Optimization study of OTEC delivery systems based on chemical-energy carriers [ERDA/NSF-00033/76/II] 19 p0409 A78-24677

Production economics for hydrogen, ammonia and methanol during the 1980-2000 period [BNL-50663] 19 p0415 A78-25243

Proceedings of the DOE Chemical Energy Storage and Hydrogen Energy Systems Contracts Review [NASA-CR-157164] 19 p0419 A78-25532

Preliminary performance tests of a GPU-3 Stirling engine on hydrogen, helium, and nitrogen [GHR-2690-SECT-1.206] 19 p0438 A78-26256

HYDROGEN CHLORIDES

Hydrogen-chlorine energy storage system [BNL-23670] 19 p0460 A78-27558

HYDROGEN ENGINES

Further Stirling engine development work. II 17 p0093 A78-18049

Hydrogen fuel cells and hydrogen engines 17 p0099 A78-18841

Hydrogen cryogenic storage - Liquid for automotive applications and cryoadsorbents for pipeline distribution systems 17 p0100 A78-18844

SUBJECT INDEX

HYDROGENATION

Use of an enzymic electric cell and immobilized hydrogenase in the study of the biophotolysis of water to produce hydrogen 18 p0207 A78-28355

The mechanism of hydrogen photoevolution in photosynthetic organisms 18 p0207 A78-28356

Mutational analysis of *Chlamydomonas reinhardtii* - Application to biological solar energy conversion 18 p0207 A78-28357

Hydrogen photoproduction from water 18 p0207 A78-28358

The molecular mechanisms of photosynthetic hydrogen and oxygen production 18 p0208 A78-28359

Procedures for the production of hydrogen from natural gas and oil fractions 18 p0209 A78-28475

Status of the DOE /SOLAR/-sponsored national program on hydrogen production from water via thermochemical cycles 18 p0217 A78-29331

High efficiency water electrolysis in alkaline solution --- for hydrogen production 19 p0311 A78-34400

Hydrogen as an energy carrier: Production, storage, transport --- German book 19 p0315 A78-35179

Water dissociation by a thermochemical cycle - A thermodynamic analysis of principles and efficiencies 19 p0340 A78-38893

Solar energy conversion through biology - Could it be a practical energy source 19 p0342 A78-39123

Optimal electrode properties and the selection of stabilizing electrolytes --- for photoelectrolytic hydrogen production 19 p0344 A78-39470

High temperature blankets for the production of synthetic fuels 19 p0359 A78-40093

Application of laser fusion to the radiolytic production of hydrogen 19 p0383 A78-42858

Experimental and theoretical investigation of thermochemical hydrogen production 19 p0383 A78-42859

Improved solar photolysis of water [NASA-CASE-NPO-14126-1] 17 p0120 A78-11500

Investigation of sulfur based thermochemical cycles for hydrogen production by water decomposition 17 p0123 A78-12160

Potential fuel production from magma [SAND-77-0509] 19 p0403 A78-24383

SPE water electrolysis technology development for large scale hydrogen production [COO-2675-6] 19 p0415 A78-25249

Status of steam-iron pilot plant operations [CONF-771092-5] 19 p0415 A78-25250

Development of the steam-iron process for hydrogen production [FE-2435-12] 19 p0416 A78-25254

Status of photoelectrochemical production of hydrogen and electrical energy 19 p0451 A78-26865

Gas core reactors for coal gasification 19 p0451 A78-26869

Solar energy conversion with hydrogen producing algae [SAND-0034-77/1] 19 p0460 A78-27565

Electrolysis based hydrogen storage system [BNL-50760] 19 p0462 A78-27580

HYDROGEN SULFIDE

The impact of H₂S emissions on future geothermal power generation - The Geysers region, California [IEEE PAPER A 77-816-2] 17 p0071 A78-14077

Effect of carbon monoxide on the reaction of hydrogen sulfide and calcium oxide [ASME PAPER 77-WA/APC-6] 19 p0297 A78-33129

Hydrogen sulfide as an air pollutant 19 p0337 A78-38245

Kinetics of thermochemical decomposition of hydrogen sulfide for the purpose of generating hydrogen 18 p0247 A78-17166

HYDROGEN-BASED ENERGY

Hydrogen transmission - The significance of efficiency --- in comparison with conventional electric power system 17 p0009 A78-10736

International Workshop on Hydrogen and its Perspectives, Liege, Belgium, November 15-18, 1976, Proceedings. Volumes 1 & 2 17 p0097 A78-18826

Technical and economic aspects of hydrogen storage in metal hydrides 17 p0099 A78-18842

Technical concepts and economic prospects for thermal hydrogen power plants for peak load generation 17 p0100 A78-18847

Outline for a hydrogen economy in 1985-2000 17 p0100 A78-18848

Profitability of a hydrogen network in a chemical complex 17 p0101 A78-18853

Toxicological aspects of the use of hydrogen in the future as main energy source 17 p0101 A78-18855

Safety aspects of a widespread hydrogen energy economy 17 p0101 A78-18857

Entropy production, efficiency, and economics in the thermochemical generation of synthetic fuels. I - The hybrid sulfuric acid process 18 p0174 A78-22867

Where aerospace can serve afresh - Paths to energy independence 18 p0175 A78-23420

Materials problems in large scale production of hydrogen from water and in hydrogen storage 18 p0183 A78-25056

The hydrogen energy economy: A realistic appraisal of prospects and impacts --- Book 19 p0336 A78-38055

Application of laser fusion to the radiolytic production of hydrogen 19 p0383 A78-42858

HYDROGENATION

The manufacture of synthetic natural gas by hydrogenation of fossil fuel residuals 17 p0099 A78-18840

Coal conversion to liquid and gaseous fuels - Aerospace technology in a new role [AIAA PAPER 78-293] 18 p0177 A78-24004

Analysis and scale-up consideration of bituminous coal liquefaction rate processes 18 p0184 A78-25322

The role of solvent in the solvent refined coal process 18 p0190 A78-26577

Products from two-step coal liquefaction using three different first-step reactor packings 18 p0190 A78-26578

Effect of coal minerals on reaction rates during coal liquefaction 18 p0190 A78-26579

Hydrogenation of phenanthrene over a commercial cobalt molybdenum sulfide catalyst under severe reaction conditions --- hydrocarbon fuel from coal liquefaction 18 p0190 A78-26580

Catalytic liquefaction of coal 18 p0191 A78-26583

Kinetics of coal hydrodesulfurization in a batch reactor 18 p0191 A78-26584

Kinetics and solubility of hydrogen in coal liquefaction reactions 18 p0191 A78-26585

Short contact time coal liquefaction - Techniques and product distributions 18 p0191 A78-26586

A petrographic classification of solid residues derived from the hydrogenation of bituminous coals 18 p0192 A78-26592

Deactivation of hydrodesulfurization catalysts under coal liquids. I - Loss of hydrogenation activity due to carbonaceous deposits 18 p0203 A78-27919

Deactivation of hydrodesulfurization catalysts under coal liquids. II - Loss of hydrogenation activity due to adsorption of metallics 18 p0203 A78-27920

- Effects of coal minerals on the hydrogenation, desulfurization, and solvent extraction of coal

tokamaks 19 p0379 A78-42217

Relative importance of different impurity sources
in tokamak reactors as estimated from particle
balance equations 19 p0379 A78-42221

Impurity gradients and high efficiency solar cells 17 p0136 N78-13531

Impurity concentrations and surface charge
densities on the heavily doped face of a silicon
solar cell 17 p0136 N78-13534

Investigation of the topographical features of
surface carrier concentrations in silicon solar
cell material using electrolyte electroreflectance 17 p0136 N78-13535

Tokamak impurity report
[DOE/ET-0001] 19 p0434 N78-25920

INCENTIVES

Economic incentives for the commercialization of
OTEC --- Ocean Thermal Energy Conversion 19 p0301 A78-33307

The fuel efficiency incentive tax proposal: Its
impact upon the future of the US passenger
automobile industry [GPO-93-188] 19 p0412 N78-25002

Solar energy incentives analysis: Psycho-economic
factors affecting the decision making of
consumers and the technology delivery system
[HCP/M2534] 19 p0463 N78-27584

INCINERATORS

Overcoming obstacles to energy recovery from
industrial wastes 17 p0006 A78-10637

Hazardous wastes and energy recovery 17 p0032 A78-11112

Modular incinerator energy recovery systems - The
Siloam Springs experience 17 p0033 A78-11114

Energy recovery from municipal and industrial waste 17 p0037 A78-11146

Refuse incineration with heat recovery - Typical
design and practical experience 17 p0037 A78-11147

Combination of refuse incineration with electric
power generation 17 p0037 A78-11148

Refuse energy in the United States - Two
generations of steam generating waterwall
incinerators 17 p0037 A78-11150

Combined refuse and sludge incineration 17 p0037 A78-11151

Combustion treatment of smoke and odors of
industrial origin - Energy recovery 17 p0082 A78-16475

Improving sludge incineration and vacuum
filtration with pulverized coal 17 p0095 A78-18498

Energy recovery by the incineration of solid waste
- Development, present status, and experiences
in Germany /James Clayton Lecture/ 18 p0221 A78-30373

Combustion and incineration processes --- Book 19 p0300 A78-33212

Thermal refuse treatment --- waste incineration 19 p0315 A78-34973

Refuse without imperfection - Refuse combustion
with combined sediment processing 19 p0316 A78-35297

Energy policy making in the Northeast: A
directory of state programs and institutions
[PB-277503/9] 19 p0449 N78-26621

INDIA

The significance of an arc shaped dark patch on
the Nimbus III /HBIR/ imagery of India 17 p0082 A78-16507

Scope for energy substitution policy in India 18 p0196 A78-27780

INDIANA

Carbonaceous shales of Indiana as sources of
energy, petrochemicals, and ceramic materials
[TID-28179] 19 p0418 N78-25518

INDIUM

Trap induced photovoltage in thin films of
gold-cadmium sulphide-indium diodes 19 p0373 A78-42131

INDIUM ALLOYS

Solar cell collector
[NASA-CASE-LEW-12552-1] 19 p0419 N78-25527

INDIUM COMPOUNDS

Low cost, high efficiency solar cells using
indium-tin oxide on semiconductor /OSOS/ solar
cells 17 p0054 A78-11334

Electrical and photovoltaic characteristics of
indium-tin oxide/silicon heterojunctions 19 p0315 A78-35282

INDIUM PHOSPHIDES

InP/CdS solar cells 17 p0018 A78-10985

Indium phosphide films deposited by cylindrical
magnetron reactive sputtering 17 p0019 A78-10987

A simple measurement of absolute solar-cell
efficiency 17 p0079 A78-15850

Silicon monoxide antireflection coatings for
InP/CdS solar cells 18 p0221 A78-30305

Indium phosphide/cadmium sulfide thinfilm
terrestrial solar cells [ALO/3717-1] 19 p0462 N78-27581

INDIUM SULFIDES

CuInS₂ liquid junction solar cells 19 p0310 A78-34274

INDUCTION MOTORS

Problem of end effect in a linear induction MHD
machine at arbitrary load current 18 p0167 A78-21395

Three-phase induction motor loads on a variable
frequency wind electric generator 18 p0231 A78-32050

The induction generator for wind energy conversion 18 p0236 A78-32507

Demonstration of an inductor
motor/alternator/flywheel energy storage system
[COO-4010-2] 17 p0141 N78-13579

Baseline tests of the power-train electric
delivery van [NASA-TN-73765] 18 p0252 N78-17936

INDUCTORS

Pulse power systems employing inductive energy
storage 17 p0007 A78-10698

Pulsed superconducting inductive storage system 17 p0008 A78-10702

Superconductive inductor storage and converters
for pulsed power loads 17 p0008 A78-10703

Inductor network development for aircraft high
power supplies [AD-A052750] 19 p0413 N78-25096

INDUSTRIAL AREAS

Multi-organizational strategies: An analytic
framework and case illustrations
[IIASA-RN-77-4] 17 p0122 N78-11864

INDUSTRIAL ENERGY

The economic viability of solar assisted
industrial process heat systems - The need for
government economic incentives 17 p0057 A78-11364

Survey of the applications of solar thermal energy
systems to industrial process heat 17 p0058 A78-11370

A solar collector for industrial and commercial
applications 17 p0058 A78-11371

INDUSTRIAL MANAGEMENT

SUBJECT INDEX

Means of transport and the energy consumed by them
17 p0067 A78-13421

Energy economy in the investment policy of French
companies. I - The industrial attitude
17 p0069 A78-13469

Forty-nine theses on energy policy --- West German
situation

Industrial energy in transition - A petrochemical
perspective
18 p0175 A78-23560

Solar energy in office and industrial buildings
18 p0181 A78-24760

Development of a flow-model for energies and
products
18 p0187 A78-25946

A short summary of present applications and hopes
for the development of heat pumps in France
18 p0197 A78-27789

Can coal-oil mixtures make it as industrial fuels
18 p0206 A78-28210

Cogeneration --- single site simultaneous
electricity/heat generation
18 p0216 A78-29226

Preliminary assessment of nontechnical issues
related to industrial application of
solar-thermal-energy systems
18 p0232 A78-32112

Technologies for the utilization of waste energy
18 p0232 A78-32116

Ocean energy industrial complexes
19 p0301 A78-33311

OTEC implementation problems for specific missions
--- Ocean Thermal Energy Conversion
19 p0302 A78-33315

Refuse-derived fuel wins out over oil and coal at
new industrial power plant
19 p0315 A78-34974

A survey of applications of fusion power
technology for the chemical and material
processing industries
19 p0368 A78-41812

Solar energy for industrial processes - A
simplified design method
19 p0383 A78-42891

Improvements in energy efficiency of industrial
electrochemical processes
[ANL/OEPR-77-2]
17 p0114 A78-10584

Impact of natural gas shortage on major industrial
fuel-burning installations. Volume 1: Text
[PB-269365/3]
17 p0115 A78-10596

Impact of natural gas shortage on major industrial
fuel-burning installations. Volume 2: Schedules
(data and tables)
[PB-269366/1]
17 p0116 A78-10597

Impact of natural gas shortage on major industrial
fuel burning installations. Volume 3. Appendix:
Summary and analysis of fuel-burning
characteristics of MFBIS
[PB-269367/9]
17 p0116 A78-10598

Industrial energy thrift scheme
[NPL-CHEM-68-PR-1]
17 p0121 A78-11510

Energy System Analysis Procedure (ESAP)
[AD-A044131]
17 p0126 A78-12532

Modeling and analysis of industrial energy usage
[NTR-7329]
17 p0151 A78-14641

Survey of the applications of solar thermal energy
systems to industrial process heat. Volume 1:
Summary
[TID-27348/1-VOL-1]
17 p0153 A78-14656

Industrial applications of solar energy
[SAN/1132-1]
18 p0242 A78-16457

Fuel and energy price forecasts: Quantities and
long-term marginal prices, volume 1
[EPRI-EA-433-VOL-1]
18 p0286 A78-21637

Energy oriented study of industrial cyclone
separators
[TREE-1174]
18 p0287 A78-21642

Energy audit scheme
[NPL-CHEM-72]
19 p0399 A78-23602

The energy/real gross domestic product ratio: An
analysis of changes during the 1966-1970 period
in relation to long-run trends
[PB-277235]
19 p0411 A78-24690

Process heat in California: Applications and
potential for solar energy in the industrial,
agricultural and commercial sectors
[NASA-CR-157169]
19 p0419 A78-25535

Industrial applications of solar total energy.
Volume 1: Summary
[SAN/1132-2/1-VOL-1]
19 p0424 A78-25587

Industrial applications of solar total energy.
Volume 2: Technical
[SAN/1132-2/2-VOL-2]
19 p0424 A78-25588

Solar total energy system: Large scale
experiment, Shenandoah, Georgia. Volume 1.
Section 1: Conclusions and recommendations.
Section 2: Systems requirements
[AEO/3987-1/1-VOL-1]
19 p0431 A78-25644

Impact of alternate fuels on refractories and
refractory insulations
[ORNL-TM-5895-ADD]
19 p0436 A78-26226

A project to reduce the impact of energy shortages
and cost increases on industrial production in
the southeast. Volume 1: Project overview
[PB-278078/1]
19 p0449 A78-26616

A project to reduce the impact of energy shortages
and cost increases on industrial production in
the southeast. Volume 2: Case study and
technical assistance
[PB-278079/9]
19 p0449 A78-26617

A project to reduce the impact of energy shortages
and cost increases on industrial production in
the southeast. Volume 3: Transfer package
[PB-278080/7]
19 p0449 A78-26618

Overcoming institutional barriers to solid waste
utilization as an energy source --- electric
power plants
[HCF/L50172-01]
19 p0452 A78-27005

Overcoming institutional barriers to solid waste
utilization as an energy source: Executive
summary --- electric power plants
[HCF/L50172-02]
19 p0453 A78-27006

How industrial societies use energy
[EPRI-EA-707-SI]
19 p0461 A78-27572

INDUSTRIAL MANAGEMENT

Preliminary assessment of nontechnical issues
related to industrial application of
solar-thermal-energy systems
18 p0232 A78-32112

Computer model for refinery operations with
emphasis on jet fuel production. Volume 1:
Program description
[NASA-CR-135333]
18 p0272 A78-20350

INDUSTRIAL PLANTS

Refuse energy in the United States - Two
generations of steam generating waterwall
incinerators
17 p0037 A78-11150

Pollution abatement energy usage of gas treating
and processing plants
17 p0073 A78-14161

Profitability of a hydrogen network in a chemical
complex
17 p0101 A78-18853

Aspects relative to security and environment in
the production and use of hydrogen in the new
Esso refinery at Antwerp
17 p0101 A78-18854

Evaluation of coal feed systems being developed by
the Energy Research and Development administration
[NASA-CR-155267]
17 p0124 A78-12419

Lock hopper values for coal gasification plant
service
17 p0134 A78-13270

Energy consumption in commercial industries by
census division - 1974
[PB-268851/3]
17 p0139 A78-13558

Oil/gas complex conceptual design/economic
analysis: Oil and SWG production
[FE-1775-8]
17 p0161 A78-15575

SUBJECT INDEX

INFORMATION SYSTEMS

Sampling of water and wastewater
[PB-272664/4] 17 p0163 N78-15957

Solar energy for process heat: Design/ccst
studies of four industrial retrofit applications
[NASA-CR-156139] 18 p0276 N78-20619

Solar total energy system, large scale experiment,
Shenandoah, Georgia. Volume 2, Section 3:
Facility concept design
[ALO/3987-1/2-VOL-2] 19 p0409 N78-24672

Solar total energy system, large scale experiment,
Shenandoah, Georgia, volume 3
[ALO/3987-1/3-VOL-3] 19 p0409 N78-24673

Status of steam-iron pilot plant operations
[CONF-771092-5] 19 p0415 N78-25250

Potential for cogeneration of heat and electricity
in California industry, phase 1
[NASA-CR-157168] 19 p0419 N78-25536

Development work for an advanced coal gasification
system for electric power generation from coal
directed toward a commercial gasification
generating plant, phase 2. Volume 14: System
analysis
[FE-1521-33] 19 p0426 N78-25602

Industrial application of fluidized-bed combustion
--- boiler and plant design
[FE-2461-5] 19 p0436 N78-26190

Possil energy demonstration plants
[TID-28182] 19 p0445 N78-26573

INDUSTRIAL SAFETY

Code of practice for the petroleum industry. Part
1: The handling, storage, and distribution of
petroleum products
[SABS-089-1977-PT-1] 19 p0402 N78-24366

Occupational exposure to refined petroleum
solvents. Criteria for a recommended standard
[DHEW/PUB/NIOSH-77/192] 19 p0412 N78-24790

INDUSTRIAL WASTES

Prospects of energy recovery from the incineration
of chemical plant wastes
17 p0006 A78-10635

Experience with burning industrial wastes in
steam-generating and high-temperature heat
recovery systems
17 p0006 A78-10636

Overcoming obstacles to energy recovery from
industrial wastes
17 p0006 A78-10637

Hazardous wastes and energy recovery
17 p0032 A78-11112

Prospects of materials and energy from refuse in
India
17 p0037 A78-11145

Energy recovery from municipal and industrial waste
17 p0037 A78-11146

Constraining the energy gobbler --- industrial
waste heat recovery techniques
17 p0096 A78-18674

A continuous monitoring system for sulfur dioxide
mass emissions from stationary sources
[APCA PAPERS 77-27,5] 18 p0185 A78-25400

Experience at Edmonton /GLC/ of generating
electricity using refuse as fuel
18 p0186 A78-25504

Fuels from waste --- Book
18 p0197 A78-27801

Fluidized bed combustion of coal and waste materials
--- Book
19 p0309 A78-33803

Hydrogen sulfide as an air pollutant
19 p0337 A78-38245

Compilation of air pollutant emission factors,
supplement no. 7
[PB-270281/9] 17 p0122 N78-11541

High-temperature desulfurization of low-Btu-gas
[PB-271008/5] 17 p0124 N78-12246

Water conservation and pollution control in coal
conversion processes
[PB-269568/2] 17 p0128 N78-12556

Synthetic fuel production from solid wastes
[PB-272423/5] 17 p0148 N78-14182

Assessment in industrial hazardous waste
management petroleum re-refining industry
[PB-272267/6] 17 p0157 N78-14951

Energy and protein production from pulp mill wastes
[COO-2983-3] 17 p0157 N78-14952

Consequences of new energy patterns
[PB-273259/2] 18 p0244 N78-16474

Energy and protein production from pulp mill wastes
[COO-2983-6] 19 p0428 N78-25617

Effect of liquid waste discharges from steam
generating facilities
[BNWL-2393] 19 p0450 N78-26634

Effective control of secondary water pollution
from flue gas desulfurization systems
[PB-278373/6] 19 p0450 N78-26645

INDUSTRIES

Estimating the potential of a solar-to-thermal
collector industry
17 p0070 A78-13851

Industries in space to benefit mankind: A view
over the next 30 years
[NASA-CR-155203] 17 p0118 N78-10973

Annual survey of manufactures, 1975. Fuels and
electric energy consumed. Statistics for the
United States
[PB-275772/2] 18 p0289 N78-21659

Impacts and benefits of a satellite power system
on the electric utility industry
[NASA-CR-157157] 19 p0402 N78-24255

Code of practice for the petroleum industry. Part
1: The handling, storage, and distribution of
petroleum products
[SABS-089-1977-PT-1] 19 p0402 N78-24366

Industrial applications of solar total energy.
Volume 1: Summary
[SAN/1132-2/1-VOL-1] 19 p0424 N78-25587

Industrial applications of solar total energy.
Volume 2: Technical
[SAN/1132-2/2-VOL-2] 19 p0424 N78-25588

Industrial applications of solar total energy.
Volume 3: Market penetration
[SAN/1132-2/3-VOL-3] 19 p0424 N78-25589

Industrial applications of solar total energy.
Volume 5: Catalog of conceptual designs
[SAN/1132-2/5-VOL-5] 19 p0425 N78-25590

Dynamic models of the industrial demand for energy
[EPRI-BA-580] 19 p0425 N78-25596

A national environmental/energy workforce
assessment, business and industry, phase 1
[PB-277904/9] 19 p0452 N78-26968

INERTIAL FUSION (REACTOR)

An overview of the planning considerations in the
United States inertial confinement fusion program
17 p0004 A78-10606

Giant laser system readied for tests --- for
inertial fusion
19 p0316 A78-35300

An assessment of laser-driven fusion
19 p0338 A78-38418

INFLATABLE STRUCTURES

Mechanical engineering department
[UCBL-50016-77-3] 19 p0431 N78-25645

INFORMATION DISSEMINATION

Transportation energy conservation data book,
supplement-3
[CRNL-5248] 17 p0121 N78-11508

INFORMATION FLOW

Facilitating data interchange with ERDA
[BNL-22595] 19 p0468 N78-27988

INFORMATION RETRIEVAL

A pilot system for the Texas energy data bank and
information retrieval system
17 p0118 N78-10957

INFORMATION SYSTEMS

A pilot system for the Texas energy data bank and
information retrieval system
17 p0118 N78-10957

Information and data flows in societal problem
areas: Focus-energy
[PB-269497/4] 17 p0118 N78-10965

The role of scientific and technical information
in critical period management, volume 1
[PB-272178/5] 17 p0157 N78-14939

The role of scientific and technical information
in critical period management, volume 2
[PB-272179/3] 17 p0157 N78-14940

Decision making with interactive access to
integrated administrative and technological data
bases. An illustrated conceptual overview ---
energy storage
[UCBL-80353] 18 p0290 N78-21986

Energy information and analytic system for New
York State
[BNL-22677] 19 p0397 N78-23579

Data-base management system for spatial display of
federal offshore oil and gas lease data
[LA-UR-77-2779] 19 p0467 N78-27791

INFRARED ABSORPTION

SUBJECT INDEX

INFRARED ABSORPTION

Solar energy applications for heat-absorbing glass
17 p0048 A78-11273

INFRARED DETECTORS

A low cost, portable instrument for measuring
emittance
17 p0061 A78-11392
Infrared focal planes in intrinsic semiconductors
--- technology review
18 p0204 A78-28139

INFRARED IMAGERY

The significance of an arc shaped dark patch on
the Nimbus III /HRIR/ imagery of India
17 p0082 A78-16507

INFRARED INSPECTION

Time and space resolved temperature measurements
of a limiter in a Tokamak discharge using an
infra red camera
17 p0041 A78-11200

INFRARED LASERS

Stimulated electronic Raman scattering in Cs
vapour - A simple tunable laser system for the
2.7 to 3.5 micron region
17 p0064 A78-12440
Implosion experiments with D2, Be-3 filled
microspheres
18 p0235 A78-32440
Preliminary results on the conversion of laser
energy into electricity
19 p0313 A78-34631
Applications of submillimeter waves in plasma
physics and controlled fusion research
19 p0360 A78-40241

INFRARED RADIATION

Solar and infrared radiation properties of
parallel-plate honeycomb
[AIAA PAPER 78-901]
19 p0324 A78-36019

INFRARED REFLECTION

Evaluation of portable optical property
measurement equipment for solar selective surfaces
[ASME PAPER 77-WA/SOL-1]
19 p0299 A78-33189

INFRARED SCANNERS

Application of airborne infrared technology to
monitor building heat losses
17 p0075 A78-14853
Energy flux and surface temperature measurements
at surfaces in the DITE tokamak
19 p0377 A78-42205

INFRARED SPECTRA

Infrared spectral emittance profiles of spectrally
selective solar absorbing layers at elevated
temperatures
17 p0070 A78-13907

INFRARED SPECTROSCOPY

Field infrared method to discriminate natural
seeps from non-seeps, Santa Barbara, California
area
[AD-A042861]
17 p0116 A78-10608

INHIBITORS

Inhibitor analysis for a solar heating and cooling
system
[NASA-CR-150513]
18 p0249 A78-17475

INJECTION

Injection of coal by screw feed
17 p0133 A78-13264

INJECTORS

Neutral beam injector research and development
work in the USA
17 p0012 A78-10878
Some results of investigation of pressure
fluctuations in a condensing injector --- for
liquid metal MHD generator
17 p0066 A78-13154
Cryopumping system for TFTR neutral beam injectors
19 p0352 A78-39952
Using computer graphics to analyze the placement
of neutral-beam injectors for the Mirror Fusion
Test Facility
19 p0357 A78-40026
Facility for the testing of the TFTR prototype
neutral beam injector --- Tokamak Fusion Test
Reactor
19 p0357 A78-40049
A computer program for parameter studies of a
neutral injection beam line
19 p0357 A78-40052

INORGANIC COMPOUNDS

Inorganic pollutants from pulverized coal
combustion /A review/
[WSS/CI PAPER 77-48]
18 p0230 A78-31957
Inorganic-organic separators for alkaline batteries
[NASA-CASE-LEW-12649-1]
19 p0419 A78-25530

INSOLATION

Potential role of solar thermal electric power in
the U.S.
17 p0010 A78-10743
Insolation and wind - A natural combination for
self-sufficient power systems
17 p0022 A78-11017
Site-dependent factors affecting the economic
feasibility of solar powered absorption cooling
17 p0046 A78-11247
Shenandoah Solar Recreational Center - An overview
17 p0049 A78-11281
Characterization of terrestrial service
environments - The simultaneous occurrence of
combined conditions of solar insolation and
climatic variables
17 p0049 A78-11283
An accurate, economical, solar insolation computer
model for the United States
17 p0049 A78-11284
Estimation of availability of solar energy
17 p0049 A78-11285
Hourly direct-normal solar radiation data tapes
for the United States
17 p0049 A78-11288
Solar shade control --- legislation to assure
direct solar radiation availability
17 p0057 A78-11358
Evaluation of an optimized solar thermal collector
by a new method
17 p0060 A78-11381
Solar energy collector orientation and tracking mode
17 p0104 A78-19827
On the right to sunshine --- homeowner access to
solar energy
17 p0105 A78-19836
A correction procedure for separating direct and
diffuse insolation on a horizontal surface
17 p0105 A78-19839
Estimation of the monthly average of the diffuse
component of total insolation on a horizontal
surface
17 p0105 A78-19840
Calculation of the energy delivered by a collector
with the method of average direct optical output
18 p0165 A78-20620
Evaluation of the energy provided for a solar
collector
18 p0165 A78-20621
Solar insolation measurements at Las Vegas, Nevada
18 p0206 A78-28173
Calibration standards and field instruments for
the precision measurement of insolation
19 p0312 A78-34517
Sunstations --- calibrated silicon solar cell for
insolation measurement
19 p0314 A78-34933
On the relation between insolation and
climatological variables. III - The relation
between normal incidence solar intensity, total
insolation, and weather at Fort Hood, Texas. IV
- Construction of a model year of solar
intensity and climate
19 p0322 A78-35781
Time integrated calculation of the insolation
collected by a reflector-collector system
19 p0323 A78-35799
Development of a solar-power cadaster
19 p0331 A78-36662
Daily input modelling for solar collectors and
systems
19 p0383 A78-42890
Solar energy meter
[NASA-TN-73791]
17 p0150 A78-14630
Variation of solar cell sensitivity and solar
radiation on tilted surfaces
[NASA-TN-78921]
19 p0443 A78-26547

INSPECTION

Inspection manual for the enforcement of new
source performance standards: Coal preparation
plants
[PB-274262/5]
18 p0270 A78-19683

SUBJECT INDEX

INVERTED CONVERTERS (DC TO AC)

INSTALLATION MANUALS

Installation package - SINS prototype system 1A
[NASA-CR-150524] 18 p0255 N78-18523

INSTRUMENT ERRORS

Tutorial, test measurement accuracy --- for gas
turbine engine performance 17 p0088 A78-17409

INSULATED STRUCTURES

Optimal proportioning of an insulated earth
cylinder for storage of solar heat 17 p0084 A78-16836

INSULATION

The estimation of daily, clear-sky solar radiation
intercepted by a tilted surface 17 p0044 A78-11230

Impact of alternate fuels on refractories and
refractory insulations
[ORNL-TN-5895-ADD] 19 p0436 N78-26226

INSULATORS

MHD electrode-insulator micro- and macro-structure
17 p0088 A78-17464

Optical properties of selectively absorbing
metal/insulator composite films 19 p0324 A78-36032

Development, testing, and evaluation of:
MHD-materials
[PE-6010-9] 19 p0441 N78-26380

INTEGRAL EQUATIONS

An integral equation method to calculate the
transient behaviour of a photovoltaic solar cell
19 p0292 A78-32695

INTEGRATED CIRCUITS

A monolithic series-array solar-cell system
17 p0103 A78-19374

Photosensing arrays with improved spatial resolution
18 p0204 A78-28134

Infrared focal planes in intrinsic semiconductors
--- technology review 18 p0204 A78-28139

Solar cell system having alternating current output
[NASA-CASE-LEW-12806-1] 19 p0421 N78-25553

INTERFACE STABILITY

Stability and voltammetry of illuminated
semiconductor-liquid interfaces 19 p0343 A78-39464

INTERFACES

Interface design considerations for terrestrial
solar cell modules 17 p0023 A78-11030

INTERFACIAL TENSION

Interfacial effects in the recovery of residual
oil by displacement: Studies at Northwestern
University [COO-0039-5] 18 p0244 A78-16494

INTERFEROMETRY

Practical interferometry at 1.06 microns --- for
testing high energy fusion laser focusing lenses
19 p0360 A78-40223

INTERLAYERS

GaAs solar cell development 17 p0138 A78-13544

Status of wraparound contact solar cells and arrays
[NASA-TN-78911] 19 p0443 A78-26543

INTERNAL COMBUSTION ENGINES

Characteristics of water-emulsion fuels ---
combustion of hydrocarbon emulsions 17 p0102 A78-18949

National Conference on Internal Combustion Engines
and Combustion, 3rd, University of Roorkee,
Roorkee, India, December 10-12, 1976, Proceedings
18 p0198 A78-27826

Some characteristics of oil consumption measured
by hydrogen fueled engine [ASLE PREPRINT 77-LC-58-1] 18 p0209 A78-28434

Fuel vaporization - Economy with reduced exhaust
emission 18 p0221 A78-30366

The utilization of LaNi5 as a hydrogen-storage
medium for heat engines 18 p0233 A78-32193

Engine performance and exhaust emission
characteristics of spark-ignition engines
burning methanol and methanol-gasoline mixtures
19 p0321 A78-35703

Performance and NO/x emissions of spark ignited
combustion engines using alternative fuels -
Quasi one-dimensional modeling. I - Hydrogen
fueled engines 19 p0333 A78-37299

Development of a new combustion system /HCA-jet/
in gasoline engine 19 p0386 A78-43296

Performance analysis of a modified internal
combustion engine [AD-A045378] 17 p0135 A78-13442

Alternative automotive engines and energy
conservation 18 p0257 A78-18534

State-of-the-art assessment of electric vehicles
and hybrid vehicles [NASA-TN-73756] 18 p0262 A78-18988

Performance of conventionally powered vehicles
tested to an electric vehicle test procedure
[NASA-TN-73768] 18 p0271 A78-20022

Stirling engine feasibility study of an 80 to 100
hp engine of improvement potential for emissions
and fuel economy [COO-2631-22] 19 p0394 A78-23442

Energy use and other comparisons between diesel
and gasoline pickup trucks [PB-277464] 19 p0404 A78-24564

A collection of Stirling engine reports from
General Motors' research, 1958 to 1970. Part
1.: Model 3 ground power units design,
construction and testing. Government contract
reports [GHR-2690-PT-1.1] 19 p0437 A78-26237

Stirling engine ground power unit
[GHR-2690-SECT-1.108] 19 p0437 A78-26245

Stirling engine Ground Power Unit model GPU 3
acceptance test report [GHR-2690-SECT-1.110] 19 p0437 A78-26247

US Army Engineer Research and Development
Laboratories five hundred hour engineering
evaluation of the Stirling GPU 2-1
[GHR-2690-SECT-1.112] 19 p0437 A78-26249

Supercritical fuel injection system
[NASA-CASE-LEW-12990-1] 19 p0453 A78-27122

Stirling total energy systems study
[HCE/22947-1] 19 p0461 A78-27570

INTERNAL WAVES

The energy of near-surface internal waves in the
Strait of Georgia 17 p0092 A78-17948

INTERNATIONAL COOPERATION

Review of overseas solar technologies relative to
international cooperation 17 p0058 A78-11367

Energy supply-demand integrations to the year
2000: Global and national studies --- Book
18 p0165 A78-20618

Regimes for the ocean, outer space, and weather
--- Book 18 p0189 A78-26399

The search for a reasonable world energy policy -
Some basic considerations and options 18 p0196 A78-27782

Investigation of international energy economics
[BNWL-2134] 17 p0140 A78-13571

Completion of the fuel cycle in small countries
[CONF-770323-5] 19 p0451 A78-26906

INTERNATIONAL LAW

The geostationary orbit, focal point of space
telecommunication law 19 p0326 A78-36301

INTERNATIONAL SUN EARTH EXPLORER 2

Implementation of extreme-purity specifications in
the case of solar generators, taking into
account, as an example, the satellites GEOS and
ISEE-B 17 p0085 A78-16852

INTERNATIONAL TRADE

International energy trends: Monthly supplement
on oil trends [NF-22885] 19 p0462 A78-27577

INTERPLANETARY SPACECRAFT

High-power, ultralow-mass solar arrays: FY-77
solar arrays technology readiness assessment
report, volume 1 [NASA-CR-157264] 19 p0457 A78-27530

High-power, ultralow-mass solar arrays: FY-77
solar arrays technology readiness assessment
report, volume 2 [NASA-CR-157265] 19 p0457 A78-27531

INVERTED CONVERTERS (DC TO AC)

Inverters for commercial fuel cell power generation
17 p0009 A78-10733

INVESTMENTS

SUBJECT INDEX

Experimental investigation of a solar cell/inverter system 17 p0054 A78-11339

Some results of investigations on the U-25 pilot plant to attain its design parameters --- MHD generator operation 17 p0066 A78-13153

Transistor inverters for satellite onboard networks of higher power 19 p0365 A78-40865

Advanced semiconductor technology for alternate energy sources: dc to ac inverters [AD-A048806] 18 p0269 A78-19662

An inverter/controller subsystem optimized for photovoltaic applications [NASA-TN-78903] 19 p0452 A78-26995

INVESTMENTS

How much investment in conversion devices --- for terrestrial solar energy utilization 17 p0004 A78-10617

Energy economy in the investment policy of French companies. I - The industrial attitude 17 p0069 A78-13469

Production of synthetic methanol from air and water using controlled thermonuclear reactor power. II - Capital investment and production costs 19 p0322 A78-35778

IODIDES

Thin film Cds-CuI heterojunction photocells 19 p0333 A78-37260

ION ACCELERATORS

Acceleration of one ampere negative ion beams to energies up to 120 keV 19 p0348 A78-39832

The design philosophy and use of high voltage power systems for multimewatt ion beam accelerators 19 p0354 A78-39974

ION ACOUSTIC WAVES

Mechanism for the omega/pe/ radiation in Tokamaks 18 p0225 A78-31215

Effect of Faraday rotation on stimulated Brillouin backscattering --- in laser heated nuclear fusion reactor 19 p0369 A78-41909

Non-resonant pump field modification of the side-scatter threshold 19 p0381 A78-42264

ION BEAMS

Solar cells by ionized-cluster beam deposition and epitaxial techniques 17 p0013 A78-10912

Fabrication of OSOS cells by neutral ion beam sputtering --- Oxide Semiconductor On Silicon solar cells 17 p0027 A78-11062

Optical and electrical properties of ion beam textured Kapton and Teflon 18 p0182 A78-24908

International Topical Conference on High Power Electron and Ion Beam Research and Technology, 2nd, Cornell University, Ithaca, N.Y., October 3-5, 1977, Proceedings. Volumes 1 & 2 18 p0189 A78-26173

Acceleration of one ampere negative ion beams to energies up to 120 keV 19 p0348 A78-39832

Engineering of beam direct conversion for a 120-kV, 1-MW ion beam 19 p0348 A78-39834

The design philosophy and use of high voltage power systems for multimewatt ion beam accelerators 19 p0354 A78-39974

ION CYCLOTRON RADIATION

Ion-cyclotron instability in the TFE tokamak 19 p0369 A78-42016

Cyclotron oscillations of a large-larmor-radius plasma 19 p0380 A78-42262

ION ENGINES

Solar array conceptual design for the Halley's Comet ion drive mission, phase 2 [NASA-CR-155594] 18 p0240 A78-16438

ION EXCHANGE RESINS

Inorganic-organic separators for alkaline batteries [NASA-CASE-LEW-12649-1] 19 p0419 A78-25530

ION IMPACT

Recent results on plasma-wall interaction in the T. P. B. tokamak 19 p0377 A78-42202

ION IMPLANTATION

Merits of ion-implantation processes in conjunction with appropriate annealing procedure for fabrication of silicon solar cells 17 p0015 A78-10945

Silicon solar cells by ion implantation and pulsed energy processing 17 p0015 A78-10946

Ion-implanted drift field silicon solar cell 19 p0335 A78-37904

Applications of ion implantation for high efficiency silicon solar cells 17 p0137 A78-13538

ION INJECTION

Magnetics design for ripple-assisted beam injection into the ISX-B and TFTR tokamaks 19 p0356 A78-40013

Effect of neutral injection heating on the impurity level in the W VII A Stellarator 19 p0378 A78-42208

Electron and ion heating by neutral injection in the DTF tokamak 19 p0381 A78-42268

ION MOTION

Heat-transfer allowing for ion slip in an MHD channel 17 p0063 A78-12346

Ionic thermoelectric power of superionic conductors 18 p0192 A78-26705

Heat exchange in an MHD channel with allowance for the ion slippage 19 p0291 A78-32570

ION PROBES

Collection of ions by electric probes in combustion MHD plasmas - An overview 18 p0188 A78-26111

ION PRODUCTION RATES

Ionization equilibrium and radiative cooling of a high temperature plasma 18 p0227 A78-31423

ION PROPULSION

Extended performance solar electric propulsion thrust system study. Volume 4: Thruster technology evaluation [NASA-CR-135281-VOL-4] 18 p0237 A78-16090

Closed loop solar array-ion thruster system with power control circuitry [NASA-CASE-LEW-12780-1] 19 p0387 A78-22149

ION SCATTERING

Evolution of stimulated Brillouin to stimulated ion Compton scattering in a CO2 laser-plasma interaction experiment 18 p0235 A78-32425

ION SOURCES

Computer simulation of ion extraction 18 p0188 A78-25947

The Princeton neutral injection power supply system 19 p0354 A78-39975

The TFTR neutral beam power system --- Tokamak Fusion Test Reactor 19 p0354 A78-39976

Performance of a developmental 120-keV, 10-A deuterium /14-A hydrogen/ neutral beam system 19 p0357 A78-40027

ION TEMPERATURE

Two-component, multiple-mirror reactor with depressed ion temperature 19 p0380 A78-42263

IONIC COLLISIONS

The ambipolarity paradox in toroidal diffusion, revisited 19 p0380 A78-42259

IONIC CRYSTALS

Ionic thermoelectric power of superionic conductors 18 p0192 A78-26705

IONIZATION COEFFICIENTS

Ionization and recombination rate coefficients of highly ionized molybdenum ions from spectroscopy of tokamak plasmas 19 p0369 A78-42015

IONIZED GASES

Stability of nonequilibrium plasmas 17 p0063 A78-12352

Stability of nonequilibrium plasma 19 p0291 A78-32575

'Local' breakdown criterion for a highly ionized gas stream
19 p0292 A78-32707

IRAN
World sources of energy and new energy resource development in Iran
17 p0111 N78-10553

IRON
An iron-air vehicle battery
18 p0174 A78-23241
Advantages of iron core in a tokamak
19 p0347 A78-39814
Friction and wear of selected metals and alloys in sliding contact with AISI 440 C stainless steel in liquid methane and in liquid natural gas [NASA-TF-1150]
18 p0273 N78-20512
Some rate and modeling studies on the use of iron-titanium hydride as an energy storage medium for electric utility companies [BNL-50667]
19 p0409 N78-24676

IRON COMPOUNDS
Investigation of polymeric iron phthalocyanine as an electrocatalyst of oxygen reduction in acid electrolytes
19 p0363 A78-40618
Development of a Ti/Fe redox couple flow battery system
19 p0388 N78-22458

IRON OXIDES
Status of steam-iron pilot plant operations [CONF-771092-5]
19 p0415 N78-25250

IRRADIANCE
Irradiance for skew rays incident upon a trough-like solar collector of arbitrary shape
17 p0104 A78-19829
A comparative analysis of models describing the formation of irradiance fields in wide-aperture optical systems
18 p0187 A78-25733
Equalizing an irradiance field on the surface of a receiver
18 p0187 A78-25734
Solar irradiance, total and spectral --- data for cost-effective solar energy conversion
18 p0199 A78-27853
Calibration standards and field instruments for the precision measurement of insolation
19 p0312 A78-34517
Diffraction analysis for multiple-beam pellet irradiance
19 p0360 A78-40225

IRREVERSIBLE PROCESSES
Thermodynamics of thermochemical cycles in the decomposition of water
17 p0098 A78-18833
Variational irreversible thermodynamics of heat and mass transfer in porous solids - New concepts and methods
19 p0313 A78-34603

IRRIGATION
Wind power installations for water pumping in developing countries
18 p0171 A78-22247
Photovoltaic power in less developed countries [COO-4094-1]
17 p0141 N78-13581
Solar irrigation program plan, revision [SAND-77-0730-REV]
17 p0151 N78-14642
Solar irrigation program [SAND-77-0380]
17 p0161 N78-15582
Preliminary economic analysis of Solar Irrigation Systems (SIS) for selected locations [SAND-77-1403]
19 p0428 N78-25620
Introductory workshops on remote sensing as related to geological problems in Georgia [E78-10152]
19 p0455 N78-27482

ISOMERIZATION
Use of transition metal compounds to sensitize a photochemical energy storage reaction
17 p0083 A78-16830
Photon energy storage in organic materials - The case of linked anthracenes
18 p0220 A78-30267
Photoisomerization of bis 9-anthryl methane and other linked anthracenes: The role of excimers and biradicals in photodimerization [AD-A051336]
19 p0408 N78-24665

ISOTHERMAL PROCESSES

Studies on coal reactivity - Kinetics of lignite pyrolysis in nitrogen at 808 C
17 p0079 A78-15831
Stationary and dynamic behavior of heat pipes
19 p0364 A78-40864

ISOTOPE SEPARATION

Study of a collisional plasma rotating between two cylinders
19 p0293 A78-32718

ISOTOPES

Stable isotopic studies of Japanese geothermal systems
17 p0062 A78-11493
Selenide isotope generators [CONF-770302-1]
17 p0114 N78-10581

ISOTOPIC LABELING
Chemical and isotopic techniques in geothermal investigations
17 p0061 A78-11490

J

JAPAN

The progress and the development program of fusion technology in Japan
17 p0038 A78-11162
Stable isotopic studies of Japanese geothermal systems
17 p0062 A78-11493
Options of long-term energy strategy of Japan
18 p0195 A78-27778

JET AIRCRAFT

Fuel efficiency - Where we are heading in the design of future jet transports
18 p0226 A78-31307
Aircraft propulsion from the back room /Sixty-sixth Wilbur and Orville Wright Memorial Lecture/
19 p0326 A78-36279

JET CONTROL

Development of a new combustion system /MCA-jet/ in gasoline engine
19 p0386 A78-43296

JET ENGINE FUELS

Increasing the resources of jet fuels
17 p0062 A78-11699
Alternative hydrocarbon fuels for aviation
17 p0077 A78-15400
The availability of jet fuel over the next two decades
17 p0102 A78-19222
Future aviation turbine fuels [AIAA PAPER 78-268]
18 p0165 A78-20781
Properties of fuels used in the Czechoslovak aircraft industry
18 p0217 A78-29588
Fuel hydrogen content as an indicator of radiative heat transfer in an aircraft gas turbine combustor
19 p0296 A78-33114
Hydrocarbon group type determination in jet fuels by high performance liquid chromatography [NASA-TN-73829]
17 p0130 N78-13233
Comparison tests on the 100-GPM electrokinetic fuel decontaminator and a 100-GPM military standard filter/seperator [AD-A048655]
18 p0253 N78-18226
Effect of fuel bound nitrogen on oxides of nitrogen emission from a gas turbine engine [AD-A048382]
18 p0262 N78-19162
Computer model for refinery operations with emphasis on jet fuel production. Volume 2: Data and technical bases [NASA-CR-135334]
18 p0262 N78-19326
Computer model for refinery operations with emphasis on jet fuel production. Volume 1: Program description [NASA-CR-135333]
18 p0272 N78-20350
Computer model for refinery operations with emphasis on jet fuel production. Volume 3: Detailed systems and programming documentation [NASA-CR-135335]
19 p0414 N78-25235
Alternate fuels nitrogen chemistry [AD-A053299]
19 p0414 N78-25240
Aviation fuels beyond the 1980's --- liquefied gases and synthetic fuels [NASA-TN-79510]
19 p0436 N78-26223

- Impact of broad-specification fuels on future jet aircraft --- engine components and performance
19 p0453 N78-27059
- JET ENGINES**
Thrust computing system applications to increase engine life and provide fuel conservation
18 p0227 A78-31311
- JET IMPINGEMENT**
Low-cost solar air heater
[COO-2929-6] 18 p0277 N78-20639
- JET MIXING FLOW**
Cold flow mixing rate data for pulverized coal reactors
19 p0328 A78-36616
- JOURNAL BEARINGS**
Hydrodynamic air lubricated compliant surface bearing for an automotive gas turbine engine.
1: Journal bearing performance
[NASA-CR-135368] 18 p0281 N78-21472

[AD-A042799]
17 p0112 A78-10568
- LITHIUM COMPOUNDS**
A lithium solid-state cell based on the
Li₃75S0.75P0.25O₄ electrolyte
19 p0363 A78-40620
- LITHIUM COOLED REACTOR EXPERIMENT**
Thermal hydraulic analyses of two fusion reactor
first wall/blanket concepts --- lithium cooled
reactor experiment hydraulic equipment
[CONF-771029-178]
19 p0434 A78-25930

LITHIUM FLUORIDES

- Thermal energy storage--Stirling engine power
plants 2. Calculated energy transfer rates from
solidifying lithium fluoride to a plain-tube
heater
[GNP-2690-SECT-7.108]
19 p0440 A78-26334
- Metallurgical studies of high temperature alloy
capsules after long time cyclic corrosion tests
as containers for lithium fluoride
[GNP-2690-SECT-7.109]
19 p0440 A78-26335
- LITHIUM HYDROXIDES**
Analysis of the failure of the nickel tank used
for LION thermal energy storage for the Calvair
automobile
[GNP-2690-SECT-7.106]
19 p0440 A78-26332
- LOAD DISTRIBUTION (FORCES)**
Digital load control for hydroelectric powerplants
[PB-274027/2]
18 p0251 A78-17492
- LOAD TESTS**
The battery energy storage test /BEST/ facility -
its purposes and description
17 p0029 A78-11079
- LOADS (FORCES)**
Fatigue load spectra for upwind and downwind rotors
18 p0267 A78-19635
- Development program for MHD power generation.
Volume 4: Superconducting magnet study
[PB-2015-16-VOL-4]
19 p0455 A78-27447
- LOCOMOTIVES**
The electric locomotive opportunity in the United
States
[EVC PAPER 7781]
17 p0086 A78-16933
- The gas turbine as an advantageous propulsion unit
for high-performance rail traffic
17 p0096 A78-18713
- The new electric locomotives
18 p0179 A78-24378
- LOGISTICS MANAGEMENT**
A study of the energy consequences of alternative
transport policies in intercity freight markets
18 p0258 A78-18547
- LONG TERM EFFECTS**
Solar house Rothenkirchen --- heating and hot
water system
18 p0179 A78-24345
- LORENTZ FORCE**
Influence of the nonuniformity of the field of
force on the flow in an MHD channel
18 p0216 A78-28951
- LOUISIANA**
Strategic petroleum reserve: Supplement to final
environmental impact statement for Bayou Choctaw
salt dome
[PB-270435/1]
17 p0119 A78-11254
- Strategic petroleum reserve. Texoma group salt
domes. Draft environmental impact statement.
Volume 1: West Hackberry expansion, Black
Bayou, Vinton, Big Hill
[FEA/S-77/323-VOL-1]
19 p0390 A78-22487
- Strategic petroleum reserve. Texoma group salt
domes. Draft environmental impact statement.
Volume 2, appendices A and B: West Hackberry
expansion, Black Bayou, Vinton, Big Hill
[FEA/S-77/323-VOL-2]
19 p0391 A78-22488
- Strategic petroleum reserve. Texoma group salt
domes. Draft environmental impact statement.
Volume 4, appendices D-S: West Hackberry
expansion, Black Bayou, Vinton, Big Hill
[FEA/S-77/323-VOL-4]
19 p0391 A78-22490
- LOW ASPECT RATIO WINGS**
Betz type limitation of vortex wind machines
17 p0093 A78-18090
- LOW COST**
Inverters for commercial fuel cell power generation
17 p0009 A78-10733
- Low cost test procedure for solar collectors
[ASME PAPER 77-WA/SOL-4]
19 p0299 A78-33192
- Polycrystalline silicon p-n junctions ---
fabrication of low cost solar cells
19 p0334 A78-37467
- Economic analysis of EBT reactor --- Elao Bumpy
Torus
19 p0350 A78-39895
- Summary of the NASA space photovoltaic research
and technology program
17 p0136 A78-13528

SUBJECT INDEX

MAGNETIC COILS

Silicon on ceramic process. Silicon sheet growth development for the large-area silicon sheet task of the low-cost silicon solar array project [NASA-CR-155613] 18 p0248 N78-17464

Wind turbine generator rotor blade concepts with low cost potential [NASA-TN-73835] 18 p0249 N78-17466

Phase 1 of the automated array assembly task of the low cost silicon solar array project [NASA-CR-155935] 18 p0255 N78-18516

Research of low cost wind generator rotors 18 p0267 N78-19639

Process for utilizing low-cost graphite substrates for polycrystalline solar cells [NASA-CASE-GSC-12022-2] 19 p0405 N78-24609

LOW GRAVITY MANUFACTURING

A road map to space products --- extraterrestrial manufactured products for Earth use [AAS 77-239] 19 p0329 A78-36716

LOW SPEED WIND TUNNELS

Applications of wind tunnels to investigations of wind-engineering problems [AIAA 78-812] 18 p0233 A78-32366

LOW TEMPERATURE

Direct utilization of solar energy with the aid of low-temperature heating 18 p0213 A78-28591

LOW TEMPERATURE PHYSICS

Dielectric relaxation in polymers at low temperatures 17 p0148 N78-14170

LOW TEMPERATURE TESTS

Thermoelectric power of tin films at low temperatures 18 p0217 A78-29427

LUBRICATING OILS

Some characteristics of oil consumption measured by hydrogen fueled engine [ASLE PREPRINT 77-LC-5R-1] 18 p0209 A78-28434

LUBRICATION SYSTEMS

Oil cooling system for a gas turbine engine [NASA-CASE-LEW-12321-1] 17 p0109 N78-10467

LUMINOUS INTENSITY

Characteristics of high intensity /HI/ edge-illuminated multijunction silicon solar cells - Experimental results and theory 17 p0023 A78-11026

Recent experimental results on high intensity /HI/ edge-illuminated multijunction silicon solar cells 17 p0023 A78-11027

High intensity solar cell 17 p0023 A78-11028

Improved performance of solar cells for high intensity applications 17 p0024 A78-11033

General principles of calculating multielement concentrating systems --- solar collectors 19 p0326 A78-36136

Intensity dependence of inverse bremsstrahlung absorption in an inhomogeneous standing wave 19 p0332 A78-37139

Deviation in solar cell characteristics from their ideal behaviour 19 p0371 A78-42118

M

MACHINE TOOLS

Advancing technologies --- Book 18 p0225 A78-31151

Mechanics of cutting and boring. Part 6: Dynamics and energetics of transverse rotation machines [AD-A045127] 17 p0135 N78-13444

MAGMA

Stable isotopic studies of Japanese geothermal systems 17 p0062 A78-11493

Volcanoes as a source of geothermal energy 17 p0067 A78-13346

Magma - A potential source of fuels 19 p0311 A78-34398

The effect of dike intrusion on free convection in conduction-dominated geothermal reservoirs 19 p0369 A78-42080

Potential fuel production from magma [SAND-77-0509] 19 p0403 N78-24383

MAGNESIUM OXIDES

Study of the behavior of periclase materials in gas flows containing alkali additions --- for MHD channel linings 19 p0328 A78-36578

MAGNET COILS

The analysis of superconducting magnet systems for the M.H.D. energy conversion 18 p0229 A78-31752

Design for the magnetic field requirements of the tandem mirror experiment 19 p0349 A78-39889

Pulsed power conversion with inductive storage --- compression for superconducting coil fields 19 p0353 A78-39954

Losses in a coil where the multifilamentary composite is subjected to simultaneous orthogonal and parallel induction variations --- superconducting toroidal field magnet in Tokamak 19 p0356 A78-40008

MAGNETIC CIRCUITS

Pulse power systems employing inductive energy storage 17 p0007 A78-10698

MAGNETIC COILS

Design, construction and operation of the DITE divertor field system --- Divertor Injection Tokamak Experiment 17 p0039 A78-11175

TFTR Toroidal Field coil design --- Tokamak Fusion Test Reactor 19 p0345 A78-39785

Manufacture, assembly and test of the toroidal and poloidal magnetic field coils of ASDEX 19 p0345 A78-39789

Design of the TEXT toroidal and poloidal field coils --- Texas fusion plasma research tokamak 19 p0345 A78-39790

The Alcator C magnetic coil systems 19 p0346 A78-39791

Stress and deflection analysis of the PLT-coil using ANSYS computer code 19 p0346 A78-39792

Toroidal field ripple effects in TNS design --- computer simulation model for Tokamak 19 p0347 A78-39810

Hybrid equilibrium field coils for the ORNL TNS 19 p0347 A78-39812

The coil winder for the magnet of the Mirror Fusion Test Facility 19 p0350 A78-39901

Potential damage to dc superconducting magnets due to high frequency electromagnetic waves 19 p0350 A78-39902

Magnetic forces in the PDX toroidal field coils 19 p0350 A78-39908

PDX PF power tests --- Princeton Divertor Experiment tokamak Poloidal Field coil system 19 p0351 A78-39909

Bending free toroidal shells for tokamak fusion reactors 19 p0351 A78-39915

Lateral support structure for constant tension D-shaped coils in tokamak fusion devices 19 p0351 A78-39916

Electrical design of TNS --- Next Step tokamak 19 p0351 A78-39918

General Electric conceptual design of a test coil for the large coil program --- for superconducting electromagnet construction 19 p0351 A78-39928

Pulse coil concepts for the LCP facility --- Large Coil Program to simulate tokamak coils 19 p0352 A78-39935

Parametric study of plasma startup systems for tokamaks 19 p0354 A78-39971

An apparatus to examine pulsed parallel field losses in large conductors --- of superconducting magnetic coils in Tokamak 19 p0355 A78-40006

Time dependent study of eddy current loss in a superconducting composite --- for Tokamak toroidal field coils 19 p0355 A78-40007

Fast ramp superconductor for ohmic heating coils --- of Tokamak Next Step reactor 19 p0356 A78-40009

- Superconducting energy storage coils
19 p0356 A78-40010
- Magnetics design for ripple-assisted beam
injection into the ISI-B and TFTR tokamaks
19 p0356 A78-40013
- Using computer graphics to analyze the placement
of neutral-beam injectors for the Mirror Fusion
Test Facility
19 p0357 A78-40026
- MAGNETIC CONTROL**
Status and prospects for continued progress in
magnetic fusion energy research and development
18 p0181 A78-24756
- Destruction of magnetic surfaces near a separatrix
of a stellarator attributed to perturbations of
magnetic fields
18 p0217 A78-29433
- MAGNETIC CORES**
Magnetic field computations for ISI using GFUN-3D
--- Impurity Study experiment iron core tokamak
computerized design
19 p0356 A78-40019
- MAGNETIC DIFFUSION**
Eddy current losses and transient magnetic forces
in pulsed fusion reactors
17 p0039 A78-11172
- Transport calculations for a wall-confined
liner-compressed plasma
19 p0380 A78-42258
- MAGNETIC EFFECTS**
Direct energy conversion of exhaust fusion plasma
by magnetic deflection
19 p0348 A78-39815
- Performance of a turbomolecular pump in a pulsed
magnetic field --- for controlled fusion
experiments
19 p0352 A78-39938
- Pulsed power conversion with inductive storage ---
compression for superconducting coil fields
19 p0353 A78-39954
- MAGNETIC FIELD CONFIGURATIONS**
The transformer design for a proposed technical
feasibility Tokamak reactor
17 p0039 A78-11171
- The poloidal field circuit in the Joint European
Torus /JET/
17 p0039 A78-11177
- Poloidal field equilibrium calculations for JET
--- Joint European Torus
17 p0040 A78-11178
- Conceptual design problems in future reversed
field pinch experiments
17 p0040 A78-11181
- The practical feasibility of a bundle divertor for
a Tokamak power reactor
17 p0041 A78-11188
- An expression for beta in linked Min-B
configurations --- fusion reactor economic
feasibility parameter
18 p0173 A78-22836
- Destruction of magnetic surfaces near a separatrix
of a stellarator attributed to perturbations of
magnetic fields
18 p0217 A78-29433
- Heliotron as a D-D fusion reactor - Preliminary
analysis
18 p0220 A78-30226
- Collapse of Alfvén waves
18 p0224 A78-31008
- Coaxial MHD generator
18 p0229 A78-31751
- The analysis of superconducting magnet systems for
the M.H.D. energy conversion
18 p0229 A78-31752
- A small tokamak 'Nova II'
19 p0327 A78-36319
- Mode mixing of large scale fluctuations in JET-2
tokamak
19 p0332 A78-37147
- Design of the TEXT toroidal and poloidal field coils
--- Texas fusion plasma research tokamak
19 p0345 A78-39790
- Engineering features of ISI-B --- Tokamak reactor
design
19 p0347 A78-39802
- Design of an electrostatic end-plugged
plasma-confinement device
19 p0347 A78-39806
- Toroidal field ripple effects in TMS design ---
computer simulation model for Tokamak
19 p0347 A78-39810
- Hybrid equilibrium field coils for the CNHL-TMS
19 p0347 A78-39812
- Design for the magnetic field requirements of the
tandem mirror experiment
19 p0349 A78-39889
- Magnetic forces in the PDX toroidal field coils
19 p0350 A78-39908
- PDX PF power tests --- Princeton Divertor
Experiment tokamak Poloidal field coil system
19 p0351 A78-39909
- Parametric study of plasma startup systems for
tokamaks
19 p0354 A78-39971
- Poloidal field coil design for a fusion-fission
breeder reactor
19 p0354 A78-39977
- Magnetics design for ripple-assisted beam
injection into the ISI-B and TFTR tokamaks
19 p0356 A78-40013
- Magnetic field computations for ISI using GFUN-3D
--- Impurity Study experiment iron core tokamak
computerized design
19 p0356 A78-40019
- Shear stabilization of collisional drift instability
19 p0369 A78-42022
- Tearing-mode-stable diffuse-pinch configurations
--- of plasmas
19 p0380 A78-42261
- Cyclotron oscillations of a large-Larmor-radius
plasma
19 p0380 A78-42262
- Reversed-field pinch-burn dynamics --- of
contained plasmas
19 p0381 A78-42266
- Reversed-field configuration generated by a
rotating relativistic electron beam
19 p0382 A78-42492
- MAGNETIC FIELDS**
Reconnection of field lines and disruptive
instability in Tokamaks
17 p0011 A78-10796
- The UHAK-II study and magnet design
17 p0038 A78-11169
- Numerical methods for studying compressed magnetic
field generators
17 p0102 A78-18908
- Evaluation of the feedback in MHD conduction
machines
18 p0167 A78-21397
- High magnetic field MHD generator program
[FE-2341-1]
18 p0245 A78-16874
- Magnetic confinement fusion energy research
[COO-3077-143]
18 p0270 A78-19673
- MAGNETIC FLUX**
Explosive magnetic flux compression plate
generators as fast high-energy power sources
17 p0008 A78-10705
- Superconducting magnetic energy storage
17 p0074 A78-14649
- MAGNETIC INDUCTION**
Development of inductive storage for generation of
high voltage pulses
17 p0007 A78-10699
- Terawatt pulse power systems utilizing inductive
storage
17 p0008 A78-10701
- Pulsed superconducting inductive storage system
17 p0008 A78-10702
- Superconductive inductor storage and converters
for pulsed power loads
17 p0008 A78-10703
- Hall effect on an rf induction discharge
17 p0070 A78-13857
- Effects of wall electrical conductance and induced
magnetic field on MHD channel heat transfer with
developing thermal and velocity fields
[ASME PAPER 77-HT-63]
17 p0090 A78-17495
- Integral characteristics of an induction MHD
device at large parameters of electromagnetic
interaction
18 p0204 A78-28087
- Comparison of several computation methods for
inductive MHD channel and free jet converters
with nonmagnetic liquid metals as working fluids
[SPB-MHD-27]
17 p0121 A78-11512

SUBJECT INDEX

MAGNETOHYDRODYNAMIC GENERATORS

MAGNETIC LEVITATION VEHICLES

Electric levitated inter-city vehicles
[EVC PAPER 7782] 17 p0085 A78-16928
Technical alternatives for a maglev system 19 p0292 A78-32653
Specialized complex electromechanical systems -
Computer and microelectronics technology in
control systems /Some results of the
International Electrotechnology Congress -
Moscow, 1977/ 19 p0325 A78-36129

The German research and technology program
concerning advanced tracked
ground-transportation systems 19 p0329 A78-36700

MAGNETIC MEASUREMENT

Significance of the space imagery for studies of
the petroleum platform areas --- in Lower Volga
region 19 p0313 A78-34877

MAGNETIC MIRRORS

Mirror reactor studies --- fusion and
fusion-fission reactors 17 p0011 A78-10874
Experimental and computational results on direct
energy conversion for mirror fusion reactors 17 p0064 A78-12486
Measurement of a theta-pinch plasma by holographic
interferometry 18 p0192 A78-26624
The technology of mirror machines - LLL facilities
for magnetic mirror fusion experiments 19 p0345 A78-39784
TMX - A new facility --- Tandem Mirror Experiment
fusion reactor design 19 p0347 A78-39805
System design for the new TMX machine --- Tandem
Mirror Experiment 19 p0349 A78-39888
Design for the magnetic field requirements of the
tandem mirror experiment 19 p0349 A78-39889
The coil winder for the magnet of the Mirror
Fusion Test Facility 19 p0350 A78-39901
Plasma-wall charge-exchange interactions in the
2XIIIB magnetic mirror experiment 19 p0377 A78-42207
Two-component, multiple-mirror reactor with
depressed ion temperature 19 p0380 A78-42263
Experimental transfer function analysis of a
dissipative and a reactive mode --- instability
in magnetic mirror plasma 19 p0381 A78-42267

MAGNETIC PUMPING

Integral characteristics of an induction MHD
device at large parameters of electromagnetic
interaction 18 p0204 A78-28087
TMP heating studies on Petula Tokamak --- Transit
Time Magnetic Pumping 19 p0354 A78-39969

MAGNETIC SUSPENSION

Development of satellite flywheels utilizing
magnetic bearings with passive radial centering
- Concepts and results 19 p0294 A78-32912
[AIAA 78-571]
Research toward improved flywheel suspension and
energy conversion systems --- for use with
energy storage systems 17 p0139 A78-13564
[PB-271413/7]

MAGNETIC TAPES

Hourly direct-normal solar radiation data tapes
for the United States 17 p0049 A78-11288

MAGNETICALLY TRAPPED PARTICLES

On toroidal diverters for tokamaks 19 p0379 A78-42242

MAGNETOHYDRODYNAMIC FLOW

Plasma flow computation method for MHD conversion
channels 17 p0002 A78-10375
Two-dimensional electrical effects in a frame-type
MHD channel 17 p0103 A78-19269
Collection of ions by electric probes in
combustion MHD plasmas - An overview 18 p0188 A78-26111

Influence of the nonuniformity of the field of
force on the flow in an MHD channel 18 p0216 A78-28951
Laminar flow of a conducting liquid between
coaxial cylinders in a traveling magnetic field 19 p0339 A78-38673
Impurity and gas throughput control for TNS ---
The Next Step tokamaks 19 p0348 A78-39822

MAGNETOHYDRODYNAMIC GENERATORS

Cathode spots on metallic electrodes under the
conditions of the channel of an MHD generator 17 p0002 A78-10243
Acceleration nozzles of MHD generators with
deformation of supersonic flow 17 p0002 A78-10244
Effect of flow inhomogeneity on plasma instability
near a channel wall 17 p0002 A78-10245
Processing the results of experiments on the U-25
unit by means of an information measuring system
--- MHD generator 17 p0002 A78-10246
Plasma flow computation method for MHD conversion
channels 17 p0002 A78-10375
Some results of research carried out at the Soviet
U-02 and U-25 open-cycle MHD facilities 17 p0009 A78-10734
National program for MHD power generation 17 p0010 A78-10745
Dynamic modeling and control of
magnetohydrodynamic/steam systems 17 p0028 A78-11070
MHD generators for baseload power stations 17 p0032 A78-11108
Heat-transfer allowing for ion slip in an MHD
channel 17 p0063 A78-12346
Investigation of the efficiency of a Faraday
MHD-generator coupled to a thermonuclear reactor 17 p0063 A78-12348
Stability of nonequilibrium plasmas 17 p0063 A78-12352
Some results of investigations on the U-25 pilot
plant to attain its design parameters --- MHD
generator operation 17 p0066 A78-13153
Some results of investigation of pressure
fluctuations in a condensing injector --- for
liquid metal MHD generator 17 p0066 A78-13154
Variation in excess oxidant factor in combustion
products of MHD generator 17 p0066 A78-13155
Experimental investigation of pulsating modes of
combustion in the combustion chambers of the
U-25 plant --- energy converter for MHD generator 17 p0066 A78-13156
Hall effect on an rf induction discharge 17 p0070 A78-13857
The use of MHD generators in the nuclear energy
field 17 p0072 A78-14130
Two-dimensional analysis of a diagonal-type
nonequilibrium plasma MHD generator 17 p0073 A78-14274
Probe-tube microphone for pressure-fluctuation
measurements in harsh environments 17 p0077 A78-15155
Analysis of the seeded combustion gas boundary
layer near a cold electrode 17 p0083 A78-16814
MHD electrode-insulator micro- and macro-structure 17 p0088 A78-17464
Effects of slagging in MHD generator ducts
[ASME PAPER 77-HT-59] 17 p0089 A78-17491
Analysis of a new concept for a high temperature
direct coal-fired falling particle air
pre-heater for MHD power generation
[ASME PAPER 77-HT-60] 17 p0089 A78-17492
Specifics of heat exchanger design for a 2000-MW
dual cycle, MHD Topping-Steam Bottoming power
plant [ASME PAPER 77-HT-61] 17 p0090 A78-17493
Heat transfer problem associated with an MHD power
generation system - An overview
[ASME PAPER 77-HT-62] 17 p0090 A78-17494

- Effects of wall electrical conductance and induced magnetic field on MHD channel heat transfer with developing thermal and velocity fields
[ASME PAPER 77-HT-63] 17 p0090 A78-17495
- 1 MHD simulation test facility for investigating the thermal properties of a slag/seed coated radiant boiler and superheater for a 2000 MWt MHD power plant
[ASME PAPER 77-HT-64] 17 p0090 A78-17496
- Particulate deposition in direct fired MHD air preheaters
[ASME PAPER 77-HT-65] 17 p0090 A78-17497
- 2 numerical solution to the unsteady, quasi-three-dimensional, turbulent heat transfer problem in an MHD channel
[ASME PAPER 77-HT-90] 17 p0091 A78-17506
- Numerical methods for studying compressed magnetic field generators 17 p0102 A78-18908
- Limiting values of the energy generated by pulsed MHD converters 17 p0103 A78-19268
- Two-dimensional electrical effects in a frame-type MHD channel 17 p0103 A78-19269
- Cold wall Faraday type generating channel 17 p0106 A78-20199
- The efficiency of half-peak MHD electric power plant 18 p0166 A78-21034
- Coaxial, explosive-type MHD generator 18 p0166 A78-21387
- Problem of end effect in a linear induction MHD machine at arbitrary load current 18 p0167 A78-21395
- Evaluation of the feedback in MHD conduction machines 18 p0167 A78-21397
- Method for taking account of the effect of chemical kinetics on the thermodynamic properties of the working fluid in a supersonic MHD generator 18 p0168 A78-22137
- The experimental MHD power plant of India 18 p0168 A78-22138
- Choice of optimal configuration of frame and cross section shape for a frame-type MHD channel 18 p0168 A78-22139
- Energy characteristics of an MHD generator cycle with internal cooling of the channel 18 p0172 A78-22531
- Two-dimensional temperature distribution in a ceramic-based electrode --- for MHD channels 18 p0173 A78-22806

- An outline for optimizing and evaluating proposed OTEC systems --- Ocean Thermal Energy Conversion 19 p0304 A78-33333

SUBJECT INDEX

METAL CRYSTALS

- A digital computer program for simulating electric vehicle performance
[SAE PAPER 780216] 19 p0307 A78-33377
- Mathematical model for the design of grids for electric vehicle batteries
[SAE PAPER 780221] 19 p0307 A78-33380
- Probability models of wind velocity magnitude and persistence
19 p0314 A78-34935
- Energy modeling and forecasting at the U.S. Energy Research and Development Administration
19 p0316 A78-35420
- Development of a mathematical model for interelectrode breakdown in an MHD generator
19 p0341 A78-38968
- A model for the current-voltage curve of photoexcited semiconductor electrodes
19 p0343 A78-39457
- Economic analysis of EBT reactor --- Elmc Pumpy Torus
19 p0250 A78-39895
- Computational model for superconducting toroidal-field magnets for a tokamak reactor
19 p0350 A78-39905
- The stationary regimes of open cycle MHD power units - A mathematical model
19 p0362 A78-40456
- Kinetics of catalytic liquefaction of Big Horn coal in a segmented bed reactor
19 p0365 A78-41222
- Models for impurity production and transport in tokamaks
19 p0379 A78-42217
- Initial numerical studies of the behaviour of Z-pinch plasma under liner implosion conditions
19 p0380 A78-42260
- Study of the performance of flat plate collectors in the transient regime
19 p0384 A78-42892
- Modeling and simulation. Volume 8 - Proceedings of the Eighth Annual Pittsburgh Conference, University of Pittsburgh, Pittsburgh, Pa., April 21, 22, 1977. Parts 1 & 2
19 p0385 A78-43026
- Modeling the sectors of production and energy transformation - The situation in France
19 p0385 A78-43270
- Comparison of several computation methods for inductive MHD channel and free jet converters with nonmagnetic liquid metals as working fluids
[SPB-MHD-27] 17 p0121 A78-11512
- Project Independence Evaluation System (PIES) documentation. Volume 4: FEA model of oil and gas supply: Data validation and update
[PB-270385/E] 17 p0139 A78-13559
- Residential energy demand analysis: Data and methodology
[BNL-21920] 17 p0140 A78-13573
- System dynamics model of national energy usage
[SAND-76-0415] 17 p0141 A78-13577
- Wind studies in complex terrain
[UCRL-79430] 17 p0157 A78-14762
- Adaptive curve fitting for chemical processes
[AD-A046456] 17 p0158 A78-15213
- A linear programming model for assessing the regional impacts of energy development on water resources
[PB-273022/4] 18 p0251 A78-17491
- Drive train dynamic analysis
18 p0266 A78-19630
- A solar adsorption cooling system: An analytical and experimental study
18 p0272 A78-20269
- Synthoil hydrodynamics
[COO-0056-4] 18 p0273 A78-20473
- Filtration model for coal fly ash with glass fabrics
[PB-276489/2] 18 p0289 A78-21667
- Methodology for predicting the demand for new electricity using goods
[EPRI-BA-593] 19 p0445 A78-26570
- Mathematical aspects of production and distribution of energy: Proceedings of symposia in applied mathematics of the American Mathematical Society, volume 21
[PB-278350/4] 19 p0449 A78-26619
- MEASURING INSTRUMENTS
- A pn junction silicon sensor for high-intensity solar flux mapping
17 p0023 A78-11023
- Nuclear Science Symposium, 4th, and Nuclear Power Systems Symposium, 9th, San Francisco, Calif., October 19-21, 1977, Proceedings
18 p0184 A78-25301
- Measurement program of the Dutch experimental vertical-axis wind turbine
18 p0210 A78-28561
- Coal thickness gauge using BRAS techniques, part 1 --- radiofrequency resonance absorption
[NASA-CR-150625] 18 p0273 A78-20573
- MECHANICAL DEVICES
- A low cost high temperature sun tracking solar energy collector
18 p0262 A78-19041
- MECHANICAL DRIVES
- Wind Turbine Structural Dynamics
[NASA-CP-2034] 18 p0265 A78-19616
- Drive train dynamic analysis
18 p0266 A78-19630
- Dynamics of drive systems for wind energy conversion
18 p0266 A78-19633
- MECHANICAL ENGINEERING
- Thermal-mechanical design of a 150-mA, direct-current, 400-keV accelerator for production of 14-MeV neutrons
19 p0357 A78-40032
- Israel Conference on Mechanical Engineering, 11th, Technion - Israel Institute of Technology, Haifa, Israel, July 11, 12, 1977, Proceedings --- computer aided aircraft and radial gas turbine engines
19 p0367 A78-41506
- Utilization of waste heat in trucks for increased fuel economy
[NASA-CR-157292] 19 p0458 A78-27532
- MECHANICAL PROPERTIES
- Lead-strontium alloys for battery grids
19 p0363 A78-40617
- Mechanical properties of oil shale of importance to in-situ rubblization
[SAND-77-0499C] 19 p0411 A78-24731
- MELTING
- Investigation of the dynamics of melting processes in a solar furnace
19 p0336 A78-37949
- MEMBRANE STRUCTURES
- Photo-galvano-voltaic cell - A new approach to the use of solar energy
19 p0333 A78-37174
- MERCURY (PLANET)
- Solar thermoelectric generators
[NASA-CR-157097] 19 p0407 A78-24645
- MESH
- Improved mesh interconnector technology for the Meteosat solar array
17 p0016 A78-10957
- METABOLIC WASTES
- The biogas facility at Benediktbeuern
18 p0221 A78-30323
- Fuel gas production from animal waste, phase 1
[COO-2991-17] 18 p0280 A78-21321
- METAL AIR BATTERIES
- An iron-air vehicle battery
18 p0174 A78-23241
- METAL COATINGS
- Analytical investigation of thermal barrier coatings for advanced power generation combustion turbines
[ASME PAPER 77-WA/ENBR-13] 19 p0298 A78-33151
- Solar cell collector
[NASA-CASE-LEW-12552-1] 19 p0419 A78-25527
- METAL COMBUSTION
- Steady metal combustor as a closed thermal energy source
18 p0233 A78-32141
- Metals in the combustible fraction of municipal solid waste
[PB-272946/5] 18 p0245 A78-16499
- METAL COMPOUNDS
- Sputtered metal silicide solar selective absorbing surfaces
18 p0221 A78-30303
- METAL CRYSTALS
- Investigation of the electrical characteristics of low-temperature thermionic power generators
18 p0227 A78-31338

METAL CUTTING

Slicing of silicon into sheet material. Silicon sheet growth development for the large area silicon sheet task of the low cost silicon solar array project
[NASA-CR-157080] 19 p0406 W78-24629

METAL FATIGUE

Corrosion fatigue of 5086-H34 aluminum in sea water --- for ocean thermal energy conversion 19 p0305 A78-33344

METAL FIBERS

Investigation of the effective thermal conductivity of metal-fiber wicks in low-temperature heat pipes 19 p0308 A78-33573

METAL FILMS

Solar cells by ionized-cluster beam deposition and epitaxial techniques 17 p0013 A78-10912

An optimum thickness indicator for evaporating metals on Schottky barrier solar cells 18 p0182 A78-24967

The role of macrorelief of semiconductor branches during their commutation in thermoelements --- semiconductor-metal contacts for thermoelectric solar batteries 18 p0187 A78-25736

Thin-film black-white coatings for the receivers of solar energy installations 18 p0215 A78-28897

Thermoelectric power of tin films at low temperatures 18 p0217 A78-29427

METAL HYDRIDES

Technical and economic aspects of hydrogen storage in metal hydrides 17 p0099 A78-18842

The storage of hydrogen in the form of metal hydrides - an application to thermal engines 17 p0100 A78-18845

Toxicological aspects of the use of hydrogen in the future as main energy source 17 p0101 A78-18855

HYCSOS: A chemical heat pump and energy system based on metal hydrides [ANT-77-39] 18 p0238 W78-16334

Metal hydride development program at Broekhaven National Library [BNL-23574] 19 p0461 W78-27568

Electrolysis based hydrogen storage system [BNL-50760] 19 p0462 W78-27580

METAL IONS

An ionic model for the systematic selection of chemical decomposition reactions for energy storage 17 p0051 A78-11307

Ionization and recombination rate coefficients of highly ionized molybdenum ions from spectroscopy of tokamak plasmas 19 p0369 A78-42015

METAL JOINTS

Study of diffusion processes in low-temperature thermal elements --- for solar energy conversion 19 p0326 A78-36135

METAL OXIDE SEMICONDUCTORS

Single crystal and polycrystalline GaAs solar cells using AMOS technology 17 p0025 A78-11044

Experimental study of the interface properties of MOS tunnel devices 17 p0026 A78-11053

Low cost, high efficiency solar cells using indium-tin oxide on semiconductor /OSOS/ solar cells 17 p0054 A78-11334

Impurity concentrations and surface charge densities on the heavily doped face of a silicon solar cell 17 p0136 W78-13534

Innovations in microelectronics and solid state at North Carolina Agricultural and Technical State University 18 p0237 W78-16280

Solar cell collector [NASA-CASE-LEW-12552-1] 19 p0419 W78-25527

METAL OXIDES

Fabrication of OSOS cells by neutral ion beam sputtering --- Oxide Semiconductor Cn Silicon solar cells 17 p0027 A78-11062

Oxide ceramics for electrodes on open-cycle MHD generators 19 p0328 A78-36556

Thermoelectric power and ac conductivity of A-type Nd2O3 19 p0332 A78-36964

METAL PARTICLES

Optimization of particulate type selective solar absorber 17 p0044 A78-11233

Selective absorption of solar energy in ultrafine chromium particles 17 p0070 A78-13785

Ultrafine chromium particles for photothermal conversion of solar energy 19 p0339 A78-38553

Selective absorption of solar energy in granular metals - The role of particle shape 19 p0369 A78-41910

METAL PLATES

Explosive magnetic flux compression plate generators as fast high-energy power sources 17 p0008 A78-10705

Metallographic analysis of a steel plate which failed in service in a coal gasifier 17 p0077 A78-15354

METAL POWDER

Coatings of ultrafine chromium particles - Efficient selective absorbers of solar energy 17 p0106 A78-20117

METAL SHEETS

A sheet-metal roof as a solar absorber 18 p0179 A78-24344

METAL SHELLS

The mechanical structure of the Joint European Torus 17 p0040 A78-11182

Design aspects of a large toroidal stabilizing shell and vacuum liner assembly 17 p0040 A78-11184

Large-scale thermal energy storage using sodium hydroxide /NaOH/ 17 p0051 A78-11309

METAL SUBFACES

Optical properties of selectively absorbing metal/insulator composite films 19 p0324 A78-36032

Experimental studies of selective coatings for solar energy collectors 19 p0375 A78-42151

Development of selective solar surfaces 19 p0375 A78-42152

Investigation of plasma-wall interaction by the aid of a plasma accelerator 19 p0379 A78-42218

Test data on electrical contacts at high surface velocities and high current densities for homopolar generators [CONF-771029-121] 19 p0467 W78-27924

METAL VAPOR LASERS

Sodium vapor heat pipe laser cell [AIAA 78-392] 19 p0317 A78-35587

METALLIZING

Solar energy reflector using metallized polystyrene 19 p0371 A78-42110

METALLURGY

Energy considerations in electrodymetallurgy [IS-M-83] 17 p0120 W78-11505

Metallurgical studies of high temperature alloy capsules after long time cyclic corrosion tests as containers for lithium fluoride [GNP-2690-SECT-7.109] 19 p0440 W78-26335

METALS

Problem of the vulnerability of materials to radiation in relation to atomic and thermonuclear power engineering 18 p0180 A78-24748

Environmental transport model of heavy metals 18 p0215 A78-28946

A baseline of logistic and power requirements for full-scale manufacturing of metallic materials in earth orbit [AAS 77-237] 19 p0329 A78-36712

A home central electric system [NASA-TN-75084] 17 p0159 W78-15561

- Two-phase working fluids for the temperature range
50 to 350 C
[NASA-CR-135255] 18 p0238 N78-16329
- Metals in the combustible fraction of municipal
solid waste
[PB-272946/5] 18 p0245 N78-16499

MOIRE EFFECTS:

SUBJECT INDEX

MOIRE EFFECTS

The development and use of the moire method in solar engineering problems 18 p0187 A78-25731

MOLECULAR BEAMS

Molecular-beam epitaxy in space 17 p0103 A78-19472

MOLECULAR DIFFUSION

Optically thin diffusion barriers enhance the life of metal/metal oxide selective surfaces 17 p0045 A78-11241

Models for impurity production and transport in tokamaks 19 p0379 A78-42217

MOLECULAR EXCITATION

Power deposition in volumetric U-235/P6-He fission-pumped nuclear lasers 18 p0235 A78-32436

MOLECULAR PUMPS

Performance of a turbomolecular pump in a pulsed magnetic field --- for controlled fusion experiments 19 p0352 A78-39938

MOLECULAR WEIGHT

Investigations of the effects of shear degradation on the rheological behavior of ultra-high molecular weight water soluble polymers as applied to enhance oil recovery 18 p0237 A78-16171

MOLTEN SALT ELECTROLYTES

Demand sensitive energy storage in molten salts 18 p0220 A78-30264

Optical properties of solar-absorbing oxide particles suspended in a molten salt heat transfer fluid 19 p0312 A78-34513

Molten carbonate fuel cell research at ORNL [ORNL/TN-5886] 17 p0151 A78-14639

Molten salt thermal energy storage systems [NASA-CR-135419] 19 p0405 A78-24618

Molten carbonate fuel cell research at CNEL. 2: Theoretical and experimental transport studies, thermochemistry, and electron microscopy [ORNL/TN-6168/V2] 19 p0448 A78-26601

Molten-salt thermal-energy storage systems [CONF-770955-3] 19 p0460 A78-27556

MOLTEN SALTS

Production of low-Btu gas from wastes, using molten salts 18 p0197 A78-27804

MOLYBDENUM

Ionization and recombination rate coefficients of highly ionized molybdenum ions from spectroscopy of tokamak plasmas 19 p0369 A78-42015

MOLYBDENUM COMPOUNDS

Deactivation and attrition of Co-Mo catalyst during B-Coal operations --- coal-gasification and liquefaction 18 p0190 A78-26582

MOLYBDENUM SULFIDES

Hydrogenation of phenanthrene over a commercial cobalt molybdenum sulfide catalyst under severe reaction conditions --- hydrocarbon fuel from coal liquefaction 18 p0190 A78-26580

MON (SEMICONDUCTORS)

Optically thin diffusion barriers enhance the life of metal/metal oxide selective surfaces 17 p0045 A78-11241

MOMENTUM THEORY

Momentum theory and flow states for windmills 18 p0234 A78-32420

MOMENTUM TRANSFER

A cross flow wind turbine 18 p0169 A78-22233
A wind energy conversion system based on the tracked vehicle airfoil concept 18 p0169 A78-22234

MONITORS

Design review package for the on-site monitor for solar heating and cooling systems [NASA-CR-150590] 18 p0275 A78-20611
Loose-parts monitoring: Present status of the technology, its implementation in US reactors, and some recommendations for achieving improved performance [CONF-770902-5] 18 p0282 A78-21483

MONTANA

Microcrack technology for geothermal exploration and assessment [PB-271940/9] 17 p0151 A78-14725
Legislative handbook on energy-related topics [PB-276766/3] 19 p0390 A78-22477
Bell Creek Field micellar-polymer pilot demonstration [BERC/TPR-77/13] 19 p0413 A78-25226

MOORING

Cold water transport, cold water pipe, and deep water mooring line analysis - A parametric approach --- for Ocean Thermal Energy Conversion 19 p0313 A78-33327

MOTOR VEHICLES

The technical evaluation of transport drive systems 17 p0067 A78-13422

Improving the emission performance of vehicles in the field [APCA PAPER 77-3,4] 18 p0184 A78-25386

Hybrid drive for motor vehicles with a preponderantly intermittent method of operation [NASA-TN-75215] 17 p0124 A78-12418

Priority treatment for high occupancy vehicles: Project status report --- bus and car pool lanes [PB-270529/1] 17 p0129 A78-12907

Typical vehicle diurnal [PB-270690/1] 17 p0145 A78-13633

Shift schedules for emissions and fuel economy testing [PB-274865/5] 18 p0261 A78-18594

State-of-the-art assessment of electric vehicles and hybrid vehicles [NASA-TN-73756] 18 p0262 A78-18988

Transit bus propulsion systems alternative power plant installation [PB-276612/9] 19 p0387 A78-22385

Alternative fuels utilization program [UCID-17645] 19 p0414 A78-25241

Energy losses in heavy commercial vehicles [PB-277354] 19 p0417 A78-25434

MULTIPHASE FLOW

A dispersion model for the Solvent Refined Coal process 18 p0230 A78-31871

MUTATIONS

Mutational analysis of Chlamydomonas reinhardtii - Application to biological solar energy conversion 18 p0207 A78-28357

N

N-P-N JUNCTIONS

Solar cell behaviour under variable surface recombination velocity and proposal of a novel structure 19 p0334 A78-37469

N-TYPE SEMICONDUCTORS

Analysis of epitaxial drift field N on P silicon solar cells 17 p0012 A78-10904

M-I-S solar cell - Theory and experimental results 17 p0025 A78-11040

Semiconductor electrodes. I. V - Photoelectrochemical cells with mixed polycrystalline n-type CdS-CdSe electrodes 18 p0233 A78-32233

CuInS_2 liquid junction solar cells 19 p0310 A78-34274

Stabilization of n-type semiconductors to photoanodic dissolution by competitive electron transfer processes 19 p0343 A78-39462

Thermodynamic potential for the anodic dissolution of n-type semiconductors - A crucial factor controlling durability and efficiency in photoelectrochemical cells and an important criterion in the selection of new electrode/electrolyte systems 19 p0344 A78-39465

Dynamics of drive systems for wind energy conversion 18 p0266 A78-19633

NAPHTHALENE

Enthalpy measurement of coal-derived liquids [FE-2035-10] 19 p0452 A78-26962

- Performance and NOx/ emissions of spark ignited combustion engines using alternative fuels - Quasi one-dimensional modeling. I - Hydrogen fueled engines 19 p0333 A78-37299
- The effect of burner design and operational factors on the emission of nitrogen oxides when burning an anthracite/slurry mixture 19 p0335 A78-37861
- Reducing nitrogen oxides in the flue gases from gas/oil-fired boilers at high-capacity power stations 19 p0335 A78-37862
- Reduction of nitrogen oxide emissions from field operating package boilers, phase 3 [PB-269277/0] 17 p0121 N78-11526
- Burner design criteria for NOx control from low-Btu gas combustion. Volume 1: Ambient fuel temperature [PB-272614/9] 17 p0163 N78-15607
- Standards support and environmental impact statement. Volume 2: Promulgated standards of performance for lignite-fired steam generators [PB-279008/7] 19 p0466 N78-27621
- NITROGEN TETROXIDE**
Characteristics of the utilization of N2O4 in solar gas-turbine power plants 19 p0335 A78-37947
- NOAA SATELLITES**
The quality of NOAA's ocean research and development program: An evaluation [PB-277095/6] 18 p0290 N78-21980
- NOCTURNAL VARIATIONS**
Nocturnal boundary-layer wind maxima and the problem of wind power assessment 18 p0179 A78-24314
- NOISE INTENSITY**
Solar power satellite system definition study. Part 2, volume 8: SPS launch vehicle ascent and entry sonic overpressure and noise effects [NASA-CR-151672] 18 p0272 N78-20163

NONAQUEOUS ELECTROLYTES

Solid electrolyte and elevated temperature water electrolysis

17 p0C98 A78-18832

NONDESTRUCTIVE TESTS

Nondestructive evaluation needs for coal

liquefaction

[AHL-77-61]

19 p0426 N78-25606

NONEQUILIBRIUM PLASMAS

Stability of nonequilibrium plasmas

17 p0063 A78-12352

Two-dimensional analysis of a diagonal-type

nonequilibrium plasma MHD generator

17 p0C73 A78-14274

Calculation of electron heating in a

nonequilibrium MHD channel

18 p0193 A78-27133

Stability of nonequilibrium plasma

19 p0291 A78-32575

Coal fired non-equilibrium, Closed Cycle MHD/steam

power generation

[ASME PAPER 77-WA/ENER-8]

19 p0298 A78-33146

NONFERROUS METALS

The significance of domestic refuse recycling for raw material requirements and energy consumption of the nonferrous metals industry

19 p0332 A78-36945

NONUNIFORM FLOW

Effect of flow inhomogeneity on plasma instability near a channel wall

17 p0002 A78-10245

NONUNIFORM PLASMAS

The effect of coherent structures on open-cycle generators

[AIAA PAPER 78-1173]

19 p0368 A78-41870

NORTH CAROLINA

Innovations in microelectronics and solid state at North Carolina Agricultural and Technical State University

18 p0237 N78-16280

NORTH DAKOTA

Legislative handbook on energy-related topics

[PB-276766/3]

19 p0390 N78-22477

NORTH SEA

Offshore oil pollution

[STP21-A76054]

17 p0122 N78-11535

Study of satellite communications system serving off-shore oil and gas exploitation activities in European sea areas, volume 1 --- forecasting

offshore structures and requirements based on ECS

[CWJ/C-640003-VOL-1]

17 p0134 N78-13308

Study of satellite communications system serving off-shore oil and gas exploitation activities in European sea areas, volume 2 --- transmission

system analysis

[CWJ/C-640003-VOL-2]

17 p0134 N78-13309

Study of satellite communications system serving off-shore oil and gas exploitation activities in European sea areas, volume 3

[CWJ/C-640003-VOL-3]

17 p0134 N78-13310

Study of satellite communications system serving off-shore oil and gas exploitation activities in European sea areas, volume 4

[CWJ/C-640003-VOL-4]

17 p0134 N78-13311

Study of satellite communications system serving off-shore oil and gas exploitation activities in European sea areas. Volume 5: Summary

[CWJ/C-640003-VOL-5-SUMM]

17 p0134 N78-13312

NOSTOC

Isoprenoid hydrocarbons produced by thermal

alteration of Nostoc muscorum and

Rhodospseudomonas spheroides

18 p0167 A78-22008

NOZZLE DESIGN

Acceleration nozzles of MHD generators with deformation of supersonic flow

17 p0002 A78-10244

NOZZLE FLOW

Study of the driving forces of heat and mass transfer in a nozzle reflux device for heating air by water

18 p0172 A78-22543

NUCLEAR AUXILIARY POWER UNITS

Heat pipe reactors for space power applications

[LA-OR-77-296]

17 p0153 N78-14653

NUCLEAR ELECTRIC POWER GENERATION

Energy technology IV; Proceedings of the Fourth Conference, Washington, D.C., March 14-16, 1977

18 p0180 A78-24751

Status and prospects for continued progress in magnetic fusion energy research and development

18 p0181 A78-24756

Nonconventional alternatives for conversion of nuclear energy

18 p0229 A78-31772

An economic comparison of three technologies - Photovoltaics, nuclear power, co-generating engines

19 p0321 A78-35752

Is solar power more dangerous than nuclear

19 p0341 A78-38998

Energy resources --- on natural and nuclear energy technology and efficiency

19 p0385 A78-43072

Technology assessment in a dialectic key

17 p0123 N78-11896

Coal and nuclear generating costs

17 p0155 N78-14674

[EPRI-PS-455-SR]

Evaluation of a seafloor nuclear power supply and its potential applications

18 p0277 N78-20643

An evaluation of the national energy plan

19 p0396 N78-23566

[END-77-48]

NUCLEAR ELECTRIC PROPULSION

Comment on 'Heat-pipe reactors for space power applications'

19 p0364 A78-40826

Optimize out-of-core thermionic energy conversion for nuclear electric propulsion

18 p0252 N78-17856

[NASA-TN-73892]

NUCLEAR ENERGY

The role of nuclear energy in the more efficient exploitation of fossil fuel resources

19 p0311 A78-34399

NUCLEAR FISSION

Nonconventional alternatives for conversion of nuclear energy

18 p0229 A78-31772

Power deposition in volumetric /U-235/P6-Re fission-pumped nuclear lasers

18 p0235 A78-32436

Symbiotic system of a fusion and a fission reactor with very simple fuel reprocessing

19 p0380 A78-42257

NUCLEAR FUEL ELEMENTS

Alternative fuel cycle options: Performance characteristics and impact on nuclear power growth potential

19 p0412 N78-24920

[AHL-77-70]

NUCLEAR FUEL REPROCESSING

Purity and gas throughput control for THS --- The Next Step tokamaks

19 p0348 A78-39822

NUCLEAR FUELS

Energy yield and fuel dynamics of the fusion breeder

17 p0041 A78-11191

Controlled nuclear fusion, a challenge to the engineer. II - Systems for fuel supply and fuel removal, plasma heating, and vacuum generation

18 p0195 A78-27700

Tritium systems preliminary design for THS --- Tokamak Next Step with fuel reprocessing

19 p0346 A78-39798

An analysis of the back end of the nuclear fuel cycle with emphasis on high-level waste management, volume 1

17 p0128 N78-12823

[NASA-CR-155319]

An analysis of the back end of the nuclear fuel cycle with emphasis on high-level waste management, volume 2

17 p0128 N78-12824

[NASA-CR-155320]

An analysis of the technical status of high level radioactive waste and spent fuel management systems

18 p0261 N78-18897

[NASA-CR-155313]

Four Workshops in Alternate Concepts in Controlled Fusion. Part A: Executive summaries. Part B: Extended summaries. Part C: CTR using the p-B-11 reaction

18 p0290 N78-21927

[EPRI-ER-429-SR-PT-A]

Report on emergency electrical power supply systems for nuclear fuel cycle and reactor facilities security systems

19 p0416 N78-25340

[T/SUB-77-14263/1]

NUCLEAR FUSION

Magnetic fusion energy

18 p0245 N78-16872

[UCRL-79600]

SUBJECT INDEX

OCEANOGRAPHIC PARAMETERS

Alternative forms of energy transmission from OTEC plants 19 p0301 A78-33312

Market definition, commercial development plan, and OTEC financing - A summary of 1976 APL work for the U.S. Maritime Administration 19 p0302 A78-33313

OTEC implementation problems for specific missions --- Ocean Thermal Energy Conversion 19 p0302 A78-33315

Stratified turbulence modeling for the near field external flow --- application to Ocean Thermal Energy Conversion plants 19 p0302 A78-33316

An estimate of the impact of OTEC operation on the vertical distribution of heat in the Gulf of Mexico 19 p0302 A78-33317

The external flow induced by an Ocean Thermal Energy Conversion /OTEC/ power plant 19 p0302 A78-33319

Development of a numerical ocean model of the Gulf of Mexico for OTEC environmental impact and resource availability studies 19 p0302 A78-33320

Operational sea state and design wave criteria - State-of-the-art of available data for U.S.A. coasts and the equatorial latitudes --- Ocean Thermal Energy Conversion platform design 19 p0302 A78-33322

Resource assessment of a high potential OTEC site near Puerto Rico --- Ocean Thermal Energy Conversion 19 p0302 A78-33323

A further evaluation of the oceanographic conditions found off Keahole Point, Hawaii, and the environmental impact of nearshore ocean thermal energy conversion plants on subtropical Hawaiian waters 19 p0303 A78-33324

Some factors affecting the selection of OTEC plant platform/cold water pipe designs 19 p0303 A78-33325

Hydrodynamic loads on the cold water pipe --- for Ocean Thermal Energy Conversion application 19 p0303 A78-33326

Cold water transport, cold water pipe, and deep water mooring line analysis - A parametric approach --- for Ocean Thermal Energy Conversion 19 p0303 A78-33327

Anchor systems --- for offshore power plants 19 p0303 A78-33328

Screens for the OTEC plants --- protection from biological materials for Ocean Thermal Energy Conversion heat exchangers 19 p0303 A78-33329

Compact heat exchangers for sea thermal power plants 19 p0303 A78-33330

Analytical and experimental studies of OTEC heat transfer problems at Oak Ridge National Laboratory 19 p0303 A78-33331

An outline for optimizing and evaluating proposed OTEC systems --- Ocean Thermal Energy Conversion 19 p0304 A78-33333

The OTEC program at Carnegie-Mellon University - Heat transfer research and power cycle transient modeling --- Ocean Thermal Energy Conversion 19 p0304 A78-33335

Enhanced performance heat exchangers --- for Ocean Thermal Energy Conversion 19 p0304 A78-33336

Heat transfer enhancement for evaporators --- in Ocean Thermal Energy Conversion 19 p0304 A78-33337

Comments on sea water side enhancement for OTEC heat exchangers 19 p0304 A78-33338

Experiments on and design of low-cost aluminum heat exchangers for OTEC plant ships 19 p0304 A78-33339

A design and producibility study of heat exchangers for Ocean Thermal Energy Conversion systems 19 p0304 A78-33340

Ultra clean heat exchangers - A critical OTEC requirement 19 p0305 A78-33341

Studies of biofouling in Ocean Thermal Energy Conversion plants 19 p0305 A78-33342

Corrosion and biofouling on an Ocean Thermal Energy Conversion power plant - What are the questions 19 p0305 A78-33343

Corrosion fatigue of 5086-H34 aluminum in sea water --- for ocean thermal energy conversion 19 p0305 A78-33344

Compatibility studies for the ammonia-titanium-seawater system as related to Ocean Thermal Energy Conversion 19 p0305 A78-33345

Hydrodynamic control of biofouling in OTEC heat exchangers 19 p0305 A78-33346

Potential of open cycle OTEC - A general survey --- Ocean Thermal Energy Conversion 19 p0305 A78-33347

Sea thermal power cycles 19 p0306 A78-33348

The foam OTEC system - A proposed alternative to the closed cycle OTEC system 19 p0306 A78-33350

Preliminary analysis of the effects of sea water leakage on the performance of the ammonia cycle --- in Ocean Thermal Energy Conversion plants 19 p0306 A78-33351

The Mist Flow OTEC Plant --- convective lift to achieve hydraulic head in Ocean Thermal Energy Conversion 19 p0306 A78-33352

Nitric acid cycle process for extracting thermal energy from low-level heat sources --- for Ocean Thermal Energy Conversion 19 p0315 A78-35171

Ocean thermal energy - Status and prospects 19 p0323 A78-35876

Marine thermal energy and the combination of solar, radiative and aeolian energies 19 p0328 A78-36623

The potential for geothermal and solar thermal power systems 19 p0361 A78-40368

Air conditioning using ocean thermal gradients 19 p0376 A78-42160

Ocean thermal Energy Conversion (OTEC) test facilities study program, volume 1 [SAN/1156-77/1-VOL-1] 17 p0120 N78-11507

Enhanced single-phase heat transfer for ocean thermal energy conversion systems [ORNL/SUB-77/14216/1] 17 p0153 N78-14657

Alternative energy transmission systems from OTEC plants, Project 8980 [DSE/2426-8] 17 p0153 N78-14658

Outline for optimizing and evaluating proposed OTEC systems [CONP-770331-2] 17 p0153 N78-14660

Analytical and experimental studies of OTEC heat transfer problems at Oak Ridge National Laboratory [CONP-770331-1] 17 p0153 N78-14661

Ocean thermal energy conversion system biofouling and corrosion problems [BNWL-SA-5970] 17 p0154 N78-14662

Nature of primary organic films in the marine environment and their significance for Ocean Thermal Energy Conversion (OTEC) heat exchange surfaces [BNWL-2283] 17 p0154 N78-14663

Solar program assessment: Environmental factors. Ocean thermal energy conversion [ERDA-77-47/8] 17 p0156 N78-14683

Alternative forms of energy transmission from OTEC plants [CONP-770331-5] 18 p0241 N78-16453

Alternative energy transmission systems from OTEC plants, Project 8980 [DSE/2426-12] 18 p0242 N78-16454

Net energy analysis of an Ocean Thermal Energy Conversion (OTEC) system [ORAU/IEA(N)-77-1] 18 p0288 N78-21652

Ocean thermal power plants heat exchangers [ERDA/NSF-43441/76/1] 19 p0410 N78-24681

OCEANOGRAPHIC PARAMETERS

Determination of design and operational criteria for offshore facilities [AIAA 77-1577] 17 p0069 A78-13663

SUBJECT INDEX

OPTIMIZATION

CdS sprayed thin films - Electrical and optical properties 17 p0018 A78-10981

The dependence of optical properties on the structural composition of solar absorbers 17 p0044 A78-11232

Optical analysis of the Fixed Mirror/Distributed Focus /FMD/ solar energy collector 17 p0059 A78-11377

Optical properties of cylindrical elliptic concentrators 17 p0060 A78-11382

Structural composition and optical properties of solar blacks - Gold black 17 p0070 A78-13908

Collection properties of generalized light concentrators 17 p0080 A78-16093

Effect of heat treatment on optical properties of collectors for solar energy installations 18 p0215 A78-28896

Thin-film black-white coatings for the receivers of solar energy installations 18 p0215 A78-28897

Optical properties of solar-absorbing oxide particles suspended in a molten salt heat transfer fluid 19 p0312 A78-34513

Optical performance of absorber-reflector combinations for photothermal solar energy conversion 19 p0316 A78-35411

Thermal optical surface properties and high-temperature solar energy conversion [AIAA PAPER 78-903] 19 p0324 A78-36021

Optical design of solar concentrators [AIAA PAPER 78-904] 19 p0324 A78-36022

Project STOP (Spectral Thermal Optimization Program) 17 p0137 A78-13541

Optical analysis of spherical segment solar collectors 18 p0239 A78-16425

Development of surfaces optically suitable for flat solar panels [NASA-CR-150539] 18 p0250 A78-17477

OPTICAL PUMPING

Gas laser with solar excitation 19 p0308 A78-33395

OPTICAL REFLECTION

Lens-mirror combinations with maximal concentration --- evaluated for solar energy applications 17 p0001 A78-10170

Analytical and experimental study of total internal reflection prismatic panels for solar energy concentrators 17 p0060 A78-11389

Determination of the geometrical concentration of a solar collector using a spherical mirror 18 p0203 A78-27922

Thin silicon film p-i-n photodiodes with internal reflection 18 p0205 A78-28142

Influence of light reflection on the collection efficiency of a solar cell 18 p0229 A78-31767

General principles of calculating multielement concentrating systems --- solar collectors 19 p0326 A78-36136

The sawtooth cover slide 17 p0137 A78-13537

OPTICAL SCANNERS

An optical scanning technique for evaluating silicon solar cells 17 p0091 A78-17553

OPTICAL THICKNESS

An optimum thickness indicator for evaporating metals on Schottky barrier solar cells 18 p0182 A78-24967

OPTIMAL CONTROL

Dynamic modeling and control of magnetohydrodynamic/steam systems 17 p0028 A78-11070

A suboptimal controller for a domestic solar heating system utilizing a time varying price for electricity 17 p0047 A78-11262

A microprocessor-based control system for solar heated/cooled residential dwellings 18 p0176 A78-23896

Optimal control of flywheel hybrid transmissions [ASME PAPER 77-WA/AUT-3] 18 p0229 A78-31828

Maximization of operating efficiency of solar cells 19 p0322 A78-35782

OPTIMIZATION

Selecting optimum tilts for solar collectors as a function of cloudiness 17 p0043 A78-11226

Optimized spacing between rows of solar collectors 17 p0043 A78-11229

Optimization of solar heating in residential buildings using a stochastic performance model 17 p0046 A78-11252

Computer optimization of solar collector area based on life-cycle costing 17 p0046 A78-11253

Optimization of an annual storage solar heating system over its life cycle 17 p0050 A78-11296

A cellwise method for the optimization of large central receiver systems --- solar collectors 17 p0053 A78-11330

Optimization of a fixed solar thermal energy collector 17 p0059 A78-11380

Evaluation of an optimized solar thermal collector by a new method 17 p0060 A78-11381

Optimal design methodology for a wind power system 17 p0070 A78-13847

Analysis and optimization of solar hot water systems 17 p0075 A78-14689

Combustion improvement in a hydrogen fueled engine 17 p0080 A78-16050

Optimal proportioning of an insulated earth cylinder for storage of solar heat 17 p0084 A78-16836

Optimal sizing of solar heating components by equating marginal costs of suboptimal investment paths 17 p0084 A78-16840

Energy optimization of a cycled Tokamak 17 p0087 A78-17133

Economic load distribution in the hybrid hydrothermal power system 17 p0092 A78-17949

Choice of the optimal parabolocylindrical concentrator with a tubiform receiver 17 p0107 A78-20424

Evaluation of the energy provided for a solar collector 18 p0165 A78-20621

Land contouring to optimize wind power [AIAA PAPER 78-279] 18 p0166 A78-20786

Optimization of solar cell contacts by system cost-per-watt minimization 18 p0176 A78-23637

Determination of optimal arrangement-angles for the panels of a nonconvex solar array 18 p0178 A78-24262

Solar challenges to consulting engineers --- on optimization of solar collector performance for heating and cooling applications 18 p0181 A78-24757

An optimum thickness indicator for evaporating metals on Schottky barrier solar cells 18 p0182 A78-24967

Thermal optimization of compact solar water heaters 18 p0206 A78-28172

Possibilities for demand-oriented delivery of wind energy 18 p0211 A78-28565

Maximum wind energy utilization by means of a single-unit wind turbine 18 p0211 A78-28572

An outline for optimizing and evaluating proposed OTEC systems --- Ocean Thermal Energy Conversion 19 p0304 A78-33333

Optimization models for the economic design of wind power systems 19 p0314 A78-34934

A cellwise method for the optimization of large central receiver systems 19 p0314 A78-34937

Optimum design of wideband selective absorbers with provision for specified included layers --- for solar applications 19 p0323 A78-35796

- PARTICLE ACCELERATORS**
- A 40-kV, 26-mA neutral-beam power supply for TMI --- Tandem Error Experiment 19 p0353 A78-39964
- Performance of a developmental 120-keV, 10-A deuterium /14-A hydrogen/ neutral beam system 19 p0357 A78-40027

Thermal-mechanical design of a 150-MW,
direct-current, 400-keV accelerator for
production of 14-MeV neutrons 19 p0357 A78-40032

PARTICLE DIFFUSION
Particulate deposition in direct fired MHD air
preheaters [ASME PAPER 77-HT-65] 17 p0050 A78-17497

PARTICLE EMISSION
Neutral particle emission of the pulsator plasma
during high-density discharges --- in tokamaks
19 p0379 A78-42216
Potential for automotive fuel economy improvement
18 p0258 A78-18543
Characterization of methanol/gasoline blends as
automotive fuel: Performance and emissions
characteristics [PB-277135/0] 19 p0393 A78-23261

PARTICLE ENERGY
Measurements of high-energy deuterons in the
plasma-focus device 18 p0235 A78-32439

PARTICLE MOTION
Relative importance of different impurity sources
in tokamak reactors as estimated from particle
balance equations 19 p0379 A78-42221

PARTICLE SIZE DISTRIBUTION
The physical transformation of the mineral matter
in pulverized coal under simulated combustion
conditions 17 p0079 A78-15834
Physical and morphological studies of
size-classified coal fly ash 18 p0222 A78-30555
Aerosol size distributions and aerosol volume
formation for a coal-fired power plant plume
19 p0366 A78-41254
Preliminary tests using a laser particle-size
analyzer on geothermal brine 19 p0430 A78-25634

PARTICLE TRAJECTORIES
Long-time-scale simulation of resonant particle
effects in Langmuir and whistler waves 18 p0231 A78-32068
Intense relativistic electron-beam trajectories
and their effect on beam heating of toroidally
confined plasma 19 p0310 A78-34237

PARTICLES
Particulate control highlights: Research on
electrostatic precipitator technology [PB-276643/4] 19 p0391 A78-22495

PARTICULATE SAMPLING
The microstructure of pulverized coal-air flames.
I - Stabilization on small burners and direct
sampling techniques 17 p0078 A78-15829
Physical and morphological studies of
size-classified coal fly ash 18 p0222 A78-30555
Operation and maintenance of particulate control
devices on coal-fired utility boilers [PB-274104/9] 18 p0251 A78-17505

PASSAGEWAYS
Priority treatment for high occupancy vehicles:
Project status report --- bus and carpool lanes
[PB-270529/1] 17 p0129 A78-12907

PASSENGER AIRCRAFT
Improved energy efficiency for small CTOL
transport aircraft 18 p0226 A78-31305
Fuel efficiency - Where we are heading in the
design of future jet transports 18 p0226 A78-31307

PASSENGERS
Intercity rail energy intensity for passenger
movement 18 p0258 A78-18546
Near-term electric vehicle program, phase 1
[SAE/1295-1] 18 p0273 A78-20448

PAYLOADS
On the relationship between gross vehicle weight,
payload, effective range, and cost of electric
vehicles [SAE PAPER 780220] 19 p0307 A78-33379

PELLETS
Diffraction analysis for multiple-beam pellet
irradiance 19 p0360 A78-40225

PERFORMANCE
Solar energy systems. Survey of materials
performance [PB-273305/3] 18 p0244 A78-16475
Test and evaluation of 23 electric vehicles for
state-of-the-art assessment [NASA-TN-73850] 18 p0252 A78-17937
Design review package for the on-site monitor for
solar heating and cooling systems [NASA-CR-150590] 18 p0275 A78-20611

PERFORMANCE PREDICTION
Potential of GaAs solar cells for Air Force space
power systems 17 p0019 A78-10994
Nominal cost and performance objectives for
photovoltaic panels in nonconcentrating central
station applications 17 p0021 A78-11007
Performance and cost assessment of photovoltaic
system concepts 17 p0021 A78-11011
Theoretical method to determine monthly efficiency
of flat plate solar collectors 17 p0029 A78-11084
A detailed model of flat plate solar collectors
17 p0042 A78-11213
Performance analysis and experience for flat plate
collector with absorber operating in a vacuum
17 p0042 A78-11215
Performance analysis of a black liquid absorbing
collector /BLAC/ 17 p0042 A78-11217
Analysis of a matrix solar collector 17 p0043 A78-11222
An approximate equation for predicting the solar
transmittance of transparent honeycombs --- flat
plate collector efficiency 17 p0044 A78-11231
Optimization of solar heating in residential
buildings using a stochastic performance model 17 p0046 A78-11252
Moderate-level-of-rigor methods for solar heating
system performance prediction 17 p0046 A78-11254
Prediction of the monthly and annual performance
of solar heating systems 17 p0047 A78-11255
Simplified techniques for sizing residential solar
heating systems 17 p0047 A78-11256
Dual phase annual cycle, index of application ---
solar system for heating and cooling of buildings
17 p0050 A78-11299
Non-evacuated solar collectors with compound
parabolic concentrators 17 p0059 A78-11378
Long-term average performance predictions for
compound parabolic concentrator solar collectors
17 p0059 A78-11379
Seasonal solar collector performance with maximum
storage 17 p0078 A78-15410
Prediction of average collector efficiency from
climatic data 17 p0084 A78-16834
A method of testing for rating thermal storage
devices based on thermal performance 17 p0084 A78-16838
A computer model for large-scale offshore
wind-power systems 17 p0093 A78-18089
Solar energy collector orientation and tracking mode
17 p0104 A78-19827
Design and performance of an air collector for
industrial crop dehydration 17 p0104 A78-19828
The effect of off-south orientation on the
performance of flat-plate solar collectors
17 p0104 A78-19830
Effects of phase-change energy storage on the
performance of air-based and liquid-based solar
heating systems 17 p0104 A78-19832

Computer aided aerogenerator analysis and performance 18 p0169 A78-22229

A performance prediction model for the Darrieus turbine --- for wind energy conversion 18 p0170 A78-22237

An aerodynamic performance theory for the Darrieus wind turbine 18 p0171 A78-22250

Experimental and analytical studies of the aerodynamic performance of windmills [AIAA PAPER 78-277] 18 p0172 A78-22612

On the theory of homojunction and heterojunction solar cells 18 p0192 A78-26616

Mode of operation and characteristics of Darrieus rotors 18 p0210 A78-28560

The effect of hub fairings on wind turbine rotor performance 18 p0219 A78-30039

Synchronization of wind turbine generators against an infinite bus under gusting wind conditions [IEEE PAPER P 77 675-2] 18 p0219 A78-30196

Prediction of the monthly and annual performance of solar heating systems 18 p0220 A78-30270

Solar heating design, by the f-chart method --- Book 18 p0224 A78-31071

Some contributions to aerodynamic theory for vertical-axis wind turbines 19 p0291 A78-32534

Junction potentials of strongly illuminated n⁺/p-p⁺ solar cells 19 p0292 A78-32693

Performance characteristics of air-cooled solar collectors as determined by computer simulation 19 p0294 A78-33027

Solar powered Rankine cycle/vapor compression cycle modeling and performance prediction 19 p0295 A78-33036

Design and calculated performance and cost of the ECAS Phase II open cycle MHD power generation system [ASME PAPER 77-WA/ENER-5] 19 p0297 A78-33143

The Mist Flow OTEC Plant --- convective lift to achieve hydraulic head in Ocean Thermal Energy Conversion 19 p0306 A78-33352

An overview of aerospace gas turbine technology of relevance to the development of the automotive gas turbine engine [SAE PAPER 780075] 19 p0306 A78-33364

Experimental and theoretical analysis of Wankel engine performance [SAE PAPER 780416] 19 p0308 A78-33388

Performance and economics of advanced energy conversion systems for coal and coal-derived fuels 19 p0309 A78-34078

Thermic diode solar panels for space heating 19 p0314 A78-34936

Performance and NO_x emissions of spark ignited combustion engines using alternative fuels - Quasi one-dimensional modeling. I - Hydrogen fueled engines 19 p0333 A78-37299

Silicon solar cell designs based on physical behavior in concentrated sunlight 19 p0334 A78-37462

Influence of bandgap narrowing on the performance of silicon n-p solar cells 19 p0334 A78-37464

Effects of temperature on the performance of silicon solar cells 19 p0371 A78-42117

Deviation in solar cell characteristics from their ideal behaviour 19 p0371 A78-42118

Calculation procedure for determining the thermal performance of solar domestic hot water and space heating systems 19 p0375 A78-42149

Solar energy for industrial processes - A simplified design method 19 p0383 A78-42891

Study of the performance of flat plate collectors in the transient regime 19 p0384 A78-42892

The theoretical and experimental performance of a solar heater equipped with flat plate collectors 19 p0384 A78-42893

Simulation study of a flywheel powered electric vehicle utilizing the modern high energy density energy storage flywheel 19 p0385 A78-43044

Selenide isotope generators [CONF-770302-1] 17 p0114 N78-10581

Performance analysis of a modified internal combustion engine [AD-A045378] 17 p0135 N78-13442

Investigation of methods to improve heat pump performance and reliability in a northern climate. Volume 3: Appendices B, C, D [EPRI-EM-319-VOL-3-APP-B] 17 p0139 N78-13565

Thermal performance of MSPC hot air collectors under natural and simulated conditions [NASA-CR-150506] 18 p0256 N78-18525

Solar power satellite system definition study. Part 2, volume 8: SPS launch vehicle ascent and entry sonic overpressure and noise effects [NASA-CR-151672] 18 p0272 N78-20163

Performance potential of combined cycles integrated with low-Btu gasifiers for future electric utility applications [NASA-TM-73775] 19 p0395 N78-23557

Study of test methods for large flexible solar arrays (VELSA) --- dynamic characteristics [ESA-CR(P)-1016] 19 p0411 N78-24688

Solar energy and the heat pump in a northern climate [EPRI-BA-407] 19 p0462 N78-27583

PERFORMANCE TESTS

The role of defects on the performance of epitaxial and diffused solar cells fabricated on EPG 'ribbon' silicon --- edge-defined growth process technology 17 p0012 A78-10905

Qualification of European high efficiency solar cells for future ESA satellites 17 p0014 A78-10936

Comparative testing of high efficiency silicon solar cells 17 p0014 A78-10937

Status of the ERDA/NASA Photovoltaic Tests and Applications Project 17 p0022 A78-11014

The testing of specially designed silicon solar cells under high sunlight illumination 17 p0022 A78-11021

Recent experimental results on high intensity /HI/ edge-illuminated multijunction silicon solar cells 17 p0023 A78-11027

The analysis, design and thermal performance testing of a heat pipe flat plate collector 17 p0042 A78-11214

Experimental performance study of a 40 sq m vacuum flow flat plate solar collector array 17 p0042 A78-11216

Performance of Lexan vs. ordinary glass as glazing materials for flat-plate solar collectors 17 p0042 A78-11219

Testing of flat-plate air heaters according to ASHRAE Standard 93-77 17 p0042 A78-11220

Performance tests of a solar energy collector used to heat air 17 p0043 A78-11224

A performance evaluation of a solar house in Québec 17 p0048 A78-11277

Solar heating and cooling of mobile homes test results 17 p0048 A78-11279

Efficiency of paraffin wax as a thermal energy storage system 17 p0049 A78-11295

Results of experiments with heliostats for central receiver power plants 17 p0053 A78-11326

Subsystem research experiments on a central receiver collector --- for solar thermal power plant 17 p0053 A78-11327

One MWh solar cavity steam generator solar test program 17 p0053 A78-11329

SUBJECT INDEX

PERFORMANCE TESTS CONTD

Economic trade-offs between the performance of collector thermal performance tests on a Solar Simulator as opposed to outdoor testing 17 p0058 A78-11369

Evaluation of initial collector field performance at the Langley Solar Building Test Facility 17 p0061 A78-11391

Electric vehicle test and evaluation program of the U.S. Postal Service [EVC PAPER 7747] 17 p0086 A78-16935

Testing of direct contact heat exchangers for geothermal brines [ASME PAPER 77-HT-4] 17 p0089 A78-17479

Performance characteristics of concentrator-augmented Savonius wind rotors 17 p0094 A78-18092

Design parameters affecting the performance of resistance-type, vertical-axis windrotors - An experimental investigation 17 p0094 A78-18093

Gas turbine module performance analysis [SAE PAPER 770992] 18 p0176 A78-23828

Retrofit precipitators meet rigid new standards --- sulfur coal combustion 18 p0189 A78-26475

Use of methanol in diesel engine - An experimental study of engine performance 18 p0199 A78-27827

Investigation of some factors affecting the performance of an alcohol-diesel oil dual fuel engine 18 p0199 A78-27829

The flat solar collector - An approach to its evaluation 18 p0220 A78-30261

Optimum testing period for new thermomechanical equipment 18 p0225 A78-31245

Preliminary performance evaluation of the New Mexico State University solar house 19 p0295 A78-33032

Design and operational influences on thermal performance of 'Solaris' solar collector [ASME PAPER 77-WA/SOL-2] 19 p0299 A78-33190

Low cost test procedure for solar collectors [ASME PAPER 77-WA/SOL-4] 19 p0299 A78-33192

A 'no-flow' method for measuring solar collector performance [ASME PAPER 77-WA/SOL-5] 19 p0299 A78-33193

Test and evaluation of 23 electric vehicles for state-of-the-art assessment [SAE PAPER 780290] 19 p0307 A78-33382

Testing of solar collectors 19 p0312 A78-34511

Diffuser augmentation of wind turbines 19 p0312 A78-34512

Heat pipe mirrors for high power lasers [AIAA 78-391] 19 p0317 A78-35586

Augmenting the condenser heat transfer performance of rotating heat pipes [AIAA 78-409] 19 p0318 A78-35597

Experimental performance of flat plate solar collectors with various cover materials with and without transparent plastic honeycomb [AIAA PAPER 78-899] 19 p0324 A78-36018

Investigating the efficiency of gas turbines in off-design operation --- multistage experimental data 19 p0335 A78-37860

Flat-sided rectilinear trough as a solar concentrator - An analytical study 19 p0344 A78-39636

PDI PF power tests --- Princeton Divertor Experiment tokamak Poloidal Field coil system 19 p0351 A78-39909

Design and test of a series switch/regulator system for a 40-kV, 80-A, 10-ms, neutral-beam power supply 19 p0353 A78-39965

TFTR tritium valve for pulsed gas feed, test results 19 p0358 A78-40075

Practical interferometry at 1.06 microns --- for testing high energy fusion laser focusing lenses 19 p0360 A78-40223

Engineering tests for energy storage cars at the Transportation Test Center. Volume 2: Performance power consumption and radio frequency interference tests [PB-269401/6] 17 p0110 N78-10484

Performance potential of the energy separator without mechanical energy recovery [PB-269721/7] 17 p0116 N78-10601

Performance tests of a total flow impulse turbine for geothermal applications [UCID-17411] 17 p0127 N78-12546

Solar power satellite 50 kW VKS-7773 cw klystron evaluation [NASA-CR-151577] 17 p0130 N78-13106

Coal feed component testing for CDIF 17 p0133 N78-13262

The Goddard Space Flight Center high efficiency cell development and evaluation program 17 p0136 N78-13529

Water pulsejet research --- for qualitative understanding of McHugh cycle [AD-A046533] 17 p0158 N78-15497

Performance of an experimental solar-driven absorption air conditioner [LBI-5911] 17 p0161 N78-15579

Provisional flat plate solar collector testing procedures [PB-272500/0] 18 p0243 N78-16463

Baseline tests of the C. B. Waterman Renault 5 electric passenger vehicle [NASA-TM-73759] 18 p0245 N78-16928

Performance evaluation of two black nickel and two black chrome solar collectors [NASA-CR-150497] 18 p0249 N78-17470

MSFC hot air collectors. Phase 1: Test Report [NASA-CR-150495] 18 p0249 N78-17471

Thermal performance of honeywell double covered liquid solar collector [NASA-CR-150505] 18 p0249 N78-17472

Thermal performance evaluation of Solar Energy Products Company (SEPCO) 'Solaron' collector tested outdoors [NASA-CR-150509] 18 p0250 N78-17478

Indoor test for thermal performance evaluation of Lenox-Honeywell solar collector --- conducted using Marshall Space Flight Center Solar Simulator [NASA-CR-150510] 18 p0250 N78-17481

Baseline tests of the AM General DJ-5F electric truck electric delivery van [NASA-TM-73758] 18 p0252 N78-17933

Baseline tests of the EVA change-of-pace coupe electric passenger vehicle [NASA-TM-73763] 18 p0253 N78-17938

Baseline tests of the EVA contractor electric passenger vehicle [NASA-TM-73762] 18 p0253 N78-17939

Baseline tests of the batronic Minivan electric delivery van [NASA-TM-73761] 18 p0253 N78-17940

Performance characteristics of automotive engines in the United States. Report no. 8: Mitsubishi Model 6DS7 diesel engine [PB-274374/8] 18 p0254 N78-18437

Performance characteristics of automotive engines in the United States. Report no. 11: Chrysler (1975) 318-CID 2-bbl engine [PB-274377/1] 18 p0254 N78-18440

Analytical testing techniques 18 p0266 N78-19625

Mod-1 wind turbine generator analysis 18 p0266 N78-19631

Design data brochure: SINS prototype system 2 [NASA-CR-150558] 18 p0268 N78-19649

Indoor test for thermal performance evaluation of the Solaron (air) solar collector [NASA-CR-150572] 18 p0268 N78-19652

Performance of conventionally powered vehicles tested to an electric vehicle test procedure [NASA-TM-73768] 18 p0271 N78-20022

Multi-wire slurry wafering demonstrations --- slicing silicon ingots for solar arrays [JPL-PUB-78-37] 18 p0276 N78-20620

Baseline tests of the EPC Hummingbird electric passenger vehicle [NASA-TM-73760] 18 p0279 N78-21010

Analysis of data and results for the roundrobin flat-plate collector test program [PB-275576/7] 18 p0289 N78-21655

Indoor thermal performance evaluation of the SEPCO air collector [NASA-CR-150631] 19 p0388 N78-22466

Indoor test for thermal performance evaluation on the Sunworks (air) solar collector [NASA-CR-150666] 19 p0405 N78-24613

PERICLASE

- Outdoor thermal efficiency evaluation of the Ying solar collector [NASA-CR-150675] 19 p0405 W78-24614
- Indoor test for thermal performance evaluation on life sciences engineering (air) solar collector [NASA-CR-150665] 19 p0420 W78-25547
- Development of prototype air/liquid solar collector subsystem [NASA-CR-150703] 19 p0421 W78-25550
- Performance and testing of a stationary concentrating collector [CONF-770953-7] 19 p0429 W78-25627
- CPC thermal collector test plan [CONF-770953-6] 19 p0429 W78-25628
- Free-air performance tests of a 5-metre-diameter Darrieus turbine [SAND-77-1063] 19 p0430 W78-25632
- US Army Engineer Research and Development Laboratories five hundred hour engineering evaluation of the Stirling GPU 2-1 [GMR-2690-SECT-1.112] 19 p0437 W78-26249
- STIR-LEC 2 Stirling engine performance [GMR-2690-SECT-1.207] 19 p0438 W78-26257
- Method of tests and instructions (generator sets, Stirling engine drive) [GMR-2690-SECT-1.208] 19 p0438 W78-26258
- Stirling engine regenerator performance analysis [GMR-2690-SECT-6.003] 19 p0439 W78-26321
- Performance evaluation of a Stirling cycle heat pump [GMR-2690-SECT-7.110] 19 p0441 W78-26336
- Baseline tests of the Kordesh hybrid passenger vehicle [NASA-TN-73769] 19 p0443 W78-26551

PERICLASE

- Refractory periclase materials and means of using them in high-temperature power plants 19 p0328 W78-36566
- Study of the behavior of periclase materials in gas flows containing alkali additions --- for HHD channel linings 19 p0328 W78-36578

PERIODIC VARIATIONS

- Optimum peak-shaving mix for electric utilities 17 p0009 W78-10737

PERMEABILITY

- Measurement of the flow properties and capillary pressure relationships of certain coals pertaining to underground coal gasification [COO-4129-3] 19 p0410 W78-24680

PERTURBATION THEORY

- Destruction of magnetic surfaces near a separatrix of a stellarator attributed to perturbations of magnetic fields 18 p0217 W78-29433

PETROGRAPHY

- Liptinites and lipid substances in an oil source rock 17 p0061 W78-11458
- A petrographic classification of solid residues derived from the hydrogenation of bituminous coals 18 p0192 W78-26592

PETROLOGY

- Planning and design of additional East Mesa geothermal test facilities, phase 1B. Volume 3: Appendices [SAN/1140-1/3-VOL-3-APP] 17 p0127 W78-12545

PHASE DIAGRAMS

- Thermodynamic phase stability diagrams for the analysis of corrosion reactions in coal gasification/combustion atmospheres [EPRI-PP-539] 19 p0445 W78-26574

PHASE MODULATION

- Closed loop solar array-ion thruster system with power control circuitry [NASA-CASE-LEW-12780-1] 19 p0387 W78-22149

PHASE TRANSFORMATIONS

- Heat transfer from a horizontal plate facing upward to superposed liquid-layers with change of phase [ASME PAPER 76-WA/HT-1] 17 p0076 W78-15057
- Effects of phase-change energy storage on the performance of air-based and liquid-based solar heating systems 17 p0104 W78-19832
- Performance of the novel solar cell 19 p0372 W78-42120
- Devolatilization and desulfurization of Iowa coal 17 p0125 W78-12525

SUBJECT INDEX

PHENANTHRENE

- Hydrogenation of phenanthrene over a commercial cobalt molybdenum sulfide catalyst under severe reaction conditions --- hydrocarbon fuel from coal liquefaction 18 p0190 W78-26580

PHENOLS

- Ultrafiltration and hyperfiltration of phenolic compounds in coal gasification wastewater streams 19 p0435 W78-26007

PHOSPHORIC ACID

- Fuel cell stacks [AD-A042315] 17 p0112 W78-10566
- Improved cathodes for phosphoric acid fuel cells --- catalysts [EPRI-EM-505] 19 p0423 W78-25578

PHOTOABSORPTION

- Optical properties of solar-absorbing oxide particles suspended in a molten salt heat transfer fluid 19 p0312 W78-34513
- Sodium vapor heat pipe laser cell [AIAA 78-392] 19 p0317 W78-35587
- Selective absorption of solar energy in granular metals - The role of particle shape 19 p0369 W78-41910

PHOTOCHEMICAL REACTIONS

- NOx-O3 photochemistry in power plant plumes - Comparison of theory with observation 17 p0001 W78-10059
- Limits on the yield of photochemical solar energy conversion 17 p0079 W78-15847
- Use of transition metal compounds to sensitize a photochemical energy storage reaction 17 p0083 W78-16830
- Photochemical conversion and storage of solar energy 18 p0202 W78-27890
- Power generation by photoelectrolysis 18 p0202 W78-27892
- Photochemical production of a fuel 18 p0202 W78-27894
- Organic molecular energy storage reactions 18 p0203 W78-27896
- Photochemical storage of solar energy 18 p0206 W78-28170
- Photon energy storage in organic materials - The case of linked anthracenes 18 p0220 W78-30267
- Photoelectrochemical storage cells - The importance of the second and third electrodes 19 p0343 W78-39455
- Photochemical and photoelectrochemical routes and solar energy conversion 19 p0373 W78-42135
- Photochemical conversion and storage of solar energy /An overview/ 19 p0373 W78-42136
- Development of a practical photochemical energy storage system [SRO-893-6] 18 p0285 W78-21626
- Development of a practical photochemical energy storage system [SRO-893-8] 18 p0285 W78-21627
- Development of a practical photochemical energy storage system [SRO-893-9] 18 p0285 W78-21628
- Development of a practical photochemical energy storage system [SRO-893-10] 18 p0285 W78-21629
- Photoisomerization of bis 9-anthryl methane and other linked anthracenes: The role of excimers and biradicals in photodimerization [AD-A051336] 19 p0408 W78-24665

PHOTOCONDUCTIVITY

- Spectral characteristics of photoconverters with nonuniform distribution of defects in the base 19 p0326 W78-36134

PHOTODIODES

- Dip-coated sheet silicon solar cells 17 p0014 W78-10926
- Photosensing arrays with improved spatial resolution 18 p0204 W78-28134
- Spectral responses limitation mechanisms of a shallow junction n+/p photodiode 18 p0205 W78-28141
- Thin silicon film p-i-n photodiodes with internal reflection 18 p0205 W78-28142

SUBJECT INDEX

PHOTOSYNTHESIS

n-CdS/n-GaAs voltage-enhanced photoanode
19 p0344 A78-39467

PHOTOELECTRIC CELLS
Photocells employing smooth AlGaAs-GaAs
heterojunctions to extend the spectral response
range
17 p0062 A78-11668
Optimum efficiency of photogalvanic cells for
solar energy conversion
17 p0091 A78-17520
Power generation by photoelectrolysis
18 p0202 A78-27892
Photogalvanic processes --- for solar energy
conversion
18 p0202 A78-27893
Thermophotoelectrochemical cells for solar energy
conversion
18 p0205 A78-28169
Photoelectric radiation-density meter --- for
concentrator focal region measurement
18 p0215 A78-28892
AlGaAs-GaAs graded-heterostructure photocells with
expanded sensitivity spectrum
19 p0300 A78-33271
Spectral characteristics of photoconverters with
nonuniform distribution of defects in the base
19 p0326 A78-36134
Thin film Cds-CuI heterojunction photocells
19 p0333 A78-37260
Photoelectric properties of Cds thin films
obtained by vacuum evaporation from the
heterogeneous Cds-Cr2O3 system
19 p0333 A78-37261
Calculation of photocurrent and limit efficiency
of p-CdTe - n-CdS film-type photocells
19 p0335 A78-37944
Analysis of the characteristics of semiconductor
photocells in the 100-400 K temperature range
19 p0336 A78-37950
Photocells based on AlGaAs heterostructure with a
transition layer
19 p0341 A78-38941

PHOTOELECTRIC EFFECT
The effects of illumination on the
depletion-region recombination currents in
Schottky-barrier solar cells
17 p0026 A78-11052
Photoelectrolysis of water at high current density
- Use of ultraviolet laser excitation
17 p0062 A78-11927

PHOTOELECTRIC EMISSION
Photocurrent analysis in MIS silicon solar cells
17 p0025 A78-11048
Conversion of solar energy into electricity
18 p0261 A78-27864
Photocurrent spectroscopy of semiconductor
electrodes in liquid junction solar cells
19 p0343 A78-39456
A model for the current-voltage curve of
photoexcited semiconductor electrodes
19 p0343 A78-39457

PHOTOELECTRIC MATERIALS
High-efficiency GaAs shallow-homojunction solar
cells
17 p0062 A78-11933
Terrestrial solar cells - Present and future
18 p0177 A78-23952
A computer analysis of Ga/1-x/Al/x/As-GaAs solar
cells with multilayered window structure
19 p0313 A78-34850
Photoelectric and electric properties of nSiC-nCdS
heterojunctions
19 p0330 A78-36855
Comparative radiation resistance calculation for
graded- and constant-composition n
Al/x/Ga/1-x/As-p Al/z/Ga/1-z/As solar cells
19 p0338 A78-38551
Stabilization of n-type semiconductors to
photoanodic dissolution by competitive electron
transfer processes
19 p0343 A78-39462
Optimal electrode properties and the selection of
stabilizing electrolytes --- for
photoelectrolytic hydrogen production
19 p0344 A78-39470

PHOTOELECTRICITY
A new description of electrochemical kinetics
19 p0343 A78-39459

Competitive oxidation at semiconductor photoanodes
19 p0344 A78-39466
Status of photoelectrochemical production of
hydrogen and electrical energy
19 p0451 A78-26665

PHOTO GEOLOGY
The significance of an arc shaped dark patch on
the Nimbus III /HRIR/ imagery of India
17 p0082 A78-16507

PHOTOINTERPRETATION
The application of LANDSAT-1 imagery for
monitoring strip mines in the new river
watershed in northeast Tennessee, part 2
[E78-10032]
17 p0125 A78-12506

PHOTOLUMINESCENCE
Materials for luminescent greenhouse solar
collectors
17 p0002 A78-10171

PHOTOLYSIS
Potentials of hydrogen production through
biophotolysis
17 p0034 A78-11125
Catalytic and structural properties of the enzyme
hydrogenase and its role in biophotolysis of water
--- for hydrogen fuel production
18 p0207 A78-28354
Use of an enzymic electric cell and immobilized
hydrogenase in the study of the biophotolysis of
water to produce hydrogen
18 p0207 A78-28355
The mechanism of hydrogen photoevolution in
photosynthetic organisms
18 p0207 A78-28356
Mutational analysis of Chlamydomonas reinhardtii -
Application to biological solar energy conversion
18 p0207 A78-28357
Hydrogen photoproduction from water
18 p0207 A78-28358
Improved solar photolysis of water
[NASA-CASE-NPO-14126-1]
17 p0120 A78-11500

PHOTOGRAPHING
Industrial use of geological remote sensing from
space
17 p0075 A78-14787

PHOTONETERS
A low cost, portable instrument for measuring
emittance
17 p0061 A78-11392
A device with a sectioned photodetector and a
laser transmitter for determining the precision
characteristics of solar energy concentrators
19 p0326 A78-36137

PHOTON BEAMS
Photon degradation of electron and proton
irradiated silicon solar cells
17 p0015 A78-10940

PHOTONS
Solar cell collector
[NASA-CASE-LEW-12552-1]
19 p0419 A78-25527
Photon degradation effects in terrestrial solar
cells
[NASA-TN-78924]
19 p0421 A78-25551

PHOTOSYNTHESIS
Potentials of hydrogen production through
biophotolysis
17 p0034 A78-11125
Hydrogen from sunlight: The biological answer -
Development of a low-cost biological solar panel
17 p0056 A78-11350
Photosynthetic and water efficiency of Salicornia
pestifer --- tumbleweeds for biomass energy
production
17 p0056 A78-11352
Hydrocarbons via photosynthesis
17 p0074 A78-14688
The problem of photosynthetic hydrogen
17 p0095 A78-18521
Energy resources offered by natural photosynthesis
18 p0197 A78-27790
Solar production of hydrogen
18 p0201 A78-27868
Will photosynthesis solve the energy problem
18 p0202 A78-27891
Ultrathin barriers and solar energy conversion ---
photosynthetic pigmented bilayer lipid membrane
18 p0203 A78-27895

- Photohydrogen production in green algae - Water serves as the primary substrate for hydrogen and oxygen production 18 p0207 A78-28352
- Hydrogen production by marine photosynthetic organisms as a potential energy resource 18 p0207 A78-28353

PHOTOVOLTAIC CONVERSION

Photovoltaic highway applications: Assessment of the near-term market
[NASA-TM-73863] 18 p0252 N78-17935

Double-sided solar cell package
[NASA-CASP-NPO-14199-1] 19 p0389 N78-22470

Energy requirement for the production of silicon solar arrays
[NASA-CR-157071] 19 p0407 N78-24643

Array, automated assembly, phase 2
[NASA-CR-157057] 19 p0407 N78-24650

DOE LeRC photovoltaic systems test facility
[NASA-TM-78923] 19 p0443 N78-26549

Impact of Balance Of System (BOS) costs on photovoltaic power systems
[NASA-TM-78939] 19 p0443 N78-26550

Description and status of NASA-LeRC/DOE photovoltaic applications systems
[NASA-TM-78936] 19 p0444 N78-26554

An inverter/controller subsystem optimized for photovoltaic applications
[NASA-TM-78903] 19 p0452 N78-26995

Solar photovoltaic systems
19 p0457 N78-27523

Silicon photovoltaic cells in TPV conversion
[EPRI-EE-633] 19 p0461 N78-27567

Heterostructure single crystal silicon photovoltaic cell. Type A: Semiconductor heterojunction silicon devices
[TID-27910] 19 p0462 N78-27579

PHOTOVOLTAIC CONVERSION

Cost factors in photovoltaic energy conversion with solar concentration
17 p0004 A78-10619

Photovoltaic Specialists Conference, 12th, Baton Rouge, La., November 15-18, 1976, Conference Record
17 p0012 A78-10902

The tubular silicon solar cell - A new concept for photovoltaic power generation
17 p0014 A78-10927

High efficiency solar cells
17 p0016 A78-10953

Model of the CdS/Cu₂S heterojunction
17 p0017 A78-10974

Recent results on II-VI heterojunctions for photovoltaic solar energy conversion
17 p0018 A78-10983

The current status of the U.S. photovoltaic conversion program
17 p0020 A78-10998

Status of the ERDA photovoltaic material and device studies
17 p0020 A78-10999

The solar energy research programme of the Commission of the European Communities
17 p0020 A78-11000

French activities in the field of photovoltaic power conversion for terrestrial use
17 p0020 A78-11001

Status of the West German terrestrial photovoltaic program
17 p0020 A78-11002

Photovoltaic system in 'Sunshine Project' - R & D underway in Japan
17 p0020 A78-11004

Major terrestrial applications for photovoltaic solar energy conversion in the 1980-2000 period
17 p0020 A78-11006

Nominal cost and performance objectives for photovoltaic panels in nonconcentrating central station applications
17 p0021 A78-11007

Solar photovoltaic conversion electric utility point of view and development role
17 p0021 A78-11008

Status of the ERDA photovoltaic systems definition project
17 p0021 A78-11009

Computer simulation of photovoltaic systems
17 p0021 A78-11010

Performance and cost assessment of photovoltaic system concepts
17 p0021 A78-11011

Technical and economic results of solar photovoltaic power systems analyses
17 p0021 A78-11012

Photovoltaic system design and analysis application to a shopping center
17 p0022 A78-11013

Status of the ERDA/NASA Photovoltaic Tests and Applications Project
17 p0022 A78-11014

The conceptual design and analysis of a photovoltaic powered experimental residence
17 p0022 A78-11015

DOD/ERDA terrestrial photovoltaic systems demonstration program
17 p0022 A78-11016

The Redox Flow System for solar photovoltaic energy storage
17 p0022 A78-11019

Novel versions of the compound parabolic concentrator for photovoltaic power generation
17 p0023 A78-11024

Thermophotovoltaic systems for electrical energy conversion
17 p0023 A78-11031

A tracking, high-concentration electrical and thermal solar energy collection system
17 p0024 A78-11032

Some economic and political aspects of photovoltaic development
17 p0024 A78-11034

Cost of earth power from photovoltaic power satellite
17 p0024 A78-11035

A simple model for solar energy economics in the U.K.
17 p0024 A78-11037

Tandem photovoltaic solar cells and increased solar energy conversion efficiency
17 p0027 A78-11059

Technoeconomic aspects of photovoltaic electric power systems /PEPS/
17 p0031 A78-11098

Solar photovoltaic power stations
17 p0054 A78-11335

Characteristics of solar cells designed for concentrator systems
17 p0054 A78-11337

Residential photovoltaic prototype system definition study
17 p0054 A78-11338

Experimental investigation of a solar cell/inverter system
17 p0054 A78-11339

The application of color response data of silicon cells for improving photovoltaic efficiency
17 p0055 A78-11341

Estimated cost of electricity produced by four types of compound parabolic concentrators
17 p0055 A78-11342

Near term commercial uses for terrestrial photovoltaics
17 p0057 A78-11361

Evaluation of the CdS/CdTe heterojunction solar cell
17 p0062 A78-11815

Solar panels BPX47A for terrestrial applications
17 p0071 A78-13984

Self-supporting active solar energy system
17 p0078 A78-15411

Limits on the yield of photochemical solar energy conversion
17 p0079 A78-15847

Semiconductor materials for photovoltaic conversion
17 p0080 A78-16128

The prospects for photovoltaic conversion
17 p0081 A78-16276

Technoeconomic aspects of central photovoltaic power plants
17 p0084 A78-16835

A Fokker-Planck analysis of photovoltaic systems
18 p0173 A78-22841

Procedure for minimizing the cost per watt of photovoltaic systems

magnetohydrodynamic spectrum of an axisymmetric
plasma
18 p0231 A78-32067
- Surface and impurity studies in ORMAK and ISX ---
tokamaks
19 p0378 A78-42210

PLASMA SPUTTERING

- Analytical investigation of thermal barrier
coatings for advanced power generation
combustion turbines
[ASME PAPER 77-WA/ENER-13]
19 p0298 A78-33151
- Friction and wear of several compressor gas-path
seal movements
[NASA-TP-1128]
17 p0158 A78-15229

PLASMA TEMPERATURE

- Temperature sheaths on probes or electrodes in MHD
plasmas
19 p0336 A78-38108
- Plasma edge cooling during RF heating
19 p0342 A78-39389

PLASMA TURBULENCE

- Turbulence theory for the dissipative trapped
electron instability --- in tokamak toroidal
devices
19 p0382 A78-42487

PLASMA WAVES

- Collapse of Alfvén waves
18 p0224 A78-31008

PLASMA-ELECTROMAGNETIC INTERACTION

- Integral characteristics of an induction MHD
device at large parameters of electromagnetic
interaction
18 p0204 A78-28087
- Intensity dependence of inverse bremsstrahlung
absorption in an inhomogeneous standing wave
19 p0332 A78-37139

PLASMA-PARTICLE INTERACTIONS

- Long-time-scale simulation of resonant particle
effects in Langmuir and whistler waves
18 p0231 A78-32068
- Measurements of high-energy deuterons in the
plasma-focus device
18 p0235 A78-32439
- Intense relativistic electron-beam trajectories
and their effect on beam heating of toroidally
confined plasma
19 p0310 A78-34237
- Microchannel plate response to hard X-rays --- for
imaging recompression beam fuel pellet implosion
19 p0360 A78-40267

PLASMAS (PHYSICS)

- Major features of D-T Tokamak fusion reactor systems
[EPRI-472-1]
17 p0147 A78-13903
- High magnetic field MHD generator program
[FE-2341-1]
18 p0245 A78-16874

PLASMATRONS

- Development of fast neutral beam injectors at
Fontenay-aux-Roses
17 p0012 A78-10879

PLASTIC COATINGS

- Technique of testing silazane coatings --- for
solar concentrators
19 p0331 A78-36859

PLASTICIZERS

- Inorganic-organic separators for alkaline batteries
[NASA-CASE-LEW-12649-1]
19 p0419 A78-25530

PLASTICS

- Radiation heat losses in solar collectors with
plastic covers
19 p0316 A78-35362

PLATINUM

- Optimization of PtDoped Kocite: Electrodes in
H3PO4 fuel cells
[AD-A053300]
19 p0422 A78-25562

PLUMES

- NOx-O3 photochemistry in power plant plumes -
Comparison of theory with observation
17 p0001 A78-10059

SUBJECT INDEX

POLLUTION CONTROL

Comparison of calculated and observed characteristics of plumes from two coal-fired power plants located in complex terrain 18 p0167 A78-21821

Conversion rates of SO₂ to submicron sulfate in the plume of a coal-fired power plant in the western United States [APCA PAPER 77-39,1] 18 p0185 A78-25412

A study of production and growth of sulfate particles in plumes from a coal-fired power plant 19 p0366 A78-41251

Nuclei formation rates in a coal-fired power plant plume 19 p0366 A78-41253

Aerosol size distributions and aerosol volume formation for a coal-fired power plant plume 19 p0366 A78-41254

Sulfur budget of a power plant plume 19 p0366 A78-41275

Oxidant measurements in western power plant plumes. Volume 1: Technical analysis [EPRI-EA-421-VOL-1] 19 p0400 A78-23614

PLUTONIUM OXIDES

General-purpose heat source project, space nuclear safety program, and radioisotopic terrestrial safety program --- plutonium oxide radioisotopic power systems [LA-7184-PR] 19 p0467 A78-27898

PLUTONIUM 238

General-purpose heat source project, space nuclear safety program, and radioisotopic terrestrial safety program --- plutonium oxide radioisotopic power systems [LA-7184-PR] 19 p0467 A78-27898

PNEUMATIC CONTROL

The Petrocarb pneumatic feeding system: A proven method for feeding particulate solids at controlled rates --- for coal gasification systems 17 p0131 A78-13243

POINTING CONTROL SYSTEMS

Parabolic collector for total energy systems application 17 p0059 A78-11376

Solar energy collector orientation and tracking mode 17 p0104 A78-19827

Steering a field of mirrors using a shared computer-based controller --- for solar array and heliostat application 19 p0312 A78-34516

An automatic alignment system for a multibeam laser system --- for use in fusion reactors 19 p0359 A78-40222

Diffraction analysis for multiple-beam pellet irradiance 19 p0360 A78-40225

POLARONS

A new description of electrochemical kinetics 19 p0343 A78-39459

POLICIES

Domestic energy resource and reserve estimates: Uses, limitations, and needed data [PB-268966/9] 17 p0115 A78-10590

POLITICS

Some economic and political aspects of photovoltaic development 17 p0024 A78-11034

Legal, political, and environmental aspects of Ocean Thermal Energy Conversion - A report on an ASIL/ERDA study 19 p0301 A78-33308

Political and economic justification for immediate realization of a syn fuels industry 19 p0310 A78-34225

Utilization requirements. A southern California Gas Company project SAGE report: Utilization requirements [NASA-CR-155948] 18 p0264 A78-19612

Political and legal implications of developing and operating a satellite power system [NASA-CR-157077] 19 p0412 A78-25003

POLLUTION CONTROL

A history of flue gas desulfurization systems since 1850 - Research, development and demonstration 17 p0003 A78-10502

Supervisory and transmission system for the control of atmospheric pollution in areas surrounding thermoelectric plants 17 p0065 A78-12936

Air pollution control and clean energy --- Book 17 p0066 A78-12999

Influence of combustion chamber geometry on toxic compound emissions 17 p0067 A78-13169

Electric utility applications of fabric filters --- for pollution control 17 p0073 A78-14155

Pollution abatement energy usage of gas treating and processing plants 17 p0073 A78-14161

Keeping oil out of the marine environment 17 p0073 A78-14170

Critical paths to coal utilization 17 p0075 A78-14690

French policy in the area of the campaign against atmospheric pollution 17 p0082 A78-16473

Combustion treatment of smoke and odors of industrial origin - Energy recovery 17 p0082 A78-16475

Synthetic fuels and combustion 17 p0082 A78-16637

An electrifying experience - Electric vehicles in the Postal Service [EVC PAPER 7750] 17 p0085 A78-16927

A study of the formation of unspammable residues of crude oil on tankers for the purpose of preventing marine pollution 17 p0093 A78-18050

Aspects relative to security and environment in the production and use of hydrogen in the new Esso refinery at Antwerp 17 p0101 A78-18854

Sulfur control for coal combustion 18 p0182 A78-24762

An evaluation of control strategies for SO₂ emissions from petroleum refineries [APCA PAPER 77-43,1] 18 p0184 A78-25380

Improving the emission performance of vehicles in the field [APCA PAPER 77-3,4] 18 p0184 A78-25386

Control of fine particulate from coal-fired utility boilers [APCA PAPER 77-14,1] 18 p0185 A78-25410

Coal dryer emission control with the energy saving centripetal vortex wet scrubber [APCA PAPER 77-17,5] 18 p0185 A78-25424

Economic comparison of selected scenarios for electrostatic precipitators and fabric filters [APCA PAPER 77-14,2] 18 p0186 A78-25445

Studies to define the role of coal cleaning in an SO₂ control strategy for TVA [APCA PAPER 77-14,4] 18 p0186 A78-25446

Technical and economic impacts of the application of environmental control technology options [APCA PAPER 77-56,4] 18 p0186 A78-25447

Retrofit precipitators meet rigid new standards --- sulfur coal combustion 18 p0189 A78-26475

Bergbau-Forschung process for the desulfurization of flue gas 18 p0223 A78-30708

The role of a carbon burnup cell in reducing SO₂ emissions from fluidized-bed coal combustion plants [WSS/CI PAPER 77-30] 18 p0230 A78-31968

Environmental technology '77: Proceedings of the Twenty-third Annual Technical Meeting, Los Angeles, Calif., April 25-27, 1977 18 p0231 A78-32101

Startup and operation of the Research-Cottrell/Bahco scrubber for removal of SO₂ and particulates from flue gas at Rickenbacker Air Force Base, Columbus, Ohio 18 p0232 A78-32108

The utilization of LaNi₅ as a hydrogen-storage medium for heat engines 18 p0233 A78-32193

The electric way ahead for road transport 19 p0292 A78-32652

Evaluation of two industrial boilers with combustion modifications for reduced pollutant emissions [ASHE PAPER 77-WA/APC-1] 19 p0297 A78-33126

Fume formation in ammonia scrubbers [ASHE PAPER 77-WA/APC-2] 19 p0297 A78-33127

Factors detrimental to electrostatic precipitator performance
[ASME PAPER 77-WA/APC-7] 19 p0297 A78-33130

SO₂ control technologies - Commercial availabilities and economics 19 p0310 A78-34224

Thermal refuse treatment --- waste incineration 19 p0315 A78-34973

Dispersion and control of atmospheric emissions: New-energy-source pollution potential --- From AIChE meetings 19 p0320 A78-35676

Methods and costs of controlling sulfur emissions from a petroleum refinery 19 p0320 A78-35698

A systematic approach to the problem of characterizing the emission potential of energy conversion processes --- coal gasification pollution potentials 19 p0320 A78-35699

Prediction of air quality impacts for a commercial shale oil complex 19 p0320 A78-35700

Methanol - A boiler fuel alternative 19 p0321 A78-35704

Evaluation of NO_x/ emission characteristics of alcohol fuels for use in stationary combustion systems 19 p0321 A78-35705

Hydrogen sulfide as an air pollutant 19 p0337 A78-38245

Efficiency and reliability of sulfur dioxide scrubbers 19 p0384 A78-42906

Economic analysis of vapor recovery systems on small bulk plants [PB-269884/3] 17 p0117 A78-10636

Aircraft engine emissions --- conference [NASA-CP-2021] 17 p0118 A78-11063

The status of flue gas desulfurization - applications in the United States: A technological assessment, highlights [PB-271361/8] 17 p0128 A78-12560

The status of flue gas desulfurization - applications in the United States: A technological assessment, report in full [PB-271362/6] 17 p0128 A78-12561

Performance analysis of a modified internal combustion engine [AD-A045378] 17 p0135 A78-13442

Cyanide removal from petroleum refinery wastewater using powdered activated carbon [PB-270862/6] 17 p0146 A78-13650

Burner design criteria for NO_x control from low-Btu gas combustion. Volume 1: Ambient fuel temperature [PB-272614/9] 17 p0163 A78-15607

Energy consumption of environmental controls: Fossil fuel, steam electric generating industry [PB-273019/0] 18 p0244 A78-16476

Operation and maintenance of particulate control devices on coal-fired utility boilers [PB-274104/9] 18 p0251 A78-17505

Advanced fossil fuel and the environment: An executive report [PB-274541/2] 18 p0261 A78-18587

Proceedings of the 2d Stationary Source Combustion Symposium. Volume 5: Addendum [PB-274897/8] 18 p0261 A78-18590

Environmental assessment of low/medium Btu gasification [PB-276580/8] 18 p0281 A78-21325

Particulate control highlights: Research on electrostatic precipitator technology [PB-276643/4] 19 p0391 A78-22495

Development of a high-temperature/high-pressure electrostatic precipitator [PB-276626/9] 19 p0391 A78-22497

Supportive studies in fluidized-bed combustion [PB-276974/3] 19 p0399 A78-23604

Environmental, health, and control aspects of coal conversion: An information overview, volume 2 [ORNL/EIS-95-VOL-2] 19 p0411 A78-24697

Effective control of secondary water pollution from flue gas desulfurization systems [PB-278373/6] 19 p0450 A78-26645

A national environmental/energy workforce assessment, business and industry, phase 1 [PB-277904/9] 19 p0452 A78-26968

A national environmental/energy workforce assessment, national legislation, phase 1 [PB-277905/6] 19 p0452 A78-26969

A national environmental/energy workforce assessment, national abstract [PB-277906/4] 19 p0452 A78-26970

Supercritical fuel injection system [NASA-CASE-LEW-12990-1] 19 p0453 A78-27122

First order estimates of energy requirements for pollution control [PB-278274/6] 19 p0465 A78-27608

EPA utility PGD (Flue Gas Desulfurization) survey: December 1977 - January 1978 [PB-279011/1] 19 p0466 A78-27622

Flue gas desulfurization system capabilities for coal-fired steam generators. Volume 2: Technical report [PB-279417/0] 19 p0467 A78-27659

Effects of alternative new source performance standards on flue gas desulfurization system supply and demand [PB-279080/6] 19 p0467 A78-27661

POLLUTION MONITORING

Instrumental sensing of stationary source emissions --- sulphur dioxide remote sensing for coal-burning power plants 17 p0001 A78-10056

NO_x-O₃ photochemistry in power plant plumes - Comparison of theory with observation 17 p0001 A78-10059

Comparison of levels of trace elements extracted from fly ash and levels found in effluent waters from a coal-fired power plant 17 p0001 A78-10062

Supervisory and transmission system for the control of atmospheric pollution in areas surrounding thermoelectric plants 17 p0065 A78-12936

Pollutant measurements in a methanol furnace [WSS/CI PAPER 77-8] 17 p0081 A78-16339

Pollutant measurements in laboratory pulverized coal combustor and gasifier 17 p0081 A78-16348

Oil in the ocean - Circumstances control its impact 17 p0087 A78-17262

Estimates of smoke and sulphur dioxide pollution from fuel combustion in the United Kingdom for 1975 and 1976 17 p0097 A78-18819

Energy resource development - The monitoring components 17 p0104 A78-19616

A continuous monitoring system for sulfur dioxide mass emissions from stationary sources [APCA PAPER 77-27,5] 18 p0185 A78-25400

Physical and morphological studies of size-classified coal fly ash 18 p0222 A78-30555

Remote monitoring of the Gravelly Run thermal plume at Hopeville and the thermal plume at the Surry nuclear power plant on the James River 19 p0313 A78-34905

Electricity generation by utilities - 1974 nationwide emissions estimates 19 p0320 A78-35701

Hydrogen sulfide as an air pollutant 19 p0337 A78-38245

Sulphur emissions in Europe 19 p0366 A78-41267

Energy requirements for municipal pollution control facilities [PB-276989/1] 19 p0401 A78-24003

Introductory workshops on remote sensing as related to geological problems in Georgia [E78-10152] 19 p0455 A78-27482

POLYAMIDE RESINS

El Dorado micellar-polymer demonstration project report --- oil recovery [BREC/TPR-77/12] 19 p0413 A78-25225

POLYCRYSTALS

Low cost solar cells based on large area unconventional silicon 17 p0013 A78-10918

Efficiency calculations for thin film polycrystalline semiconductor Schottky barrier solar cells 17 p0013 A78-10920

Vacuum deposited polycrystalline silicon solar cells 17 p0013 A78-10921

SUBJECT INDEX

POWER EFFICIENCY

- Single crystal and polycrystalline GaAs solar cells using AMOS technology 17 p0025 A78-11044
- The structure and Schottky barrier diode properties of polycrystalline GaAs films grown by the close spaced vapour transport technique on Mo substrates 17 p0027 A78-11060
- Polycrystalline thin film Cds/CdTe solar cells 18 p0225 A78-31210
- Polycrystalline silicon p-n junctions --- fabrication of low cost solar cells 19 p0334 A78-37467
- Process for utilizing low-cost graphite substrates for polycrystalline solar cells [NASA-CASE-GSC-12022-2] 19 p0405 N78-24609
- POLYETHYLENES**
- Development of a freeze-tolerant solar water heater using crosslinked polyethylene as a material of construction [COO-2956-5] 17 p0162 N78-15584
- POLYMER PHYSICS**
- Dielectric relaxation in polymers at low temperatures 17 p0148 N78-14170
- POLYMERIC FILMS**
- Material and design considerations of encapsulants for photovoltaic arrays in terrestrial applications 17 p0016 A78-10951
- Teflon PEP fluorocarbon film for flat plate solar collectors 17 p0042 A78-11218
- Conceptual design of large scale water electrolysis plant using solid polymer electrolyte technology 18 p0174 A78-22869
- Study of physicochemical processes in fabrication of reflectors from polymer materials --- coat bond in foam-film solar concentrator 18 p0215 A78-28895
- POLYMERS**
- Investigations of the effects of shear degradation on the rheological behavior of ultra-high molecular weight water soluble polymers as applied to enhance oil recovery 18 p0237 N78-16171
- North Stanley polymer demonstration project [COO-0029-1] 19 p0394 N78-23539
- Study to determine the technical and economic feasibility of reclaiming chemicals used in micellar polymer and low tension surfactant flooding [FE-2600-1] 19 p0402 N78-24325
- Study to determine the technical and economic feasibility of reclaiming chemicals used in micellar polymer and low tension surfactant flooding [FE-2600-2] 19 p0402 N78-24326
- Bell Creek Field micellar-polymer pilot demonstration [BERC/TFR-77/13] 19 p0413 N78-25226
- Pilot demonstration-enhanced oil recovery by micellar-polymer waterflooding Bell Creek Field [COO-4207-14] 19 p0418 N78-25510
- Pilot demonstration of enhanced oil recovery by micellar polymer waterflooding, phase B [SAN/1395-15] 19 p0455 N78-27498
- POLYSTYRENE**
- Solar energy reflector using metallised polystyrene 19 p0371 A78-42110
- POLYURETHANE FOAM**
- The stability of polyurethane foam solar energy collectors to climatic effects 18 p0187 A78-25738
- PONDS**
- The application of LANDSAT-1 imagery for monitoring strip mines in the new river watershed in northeast Tennessee, part 2 [E78-10032] 17 p0125 N78-12506
- POPULATIONS**
- Conference proceedings: A critical economic balance: Water, land, energy, people [PB-274089/2] 18 p0253 N78-17944
- POROUS MATERIALS**
- Lift on a rotating porous cylinder --- with application to wind power generation 18 p0167 A78-21633
- Investigation of hydrodynamic flows of a heat transfer fluid in zones of artificial porosity 18 p0172 A78-22537
- Variational irreversible thermodynamics of heat and mass transfer in porous solids - New concepts and methods 19 p0313 A78-34603
- Calculation of porous-particle combustion --- coal for MHD generators 19 p0315 A78-35052
- Geothermal energy-related problems of natural convection in porous media 19 p0393 N78-23378
- PORTABLE EQUIPMENT**
- Evaluation of portable optical property measurement equipment for solar selective surfaces [ASME PAPER 77-WA/SOL-1] 19 p0299 A78-33189
- Study of high power, high performance portable MHD generator power supply systems [AD-A040381] 17 p0111 N78-10560
- POSITION (LOCATION)**
- Effects of rotor location, coning, and tilt on critical loads in large wind turbines 18 p0267 N78-19636
- POTABLE WATER**
- Energy and water --- energy resources correlation with fresh water availability 18 p0175 A78-23562
- Prototype solar heating and cooling systems, including potable hot water [NASA-CR-150576] 18 p0263 N78-19601
- POTENTIAL ENERGY**
- Storage of solar energy 18 p0201 A78-27865
- Salt domes - Is there more energy available from their salt than from their oil --- salinity gradient energy due to osmotic pressure difference 18 p0217 A78-29623
- POTENTIAL FLOW**
- Land contouring to optimize wind power [AIAA PAPER 78-279] 18 p0166 A78-20786
- POTENTIAL GRADIENTS**
- Some studies on a solid-state sulfur probe for coal gasification systems 19 p0310 A78-34273
- POWDER (PARTICLES)**
- Investigation of the dynamics of melting processes in a solar furnace 19 p0336 A78-37949
- POWER AMPLIFIERS**
- The development and prospects of power transistors used for the conversion of energy 17 p0081 A78-16353
- Design of the power amplifier for the HELPL at LASL --- High Energy Gas Laser Facility 19 p0349 A78-39861
- POWER CONDITIONING**
- International Pulsed Power Conference, Texas Tech University, Lubbock, Tex., November 9-11, 1976, Proceedings 17 p0007 A78-10676
- Terawatt pulse power systems utilizing inductive storage 17 p0008 A78-10701
- The evolution of pulsed power --- voltage generator fusion reactor applications 17 p0008 A78-10709
- Betz type limitation of vortex wind machines 17 p0093 A78-18090
- Power conditioning systems for high-power, airborne, pulsed applications 18 p0174 A78-23412
- The beamed power microwave transmitting antenna 19 p0340 A78-38841
- A 25 megajoule energy storage and delivery system for the Shiva laser 19 p0351 A78-39920
- Photovoltaic village power application: Assessment of the near-term market [NASA-TN-73893] 18 p0267 N78-19643
- POWER EFFICIENCY**
- Albedo contribution to satellite solar array performance 17 p0019 A78-10990
- Improved Helios cell output --- solar generator power efficiency 17 p0019 A78-10995

POWER GAIN

SUBJECT INDEX

- An analysis of optimum loading conditions for P-N junction solar cells 17 p0030 A78-11092
- The technical evaluation of transport drive systems 17 p0067 A78-13422
- The potential for power production by large dispersed arrays of wind turbines 18 p0168 A78-22227
- Some results of applying the MHD method in power engineering 18 p0204 A78-28086
- Superconducting machines --- homopolar d.c. machines and a.c. generators 18 p0225 A78-31154
- Power increase from solar cells under pyramidal-horn type concentrator 19 p0372 A78-42125
- The influence of blade thickness on the output of vertical axis wind turbines 19 p0381 A78-42417
- Calculation of the geometry and performance of a high-speed wind rotor 19 p0382 A78-42419
- Baseload reliability in a combustion turbine 19 p0385 A78-43101
- Study of the manufacturing costs of lead-acid batteries for peaking power [CONS/2114-2] 17 p0114 A78-10583
- The Goddard Space Flight Center high efficiency cell development and evaluation program 17 p0136 A78-13529
- Evaluation of a photovoltaic central power station [CONF-770403-8] 17 p0141 A78-13582
- Energetic evaluation of the hybrid tunnel principle and possibilities of efficiency improvement --- wind/tow tunnel combination 18 p0246 A78-17011
- POWER GAIN**
- The use of built form to enhance the output of wind collectors 17 p0107 A78-20478
- POWER LINES**
- Electrical energy transmission for OTEC power plants 19 p0301 A78-33310
- POWER PLANTS**
- Heat optimization for solar power plants - Concentration of radiation and the temperature of the working medium 17 p0064 A78-12392
- Comparative analysis of the geometrical characteristics of solar power plant boilers 17 p0064 A78-12393
- Specifics of heat exchanger design for a 2000-MW dual cycle, MHD Topping-Steam Bottoming power plant [ASME PAPER 77-HT-61] 17 p0090 A78-17493
- Solar power stations 17 p0092 A78-17673
- Economic energy utilization by means of remote heating 17 p0093 A78-18025
- The tokamak - Model T fusion reactor 18 p0217 A78-29620
- Corrosion and biofouling on an Ocean Thermal Energy Conversion power plant - What are the questions 19 p0305 A78-33343
- Potential of open cycle OTEC - A general survey --- Ocean Thermal Energy Conversion 19 p0305 A78-33347
- High temperature thermal energy storage, including a discussion of TES integrated into power plants --- Book 19 p0311 A78-34468
- Thermal optimization of solar power plants - Radiation concentration and working-fluid temperature 19 p0332 A78-36869
- Comparative analysis of geometric characteristics of solar power plant boilers 19 p0332 A78-36870
- Experimental study of the joint operation of wind- and solar-plants 19 p0336 A78-37948
- Study of practical cycles for geothermal power plants [COO-2619-1] 18 p0288 A78-21651
- Corrosion of iron-base alloys versus alternate materials in geothermal brines [PNL-2456] 19 p0454 A78-27264
- POWER SPECTRA**
- Modal analysis of the first production design heliostat used at the Solar Thermal Test Facility (STTF) [SAND-77-1393] 19 p0410 A78-24686
- POWER SUPPLIES**
- Inductor network development for aircraft high power supplies [AD-A052750] 19 p0413 A78-25096
- Prediction of thermoelectric battery power and voltage for a 15 year lifetime MB-75 MW (B) battery [GA-A-14718] 19 p0446 A78-26576
- POWER SUPPLY CIRCUITS**
- The poloidal field circuit in the Joint European Torus /JET/ 17 p0039 A78-11177
- Large Tokamak power supplies - A survey of problems and solutions 17 p0041 A78-11205
- Superconducting magnetic energy storage 17 p0074 A78-14649
- Voltage-regulation requirements in power-supply centers in the case of nonuniform user-loads 18 p0189 A78-26265
- Closed loop solar array-ion thruster system with power control circuitry [NASA-CASE-LBN-12780-1] 19 p0387 A78-22149
- POWER TRANSMISSION**
- Dynamics of drive systems for wind energy conversion 18 p0266 A78-19633
- POWERED LIFT AIRCRAFT**
- Some aspects of powerplant airframe integration affecting fuel conservation 18 p0226 A78-31304
- PRECIPITATION (METEOROLOGY)**
- A preliminary numerical study into the effects of coal development on cloud and precipitation processes to the northern Great Plains 19 p0386 A78-43291
- Strategic petroleum reserve. Texoma group salt domes. Draft environmental impact statement. Volume 4, appendices D-S: West Hackberry expansion, Black Bayou, Vinton, Big Hill [FEA/S-77/323-VOL-4] 19 p0391 A78-22490
- PREDICTION ANALYSIS TECHNIQUES**
- Outline for a hydrogen economy in 1985-2000 17 p0100 A78-18848
- Solar energy availability prediction from climatological data 18 p0199 A78-27854
- Project Independence Evaluation System (PIES) documentation. Volume 14: A users guide [PB-268850/5] 17 p0116 A78-10599
- Impurity gradients and high efficiency solar cells 17 p0136 A78-13531
- Flutter of Darrieus wind turbine blades 18 p0265 A78-19624
- Kinetic model for predicting the composition of chlorinated water discharged from power plant cooling systems [CONF-771070-1] 19 p0411 A78-24695
- Computer model for refinery operations with emphasis on jet fuel production. Volume 3: Detailed systems and programming documentation [NASA-CR-135335] 19 p0414 A78-25235
- Prediction of thermoelectric battery power and voltage for a 15 year lifetime MB-75 MW (B) battery [GA-A-14718] 19 p0446 A78-26576
- Impact of selected energy conservation technologies on baseline demands [BRL-50745] 19 p0463 A78-27591
- PREDICTIONS**
- Power conversion system of the 21st century [CONF-770448-1] 17 p0155 A78-14672
- PREHEATED FLAMES**
- The microstructure of pulverized coal-air flames. I - Stabilization on small burners and direct sampling techniques 17 p0078 A78-15829
- Investigation of combustion stability in an MHD-generator combustion chamber 19 p0292 A78-32715

PRESSURE DISTRIBUTION

Acceleration nozzles of MHD generators with deformation of supersonic flow 17 p0002 A78-10244

On pressure and heat flux distribution along magnetohydrodynamic generator channel-diffuser systems 17 p0128 A78-12837

Evaluation of stresses in tubes with external heat flux and internal pressurization [GHR-2690-SECT-3.204] 19 p0439 A78-26294

PRESSURE GRADIENTS

Computer techniques to aid in the interpretation of subsurface fluid-pressure gradients [PB-268603/8] 17 p0110 A78-10546

PRESSURE OSCILLATIONS

Probe-tube microphone for pressure-fluctuation measurements in harsh environments 17 p0077 A78-15155

PRESSURE PULSES

Some results of investigation of pressure fluctuations in a condensing injector --- for liquid metal MHD generator 17 p0066 A78-13154

Experimental investigation of pulsating modes of combustion in the combustion chambers of the U-25 plant --- energy converter for MHD generator 17 p0066 A78-13156

Pulse test analysis of vertically fractured wells [ORO-8036-5] 19 p0418 A78-25511

PRESSURE REDUCTION

Thermal energy storage Stirling engine power plants 1: Calculated heat transfer and pressure drop across ground power unit heater assemblies [GHR-2690-SECT-7.104] 19 p0440 A78-26330

PRESSURE REGULATORS

EBV ball-valve stem failure: Synthane coal-gasification pilot plant, failure analysis report [ANL/MSD/FE-77-4] 19 p0404 A78-24559

PRESSURE SENSORS

Probe-tube microphone for pressure-fluctuation measurements in harsh environments 17 p0077 A78-15155

PRESSURE VESSEL DESIGN

A design and producibility study of heat exchangers for Ocean Thermal Energy Conversion systems 19 p0304 A78-33340

PRESSURE VESSELS

A pressurized-liquid concept for solar-thermal energy storage 19 p0364 A78-40819

PRIMARY BATTERIES

Current efficiency in the lithium-water battery 17 p0095 A78-18410

Primary lithium organic electrolyte battery BA - 5598 ()/U [AD-A042799] 17 p0112 A78-10568

PRINTED CIRCUITS

Fired through printed contacts on antireflection coated silicon terrestrial solar cells 17 p0016 A78-10956

PRIORITIES

Priority treatment for high occupancy vehicles: Project status report --- bus and carpool lanes [PB-270529/1] 17 p0129 A78-12907

PRISMS

Analytical and experimental study of total internal reflection prismatic panels for solar energy concentrators 17 p0060 A78-11389

PROBABILITY DENSITY FUNCTIONS

A Fokker-Planck analysis of photovoltaic systems 18 p0173 A78-22841

PROBABILITY DISTRIBUTION FUNCTIONS

Probability distribution of bids on outer continental shelf oil and gas leases [LA-7190-NS] 19 p0468 A78-27982

PROBABILITY THEORY

Fusion-neutron-induced nuclear recoil emission probabilities 17 p0062 A78-11814

PROBLEM SOLVING

The role of scientific and technical information in critical period management, volume 1 [PB-272178/5] 17 p0157 A78-14939

The role of scientific and technical information in critical period management, volume 2 [PB-272179/3] 17 p0157 A78-14940

Hardware problems encountered in solar heating and cooling systems [NASA-TN-78172] 19 p0420 A78-25539

PROCEEDINGS

Proceedings of the 2d Stationary Source Combustion Symposium, Volume 5: Addendum [PB-274897/8] 18 p0261 A78-18590

A Forum on Solar Access 18 p0264 A78-19607

PROCESS CONTROL (INDUSTRY)

Instrumentation for in situ coal gasification. I - Background and overview 19 p0367 A78-41522

Highlights of the LLL Hoe Creek No. 2 underground coal gasification experiment 19 p0367 A78-41524

PRODUCT DEVELOPMENT

An update of the development on the new Audi NSU rotary engine generation [SAE PAPER 780418] 19 p0308 A78-33390

A road map to space products --- extraterrestrial manufactured products for Earth use [AAS 77-239] 19 p0329 A78-36716

Research and Product Development programme in the area of solar thermal energy 19 p0370 A78-42108

Laser-zone growth in a Ribbon-To-Ribbon, RTE, process silicon sheet growth development for the large area silicon sheet task of the low cost silicon solar array project [NASA-CR-155586] 18 p0240 A78-16437

HSFC hot air collectors. Phase 1: Test report [NASA-CR-150495] 18 p0249 A78-17471

Dip-coating process: Silicon sheet growth development for the large-area silicon sheet task of the low-cost silicon solar array project [NASA-CR-157072] 19 p0406 A78-24627

Automated array assembly, phase 2 [NASA-CR-157134] 19 p0407 A78-24653

Small refiner bias analysis [HCP/B70258-01] 19 p0416 A78-25253

Solar heating and cooling system design and development [NASA-CR-150705] 19 p0444 A78-26556

Development and fabrication of a concentrating solar collector subsystem [NASA-CR-150712] 19 p0444 A78-26557

PRODUCTION ENGINEERING

Production of solar-grade silicon from purified metallurgical silicon 17 p0013 A78-10925

Underground gasification - An alternate way to exploit coal 17 p0087 A78-17261

Procedure for minimizing the cost per watt of photovoltaic systems 18 p0176 A78-23636

Natural gas technology --- emphasizing production from unconventional sources in U.S.A. 18 p0180 A78-24752

Advanced high efficiency wraparound contact solar cell [AIAA-PAP88-77-521] 17 p0137 A78-13536

Photovoltaic solar panels and solar modules [LPS-77-12] 17 p0156 A78-14685

Phase 1 of the automated array assembly task of the low cost silicon solar array project [NASA-CR-155935] 18 p0255 A78-18516

Energy requirement for the production of silicon solar arrays [NASA-CR-155932] 18 p0255 A78-18519

Computer model for refinery operations with emphasis on jet fuel production. Volume 1: Program description 18 p0272 A78-20350

Process feasibility study in support of silicon material task 1 [NASA-CR-157030] 19 p0396 A78-23561

Low cost silicon solar array project large area silicon sheet task: Silicon web process development [NASA-CR-156984] 19 p0396 A78-23563

Low cost silicon solar array project silicon materials task [NASA-CR-157092] 19 p0407 A78-24640

PRODUCTION PLANNING

SUBJECT INDEX

Energy requirement for the production of silicon solar arrays
[NASA-CR-157074] 19 p0407 N78-24642

Applications of aerospace technology to petroleum extraction and reservoir engineering
[NASA-CR-157167] 19 p0414 N78-25233

Evaluation of methods to produce aviation turbine fuels from synthetic crude oils, phase 3, volume 3
[AD-A053106] 19 p0414 N78-25239

Prototype solar heating and combined heating and cooling systems
[NASA-CR-150686] 19 p0420 N78-25537

Prototype solar heating and combined heating and cooling systems
[NASA-CR-150687] 19 p0420 N78-25538

Agglomerating burner gasification process: design, installation, and operation of a 25-ton-a-day process development unit.
[FE-1513-69] 19 p0426 N78-25600

Nondestructive evaluation needs for coal liquefaction
[ANL-77-61] 19 p0426 N78-25606

Oil shale programs
[SAND-77-1497] 19 p0432 N78-25653

EDS coal liquefaction process development, phase 3 B
[FE-2893-6] 19 p0459 N78-27549

PRODUCTION PLANNING

Improving production from petroleum reserves - Enhanced recovery 18 p0196 A78-27786

Energy System Analysis Procedure (ESAP)
[AD-A044131] 17 p0126 N78-12532

Oil and gas replacement cost: Development and production. Volume 2: Exhibits
[TID-28043/2] 19 p0418 N78-25515

PROJECT MANAGEMENT

An overview of the planning considerations in the United States inertial confinement fusion program
17 p0004 A78-10606

Baseline gas turbine development program
[COO-2749-16] 17 p0120 N78-11405

Ocean thermal Energy Conversion (OTEC) test facilities study program, volume 1
[SAN/1156-77/1-VOL-1] 17 p0120 N78-11507

Multi-organizational strategies: An analytic framework and case illustrations
[IIASA-RN-77-4] 17 p0122 N78-11864

CCMS solar energy pilot study: Report of the annual meeting
[PB-271797/3] 17 p0145 N78-13623

NASA authorization, 1979, program review, volume 2, part 1
[GPO-98-932] 18 p0252 N78-17932

Management of social and economic impacts associated with the construction of large-scale projects: Experiences from the Western coal development communities
[BNWL-RAP-16] 19 p0468 N78-27975

PROJECT PLANNING

Ocean thermal energy - Status and prospects
19 p0323 A78-35876

UK experience of planning the nuclear contribution to the UK power programme
[IAEA-CN-36/53] 17 p0116 N78-10605

CCMS solar energy pilot study: Report of the annual meeting
[PB-271797/3] 17 p0145 N78-13623

Modeling and analysis of industrial energy usage
[NTR-7329] 17 p0151 N78-14641

The next 25 years: Industrialization of space: Rationale for planning
[NASA-TN-79360] 18 p0253 N78-18091

Outline of the energy-related projects sponsored by the Federal Railroad Administration, DOT
18 p0258 N78-18544

Electric car technology for demonstration and development
18 p0259 N78-18551

Plans for wind energy system simulation
18 p0267 N78-19640

The goldstone energy project
[NASA-CN-156133] 18 p0275 N78-20618

The modular solar energy satellite. Project proposal and development strategy
19 p0399 N78-23598

Stirling thermal engine regenerator cost reduction program outline
[GMR-2690-SECT-6.001] 19 p0439 N78-26319

PROPANE

Formation and growth of thermal NOx in hydrocarbon combustion
18 p0227 A78-31498

Performance and emissions of a catalytic reactor with propane, diesel, and Jet A fuels
[NASA-TN-73786] 17 p0148 N78-14177

PROPELLANT COMBUSTION

The effect of burner design and operational factors on the emission of nitrogen oxides when burning an anthracite/slurry mixture
19 p0335 A78-37861

PROPELLER FANS

Fuel saving potential of Mach 0.8 twin engine prop-fan transports
18 p0226 A78-31306

PROPORTIONAL CONTROL

Preliminary comparison of proportional and full on-off control systems for solar energy applications
17 p0047 A78-11261

PROPULSION SYSTEM CONFIGURATIONS

The gas turbine as an advantageous propulsion unit for high-performance rail traffic
17 p0096 A78-18713

Research needs for U.S. Army aircraft propulsion
[AIAA PAPER 78-45] 18 p0172 A78-22558

Propulsion options for orbital transfers in cis-lunar space
18 p0204 A78-27931

Advanced launch vehicle systems and technology
18 p0225 A78-31175

PROPULSION SYSTEM PERFORMANCE

Fiat electric city car prototype
[EVC PAPER 7755] 17 p0085 A78-16926

Speed polar of a wind turbine powered cargo boat
17 p0094 A78-18094

Evolution of the aircraft gas turbine engine
18 p0220 A78-30257

Canadian Symposium on Energy Conserving Transport Aircraft, Ottawa, Canada, October 3, 4, 1977, Proceedings
18 p0226 A78-31301

Aircraft propulsion from the back room /Sixty-sixth Wilbur and Orville Wright Memorial Lecture/
19 p0326 A78-36279

Engineering tests for energy storage cars at the Transportation Test Center. Volume 3: Noise tests
[PB-269402/4] 17 p0110 N78-10485

Baseline tests of the power-train electric delivery van
[NASA-TN-73765] 18 p0252 N78-17936

State-of-the-art assessment of electric vehicles and hybrid vehicles
[NASA-TN-73756] 18 p0262 N78-18988

Impact of future fuel properties on aircraft engines and fuel systems
[NASA-TN-78866] 19 p0402 N78-24369

PROPULSIVE EFFICIENCY

Gas turbine module performance analysis
[SAE PAPER 770992] 18 p0176 A78-23828

Evolution of the aircraft gas turbine engine
18 p0220 A78-30257

Energy conserving aircraft from the engine viewpoint
18 p0226 A78-31310

Aero engines climb towards better fuel efficiency
19 p0332 A78-37114

ACEE propulsion overview
19 p0453 N78-27048

PROTECTIVE COATINGS

The use of silicone gel for potting photovoltaic arrays
17 p0054 A78-11336

High temperature heat pipes for terrestrial applications
[AIAA 78-435] 19 p0318 A78-35615

Technique of testing silazane coatings --- for solar concentrators
19 p0331 A78-36859

PROTEINS

Energy and protein production from pulp mill wastes
[COO-2983-3] 17 p0157 N78-14952

Energy and protein production from pulp mill wastes
[COO-2983-6] 19 p0428 N78-25617

PROTON IMPACT

Spectral characteristics of photoconverters with nonuniform distribution of defects in the base
19 p0326 A78-36134

PROTON IRRADIATION

Electron and proton degradation of commercially available solar cell/ccverslide components
17 p0015 A78-10938

Photon degradation of electron and proton irradiated silicon solar cells
17 p0015 A78-10940

Radiation tests of SEP solar cells
17 p0138 N78-13548

PROTOTYPES

The Copper Electric Town Car - Recent developments [EVC PAPER 7756]
17 p0086 A78-16934

Program for wind energy utilization in the framework of nonnuclear energy research
18 p0210 A78-28556

Facility for the testing of the TFTR prototype neutral beam injector --- Tokamak Fusion Test Reactor
19 p0357 A78-40049

Prototype solar heating and hot water systems [NASA-CR-150525]
18 p0250 N78-17482

Prototype solar heating and cooling systems, including potable hot water
18 p0263 N78-19601

Prototype solar domestic hot water systems [NASA-CR-150545]
18 p0264 N78-19606

Design data brochure: SIMS prototype system 2 [NASA-CR-150558]
18 p0268 N78-19649

Prototype solar heating and cooling systems [NASA-CR-150570]
18 p0268 N78-19655

Prototype pilot plant operation: Synthane process [COO-0003-8]
18 p0280 N78-21316

Prototype pilot plant operation, synthane process [COO-0003-10]
18 p0280 N78-21317

Development of prototype air/liquid solar collector subsystem
18 p0283 N78-21604

Preliminary design package for prototype solar heating system
19 p0405 N78-24610

PSYCHOLOGICAL FACTORS

Solar energy incentives analysis: Psycho-economic factors affecting the decision making of consumers and the technology delivery system [HCP/H2534]
19 p0463 N78-27584

PUBLIC HEALTH

Comparative evaluation of the radiation danger to the public caused by atmospheric emissions from thermal and atomic electric power plants
18 p0166 A78-21349

Health and environmental aspects of energy development [ISS-P-77/2]
19 p0399 N78-23599

Environmental, health, and control aspects of coal conversion, an information overview, volume 1 [ORNL/EIS-94-VOL-1]
19 p0411 N78-24696

Energy/environment 2. Proceeding of 2nd National Conference on the Interagency R and D Program [PB-277917]
19 p0433 N78-25678

PUBLIC LAW

Introduction to the ERDA electric and hybrid demonstration project --- provisions of the legislative Act [ERHQ-0008]
18 p0279 N78-21016

PUERTO RICO

Resource assessment of a high potential OTEC site near Puerto Rico --- Ocean Thermal Energy Conversion
19 p0302 A78-33323

PULSE GENERATORS

International Pulsed Power Conference, Texas Tech University, Lubbock, Tex., November 9-11, 1976, Proceedings
17 p0007 A78-10676

Controllable homopolar motor-generator energy storage for application in a fusion power reactor
17 p0007 A78-10680

Development of inductive storage for generation of high voltage pulses
17 p0007 A78-10699

The evolution of pulsed power --- voltage generator fusion reactor applications
17 p0008 A78-10709

Direct conversion of CO2 laser energy to high-voltage electrical energy using a laser-produced plasma
17 p0078 A78-15788

System engineering and design of a pulsed homopolar generator power supply for the Texas Experimental Tokamak
19 p0351 A78-39921

Pulsed power conversion with inductive storage --- compression for superconducting coil fields
19 p0353 A78-39954

PULSED JET ENGINES

Solar-powered global aerospace transportation [AIAA PAPER 78-689]
19 p0293 A78-32761

PULSED LASERS

Pulsed power systems for the LASL high energy gas laser facility
17 p0007 A78-10691

Stimulated electronic Raman scattering in Cs vapour - A simple tunable laser system for the 2.7 to 3.5 micron region
17 p0064 A78-12440

Design of the power amplifier for the REGEL at LASL --- High Energy Gas Laser Facility
19 p0349 A78-39861

PULSEJET ENGINES

Water pulsejet research --- for quantitative understanding of McHugh cycle [AD-A046533]
17 p0158 N78-15497

PUMPING

Mechanical energy storage systems - Compressed air and underground pumped hydro [AIAA PAPER 78-281]
18 p0166 A78-20788

Rocketdyne's advanced coal slurry pumping program
17 p0133 N78-13266

PUMPS

Implanted energy conversion system [PB-272609/9]
18 p0243 N78-16464

Pump/control system minimum operating cost testing [NASA-CR-150604]
18 p0275 N78-20617

PURIFICATION

Purification and characterization of metallurgical silicon
18 p0219 A78-30191

Solar silicon via the Dow Corning process [NASA-CR-157065]
19 p0406 N78-24637

PURITY

High-purity silicon for solar cell applications
19 p0344 A78-39567

PYRANOMETERS

Solar energy measuring equipment
18 p0201 A78-27869

PYROHELIONMETERS

Solar energy measuring equipment
18 p0201 A78-27869

PYROLYSIS

Pyrolysis of solid wastes for production of gaseous fuels and chemical feedstocks
17 p0035 A78-11131

The Garrett pyrolysis process
17 p0036 A78-11141

The Andco-Torrax process - A slagging pyrolysis solid waste conversion system
17 p0036 A78-11142

Partial oxidation of refuse using the Purox system
17 p0036 A78-11143

Energy recovery from municipal and industrial waste
17 p0037 A78-11146

Studies on coal reactivity - Kinetics of lignite pyrolysis in nitrogen at 808 C
17 p0079 A78-15831

Coal pyrolysis at fire-level heat flux
17 p0079 A78-15835

A fluidized bed solar reactor - A thermochemical application
18 p0165 A78-20623

Reactions of fuel-nitrogen compounds under conditions of inert pyrolysis
18 p0173 A78-22822

Entropy production, efficiency, and economics in the thermochemical generation of synthetic fuels. I - The hybrid sulfuric acid process
18 p0174 A78-22867

Energy from municipal refuse
18 p0182 A78-24763

Energy from wastes - An overview of present technologies and programs
18 p0197 A78-27803

QUALITATIVE ANALYSIS

The nature of pyrolytic oil from municipal solid waste 18 p0157 A78-27806

Fuels from wood waste 18 p0198 A78-27810

Pyrolytic gasification of Kraft black liquors 18 p0198 A78-27811

Pyrolysis of subbituminous coal in relation to in-situ coal gasification 18 p0229 A78-31750

Waste pyrolysis - Alternative fuel source 19 p0333 A78-37172

Pyrolysis of 1,2-diphenylethane in the presence of tetralin 19 p0342 A78-39124

Engineering development of a short residence time, coal hydrolysis process 19 p0362 A78-40592

Economic evaluation of synthetic natural gas production by short residence time hydrolysis of coal 19 p0363 A78-40593

Water in synthetic fuel production: The technology and alternatives --- Book 19 p0365 A78-41000

Oil shale retorting - Effects of particle size and heating rate on oil evolution and intraparticle oil degradation 19 p0367 A78-41521

Qualitative and quantitative studies of volatiles from coal pyrolysis using mass spectrometry and gas chromatography 17 p0119 N78-11207

Pyrolysis of industrial wastes for oil and activated carbon recovery [PB-270961/6] 17 p0147 N78-13967

Hydrogasifier development for the Hydrane process [FE-2518-4] 19 p0415 N78-25244

Optimization of pyrolytic conversion of coal to clean fuel --- computer programs [FE-2253-5] 19 p0427 N78-25609

Solid waste utilization: Pyrolysis [ANL/CES/TE-77-15] 19 p0435 N78-26038

Q

QUALITATIVE ANALYSIS
Evaluation of in situ coal gasification processes on a regional basis [ORNL-5279] 19 p0431 N78-25647

QUALITY
Metering low-quality steam-water flows [UCRL-52271] 18 p0263 N78-19455

QUALITY CONTROL
Engineering estimate of the quality of facets obtained by a deformation method of form giving --- mirrors for solar collectors 18 p0214 A78-28890

Optimum testing period for new thermomechanical equipment 18 p0225 A78-31245

QUARTZ CRYSTALS
Tectonic atlas of uranium potential in crystalline rocks of the eastern US [GJBX-69(77)] 19 p0400 N78-23666

QUENCHING (COOLING)
Quenching of nitric-oxide formation in methane-air flames by secondary-air injection 17 p0081 A78-16338

R

RADIAL DISTRIBUTION
Ball to separator contact forces in angular contact ball bearings under thrust and radial loads [NASA-CR-2976] 18 p0281 N78-21469

RADIANT COOLING
Radiative cooling of TiO2 white paint 18 p0206 A78-28171

Ionization equilibrium and radiative cooling of a high temperature plasma 18 p0227 A78-31423

RADIANT FLUX DENSITY
An analytic evaluation of the flux density due to sunlight reflected from a flat mirror having a polygonal boundary 17 p0053 A78-11328

SUBJECT INDEX

Photoelectric radiation-density meter --- for concentrator focal region measurement 18 p0215 A78-28892

RADIANT HEATING
Equalizing an irradiance field on the surface of a receiver 18 p0187 A78-25734

Portable linear-focused solar thermal energy collecting system [NASA-CASE-WFO-13734-1] 17 p0111 N78-10554

RADIATION DAMAGE
New developments in vertical-junction solar cells --- groove structure to promote radiation resistance 17 p0012 A78-10907

Comparative testing of high efficiency silicon solar cells 17 p0014 A78-10937

Electron and proton degradation of commercially available solar cell/coverslide components 17 p0015 A78-10938

Photon degradation of electron and proton irradiated silicon solar cells 17 p0015 A78-10940

Problem of the vulnerability of materials to radiation in relation to atomic and thermonuclear power engineering 18 p0180 A78-24748

Annealing of GaAs solar cells damaged by electron irradiation 18 p0219 A78-30192

Solar Cell High Efficiency and Radiation Damage [NASA-CP-2020] 17 p0136 N78-13527

Ultraviolet damage in solar cell assemblies with various UV filters 17 p0138 N78-13551

RADIATION DISTRIBUTION
A comparative analysis of models describing the formation of irradiance fields in wide-aperture optical systems 18 p0187 A78-25733

Diffraction analysis for multiple-beam pellet irradiance 19 p0360 A78-40225

Solar energy for use as a source of power 19 p0370 A78-42104

RADIATION DOSAGE
Health and safety impacts of nuclear, geothermal, and fossil-fuel electric generation in California. Volume 2: Radiological health and related standards for nuclear power plants [LBL-5285-VOL-2] 18 p0278 N78-20769

RADIATION EFFECTS
Junction potentials of strongly illuminated n+/p-p+/p+ solar cells 19 p0292 A78-32693

Microchannel plate response to hard X-rays --- for imaging recompression beam fuel pellet implosion 19 p0360 A78-40267

RADIATION HAZARDS
Comparative evaluation of the radiation danger to the public caused by atmospheric emissions from thermal and atomic electric power plants 18 p0166 A78-21349

RADIATION MEASUREMENT
Spectral distribution of global solar radiation at Poona 19 p0370 A78-42106

Radiation measurements for solar energy utilization 19 p0370 A78-42109

RADIATION MEASURING INSTRUMENTS
Solar radiation and energy measurements --- solar cell meter for meteorological monitoring 17 p0009 A78-10732

Solar energy measuring equipment 18 p0201 A78-27869

Photoelectric radiation-density meter --- for concentrator focal region measurement 18 p0215 A78-28892

A device with a sectioned photodetector and a laser transmitter for determining the precision characteristics of solar energy concentrators 19 p0326 A78-36137

RADIATION PRESSURE
Effects of solar radiation pressure on the orbit of the Solar Power Satellite 18 p0230 A78-31916

Orbital motion of the solar power satellite [NASA-CR-151603] 17 p0158 N78-15148

RADIATION SHIELDING

- The use and performance of graphite and metal ISSFCs in tokamak fusion reactors --- Internal Spectral Shifter and Energy Converter shield 18 p0195 A78-27579
- High temperature blankets for the production of synthetic fuels 19 p0359 A78-40093
- Mechanical design and analysis for a EPR first wall/blanket/shield system --- for tokamak Experimental Power Reactor 19 p0359 A78-40095

RADIATION TOLERANCE

- Comparative radiation resistance calculation for graded- and constant-composition n Al/x/Ga/1-x/As-p Al/z/Ga/1-z/As solar cells 19 p0338 A78-38551
- Radiation tests of SEP solar cells 17 p0138 A78-13548

RADIATIVE HEAT TRANSFER

- The emission characteristics of liquid-fuel flames 18 p0222 A78-30496
- Fuel hydrogen content as an indicator of radiative heat transfer in an aircraft gas turbine combustor 19 p0296 A78-33114
- Radiation heat losses in solar collectors with plastic covers 19 p0316 A78-35362
- Marine thermic energy and the combination of solar, radiative and aeolian energies 19 p0328 A78-36623
- Radiative heat transfer in axially symmetric hollow collectors of high-temperature solar installations 19 p0331 A78-36860
- Selective paints for solar absorbers 18 p0237 A78-16177
- Conceptual design of a heat pipe radiator [LA-6939-MS] 18 p0273 A78-20471

RADIATIVE TRANSFER

- Surface ignition of coal and other fuel particles in radiative and diffusive environment --- in MHD combustor 18 p0222 A78-30511
- Radiation transfer through specular passages - a simple approximation 19 p0369 A78-42030

RADIATORS

- Properties of a solar cell array with mirrors and radiators [DGLE PAPER 77-011] 18 p0179 A78-24405

RADIO FREQUENCIES

- Coal thickness gauge using BRAS techniques, part 1 --- radiofrequency resonance absorption [NASA-CR-150625] 18 p0273 A78-20573

RADIO FREQUENCY HEATING

- Plasma edge cooling during RF heating 19 p0342 A78-39389
- A lower hybrid heating system for an ignition tokamak 19 p0354 A78-39972

RADIO FREQUENCY INTERFERENCE

- Engineering tests for energy storage cars at the Transportation Test Center. Volume 2: Performance power consumption and radio frequency interference tests [PB-269401/6] 17 p0110 A78-10484

RADIO OBSERVATION

- Ion-cyclotron instability in the TFR tokamak 19 p0369 A78-42016

RADIOACTIVE CONTAMINANTS

- Comparative evaluation of the radiation danger to the public caused by atmospheric emissions from thermal and atomic electric power plants 18 p0166 A78-21349

RADIOACTIVE ISOTOPES

- Heat source component development program [BNM-X-679] 17 p0141 A78-13580
- Prediction of thermoelectric battery power and voltage for a 15 year lifetime NB-75 w (B) battery [GA-A-14718] 19 p0446 A78-26576

RADIOACTIVE WASTES

- Waste management considerations for fusion power reactors 18 p0176 A78-23588
- Tritium systems preliminary design for TMS --- Tokamak Next Step with fuel reprocessing 19 p0346 A78-39798

- An analysis of the back end of the nuclear fuel cycle with emphasis on high-level waste management, volume 1 [NASA-CR-155319] 17 p0128 A78-12823
- An analysis of the back end of the nuclear fuel cycle with emphasis on high-level waste management, volume 2 [NASA-CR-155320] 17 p0128 A78-12824
- An analysis of the technical status of high level radioactive waste and spent fuel management systems [NASA-CR-155313] 18 p0261 A78-18897

RADIOACTIVITY

- Fusion-neutron-induced nuclear recoil emission probabilities 17 p0062 A78-11814

RADIOLYSIS

- Application of laser fusion to the radiolytic production of hydrogen 19 p0383 A78-42858

RADIOMETERS

- Solar energy measuring equipment 18 p0201 A78-27869
- Calibration standards and field instruments for the precision measurement of insolation 19 p0312 A78-34517

RAIL TRANSPORTATION

- Means of transport and the energy consumed by them 17 p0067 A78-13421
- The technical evaluation of transport drive systems 17 p0067 A78-13422
- Achievements of scientific and technological progress in the development of transport and its energetics in the USSR 17 p0073 A78-14131
- Electrifying the Burlington Northern Railroad [EVC PAPER 7780] 17 p0086 A78-16930
- The electric locomotive opportunity in the United States [EVC PAPER 7781] 17 p0086 A78-16933
- The gas turbine as an advantageous propulsion unit for high-performance rail traffic 17 p0096 A78-18713
- Prototype testing of a rotary current train in the Berlin transit system 18 p0194 A78-27171
- Technical alternatives for a maglev system 19 p0292 A78-32653
- Engineering tests for energy storage cars at the Transportation Test Center. Volume 1: Program description and test summary [PB-269400/8] 17 p0109 A78-10483
- Engineering tests for energy storage cars at the Transportation Tests Center. Volume 4: Ride Roughness tests [PB-269403/2] 17 p0110 A78-10486
- Energy use in intercity freight transport and policy implications 18 p0257 A78-18536
- Energy and economic impacts of projected freight transportation improvements 18 p0257 A78-18537
- Outline of the energy-related projects sponsored by the Federal Railroad Administration, DOT 18 p0258 A78-18544
- Measurement and simulation of fuel consumption in rail freight service 18 p0258 A78-18545
- Electrification of railroads problems-potentials-economic impacts 18 p0259 A78-18550

RAMAN SPECTRA

- Stimulated electronic Raman scattering in Cs vapour - a simple tunable laser system for the 2.7 to 3.5 micron region 17 p0064 A78-12440

RANGES (FACILITIES)

- On the relationship between gross vehicle weight, payload, effective range, and cost of electric vehicles [SAE PAPER 780220] 19 p0307 A78-33379

RANKINE CYCLE

- Current costs of solar powered organic Rankine cycle engines 17 p0104 A78-19826
- Solar cooling --- Book 18 p0167 A78-21699

- Solar powered Rankine cycle/vapor compression cycle modeling and performance prediction 19 p0295 A78-33036
- Steam bottoming plants for combined cycles 19 p0296 A78-33102
- Optimum operating conditions for a cylindrical parabolic focusing collector/Rankine power generation cycle system [SAND-75-6132] 17 p0151 A78-14634
- Piping design considerations in a solar-Rankine power plant --- pipe size 17 p0158 A78-15085
- Modeling of Rankine cycle/vapor compression cycle cooling systems for solar energy applications 18 p0282 A78-21587
- Ocean thermal power plants heat exchangers [ERDA/NSF-A3441/76/1] 19 p0410 A78-24681
- RAPID TRANSIT SYSTEMS**
- Electric levitated inter-city vehicles [EVC PAPER 7782] 17 p0085 A78-16928
- Prototype testing of a rotary current train in the Berlin transit system 18 p0194 A78-27171
- Technical alternatives for a maglev system 19 p0292 A78-32653
- Large buses and the Townobile electric city transit system [SAE PAPER 780293] 19 p0308 A78-33385
- The role of advanced transit in the implementation of the polycentric city concept 19 p0329 A78-36697
- The German research and technology program concerning advanced tracked ground-transportation systems 19 p0329 A78-36700
- Investigations concerning direct-current operated local-traffic vehicles with low reactive effects 19 p0365 A78-40866
- Engineering tests for energy storage cars at the Transportation Test Center. Volume 1: Program description and test summary [PB-269400/8] 17 p0109 A78-10483
- Engineering tests for energy storage cars at the Transportation Test Center. Volume 2: Performance power consumption and radio frequency interference tests [PB-269401/6] 17 p0110 A78-10484
- Engineering tests for energy storage cars at the Transportation Test Center. Volume 3: Noise tests [PB-269402/4] 17 p0110 A78-10485
- Engineering tests for energy storage cars at the Transportation Test Center. Volume 4: Ride Roughness tests [PB-269403/2] 17 p0110 A78-10486
- Alternative concepts for underground rapid transit systems, executive summary [PB-270102/7] 17 p0123 A78-11894
- Investigation of the feasibility of a dual model electric transportation system [LBL-6301] 17 p0157 A78-14954
- Intercity rail energy intensity for passenger movement 18 p0258 A78-18546
- RARE GASES**
- Noble-gas closed-cycle system of magnetohydrodynamic power generation [E-2128-ERDA] 19 p0422 A78-25570
- RATES (PER TIME)**

SUBJECT INDEX

REACTOR DESIGN

- A comparison between an air core and an iron core Ohmic Heating system for The Next Step --- tokamak 19 p0358 A78-40065
- Gas core reactors for coal gasification 19 p0451 A78-26669
- REACTOR DESIGN
- Processing the results of experiments on the U-25 unit by means of an informatic measuring system --- MHD generator 17 p0002 A78-10246
- Reactor costs and maintenance, with reference to the Culham Mark II conceptual Tokamak reactor design 17 p0011 A78-10872
- Mirror reactor studies --- fusion and fusion-fission reactors 17 p0011 A78-10874
- Conceptual design problems in future reversed field pinch experiments 17 p0040 A78-11181
- Parameter study of a screw-pinch reactor 17 p0041 A78-11187
- Large Tokamak power supplies - A survey of problems and solutions 17 p0041 A78-11205
- Energy optimization of a cycled Tokamak 17 p0067 A78-17133
- Computer simulation of the periodic electrostatic focusing converter --- controlled fusion reactor design 17 p0095 A78-18392
- Tokamak fusion power reactors 17 p0103 A78-19600
- An expression for beta in linked Min-B configurations --- fusion reactor economic feasibility parameter 18 p0173 A78-22836
- Materials engineering and development for coal fired MHD power generators 18 p0182 A78-25052
- Nuclear Science Symposium, 4th, and Nuclear Power Systems Symposium, 9th, San Francisco, Calif., October 19-21, 1977, Proceedings 18 p0184 A78-25301
- Computer simulation of ion extraction 18 p0188 A78-25947
- Heliotron as a D-D fusion reactor - Preliminary analysis 18 p0220 A78-30226
- Structural and mechanical design of tokamaks [ASME PAPER 77-WA/NE-2] 19 p0299 A78-33186
- TFTR vacuum system --- Tokamak Fusion Test Reactor 19 p0325 A78-36046
- A small tokamak 'Nova II' 19 p0327 A78-36319
- Wall stabilization of axisymmetric modes in noncircular tokamak plasmas 19 p0332 A78-37143
- Aerospace aids fusion power concept 19 p0339 A78-38775
- Advanced lasers for fusion applications 19 p0342 A78-39367
- Design of the TEXT toroidal and poloidal field coils --- Texas fusion plasma research tokamak 19 p0345 A78-39790
- Stress and deflection analysis of the PLT-coil using ANSYS computer code 19 p0346 A78-39792
- Establishment of design and performance requirements using cost and systems analysis --- for commercial fusion power plant 19 p0346 A78-39793
- Impact of confinement physics on reactor design and economics 19 p0346 A78-39794
- An approach to decision modeling for an ignition test reactor --- The Next Step Tokamak design 19 p0346 A78-39797
- Tritium systems preliminary design for TNS --- Tokamak Next Step with fuel reprocessing 19 p0346 A78-39798
- Control system of plasma position and cross-sectional shape in large tokamak device 19 p0346 A78-39800
- Engineering features of ISI-B --- Tokamak reactor design 19 p0347 A78-39802
- TMX - A new facility --- Tandem Mirror Experiment fusion reactor design 19 p0347 A78-39805
- Design of an electrostatic end-plugged plasma-confinement device 19 p0347 A78-39806
- Toroidal field ripple effects in TNS design --- computer simulation model for Tokamak 19 p0347 A78-39810
- Hybrid equilibrium field coils for the ORNL TNS 19 p0347 A78-39812
- Advantages of iron core in a tokamak 19 p0347 A78-39814
- Design related R&D assessment for TNS --- tokamak technology 19 p0349 A78-39877
- Engineering features of an upgradable ignition test reactor 19 p0349 A78-39878
- Magnet conceptual design for a high field tokamak reactor 19 p0349 A78-39884
- The JET Project - Technical developments, status of the manufacturing work in industry, administrative and managerial aspects --- Joint European Torus reactor design 19 p0349 A78-39887
- System design for the new TMX machine --- Tandem Mirror Experiment 19 p0349 A78-39888
- Design for the magnetic field requirements of the tandem mirror experiment 19 p0349 A78-39889
- Economic analysis of EBT reactor --- Elmo Pumpy Torus 19 p0350 A78-39895
- Computational model for superconducting toroidal-field magnets for a tokamak reactor 19 p0350 A78-39905
- Electrical design of TNS --- Next Step tokamak 19 p0351 A78-39918
- Cryopumping system for TFTR neutral beam injectors 19 p0352 A78-39952
- Design of the ZT-40 power crowbar system --- for toroidal Z pinch current maintenance 19 p0353 A78-39957
- A 40-kV, 26-ms neutral-beam power supply for TMX --- Tandem Mirror Experiment 19 p0353 A78-39964
- TMX heating studies on Petula Tokamak --- Transit Time Magnetic Pumping 19 p0354 A78-39969
- A lower hybrid heating system for an ignition tokamak 19 p0354 A78-39972
- The Princeton neutral injection power supply system 19 p0354 A78-39975
- The TFTR neutral beam power system --- Tokamak Fusion Test Reactor 19 p0354 A78-39976
- Poloidal field coil design for a fusion-fission breeder reactor 19 p0354 A78-39977
- A tokamak hybrid blanket design 19 p0355 A78-39982
- Tritium handling trade studies and design options for the GA/ANL TNS --- The Next Step tokamak 19 p0355 A78-39983
- Bundle divertor designs for the ILB advanced fuel tokamaks 19 p0355 A78-39985
- Some design aspects of computer based control systems for pulsed fusion experiments 19 p0355 A78-39991
- Losses in a coil where the multifilamentary composite is subjected to simultaneous orthogonal and parallel induction variations --- superconducting toroidal field magnet in Tokamak 19 p0356 A78-40008
- Fast ramp superconductor for ohmic heating coils --- of Tokamak Next Step reactor 19 p0356 A78-40009
- Superconducting energy storage coils 19 p0356 A78-40010
- Magnetics design for ripple-assisted beam injection into the ISI-B and TFTR tokamaks 19 p0356 A78-40013

Magnetic field computations for ISX using GFUN-3D
--- Impurity Study experiment iron core tokamak
computerized design 19 p0356 A78-40019

Performance of a developmental 120-keV, 10-A
deuterium /14-A hydrogen/ neutral beam system 19 p0357 A78-40027

Thermal-mechanical design of a 150-MW,
direct-current, 400-keV accelerator for
production of 14-MeV neutrons 19 p0357 A78-40032

Mechanical and thermal design of a gas-cooled
fusion blanket module 19 p0357 A78-40040

Blanket structure design for JAFBI Experimental
Fusion Reactor 19 p0357 A78-40041

A computer program for parameter studies of a
neutral injection beam line 19 p0357 A78-40052

PLT OH system operation --- Princeton Large
Torus-Ohmic Heating 19 p0357 A78-40064

A comparison between an air core and an iron core
Ohmic Heating system for The Next Step --- tokamak 19 p0358 A78-40065

Structural analysis of a two-component torus /TCT/
hybrid reactor first wall 19 p0358 A78-40072

TFTR tritium valve for pulsed gas feed, test results 19 p0358 A78-40075

Mechanical design and analysis for a EPP first
wall/blanket/shield system --- for tokamak
Experimental Power Reactor 19 p0359 A78-40095

The OMEGA fusion laser system 19 p0359 A78-40221

An automatic alignment system for a multibeam
laser system --- for use in fusion reactors 19 p0359 A78-40222

The Shiva laser - nearing completion 19 p0360 A78-40226

Thermo-nuclear fusion study by glass laser 'Gekko
II' 19 p0362 A78-40384

Comment on 'Heat-pipe reactors for space power
applications' 19 p0364 A78-40826

Divertors for impurity control and review of
impurity effects in PFI tokamaks 19 p0377 A78-42203

Protection of walls from hard disruptions in large
tokamaks 19 p0379 A78-42214

On toroidal divertors for tokamaks 19 p0379 A78-42242

Symbiotic system of a fusion and a fission reactor
with very simple fuel reprocessing 19 p0380 A78-42257

Two-component, multiple-mirror reactor with
depressed ion temperature 19 p0380 A78-42263

Fusion reactor design. II - Report on the Second
IAEA Technical Committee Meeting and Workshop,
Madison, Wisconsin, USA, 10-21 October 1977 19 p0381 A78-42269

Large closed-cycle gas turbine plant
[GA-14311] 17 p0152 A78-14652

Thermal hydraulic analyses of two fusion reactor
first wall/blanket concepts --- lithium cooled
reactor experiment hydraulic equipment
[CONF-771029-178] 19 p0434 A78-25930

REACTOR MATERIALS

Problem of the vulnerability of materials to
radiation in relation to atomic and
thermonuclear power engineering 18 p0180 A78-24748

Materials requirements for fusion reactors 18 p0182 A78-25051

Materials problems in coal gasification and
liquefaction 18 p0183 A78-25053

The use and performance of graphite and metal
ISSECS in tokamak fusion reactors --- Internal
Spectral Shifter and Energy Converter shield 18 p0195 A78-27579

REACTOR PHYSICS

Shaping and compression experiments in a Tokamak 17 p0011 A78-10778

REACTOR SAFETY

Aspects of safety and reliability of
superconducting magnet systems for fusion power
reactors 17 p0038 A78-11167

Loose-parts monitoring: Present status of the
technology, its implementation in US reactors,
and some recommendations for achieving improved
performance [CONF-770902-5] 18 p0282 A78-21483

Report to congress on abnormal occurrences July -
September 1977 [PB-278534] 19 p0412 A78-24923

General-purpose heat source project, space nuclear
safety program, and radioisotopic terrestrial
safety program --- plutonium oxide radioisotopic
power systems [LA-7184-PR] 19 p0467 A78-27898

REACTOR TECHNOLOGY

Pulsed power for fusion 17 p0007 A78-10696

Doublet IIA experiments --- plasma cross sections
in Tokamak fusion reactor 17 p0011 A78-10776

Formation of a high-current
relativistic-electron-beam ring for plasma
confinement 17 p0012 A78-10887

The present status of fusion power 17 p0028 A78-11075

Symposium on Fusion Technology, 9th,
Garmisch-Partenkirchen, West Germany, June
14-18, 1976, Proceedings 17 p0038 A78-11161

The progress and the development program of fusion
technology in Japan 17 p0038 A78-11162

Vacuum pumping for controlled thermonuclear reactors 17 p0038 A78-11163

The UWBK-II study and magnet design 17 p0038 A78-11169

Poloidal field for a 1.7 MA Tokamak - Comparison
between an iron core and an air core transformer 17 p0039 A78-11170

The transformer design for a proposed technical
feasibility Tokamak reactor 17 p0039 A78-11171

Eddy current losses and transient magnetic forces
in pulsed fusion reactors 17 p0039 A78-11172

Analysis of various field programming to produce
the RFP configuration --- Reversed Field Pinch 17 p0039 A78-11174

Studies on design and tests of superconductors for
Tokamaks 17 p0039 A78-11176

REGIONAL PLANNING

Energy-politics alternatives for the urban region of Munich until 1985

17 p0093 A78-17950

The role of advanced transit in the implementation of the polycentric city concept

19 p0329 A78-36697

Conference proceedings: A critical economic balance: Water, land, energy, people

[PB-274089/2] 18 p0253 N78-17944

Energy conservation policy - opportunities and associated impacts. Study module 1-A. Volume 1, summary report

[PB-274337/5] 18 p0269 N78-19661

Energy contingency planning

[PB-275371/3] 18 p0276 N78-20626

Energy supply and environmental impacts:

Conventional energy sources 18 p0289 N78-21669

Colorado energy impact assistance plan

[PB-276587/3] 19 p0390 N78-22483

Geothermal potential of the west Boise area

[TRFE-1162] 19 p0455 N78-27497

Effects of environmental protection regulation on regional economic development

[PB-278918/8] 19 p0468 N78-28015

REGIONS

Evaluation of in situ coal gasification processes on a regional basis

[ORNL-5279] 19 p0431 N78-25647

REGULATIONS

Guidelines for forecasting energy demand

[IA-1327] 17 p0114 N78-10582

Federal energy conservation programs, a state perspective

[PB-271283/4] 17 p0144 N78-13614

Enhanced oil recovery: The impact of policy options

[PB-276763/0] 19 p0388 N78-22451

Effects of environmental protection regulation on regional economic development

[PB-278918/8] 19 p0468 N78-28015

REGULATORS

The regulation, storage, and conversion of wind produced electrical energy at the level of a few hundred watts

18 p0171 A78-22248

REINFORCED PLASTICS

Fiber-composite systems for energy-storage flywheels

17 p0085 A78-16901

REINFORCING FIBERS

Fiber-composite systems for energy-storage flywheels

17 p0085 A78-16901

RELATIVISTIC PARTICLES

Formation of a high-current relativistic-electron-beam ring for plasma confinement

17 p0012 A78-10887

RELATIVISTIC PLASMAS

Application of homopolar generators for high voltage plasma experiments

19 p0348 A78-39848

Reversed-field configuration generated by a rotating relativistic electron beam

19 p0382 A78-42492

RELIABILITY ANALYSIS

Aspects of safety and reliability of superconducting magnet systems for fusion power reactors

17 p0038 A78-11167

Annual Canadian Symposium on Reliability Engineering, 4th, Ottawa, Canada, October 13, 14, 1977, Proceedings

18 p0217 A78-29476

Structural and mechanical design of tokamaks

[ASME PAPER 77-WA/NE-2] 19 p0259 A78-33186

Power plant performance --- comparison of coal and nuclear fueled

19 p0321 A78-35753

High energy density, long life energy storage capacitor dielectric system

19 p0359 A78-40099

Baseload reliability in a combustion turbine

19 p0385 A78-43101

Investigation of methods to improve heat pump performance and reliability in a northern climate. Volume 3: Appendices B, C, D

[EPRI-EH-319-VOL-3-APP-B] 17 p0139 N78-13565

RELIABILITY ENGINEERING

Annual Canadian Symposium on Reliability Engineering, 4th, Ottawa, Canada, October 13, 14, 1977, Proceedings

18 p0217 A78-29476

Modular approach for emergency and stand-by electric power in Northern Canada

19 p0337 A78-38402

Superconducting magnets for fusion reactors - The problem of a reliable and effective cooling system

19 p0350 A78-39897

Potential damage to dc superconducting magnets due to high frequency electromagnetic waves

19 p0350 A78-39902

PII OH system operation --- Princeton Large Torus-Omic Heating

19 p0357 A78-40064

REMOTE HANDLING

Some opportunities in teleoperated mining

18 p0222 A78-30507

REMOTE REGIONS

Insolation and wind - A natural combination for self-sufficient power systems

17 p0022 A78-11017

REMOTE SENSORS

Instrumental sensing of stationary source emissions --- sulphur dioxide remote sensing for coal-burning power plants

17 p0001 A78-10056

Remote sensing - A burgeoning science --- Canadian programs

17 p0063 A78-12214

Applications of Seasat to the offshore oil, gas and mining industries

[AIAA 77-1583] 17 p0069 A78-13666

Future onshore and offshore exploration by remote sensing from space

[AIAA 77-1550] 17 p0069 A78-13681

Industrial use of geological remote sensing from space

17 p0075 A78-14787

Energy and remote sensing --- satellite exploration, monitoring, siting

17 p0075 A78-14805

Remote sensing of earth resources. Volume 5 - Annual Remote Sensing of Earth Resources

Conference, 5th, Tallahassee, Tenn., March 29-31, 1976, Technical Papers

18 p0198 A78-27823

Remote-sensing methods for monitoring surface coal mining in the northern Great Plains

18 p0206 A78-28247

The detection of hydrocarbon sheets on the sea

18 p0209 A78-28395

Remote monitoring of the Gravelly Run thermal plume at Hopewell and the thermal plume at the Surry nuclear power plant on the James River

19 p0313 A78-34905

Remote leak detection for the TFTR --- Tokamak Fusion Test Reactor

19 p0352 A78-39939

Instrumentation for in situ coal gasification. I - Background and overview

19 p0367 A78-41522

Highlights of the LLL Hoe Creek No. 2 underground coal gasification experiment

19 p0367 A78-41524

Energy and remote sensing

17 p0149 N78-14497

Application of remote sensing to geothermal anomaly mapping in the Caldas Novas County, Goias

[INPE-1129-TPT/070] 17 p0149 N78-14610

Remote sensing applications in hydro-geothermal exploration of the northern basin and range province

18 p0238 N78-16405

Photovoltaic remote instrument applications:

Assessment of the near-term market

[NASA-TN-73881] 18 p0271 N78-19710

Subsystem design package for Mod 2 site data acquisition system: Solar heating and cooling

[NASA-CR-150588] 18 p0274 N78-20609

REPLACING

Oil and gas replacement cost: Development and production. Volume 2: Exhibits

[TID-28043/2] 19 p0418 N78-25515

REPORTS

Bibliography of earth science reports for 1976

Federally sponsored energy research in the
northern Great Plains, North Dakota, fiscal year
1976
[PB-278132/6] 19 p0465 N78-27607

RESERVES
Net energy effects and resource depletion: An
all-oil economy
[COO-2865-6] 17 p0142 N78-13592
Other storage reserve report
[PB-273474/7] 18 p0260 N78-18564

RESERVOIRS
The effect of dike intrusion on free convection in
conduction-dominated geothermal reservoirs
19 p0369 A78-42080
Research on the physical properties of geothermal
reservoir rocks. Summary report on collection
of samples of volcanic rocks for petrophysical
studies
[COO-2908-1] 17 p0141 N78-13584
Results of reservoir evaluation tests, 1976 East
Mesa Geothermal Field, California
[LBL-6369] 18 p0286 N78-21631

RESIDENTIAL AREAS
Solar-electric residential system tests
17 p0010 A78-10741
A solar panel for residential use
17 p0043 A78-11223
A microprocessor-based control system for solar
heated/cooled residential dwellings
18 p0176 A78-23896
Application of solar energy to schools and
residences
18 p0181 A78-24759
Solar design and installation experience ---
pyramidal optics for use in residential buildings
18 p0181 A78-24761
Building rights, apartment- and
residence-designing in the light of solar energy
utilization
18 p0214 A78-28594
Residential energy demand analysis: Data and
methodology
[BNL-21920] 17 p0140 N78-13573
Environmental issues associated with solar heating
and cooling of residential dwellings
[SAND-77-0172] 17 p0161 N78-15581
Land use configurations and the utilization of
distributed energy technology
[UCRL-13773] 19 p0418 N78-25512
Interaction of land-use patterns and residential
energy conservation
[TID-28058] 19 p0418 N78-25513
Application analysis of solar total energy to the
residential sector
[TID-28103] 19 p0429 N78-25624
Dynamic models of house heating based on
equivalent thermal parameters
19 p0456 N78-27517
Stirling total energy systems study
[HCP/T2947-1] 19 p0461 N78-27570
Potential energy savings in commercial/residential
communities based on integrated systems design
[CONR-771120-21] 19 p0464 N78-27592

RESIDUAL GAS
Thermochemistry of the reactions of the metals Nb,
V, and Mo with the residual gases of a vacuum
19 p0379 A78-42227

RESIDUES
A study of the formation of unpumpable residues of
crude oil on tankers for the purpose of
preventing marine pollution
17 p0093 A78-18050
A petrographic classification of solid residues
derived from the hydrogenation of bituminous coals
18 p0192 A78-26592

RESISTANCE HEATING
A comparison between an air core and an iron core
Ohmic heating system for The Next Step --- tokamak
19 p0358 A78-40065

RESONANT FREQUENCIES
Proposed high-power microwave source using a
superconducting cavity as an energy storage
[IPFS-T-30] 18 p0240 N78-16436

RESONANT VIBRATION
Aeroelasticity problems in wind energy converters
18 p0210 A78-28562

RESOURCE ALLOCATION
Economic load distribution in the hybrid
hydrothermal power system
17 p0092 A78-17949
Regimes for the ocean, outer space, and weather
--- Book
18 p0189 A78-26399
Allocation of petroleum feedstocks to synthetic
natural gas plants
[PB-273098/4] 18 p0251 N78-17490

RESOURCES

The energy question: A case study in major public policy development in a quasi-free enterprise society

18 p0274 N78-20599

Data bank for the geographical allocation of future US energy supply facilities by county [BRL-50754]

19 p0463 N78-27590

RESOURCES

Rocky Mountain energy resource development:

Status, potential, and socioeconomic issues

[PB-269969/2] 17 p0126 N78-12533

Consensus forecast of US energy supply and demand

to the year 2000

[ORNL/TM-5369]

17 p0140 N78-13576

Heat transfer effects in forced geohat recovery systems

19 p0395 N78-23554

RESOURCES MANAGEMENT

Energy crisis: An evaluation of our resource

potential; Proceedings of the Third Annual

UMR-NEC Conference on Energy, University of

Missouri-Rolla, Rolla, Mo., October 12-14, 1976

17 p0030 A78-11089

Devonian - Ohio Shale productive potential

17 p0030 A78-11090

Solar shade control --- legislation to assure direct solar radiation availability

17 p0057 A78-11358

Energy and remote sensing --- satellite

exploration, monitoring, siting

17 p0075 A78-14805

Fuels and energy from renewable resources;

Proceedings of the Symposium, Chicago, Ill.,

August 29-September 2, 1977

17 p0107 A78-20524

Regimes for the ocean, outer space, and weather

--- Book

18 p0189 A78-26399

Remote sensing of earth resources. Volume 5 -

Annual Remote Sensing of Earth Resources

Conference, 5th, Tallahoma, Tenn., March 29-31,

1976, Technical Papers

18 p0198 A78-27823

The role of nuclear energy in the more efficient

exploitation of fossil fuel resources

19 p0311 A78-34399

Development of a solar-power cadaster

19 p0331 A78-36862

World sources of energy and new energy resource

development in Iran

17 p0111 N78-10553

Use of brackish ground water resources for

regional energy center development, Tularosa

Basin, New Mexico: Preliminary evaluation

[PB-269898/3] 17 p0116 N78-10602

Hot dry rock geothermal energy: Status of

exploration and assessment. Report no. 1: Of

the hot dry rock assessment panel

[ERDA-77-74]

18 p0270 N78-19671

Applications of remote sensing in resource

management in Nebraska

[E78-10099] 18 p0273 N78-20567

Coal energy and the environment: Analysis of

economic and energy efficiency implications of

environmental and resource constraints on the

utilization of coal to produce electricity

18 p0274 N78-20600

Distributed technologies in California's energy

future, volume 1

[LBL-6831-VOL-1] 18 p0285 N78-21623

Alaska natural resource issues

[GPO-95-110] 19 p0404 N78-24601

Hydrogeochemical and stream-sediment survey of the

National Resource Evaluation (NRE) program:

Western United States

[UCID-16911-77-2] 19 p0434 N78-25722

Energy and Resource Planning Group

[UCRL-50029-77] 19 p0448 N78-26611

RETROFITTING

Retrofit precipitators meet rigid new standards

--- sulfur coal combustion

18 p0189 A78-26475

Commercial space: Policy analysis of

profitability of retrofit for energy conservation

[PB-269189/7] 17 p0115 N78-10591

Evaluation of the plan to conserve energy in

federal buildings through retrofit programs

[PB-275311/9] 18 p0276 N78-20627

SUBJECT INDEX

REUSABLE LAUNCH VEHICLES

Advanced launch vehicle systems and technology

18 p0225 A78-31175

REVIEWING

Review of air quality modeling techniques. Volume

8: health and safety impacts of nuclear,

geothermal, and fossil-fuel electric generation

in California

[LBL-5998] 17 p0117 N78-10615

RHEOLOGY

Investigations of the effects of shear degradation

on the rheological behavior of ultra-high

molecular weight water soluble polymers as

applied to enhance oil recovery

18 p0237 N78-16171

RIBBONS

Laser-zone growth in a Ribbon-To-Ribbon, RTR,

process silicon sheet growth development for the

large area silicon sheet task of the low cost

silicon solar array project

[NASA-CR-155586] 18 p0240 N78-16437

RIDING QUALITY

Engineering tests for energy storage cars at the

Transportation Test Center. Volume 1: Program

description and test summary

[PB-269400/8] 17 p0109 N78-10483

Engineering tests for energy storage cars at the

Transportation Tests Center. Volume 4: Ride

Roughness tests

[PB-269403/2] 17 p0110 N78-10486

RING CURRENTS

Formation of a high-current

relativistic-electron-beam ring for plasma

confinement

17 p0012 A78-10887

RINGS

Thermal surveillance of active volcanoes using the

LANDSAT-1 data collection system. Part 4:

Lassen volcanic region

[E78-10123] 19 p0394 N78-23499

RIVERS

The application of LANDSAT-1 imagery for

monitoring strip mines in the new river

watershed in northeast Tennessee, part 2

[E78-10032] 17 p0125 N78-12506

ROCKET ENGINES

Extended performance solar electric propulsion

thrust system study. Volume 4: Thruster

technology evaluation

[NASA-CR-135281-VOL-4] 18 p0237 N78-16090

ROCKS

A numerical simulation of heat transfer in rock beds

17 p0050 A78-11305

Rock properties for thermal energy storage systems

in the 0 to 500 C range

17 p0051 A78-11308

Inexpensive solar collectors for agricultural

requirements

17 p0105 A78-19837

Parametric study of rock pile thermal storage for

solar heating and cooling phase 1

[NASA-CR-155336] 17 p0138 N78-13552

Heat extraction from hot, dry rock masses

[PB-271411/1] 17 p0139 N78-13560

Geological and geothermal data use investigations

for application explorer mission-A: Heat

capacity mapping mission

[E78-10092] 18 p0263 N78-19570

LL gas stimulation program

[UCRL-50036-77-3] 19 p0445 N78-26575

ROCKY MOUNTAINS (NORTH AMERICA)

Rocky Mountain energy resource development:

Status, potential, and socioeconomic issues

[PB-269969/2] 17 p0126 N78-12533

ROLL FORMING

Experiments to evaluate high-temperature rolling

as a low-cost process for silicon solar cells

17 p0014 A78-10928

ROOM TEMPERATURE

A procedure for comparing the economy of different

electrical space heating systems

17 p0068 A78-13451

Lightweight thermal storage for solar heated

buildings

17 p0083 A78-16832

ROTATING BODIES

Augmenting the condenser heat transfer performance

of rotating heat pipes

[AIAA 78-409] 19 p0318 A78-35597

SUBJECT INDEX

SAFETY MANAGEMENT

High pressure rotary piston coal feeder
17 p0133 A78-13261

High pressure rotary piston coal feeder
[MERC/SP-77/6] 19 p0417 A78-25443

ROTATING CYLINDERS

Lift on a rotating porous cylinder --- with
application to wind power generation 18 p0167 A78-21633

Madaras Rotor Power Plant --- windpowered generator
19 p0361 A78-40367

ROTATING ELECTRICAL MACHINES

S.C. magnet design for 10 MJ homopolar machine ---
as energy storage device for fusion experiments 19 p0348 A78-39840

ROTATING GENERATORS

Evaluation of the feedback in MHD conduction
machines 18 p0167 A78-21397

Kine-Pak: A self-contained, electrical power
generator system --- using a helical spring to
rotate a rotor and generate electric current
[NASA-CASE-LAR-11551-1] 19 p0389 A78-22468

Wind wheel electric power generator
[NASA-CASE-MFS-23515-1] 19 p0389 A78-22469

ROTATING PLASMAS

Study of a collisional plasma rotating between two
cylinders 19 p0293 A78-32718

Production of fusion energy by vortex structure
compression 19 p0338 A78-38419

Reversed-field configuration generated by a
rotating relativistic electron beam 19 p0382 A78-42492

ROTOR AERODYNAMICS

A low cost windmill rotor 18 p0170 A78-22242

Performance of counter- and corotating arrays of
Savonius turbines --- windpowered machines 18 p0188 A78-26113

Mode of operation and characteristics of Darrieus
rotors 18 p0210 A78-28560

Measurement program of the Dutch experimental
vertical-axis wind turbine 18 p0210 A78-28561

Aeroelasticity problems in wind energy converters
18 p0210 A78-28562

Novel wind turbine: Invention of a Viennese
engineer - 'Fan principle' yields severalfold
the current effective power 18 p0211 A78-28566

Giant wind turbines 19 p0340 A78-38814

Aerodynamic augmentation of wind turbines
19 p0361 A78-40366

Calculation of the geometry and performance of a
high-speed wind rotor 19 p0382 A78-42419

Secondary parameters affecting the performance of
resistance-type vertical-axis wind rotors 19 p0382 A78-42420

ROTOR BLADES

Design parameters affecting the performance of
resistance-type, vertical-axis windrotors - An
experimental investigation 17 p0054 A78-18093

Criteria for the manufacture and operation of wind
power installations with power up to 10 kW 18 p0212 A78-28573

Cost-effective concept for utilization of wind
energy - Results based on experience with the
Sylt double rotor 18 p0212 A78-28574

ROTOR BLADES (TURBOMACHINERY)

Mode of operation and characteristics of Darrieus
rotors 18 p0210 A78-28560

Measurement program of the Dutch experimental
vertical-axis wind turbine 18 p0210 A78-28561

Recent developments in wind turbines 18 p0210 A78-28563

Twind wind mill --- blade and tower design 18 p0211 A78-28570

Blade twist, droop snoot, and forward spars --- in
windmill blades 18 p0234 A78-32421

Calculation of the geometry and performance of a
high-speed wind rotor 19 p0382 A78-42419

Secondary parameters affecting the performance of
resistance-type vertical-axis wind rotors 19 p0382 A78-42420

Wind turbine generator rotor blade concepts with
low cost potential 18 p0249 A78-17466

[NASA-TN-73835] 18 p0267 A78-19635

Fatigue load spectra for upwind and downwind rotors
Effects of rotor location, coning, and tilt on
critical loads in large wind turbines 18 p0267 A78-19636

Comparison of blade loads of fixed and free yawing
wind turbine 18 p0267 A78-19637

Fixed pitch wind turbines 18 p0267 A78-19638

Research of low cost wind generator rotors
18 p0267 A78-19639

ROTOR SPEED

Possibilities for demand-oriented delivery of wind
energy 18 p0211 A78-28565

ROTOES

Toroidal accelerator rotor platforms for wind
energy conversion 18 p0235 A78-32505

Madaras Rotor Power Plant --- windpowered generator
19 p0361 A78-40367

Wind tunnel performance data for two- and
three-bucket Savonius rotors 19 p0364 A78-40822

SEDIMENTS

Thermal alteration experiments on organic matter
in recent marine sediments as a model for
petroleum genesis

17 p0097 A78-18784

Onsite control of sedimentation utilizing the
modified block-cut method of surface mining
[PB-272244/5]

17 p0159 A78-15552

Hydrogeochemical and stream-sediment survey of the
National Resource Evaluation (NURE) program:
Western United States
[UCID-16911-77-2]

19 p0434 A78-25722

SEISMOLOGY

Instrumentation for in situ coal gasification. I -
Background and overview

19 p0367 A78-41522

SELECTION

Site selection for NSPC operational tests of solar
heating and cooling systems
[NASA-CR-150537]

18 p0263 A78-19602

SELECTIVE DISSEMINATION OF INFORMATION
What does it concern --- technological information
dissemination and social response

18 p0218 A78-29873

The role of scientific and technical information
in critical period management, volume 1
[PB-272178/5]

17 p0157 A78-14939

SELENIDES

Selenide isotope generators
[CONF-770302-1]

17 p0114 A78-10581

SELF ALIGNMENT

An automatic alignment system for a multibeam
laser system --- for use in fusion reactors

19 p0359 A78-40222

SEMICONDUCTING FILMS

Solar cells by ionized-cluster beam deposition and
epitaxial techniques

17 p0013 A78-10912

The structure and Schottky barrier diode
properties of polycrystalline GaAs films grown
by the close spaced vapour transport technique
on Mo substrates

17 p0027 A78-11060

Rheotaxy for large grain thin film solar cell
fabrication

17 p0027 A78-11067

Low cost, high efficiency solar cells using
indium-tin oxide on semiconductor /OSOS/ solar
cells

17 p0054 A78-11334

Evaluation of the CdS/CdTe heterojunction solar cell

17 p0062 A78-11815

Silicon films as selective absorbers for solar
energy conversion

17 p0070 A78-13905

Molecular-beam epitaxy in space

17 p0103 A78-19472

Thin silicon film p-i-n photodiodes with internal
reflection

18 p0205 A78-28142

Observations of anisotropic diffused layer sheet
resistance in EFG silicon ribbon solar cells ---
Edge-defined Film-fed Growth

18 p0223 A78-30648

High conductivity ZnSe films --- for solar cells

19 p0310 A78-34256

American Vacuum Society, National Symposium, 28th,
and Conference on Microbalance Techniques, 15th,
Boston, Mass., November 8-11, 1977, Proceedings

19 p0324 A78-36030

Thickness dependence of structural and electrical
properties of CdS films for solar cells

19 p0325 A78-36035

Structure and morphology of chemical-sprayed CdS
films

19 p0325 A78-36036

Photoelectric properties of CdS thin films
obtained by vacuum evaporation from the
heterogeneous CdS-Cr₂O₃ system

19 p0333 A78-37261

Calculation of photocurrent and limit efficiency
of p-CdTe - n-CdS film-type photocells

19 p0335 A78-37944

Low-resistivity ZnCdS films for use as windows in
heterojunction solar cells

19 p0369 A78-41913

Evaporated CdS film based heterojunction solar cells

19 p0372 A78-42122

Technology of Cu₂S-CdS solar cells - German
state-of-the-art

19 p0373 A78-42127

SEMICONDUCTOR DEVICES

High efficiency and large area /GaAl/As-GaAs solar
cells

17 p0026 A78-11054

The operation of the
semiconductor-insulator-semiconductor /SIS/
solar cell Theory

18 p0192 A78-26717

Direct heat pipe cooling of semiconductor devices
[AIAA 78-450]

19 p0319 A78-35626

Analysis of the characteristics of semiconductor
photocells in the 100-400 K temperature range

19 p0336 A78-37950

A model for the current-voltage curve of
photoexcited semiconductor electrodes

19 p0343 A78-39457

Competitive oxidation at semiconductor photocathodes

19 p0344 A78-39466

Advanced semiconductor technology for alternate
energy sources: dc to ac inverters

18 p0269 A78-19662

SEMICONDUCTOR DIODES

Nonreflecting vertical junction silicon solar cell
optimization

17 p0151 A78-14636

SEMICONDUCTOR JUNCTIONS

Structures for photocells - Homostructures,
heterostructures or heterojunctions

17 p0003 A78-10552

Model of the CdS/Cu₂S heterojunction

17 p0017 A78-10974

A contribution to Schottky barrier solar cell theory

17 p0025 A78-11041

Vapor-phase-epitaxial growth, processing and
performance of AlAs-GaAs heterojunction solar
cells

17 p0026 A78-11055

Computer analysis of heterojunction and graded
bandgap solar cells

17 p0026 A78-11056

Improved GaAs solar cells with very thin junctions

17 p0026 A78-11057

Photocells employing smooth AlGaAs-GaAs
heterojunctions to extend the spectral response
range

17 p0062 A78-11668

Photocells with intermediate conversion of
radiation and which operate at an increased
concentration /2500-fold/ of solar radiation

18 p0172 A78-22795

Simplified fabrication of GaAs homojunction solar
cells with increased conversion efficiencies

18 p0216 A78-29199

AlGaAs-GaAs graded-heterostructure photocells with
expanded sensitivity spectrum

19 p0300 A78-33271

CuInS₂ liquid junction solar cells

19 p0310 A78-34274

Electrical and photovoltaic characteristics of
indium-tin oxide/silicon heterojunctions

19 p0315 A78-35282

Analysis of generation in space charge regions of
solar cells

19 p0334 A78-37466

A simple theory of back surface field /BSF/ solar
cells

19 p0338 A78-38552

Semiconductor liquid-junction solar cells;
Proceedings of the Conference on the
Electrochemistry and Physics of Semiconductor
Liquid Interfaces under illumination, Airline,
Va., May 3-5, 1977

19 p0342 A78-39453

State of the art homojunction cells

19 p0343 A78-39454

Photocurrent spectroscopy of semiconductor
electrodes in liquid junction solar cells

19 p0343 A78-39456

Stable semiconductor liquid junction cell with 9%
solar to electrical conversion efficiency

19 p0343 A78-39461

Stability and voltammetry of illuminated
semiconductor-liquid interfaces

SUBJECT INDEX

SILICON

Dynamic oil shale fracture experiments
[PB-269258/0] 17 p0122 N78-11559

Borehole gravity survey to determine density
variations in the Devonian shale sequence of
Lincoln County
[NERC-CR-77/7] 17 p0157 N78-14729

Interactive data management and analysis system
for the Eastern Gas Shale Program
[MLM-2469(OP)] 19 p0401 N78-23988

Mechanical properties of oil shale of importance
to in-situ rubblelization
[SAND-77-0499C] 19 p0411 N78-24731

Carbonaceous shales of Indiana as sources of
energy, petrochemicals, and ceramic materials
[TID-28179] 19 p0418 N78-25518

Geochemical characterization of Devonian gas shale
[MLM-2467(OP)] 19 p0434 N78-25719

Physicochemical characterization of Devonian gas
shale
[MLM-2466(OP)] 19 p0434 N78-25720

SHEAR FLOW
Simplest physical model of a magnetohydrodynamic
generator 19 p0339 A78-38634

SHEAR STRESS
Investigations of the effects of shear degradation
on the rheological behavior of ultra-high
molecular weight water soluble polymers as
applied to enhance oil recovery 18 p0237 N78-16171

Two-phase Hartmann flows in the MHD generator
configuration
[AD-A051450] 19 p0401 N78-23927

SHELTERS
Evaluation of computerized energy programs for the
calculation of energy use in new and existing
buildings
[PB-272337/7] 18 p0243 N78-16466

SHIPS
Forecast markets, economics and shipbuilding
program for OTEC/industrial plant-ships in
tropical oceans --- Ocean Thermal Energy
Conversion 17 p0056 A78-11349

Energy - Implications for transport 18 p0218 A78-29904

Energy and economic impacts of projected freight
transportation improvements 18 p0257 N78-18537

SHOCK TUBES
A shock tube study of the ignition delay of
methane at elevated temperatures 18 p0199 A78-27831

Shock-tube combustion of high density hydrocarbon
fuels 18 p0222 A78-30512

SHORT CIRCUITS
Variation of short-circuit current spectral
response with Cu/2-x/S composition in thin film
Cu/2-x/S/CdS photovoltaic cells 17 p0017 A78-10973

Enhancement of MIS solar-cell 'efficiency' by
peripheral collection 17 p0070 A78-13797

Annealing of GaAs solar cells damaged by electron
irradiation 18 p0219 A78-30192

SHORT HAUL AIRCRAFT
Improved energy efficiency for small CTOI
transport aircraft 18 p0226 A78-31305

SHORT TAKEOFF AIRCRAFT
Some aspects of powerplant airframe integration
affecting fuel conservation 18 p0226 A78-31304

SHROUDED TURBINES
The shrouded aerogenerator --- wind turbines
17 p0067 A78-13344

The Leboast Wind Turbine - Laboratory tests and
data analysis 19 p0364 A78-40824

SIBERIA
The energy problem of the North --- power
requirements, resources, and technological
evolution 17 p0071 A78-13989

SIDELobe REDUCTION
Solar power satellite system definition study,
Part 3
[NASA-CR-151673] 18 p0272 N78-20164

SILANES
Process feasibility study in support of silicon
material task 1
[NASA-CR-157030] 19 p0396 N78-23561

SILICIDES
Thin Pt and Pd silicide Schottky barriers for
silicon solar cells 18 p0171 A78-22267

Sputtered metal silicide solar selective absorbing
surfaces 18 p0221 A78-30303

SnO₂/Si solar cells - Heterostructure of
Schottky-barrier or MIS-type device 19 p0338 A78-38550

SILICON
Silicon for solar photocells 17 p0003 A78-10551

Single crystal silicon photocells for terrestrial
use - State of the art and perspectives on the
future 17 p0003 A78-10553

Fabrication and characterization of solar cells
using dendritic silicon thin films grown on
alumina ceramic 17 p0013 A78-10916

Low cost solar cells based on large area
unconventional silicon 17 p0013 A78-10918

Production of solar-grade silicon from purified
metallurgical silicon 17 p0013 A78-10925

Dip-coated sheet silicon solar cells 17 p0014 A78-10926

The application of color response data of silicon
cells for improving photovoltaic efficiency 17 p0055 A78-11341

Silicon films as selective absorbers for solar
energy conversion 17 p0070 A78-13905

Solar cells for terrestrial applications 17 p0083 A78-16826

Thermomigration of silicon wafers in a solar furnace 17 p0084 A78-16837

Development of low-cost silicon crystal growth
techniques for terrestrial photovoltaic solar
energy conversion 18 p0220 A78-30268

State of the art homojunction cells 19 p0343 A78-39454

High-purity silicon for solar cell applications 19 p0344 A78-39567

High efficiency solar panel (HESP)
[AD-A043382] 17 p0112 N78-10572

A Review of Air Force space photovoltaic
development efforts 17 p0136 N78-13530

Impurity concentrations and surface charge
densities on the heavily doped face of a silicon
solar cell 17 p0136 N78-13534

Investigation of the topographical features of
surface carrier concentrations in silicon solar
cell material using electrolyte electroreflectance 17 p0136 N78-13535

Advanced high efficiency wraparound contact solar
cell
[AIAA-PAPER-77-521] 17 p0137 N78-13536

Transmutation doping of silicon solar cells 17 p0137 N78-13539

Nonreflecting vertical junction silicon solar cell
optimization [AD-A046150] 17 p0151 N78-14636

Silicon photovoltaic cells in thermophotovoltaic
conversion [EPRI-ER-478] 18 p0242 N78-16460

Silicon on ceramic process. Silicon sheet growth
development for the large-area silicon sheet
task of the low-cost silicon solar array project
[NASA-CR-155613] 18 p0248 N78-17464

Phase 1 of the automated array assembly task of
the low cost silicon solar array project
[NASA-CR-155935] 18 p0255 N78-18516

- Hot forming of silicon sheet, silicon sheet growth development for the large area silicon sheet task of the low cost silicon solar array project [NASA-CR-155934] 18 p0255 N78-18517
- Energy requirement for the production of silicon solar arrays [NASA-CR-155932] 18 p0255 N78-18519

- Large open-circuit photovoltages in silicon minority carrier HIS solar cells 17 p0025 N78-11046
- Interface study of HIS silicon solar cells 17 p0025 N78-11047

Photocurrent analysis in MIS silicon solar cells
17 p0025 A78-11048

Inversion layer silicon solar cells with MIS
contact grids
17 p0026 A78-11049

Improvement of efficiency in Si Schottky barrier
solar cells
17 p0026 A78-11051

Degradation of SnO₂/Si heterojunction solar cells
17 p0027 A78-11063

Inversion layer silicon solar cells with 10-12%
AM1 efficiencies
17 p0027 A78-11066

An optical scanning technique for evaluating
silicon solar cells
17 p0091 A78-17553

Thin Pt and Pd silicide Schottky barriers for
silicon solar cells
18 p0171 A78-22267

On the theory of homojunction and heterojunction
solar cells
18 p0192 A78-26616

Spectral responses limitation mechanisms of a
shallow junction n⁺/p photodiode
18 p0205 A78-28141

Thin silicon film p-i-n photodiodes with internal
reflection
18 p0205 A78-28142

Diffusion lengths in amphoteric GaAs heteroface
solar cells
18 p0216 A78-29195

Solar cells from zone-refined metallurgical silicon
18 p0219 A78-30190

Purification and characterization of metallurgical
silicon
18 p0219 A78-30191

Epitaxial silicon solar cells with uniformly doped
layer
18 p0228 A78-31732

On the fill factor of solar cells --- v_{olt}-ampere
characteristics
19 p0292 A78-32691

Electrical and photovoltaic characteristics of
indium-tin oxide/silicon heterojunctions
19 p0315 A78-35282

Silicon solar cell designs based on physical
behavior in concentrated sunlight
19 p0334 A78-37462

Influence of bandgap narrowing on the performance
of silicon n-p solar cells
19 p0334 A78-37464

Polycrystalline silicon p-n junctions ---
fabrication of low cost solar cells
19 p0334 A78-37467

Minority carrier lifetime measurement of silicon
solar cell
19 p0335 A78-37903

Ion-implanted drift field silicon solar cell
19 p0335 A78-37904

Energy budget of single crystal silicon solar
cells with the present state-of-art
19 p0371 A78-42116

Effects of temperature on the performance of
silicon solar cells
19 p0371 A78-42117

A note on the performance of a Si solar cell under
partial illumination
19 p0371 A78-42119

Measurement of material parameters that limit the
open-circuit voltage in P-N-junction silicon
solar cells
17 p0126 N78-13532

Applications of ion implantation for high
efficiency silicon solar cells
17 p0127 N78-13538

Developments in vertical-junction silicon solar
cells
17 p0137 N78-13540

Physics underlying improved efficiency of
high-low-junction emitter silicon solar cells
[SAND-77-1610C]
19 p0410 N78-24685

SILICON OXIDES
Silicon monoxide antireflection coatings for
InP/CdS solar cells
18 p0221 A78-30305

SILICON TETRACHLORIDE
Process feasibility study in support of silicon
material task 1
[NASA-CR-157030]
19 p0396 N78-23561

SILICON TRANSISTORS

The development and prospects of power transistors
used for the conversion of energy
17 p0081 A78-16353

SILICONES

The use of silicone gel for potting photovoltaic
arrays
17 p0054 A78-11336

SILVER

Doped silver catalysts for H₂/air fuel cells
17 p0095 A78-18644

SINGAPORE

A study on the use of windmills in Singapore
18 p0169 A78-22230

SINGLE CRYSTALS

Single crystal silicon photocells for terrestrial
use - State of the art and perspectives on the
future
17 p0003 A78-10553

Ribbon-to-ribbon crystal growth --- for solar cell
fabrication
17 p0014 A78-10929

Single crystal and polycrystalline GaAs solar
cells using AMOS technology
17 p0025 A78-11044

Purification and characterization of metallurgical
silicon
18 p0219 A78-30191

Development of low-cost silicon crystal growth
techniques for terrestrial photovoltaic solar
energy conversion
18 p0220 A78-30268

Epitaxial silicon solar cells with uniformly doped
layer
18 p0228 A78-31732

Energy budget of single crystal silicon solar
cells with the present state-of-art
19 p0371 A78-42116

Novel silicon crystals and method for their
preparation
[NASA-TM-75195]
18 p0290 N78-21957

Heterostructure single crystal silicon
photovoltaic cell. Type A: Semiconductor
heterojunction silicon devices
[TID-27910]
19 p0462 N78-27579

SINTERING

Solar conversion efficiency of pressure sintered
cadmium selenide liquid junction cells
19 p0344 A78-39469

SITES

Evaluation of offshore site for wind energy
generation
17 p0029 A78-11080

Candidate locations for SPS rectifying antennas
[NASA-TM-78146]
17 p0138 N78-13553

Site dependent factors affecting the economic
feasibility of solar powered absorption cooling
[NASA-CR-150533]
18 p0255 N78-18524

Site selection for MSFC operational tests of solar
heating and cooling systems
[NASA-CR-150537]
18 p0263 N78-19602

Site selection feasibility for a solar energy
system on the Fairbanks Federal Building
[NASA-CR-150559]
18 p0268 N78-19645

SIZE (DIMENSIONS)

Piping design considerations in a solar-Rankine
power plant --- pipe size
17 p0158 N78-15085

SIZE DETERMINATION

Optimal sizing of solar heating components by
equating marginal costs of suboptimal investment
paths
17 p0084 A78-16840

SIZING SCREENS

Screens for the OTEC plants --- protection from
biological materials for Ocean Thermal Energy
Conversion heat exchangers
19 p0303 A78-33329

SLAGS

Effects of slagging in MHD generator ducts
[ASME PAPER 77-HT-59]
17 p0089 A78-17491

Characterization of open-cycle coal-fired MHD
generators, revision A
[PE-2478-4-REV-A]
19 p0422 N78-25566

SLICING

Multi-wire slurry wafering demonstrations ---
slicing silicon ingots for solar arrays
[JPL-PUB-78-37]
18 p0276 N78-20620

SLIDING FRICTION

SLIDING FRICTION

Friction and wear of selected metals and alloys in sliding contact with AISI 440 C stainless steel in liquid methane and in liquid natural gas
[NASA-TP-1150] 18 p0273 N78-20512

SLUDGE

Operating experience with large scale digestion of urban refuse with sewage sludge 17 p0036 A78-11136
Combined refuse and sludge incineration 17 p0037 A78-11151
Improving sludge incineration and vacuum filtration with pulverized coal 17 p0095 A78-18498
Evaluation of sulfate-bearing waste material from fluidized bed combustion of coals for soil stabilization
[PB-278031/0] 19 p0451 N78-26657

SLURRIES

The role of solvent in the solvent refined coal process 18 p0190 A78-26577
Products from two-step coal liquefaction using three different first-step reactor packings 18 p0190 A78-26578
Rocketdyne's advanced coal slurry pumping program 17 p0133 N78-13266
Surfactant-assisted liquefaction of particulate carbonaceous substances --- coal liquefaction
[NASA-CASE-RPO-13904-1] 19 p0414 N78-25237
Status of steam-iron pilot plant operations
[CONF-771092-5] 19 p0415 N78-25250
Appendix: Cook inlet coal: Economics of mining and marine slurry transport
[PB-278756/2] 19 p0455 N78-27493
Feasibility study of mining Alaska coal and transportation by slurry to the west coast
[PB-278755/4] 19 p0458 N78-27545
Task reports: Slurry coal pipelines, volume 2, part 1 --- environmental impact
[PB-278676/2] 19 p0465 N78-27603
Task reports: Slurry coal pipelines, volume 2, part 2 --- environmental impact
[PB-278677/0] 19 p0465 N78-27604

SLURRY PROPELLANTS

The effect of burner design and operational factors on the emission of nitrogen oxides when burning an anthracite/slurry mixture 19 p0335 A78-37861

SHELTING

High-purity silicon for solar cell applications 19 p0344 A78-39567

SOCIAL FACTORS

A detailed analysis of the environmental effects of energy utilization in the U.S. economy 17 p0031 A78-11102
Technical and socio-economic aspects of solar energy and rural development in developing countries 17 p0083 A78-16829
Technological innovation and social exploration in economic growth and energy development 18 p0204 A78-27935
What does it concern --- technological information dissemination and social response 18 p0218 A78-29873
Transportation in America's future: Potentials for the next half century. Part 1: Societal
[PB-270467/4] 17 p0129 N78-12910
Energy conservation in the home: An energy education/conservation curriculum guide for home economics teachers
[EDM-1028] 18 p0284 N78-21607
Management of social and economic impacts associated with the construction of large-scale projects: Experiences from the Western coal development communities
[BNWL-RAP-16] 19 p0468 N78-27975

SODIUM

Material selection considerations for fluoride thermal energy storage containment in a sodium heat pipe environment
[AD-A042389] 17 p0112 N78-10563
Ford/ERDA sodium-sulfur battery development, phase 2
[COO-2566-30] 19 p0463 N78-27585

SODIUM COOLING

A liquid sodium cooled solar tower system 17 p0053 A78-11325

SUBJECT INDEX

SODIUM HYDROXIDES

Large-scale thermal energy storage using sodium hydroxide /NaOH/ 17 p0051 A78-11309
Biogasification using NaOH treated pig faeces 18 p0194 A78-27550

SODIUM NITRATES

Boiling heat transfer in a bench-scale molten-salt thermal energy storage device
[CERL/TH-5689] 17 p0114 N78-10586

SODIUM VAPOR

Sodium vapor heat pipe laser cell
[AIAA 78-392] 19 p0317 A78-35587

SOIL MECHANICS

Evaluation of sulfate-bearing waste material from fluidized bed combustion of coals for soil stabilization
[PB-278031/0] 19 p0451 N78-26657

SOILS

Ground as a heat source --- for house heating 17 p0097 A78-18816
Geological and geothermal data use investigations for application explorer mission-A: Heat capacity mapping mission
[E78-10092] 18 p0263 N78-19570
HCMM energy budget data as a model input for assessing regions of high potential groundwater pollution
[E78-10111] 18 p0282 N78-21516

SOLAR ARRAYS

Solar-electrical systems - Theory and applications 17 p0009 A78-10731
Solar-electric residential system tests 17 p0010 A78-10741
Integral glass sheet encapsulation for terrestrial panel applications --- solar cell modules 17 p0016 A78-10948
Material and design considerations of encapsulants for photovoltaic arrays in terrestrial applications 17 p0016 A78-10951
SAMIS - A simulation of the solar array manufacturing industry 17 p0016 A78-10955
Improved mesh interconnector technology for the Meteosat solar array 17 p0016 A78-10957
Development status of the ultralightweight solar array ULP --- Ultra Lightweight Panel 17 p0017 A78-10967
An automatable integrated thin film solar cell array 17 p0017 A78-10972
Albedo contribution to satellite solar array performance 17 p0019 A78-10990
German activities in the field of terrestrial application of solar cell arrays 17 p0020 A78-11005
Novel versions of the compound parabolic concentrator for photovoltaic power generation 17 p0023 A78-11024
Progress report on a 1-kW terrestrial array of AlGaAs/GaAs concentrator solar cells 17 p0023 A78-11025
Some problems concerning solar cell arrays in the design of solar-electrical systems 17 p0030 A78-11086
Experimental performance study of a 40 sq m vacuum flow flat plate solar collector array 17 p0042 A78-11216
A solar panel for residential use 17 p0043 A78-11223
Solar photovoltaic power stations 17 p0054 A78-11335
The use of silicone gel for potting photovoltaic arrays 17 p0054 A78-11336
Solar panels BPX47A for terrestrial applications 17 p0071 A78-13984
Solar energy and economic considerations 17 p0078 A78-15407
Economic photovoltaic power generation with heat recovery 17 p0091 A78-17552
Determination of optimal arrangement-angles for the panels of a nonconvex solar array 18 p0178 A78-24262
Application of solar energy in space 18 p0201 A78-27863

- Solar thermal test facility 18 p0216 A78-29227
- Advanced lightweight solar array technology ---
for communication satellites [AIAA 78-533] 19 p0294 A78-32883
- Shading effect for uniformly spaced solar collector arrays on plane surfaces 19 p0296 A78-33039
- Steering a field of mirrors using a shared computer-based controller --- for solar array and heliostat application 19 p0312 A78-34516
- Solar and infrared radiation properties of parallel-plate honeycomb [AIAA PAPER 78-901] 19 p0324 A78-36019
- A note on the performance of a Si solar cell under partial illumination 19 p0371 A78-42119
- Views change on power satellite work --- satellite solar power station concepts 19 p0382 A78-42475

SOLAR SAILS

SUBJECT INDEX

- A fixed tilt solar collector employing reversible
vee-trough reflectors and vacuum tube receivers
for solar heating and cooling systems
[NASA-CR-155426] 17 p0160 N78-15567
- SOLAR SAILS**
Film reflectors in space --- Russian book on
orbiting solar power stations and solar sails
17 p0078 A78-15423
- SOLAR SEA POWER PLANTS**
Solar sea power plants - Prospects and problems
19 p0376 A78-42163
- SOLAR SENSORS**
Solar energy collector orientation and tracking mode
17 p0104 A78-19827
A low cost high temperature sun tracking solar
energy collector
18 p0262 N78-19041
- SOLAR SIMULATION**
Indoor test for thermal performance evaluation of
Sunworks (liquid) solar collector
[NASA-CR-150573] 18 p0268 N78-19650
- SOLAR SIMULATORS**
What is simulated AND - A comparison of CWR and
violet cell measurements across USA and Europe
17 p0019 A78-10988
Economic trade-offs between the performance of
collector thermal performance tests on a Solar
Simulator as opposed to outdoor testing
17 p0058 A78-11369
Indoor test for thermal performance evaluation of
Libbey-Owens-Ford solar collector --- using a
solar simulator
[NASA-CR-150508] 18 p0249 N78-17474
Use of the Marshall Space Flight Center solar
simulator in collector performance evaluation
[NASA-TN-78165] 18 p0284 N78-21605
Indoor test for thermal performance evaluation on
life sciences engineering (air) solar collector
[NASA-CR-150665] 19 p0420 N78-25547
- SOLAR SPECTRA**
High-efficiency solar energy conversion through
flux concentration and spectrum splitting
18 p0168 A78-22064
Solar irradiance, total and spectral --- data for
cost-effective solar energy conversion
18 p0199 A78-27853
- SOLAR TERRESTRIAL INTERACTIONS**
The earth as a solar heat engine --- windpower
utilization, ocean thermal conversion, tidal
power, waterwave power and biomass conversion
18 p0223 A78-30745
- SOLDERED JOINTS**
Development program for MHD power generation.
Volume 4: Superconducting magnet study
[FE-2015-16-VOL-4] 19 p0455 N78-27447
- SOLENOIDS**
Fusion reactor development scenarios for the laser
solenoid concept
19 p0349 A78-39881
- SOLID ELECTRODES**
MHD electrode-insulator micro- and macro-structure
17 p0088 A78-17464
- SOLID STATE DEVICES**
Design considerations for an electric vehicle
solid-state motor controller with regenerative
braking capability
17 p0092 A78-17570
A lithium solid-state cell based on the
Li3.75S0.75P0.25O4 electrolyte
19 p0363 A78-40620
On the discharge mechanism of silver/alkylammonium
polyiodide solid state cells
19 p0363 A78-40621
Innovations in microelectronics and solid state at
North Carolina Agricultural and Technical State
University
18 p0237 N78-16280
- SOLID STATE LASERS**
A 25 megajoule energy storage and delivery system
for the Shiva laser
19 p0351 A78-39920
- SOLID SUSPENSIONS**
Studies on the separation of coal extract from
solid residue in liquefied coal
[NSP/AER-75-15213] 19 p0398 N78-23590
- SOLID WASTES**
Quality and characteristics of steam produced from
wastes
17 p0005 A78-10630
- Densified refuse derived fuels - An alternative
concept
17 p0005 A78-10634
- Energy from solid waste - Appraisal of alternatives
17 p0011 A78-10746
- The utilization of solid wastes for the generation
of electric power
17 p0028 A78-11074
- ROEHHC subscript R Burner - High ash solid fuel
combustion system
17 p0032 A78-11111
- The environmental effects and economic costs of
solid waste energy recovery
17 p0033 A78-11113
- Modular incinerator energy recovery systems - The
Silcoam Springs experience
17 p0033 A78-11114
- Utilization of waste cellulose for production of
chemical feedstocks via acid hydrolysis ---
Conversion to glucose
17 p0035 A78-11129
- Pyrolysis of solid wastes for production of
gaseous fuels and chemical feedstocks
17 p0035 A78-11131
- Chicago's new refuse disposal installation
17 p0035 A78-11133
- Operating experience with large scale digestion of
urban refuse with sewage sludge
17 p0036 A78-11136
- Environmental impact of solid waste and biomass
conversion-to-energy processes
17 p0036 A78-11139
- The Andco-Torrax process - A slagging pyrolysis
solid waste conversion system
17 p0036 A78-11142
- Energy from refuse - Theoretical and practical
results
17 p0037 A78-11149
- A solid waste package deal - Energy and materials
from garbage
17 p0092 A78-17671
- Energy from municipal refuse
18 p0182 A78-24763
- Fuels from waste --- Book
18 p0197 A78-27801
- Energy from wastes - An overview of present
technologies and programs
18 p0197 A78-27803
- Production of low-Btu gas from wastes, using
molten salts
18 p0197 A78-27804
- Pipeline gas from solid wastes by the Syngas
recycling process
18 p0197 A78-27805
- The nature of pyrolytic oil from municipal solid
waste
18 p0197 A78-27806
- The production of oil from wood waste
18 p0198 A78-27809
- Fuels from wood waste
18 p0198 A78-27810
- Pyrolytic gasification of Kraft black liquors
18 p0198 A78-27811
- Energy recovery by the incineration of solid waste
- Development, present status, and experiences
in Germany /James Clayton Lecture/
18 p0221 A78-30373
- Energy savings from solid urban waste disposal
systems in Italy
18 p0228 A78-31744
- Waste pyrolysis - Alternative fuel source
19 p0333 A78-31712
- European developments in the recovery of energy
and materials from municipal solid waste
[PB-270219/9] 17 p0122 N78-11892

from solid waste, executive summary
[PB-277143/4] 19 p0392 N78-22979

SUBJECT INDEX

SPACE MANUFACTURING

Solid waste utilization: Pyrolysis
 [ANL/CES/78-77-15] 19 p0435 N78-26038
 Overcoming institutional barriers to solid waste
 utilization as an energy source --- electric
 power plants
 [HCP/L50172-01] 19 p0452 N78-27005
 Overcoming institutional barriers to solid waste
 utilization as an energy source: Executive
 summary --- electric power plants
 [HCP/L50172-02] 19 p0453 N78-27006
 Environmental effects of burning solid waste as fuel
 [IS-N-124] 19 p0466 N78-27637

SOLID-SOLID INTERFACES
 Dependence of Schottky barrier solar cell
 efficiency on the thickness of the interfacial
 layer 19 p0373 A78-42128

SOLIDIFICATION
 Purification and characterization of metallurgical
 silicon 18 p0219 A78-30191

SOLIDS FLOW
 Gravity flow rate of solids through orifices and
 pipes 17 p0133 N78-13260

SOLUBILITY
 Kinetics and solubility of hydrogen in coal
 liquefaction reactions 18 p0191 A78-26585
 An investigation of coal solubility in anthracene
 oils 18 p0195 A78-27745

SOLVENT EXTRACTION
 Effect of solvent on molecular composition in coal
 liquefaction 18 p0173 A78-22823
 An investigation of coal solubility in anthracene
 oils 18 p0195 A78-27745
 Effects of coal minerals on the hydrogenation,
 desulfurization, and solvent extraction of coal
 18 p0229 A78-31870
 Application of solar energy to a solvent
 reclamation system 19 p0338 A78-38426
 Studies on the separation of coal extract from
 solid residue in liquefied coal
 [NSF/ABR-75-15213] 19 p0398 N78-23590
 Assessment of technology for the liquefaction of
 coal: Summary
 [FE-1216-2] 19 p0445 N78-26572

SOLVENTS
 The role of solvent in the solvent refined coal
 process 18 p0190 A78-26577
 Short contact time coal liquefaction - Techniques
 and product distributions 18 p0191 A78-26586
 Separation of coal liquids from major liquefaction
 processes to meaningful fractions 18 p0191 A78-26590
 Occupational exposure to refined petroleum
 solvents. Criteria for a recommended standard
 [DHEW/PUB/NIOSH-77/192] 19 p0412 N78-24790
 Characteristics of solvent refined coal: Dual
 register burner tests
 [EPRI-PP-628] 19 p0437 N78-26232

SORBENTS
 Synthetic SO₂ sorbents for fluidized-bed coal
 combustors 17 p0003 A78-10503

SORPTION
 Tritium removal from liquid metals by sorption on
 yttrium 19 p0358 A78-40074

SOUTH DAKOTA
 Legislative handbook on energy-related topics
 [PB-276766/3] 19 p0390 N78-22477

SOUTHERN CALIFORNIA
 Public policy issues. A Southern California Gas
 Company project SAGE report
 [NASA-CR-155945] 18 p0264 N78-19613

SPACE CHARGE
 Experimental and computational results on direct
 energy conversion for mirror fusion reactors
 17 p0064 A78-12486
 Analysis of generation in space charge regions of
 solar cells 19 p0334 A78-37466

SPACE COLONIES

The industrialization of space - A myth or
 tomorrow's reality. I 17 p0106 A78-20148
 Space industrialization - Redefining the world
 18 p0193 A78-26823
 Materials, processing, and construction --- in space
 18 p0203 A78-27928
 Directions for research --- for space
 manufacturing colonization and scientific research
 18 p0203 A78-27930
 The economics of space industrialization - A
 phased approach 18 p0204 A78-27934
 The extraterrestrial imperative --- space
 industrialization 19 p0308 A78-33589

SPACE ERRECTABLE STRUCTURES
 Learning to build large structures in space
 17 p0082 A78-16698
 Development of a large-area roll-out solar
 generator for the multi-kW range
 [DGLR PAPER 77-012] 18 p0180 A78-24406
 Modular solar energy satellite - Project proposal
 and development strategy 18 p0180 A78-24452
 Structure assembly demonstration slated --- for
 large space structures in low orbit 19 p0339 A78-38774

SPACE EXPLORATION
 Integrating space developments - 1980-95 --- for
 scientific research and energy production
 18 p0175 A78-23422

SPACE INDUSTRIALIZATION
 Industrialization of space - Myth or the reality
 of tomorrow 18 p0218 A78-29660
 The extraterrestrial imperative --- space
 industrialization 19 p0308 A78-33589
 The industrialization of space; Proceedings of the
 Twenty-third Annual Meeting, San Francisco,
 Calif., October 18-20, 1977. Parts 1 & 2
 19 p0329 A78-36701
 Space industrialization - The long-range view and
 the near and intermediate steps 19 p0330 A78-36729
 Platform designed for numerous uses --- in
 geostationary orbit 19 p0382 A78-42509

SPACE LAW
 The geostationary orbit, focal point of space
 telecommunication law 19 p0326 A78-36301

SPACE LOGISTICS
 A baseline of logistic and power requirements for
 full-scale manufacturing of metallic materials
 in earth orbit 19 p0329 A78-36712
 [AAS 77-237]

SPACE MANUFACTURING
 Systems analysis of space manufacturing from
 nonterrestrial materials
 [IAP PAPER 77-72] 17 p0080 A78-15930
 Establishment of a space manufacturing facility
 17 p0087 A78-17190
 The industrialization of space - A myth or
 tomorrow's reality. I 17 p0106 A78-20148
 Space industrialization - Redefining the world
 18 p0193 A78-26823
 Transport --- to near-earth industrial sites
 18 p0203 A78-27927
 Materials, processing, and construction --- in space
 18 p0203 A78-27928
 Directions for research --- for space
 manufacturing colonization and scientific research
 18 p0203 A78-27930
 Demandite, lunar materials and space
 industrialization 18 p0204 A78-27933
 The economics of space industrialization - A
 phased approach 18 p0204 A78-27934
 A baseline of logistic and power requirements for
 full-scale manufacturing of metallic materials
 in earth orbit 19 p0329 A78-36712
 [AAS 77-237]

- A road map to space products --- extraterrestrial manufactured products for Earth use
 [AAS 77-239] 19 p0329 A78-36716
 In orbit manufacture of solar reflector satellites
 [AAS 77-241] 19 p0330 A78-36718
 AIAA/HSPC Symposium on Space Industrialization:
 Proceedings
 [NASA-CP-2026] 18 p0253 A78-18088
 The next 25 years: Industrialization of space:
 Rationale for planning
 [NASA-TM-79360] 18 p0253 A78-18091
- SPACE NAVIGATION**
 Electromechanics in space --- Russian book on spacecraft control, navigation and energy conversion systems 17 p0073 A78-14175
- SPACE POWER REACTORS**
 Lithium and potassium heat pipes for thermionic converters
 [NASA-TM-78946] 19 p0441 A78-26390
 General-purpose heat source project, space nuclear safety program, and radioisotopic terrestrial safety program --- plutonium oxide radioisotopic power systems
 [LA-7184-PR] 19 p0467 A78-27898
- SPACE PROCESSING**
 Molecular-beam epitaxy in space 17 p0103 A78-19472
 Materials, processing, and construction --- in space 18 p0203 A78-27928
 Industries in space to benefit mankind: A view over the next 30 years 17 p0118 A78-10973
 [NASA-CR-155203]
 AIAA/HSPC Symposium on Space Industrialization:
 Proceedings
 [NASA-CP-2026] 18 p0253 A78-18088
 The next 25 years: Industrialization of space:
 Rationale for planning
 [NASA-TM-79360] 18 p0253 A78-18091
- SPACE SHUTTLE ORBITERS**
 Next steps in space transportation and operations 17 p0103 A78-19543
- SPACE SHUTTLE PAYLOADS**
 A thermal canister experiment for the Space Shuttle [AIAA 78-456] 19 p0319 A78-35631
 In orbit manufacture of solar reflector satellites [AAS 77-241] 19 p0330 A78-36718
 Structure assembly demonstration slated --- for large space structures in low orbit 19 p0339 A78-38774
- SPACE SHUTTLES**
 The further development of the Spacelab/Space Shuttle system - A first step towards a space station
 [DGLR PAPER 77-041] 18 p0180 A78-24430
 Solar-powered global aerospace transportation [AIAA PAPER 78-689] 19 p0293 A78-32761
- SPACE STATIONS**
 Establishment of a space manufacturing facility 17 p0087 A78-17190
 The further development of the Spacelab/Space Shuttle system - A first step towards a space station
 [DGLR PAPER 77-041] 18 p0180 A78-24430
 Space station systems analysis study. Part 3: Documentation. Volume 7: SCB alternate EPS evaluation, task 10 17 p0109 A78-10185
 [NASA-CR-151535]
 AIAA/HSPC Symposium on Space Industrialization:
 Proceedings
 [NASA-CP-2026] 18 p0253 A78-18088
- SPACE SURVEILLANCE**
 The beamed power microwave transmitting antenna 19 p0340 A78-38841
- SPACE TRANSPORTATION**
 Integrating space developments - 1980-95 --- for scientific research and energy production 18 p0175 A78-23422
 Transport --- to near-earth industrial sites 18 p0203 A78-27927
 Advanced launch vehicle systems and technology 18 p0225 A78-31175
 Solar power satellite. System definition study. Part 1, volume 4: SPS transportation system requirements --- spacecraft propulsion [NASA-CR-151557] 17 p0130 A78-13102
- Solar power satellite. System definition study. Part 1, volume 5: SPS transportation. Representative system descriptions [NASA-CR-151558] 17 p0130 A78-13103
 AIAA/HSPC Symposium on Space Industrialization: Proceedings
 [NASA-CP-2026] 18 p0253 A78-18088
 Solar power satellite system definition study. Part 2, volume 5: Space operations (construction and transportation) [NASA-CR-151669] 18 p0271 A78-20159
- SPACE TRANSPORTATION SYSTEM**
 Next steps in space transportation and operations 17 p0103 A78-19543
 Construction in space: A proposed experiment in support of the space solar power concept and other large space systems [NASA-TM-79435] 18 p0279 A78-21179
- SPACEBORNE EXPERIMENTS**
 A thermal canister experiment for the Space Shuttle [AIAA 78-456] 19 p0319 A78-35631
- SPACECRAFT COMPONENTS**
 Heat pipes in space and on earth [AIAA PAPER 78-295] 18 p0178 A78-24005
- SPACECRAFT CONTROL**
 Electromechanics in space --- Russian book on spacecraft control, navigation and energy conversion systems 17 p0073 A78-14175
- SPACECRAFT DESIGN**
 Implementation of extreme-purity specifications in the case of solar generators, taking into account, as an example, the satellites GEOS and ISER-B 17 p0085 A78-16852
 Advanced launch vehicle systems and technology 18 p0225 A78-31175
 Technical applications of heat pipes [AIAA 78-396] 19 p0318 A78-35589
- SPACECRAFT ELECTRONIC EQUIPMENT**
 Electromechanics in space --- Russian book on spacecraft control, navigation and energy conversion systems 17 p0073 A78-14175
 Specialized complex electromechanical systems - Computer and microelectronics technology in control systems /Some results of the International Electrotechnology Congress - Moscow, 1977/ 19 p0325 A78-36129
- SPACECRAFT INSTRUMENTS**
 A thermal canister experiment for the Space Shuttle [AIAA 78-456] 19 p0319 A78-35631
- SPACECRAFT MODULES**
 Solar power satellite. System definition study. Part 1, volume 2: System requirements and energy conversion options [NASA-CR-151555] 17 p0129 A78-13100
 The modular solar energy satellite. Project proposal and development strategy 19 p0399 A78-23598
- SPACECRAFT MOTION**
 Orbital motion of the solar power satellite [NASA-CR-151603] 17 p0158 A78-15148
- SPACECRAFT POWER SUPPLIES**
 ATS-6 solar cell flight experiment through 2 years in orbit 17 p0014 A78-10932
 Qualification of European high efficiency solar cells for future ESA satellites 17 p0014 A78-10936
 Development of a multi-kW roll-out solar generator 17 p0017 A78-10965
 Comparison of foldout and rollout solargenerators in the multi-kW-range 17 p0017 A78-10966
 Development status of the ultralightweight solar array ULP --- Ultra Lightweight Panel 17 p0017 A78-10967
 Concentrator solar arrays for space power 17 p0017 A78-10970
 Potential of GaAs solar cells for Air Force space power systems 17 p0019 A78-10994
 Improved Helios cell output --- solar generator power efficiency 17 p0019 A78-10995
 Next steps in space transportation and operations 17 p0103 A78-19543

- Application of solar energy in space 18 p0201 A78-27863
- High temperature materials for space power systems 18 p0218 A78-29954
- Development and fabrication of a diffusion welded

[E78-10032] 17 p0125 A78-12506
- STROUHAL NUMBER**
Hydrodynamic loads on the cold water pipe --- for Ocean Thermal Energy Conversion application
19 p0303 A78-33326
- STRUCTURAL ANALYSIS**
Some factors affecting the selection of OTEC plant platform/cold water pipe designs
19 p0303 A78-33325
- Using computer graphics to analyze the placement of neutral-beam injectors for the Mirror Fusion Test Facility
19 p0357 A78-40026
- Structural analysis of a two-component torus /TCT/ hybrid reactor first wall
19 p0358 A78-40072
- Structural effects in chemically sprayed CdS/Cu/sub x/S photovoltaic cells
[SAND-76-0737] 17 p0161 A78-15573
- Simplified modeling for wind turbine modal analysis using NASTRAN
18 p0265 A78-19619
- STRUCTURAL BASINS**
Remote sensing applications in hydro-geothermal exploration of the northern basin and range province
18 p0238 A78-16405
- STRUCTURAL DESIGN**
Conceptual design of OTEC platforms --- Ocean Thermal Energy Conversion
17 p0008 A78-10724
- Finite size corrections for a reflector-collector system
17 p0043 A78-11227
- Optimum and near-optimum blade configurations for high speed wind turbines
17 p0051 A78-11314
- Solar energy: Fundamentals in building design --- Book
17 p0081 A78-16275
- Optimal design of anisotropic /fiber-reinforced/ flywheels --- for energy storage
17 p0092 A78-17789
- Design parameters affecting the performance of resistance-type, vertical-axis windrotors - An experimental investigation
17 p0094 A78-18093
- Passive solar heating and cooling systems
18 p0175 A78-23425
- Convective heat transfer effects within honeycomb structures for flat plate solar collectors
18 p0200 A78-27857
- Blade design and fabrication - 17-meter VAWT --- Vertical Axis Wind Turbine
18 p0234 A78-32422
- Structural and mechanical design of tokamaks
[ASME PAPER 77-WA/NE-2] 19 p0299 A78-33186
- Optical design of solar concentrators
[AIAA PAPER 78-904] 19 p0324 A78-36022
- The effect of burner design and operational factors on the emission of nitrogen oxides when burning an anthracite/slurry mixture
19 p0335 A78-37861
- Lateral support structure for constant tension D-shaped coils in tokamak fusion devices
19 p0351 A78-39916
- Blanket structure design for JAERI Experimental Fusion Reactor
19 p0357 A78-40041
- Capturing sunlight - A revolution in collector design
19 p0365 A78-41217
- A new design of organic vapour engine for solar systems
19 p0376 A78-42161
- Solar energy operated oscillating heat engine
19 p0376 A78-42162
- A domestic multi-purpose solar energy unit
19 p0376 A78-42165
- Calculation of the geometry and performance of a high-speed wind rotor
19 p0382 A78-42419
- Secondary parameters affecting the performance of resistance-type vertical-axis wind rotors
19 p0382 A78-42420

- Superconducting machines --- homopolar d.c. machines and a.c. generators 18 p0225 A78-31154
- The analysis of superconducting magnet systems for the M.H.D. energy conversion 18 p0229 A78-31752
- The U-25B MHD-facility intended for research in strong electric and magnetic fields 19 p0293 A78-32716
- The MHD generator channel No. 1 of the U-25B facility intended for research in strong electric and magnetic fields 19 p0293 A78-32717
- S.C. magnet design for 10 MJ homopolar machine --- as energy storage device for fusion experiments 19 p0348 A78-39840
- Cryostabilization of large superconducting magnets using pool boiled helium II 19 p0350 A78-39896
- Superconducting magnets for fusion reactors - The problem of a reliable and effective cooling system 19 p0350 A78-39897
- The coil winder for the magnet of the Mirror Fusion Test Facility 19 p0350 A78-39901
- Potential damage to dc superconducting magnets due to high frequency electromagnetic waves 19 p0350 A78-39902
- Computational model for superconducting toroidal-field magnets for a tokamak reactor 19 p0350 A78-39905
- General Electric conceptual design of a test coil for the large coil program --- for superconducting electromagnet construction 19 p0351 A78-39928
- Pulsed power conversion with inductive storage --- compression for superconducting coil fields 19 p0353 A78-39954
- Poloidal field coil design for a fusion-fission breeder reactor 19 p0354 A78-39977
- An apparatus to examine pulsed parallel field losses in large conductors --- of superconducting magnetic coils in Tokamak 19 p0355 A78-40006
- Time dependent study of eddy current loss in a superconducting composite --- for Tokamak toroidal field coils 19 p0355 A78-40007
- Losses in a coil where the multifilamentary composite is subjected to simultaneous orthogonal and parallel induction variations --- superconducting toroidal field magnet in Tokamak 19 p0356 A78-40008
- Fast ramp superconductor for ohmic heating coils --- of Tokamak Next Step reactor 19 p0356 A78-40009
- Superconducting energy storage coils 19 p0356 A78-40010

SUBJECT INDEX

SURFACE PROPERTIES

Dielectric breakdown of liquid and vapor helium in bulk and across epoxy insulation 19 p0357 A78-40047

Large superconducting magnets - A key issue in commercialization of MHD 19 p0362 A78-40509

Development program for MHD power generation. Volume 4: Superconducting magnet study [FE-2015-16-VOL-4] 19 p0455 N78-27447

SUPERCONDUCTING POWER TRANSMISSION
Prospects of using superconducting dc lines [BNL-TR-637] 17 p0115 N78-10589

Superconducting power transmission line materials research and conductor development [SIN/0326-1] 19 p0416 N78-25342

SUPERCONDUCTORS
Pulsed superconducting inductive storage system 17 p0008 A78-10702

Superconductive inductor storage and converters for pulsed power loads 17 p0008 A78-10703

Superconducting magnetic energy storage 17 p0074 A78-14649

Advancing technologies --- Book 18 p0225 A78-31151

Superconducting machines --- homopolar d.c. machines and a.c. generators 18 p0225 A78-31154

SUPERHEATING
A MHD simulation test facility for investigating the thermal properties of a slag/seed coated radiant boiler and superheater for a 2000 MWt MHD power plant [ASME PAPER 77-HT-64] 17 p0090 A78-17496

SUPERSONIC COMBUSTION
A shock tube study of the ignition delay of methane at elevated temperatures 18 p0199 A78-27831

SUPERSONIC DIFFUSERS
On pressure and heat flux distribution along magnetohydrodynamic generator channel-diffuser systems 17 p0128 N78-12837

SUPERSONIC FLOW
Method for taking account of the effect of chemical kinetics on the thermodynamic properties of the working fluid in a supersonic MHD generator 18 p0168 A78-22137

SUPERSONIC NOZZLES
Acceleration nozzles of MHD generators with deformation of supersonic flow 17 p0002 A78-10244

SUPERSONIC TRANSPORTS
Supersonic transport in terms of energy savings 19 p0323 A78-35893

Supersonic transportation faced with energy savings [AAAP-WT-77-28] 19 p0402 N78-24131

SUPPLYING
Project Independence Evaluation System (PIES) documentation. Volume 10: Automation of finding rate and discount rates in the FEA gas supply model [PB-269947/8] 17 p0127 N78-12541

An overview of US energy options: Supply- and demand-side history and prospects [NASA-CR-155946] 18 p0264 N78-19610

SUPPORTS
Lateral support structure for constant tension D-shaped coils in tokamak fusion devices 19 p0351 A78-39916

Vertical axis wind turbine tie-down design with an example [SAND-77-1919] 19 p0429 N78-25631

SURFACE DEFECTS
An analysis of factors influencing the efficiency of EFG silicon ribbon solar cells 17 p0014 A78-10930

SURFACE DIFFUSION
The role of defects on the performance of epitaxial and diffused solar cells fabricated on EFG 'ribbon' silicon --- edge-defined growth process technology 17 p0012 A78-10905

Solar cell processing with spin-on diffusion sources 17 p0015 A78-10943

Observations of anisotropic diffused layer sheet resistance in EFG silicon ribbon solar cells --- Edge-defined Film-fed Growth 18 p0223 A78-30648

SURFACE DISTORTION
Estimating the deformation process in the formation of the reflecting surface of solar concentrators 18 p0187 A78-25735

SURFACE FINISHING
Textured surface cell performance characteristics 17 p0019 A78-10996

First wall surface treating in the Frascati Tokamak FT 19 p0380 A78-42245

SURFACE GEOMETRY
A study of improvements in silicon solar cell efficiency due to various geometrical and doping modifications 17 p0012 A78-10906

Vortex augmentation of wind energy --- aerodynamic surface design for energy conversion efficiency 17 p0094 A78-18091

Irradiance for skew rays incident upon a trough-like solar collector of arbitrary shape 17 p0104 A78-19829

Asymmetrical non-imaging cylindrical solar concentrators 17 p0104 A78-19831

Geometric factors for plane specular reflectors 17 p0105 A78-19835

The development and use of the moire method in solar engineering problems 18 p0187 A78-25731

Concentration of the sun's rays using catenary curves 18 p0214 A78-28843

Radiation transfer through specular passages - A simple approximation 19 p0369 A78-42030

SURFACE NAVIGATION
Positioning and navigation by satellite --- for marine operations [AIAA 77-1553] 17 p0069 A78-13684

SURFACE PROPERTIES
Post-fabrication treatments, surface properties, and front contact of Cu_x/S-CdS solar cells 17 p0018 A78-10978

Augmented solar energy collection using different types of planar reflective surfaces - Theoretical calculations and experimental results 17 p0060 A78-11386

Study of physicochemical processes in fabrication of reflectors from polymer materials --- coat bond in foam-film solar concentrator 18 p0215 A78-28895

Effect of heat treatment on optical properties of collectors for solar energy installations 18 p0215 A78-28896

Thermionic emission from electrodes with raised surfaces in a thermionic converter 18 p0224 A78-31011

Thermal optical surface properties and high-temperature solar energy conversion [AIAA PAPER 78-903] 19 p0324 A78-36021

ERDA/NASA advanced thermionic technology program [COO-3056-20] 17 p0120 N78-11504

Investigation of the topographical features of surface carrier concentrations in silicon solar cell material using electrolyte electroluminescence 17 p0136 N78-13535

Some experimental results on selective absorbing surfaces for low temperature solar collectors --- electroplated black nickel coatings [DLR-FB-77-23] 17 p0156 N78-14686

Development of surfaces optically suitable for flat solar panels [NASA-CR-150539] 18 p0250 N78-17477

Some experimental results on selective absorbing surfaces for low temperature solar collectors --- electroplated black nickel coatings [ESA-TT-432] 19 p0390 N78-22482

Surface structure and mechanisms of gasification catalyst deactivation [FE-2229-5] 19 p0398 N78-23589

Effectiveness of spectrally selective surfaces for exposed, high-temperature solar absorbers [SAND-77-8300] 19 p0444 N78-26563

SURFACE REACTIONS

- A correction procedure for separating direct and diffuse insolation on a horizontal surface
17 p0105 A78-19839
- Estimation of the monthly average of the diffuse component of total insolation on a horizontal surface
17 p0105 A78-19840
- Tritium removal from liquid metals by sorption on yttrium
19 p0358 A78-40074
- International Symposium on Plasma Wall Interaction, Juelich, West Germany, October 18-22, 1976, Proceedings
19 p0377 A78-42201
- Wall analysis in TFR performed by QWAASS --- Quantitative Wall Analysis by Auger and Secondary ion mass Spectroscopy
19 p0377 A78-42206
- Review of the work on plasma-wall interaction in tokamak plasma confinement at JAERI
19 p0378 A78-42209
- Surface and impurity studies in ORMAK and ISX --- tokamaks
19 p0378 A78-42210
- Alumina-plasma interaction in the Petula tokamak
19 p0378 A78-42211
- Screening property of the limiter shadow region for heavy wall impurities --- in tokamak
19 p0378 A78-42213
- Study to determine the technical and economic feasibility of reclaiming chemicals used in micellar polymer and low tension surfactant flooding [PE-2600-2]
19 p0402 A78-24326
- SURFACE ROUGHNESS**
- Processing ramifications of textured surfaces --- of silicon wafers for solar cells
17 p0016 A78-10949
- Engineering estimate of the quality of facets obtained by a deformation method of form giving --- mirrors for solar collectors
18 p0214 A78-28890
- SURFACE ROUGHNESS EFFECTS**
- Wind shear downwind of large surface roughness elements --- for wind energy conversion system design
17 p0076 A78-14957
- Improvements in the design of solar selective thin film absorbers
18 p0168 A78-22018
- Mathematical modelling of topographic effects on wind energy systems
18 p0169 A78-22228
- Wind tunnel simulation of the influence of two dimensional ridges on wind speed and turbulence --- for windpower generator site selection in hilly terrain
18 p0169 A78-22231
- SURFACE TEMPERATURE**
- Time and space resolved temperature measurements of a limiter in a Tokamak discharge using an infra red camera
17 p0041 A78-11200
- The effect of the properties of the working fluid on the choice of electrode-surface temperature for an MHD generator channel
19 p0341 A78-38969
- Energy flux and surface temperature measurements at surfaces in the DITE tokamak
19 p0377 A78-42205
- Application of remote sensing to geothermal anomaly mapping in the Caldas Novas County, Goias [INPE-1129-TPT/070]
17 p0149 A78-14610
- SURFACE VEHICLES**
- Energy - Implications for transport
18 p0218 A78-29904
- Baseline tests of the Zagato Elcar electric passenger vehicle [NASA-TN-73764]
18 p0252 A78-17934
- Thermal energy storage for road vehicle propulsion [GMR-2690-SECT-7.103]
19 p0440 A78-26329
- Thermal energy storage-Stirling engine powerplants for road vehicles [GMR-2690-SECT-7.111]
19 p0441 A78-26337
- SURFACE WAVES**
- Energy from ocean surface waves
17 p0006 A78-10655

SURFACES

- Variation of solar cell sensitivity and solar radiation on tilted surfaces [NASA-TN-78921]
19 p0443 A78-26547
- SURFACTANTS**
- Surfactant-assisted liquefaction of particulate carbonaceous substances --- coal liquefaction [NASA-CASE-NPO-13904-1]
19 p0414 A78-25237
- SUSPENDING (HANGING)**
- Research toward improved flywheel suspension and energy conversion systems [PB-278679/G]

SUBJECT INDEX

SYSTEM EFFECTIVENESS

Prototype pilot plant operation, synthane process
[COO-0003-10] 18 p0280 N78-21317

SYNTHETIC FUELS

Biomass and wastes as energy resources - Update
17 p0033 A78-11121

Pyrolysis of solid wastes for production of
gaseous fuels and chemical feedstocks
17 p0035 A78-11131

Ammonia synthesis gas and petrochemicals from
cattle feedlot manure
17 p0035 A78-11132

Syngas process converts waste to SNG
17 p0035 A78-11134

The economics of SNG production by anaerobic
digestion of specially grown plant matter ---
synthetic natural gas
17 p0036 A78-11138

Biomass and waste production as energy resources -
Update
17 p0063 A78-12222

Mobilization and impacts of bio-gas technologies
17 p0067 A78-13345

Koppers-Totzek economics and inflation ---
entrained slagging gasification process
17 p0074 A78-14539

Future fuels for aviation
[ONERA, TP NO. 1977-156]
17 p0076 A78-15021

Synthetic fuels and combustion
17 p0082 A78-16637

Heavy oil gasification --- Book
17 p0087 A78-17144

Production of synthetic methanol from air and
water using controlled thermonuclear reactor
power. I - Technology and energy requirement
18 p0174 A78-22846

Entropy production, efficiency, and economics in
the thermochemical generation of synthetic
fuels. I - The hybrid sulfuric acid process
18 p0174 A78-22867

Entropy production, efficiency, and economics in
the thermochemical generation of synthetic
fuels. II - The methanol water splitting cycle
18 p0174 A78-22868

Fuels from waste --- Book
18 p0197 A78-27801

A wealth of waste - A shortage of energy ---
organic wastes for fuel conversion in U.S.
18 p0197 A78-27802

The nature of pyrolytic oil from municipal solid
waste
18 p0197 A78-27806

Fuels and chemicals from crops
18 p0197 A78-27808

The production of oil from wood waste
18 p0198 A78-27809

Fuels from wood waste
18 p0198 A78-27810

Methanol production from organic waste
18 p0198 A78-27812

Open-Cycle Gas Turbine/Steam Turbine Combined
Cycles with synthetic fuels from coal
[ASME PAPER 77-WA/ENEB-9]
19 p0298 A78-33147

Magma - A potential source of fuels
19 p0311 A78-34398

Methanol - A boiler fuel alternative
19 p0321 A78-35704

Evaluation of NO_x/ emission characteristics of
alcohol fuels for use in stationary combustion
systems
19 p0321 A78-35705

Production of synthetic methanol from air and
water using controlled thermonuclear reactor
power. II - Capital investment and production
costs
19 p0322 A78-35778

New concepts and results concerning the mechanism
of carbon monoxide hydrogenation. I - Organic
oxygen compounds produced during medium-pressure
synthesis with iron catalysts. II - Evolution of
reaction steps on the basis of detailed product
composition and other data
19 p0337 A78-38404

High temperature blankets for the production of
synthetic fuels
19 p0359 A78-40093

Water in synthetic fuel production: The technology
and alternatives --- Book
19 p0365 A78-41000

Characterization of nitrogen compounds in tar
produced from underground coal gasification
19 p0368 A78-41814

Catalytic hydrosolvation process converts coal to
low-sulfur liquid fuel
19 p0368 A78-41817

Synthetic fuel and electric cars: A cost
effectiveness comparison of alternatives for
substituting coal for oil
17 p0110 N78-10552

Effect of fuel properties on performance of single
aircraft turbojet combustor at simulated idle,
cruise, and takeoff conditions
[NASA-TN-73780]
17 p0129 N78-13056

Workshop on Synthetic Fuels from Fusion
[EPRI-ER-439-SR]
17 p0131 N78-13239

Experience in feeding coal into a liquefaction
process development unit
17 p0131 N78-13242

Pyrolysis of industrial wastes for oil and
activated carbon recovery
[PB-270961/6]
17 p0147 N78-13967

Synthetic fuel production from solid wastes
[PB-272423/5]
17 p0148 N78-14182

Two-stage coal gasification to high-BTU gas
18 p0238 N78-16422

Allocation of petroleum feedstocks to synthetic
natural gas plants
[PB-273098/4]
18 p0251 N78-17490

Synthetic liquid fuels development: Assessment of
critical factors
18 p0257 N78-18535

Fusion energy applied to synthetic fuel
production: A report to the DOE Division of
Magnetic Fusion Energy based on a preliminary
study by an ad-hoc advisory group
[CONF-770593]
19 p0393 N78-23251

Characterization of substances in products,
effluents and wastes from synthetic fuel
development processes
[BNWL-2224]
19 p0410 N78-24683

Evaluation of methods to produce aviation turbine
fuels from synthetic crude oils, phase 3, volume 3
[AD-A053106]
19 p0414 N78-25239

Alternate fuels nitrogen chemistry
[AD-A053299]
19 p0414 N78-25240

Status of steam-iron pilot plant operations
[CONF-771092-5]
19 p0415 N78-25250

Assessment, selection, and development of
procedures for determining the environmental
acceptability of synthetic fuel plants based on
coal, appendix 2
[FF-1795-3-PT-2-REV]
19 p0433 N78-25674

Aviation fuels beyond the 1980's --- liquefied
gases and synthetic fuels
[NASA-TN-79510]
19 p0436 N78-26223

Development studies on selected conversion of
synthesis gas from coal to high octane gasoline
[FE-2276-20]
19 p0454 N78-27289

SYSTEM EFFECTIVENESS

A general design method for closed-loop solar
energy systems
17 p0046 A78-11251

Solar tower - Thermal collection energy component:
10 MWe pilot plant
17 p0052 A78-11322

Effects of solar data accuracy on the performance
and economics of solar energy systems
17 p0058 A78-11366

Assessing near-term technologies for solar heating
and air-conditioning systems
17 p0074 A78-14540

A computer model for large-scale offshore
wind-power systems
17 p0093 A78-18089

Influence of system exactness on the concentration
factor of cylinder-parabolic solar energy
collectors
18 p0176 A78-23920

Comparing the Ames and St. Louis resource recovery
projects
18 p0186 A78-25700

Recent developments in wind turbines
18 p0210 A78-28563

Winds and wind system performance --- Book
18 p0231 A78-32074

SYSTEMS ANALYSIS

SUBJECT INDEX

- The effect of certain major parameters on the annual effectiveness of solar systems for residential dwellings
[ASME PAPER 77-WA/SOL-3] 19 p0299 A78-33191
- Efficiency and reliability of sulfur dioxide scrubbers 19 p0384 A78-42906
- Comparison of solar system measured data for various sample rates --- conducted using Marshall Space Flight Center Solar House [NASA-CR-150496] 18 p0250 A78-17480
- Prototype solar heated hot water systems and double-walled heat exchangers: A collection of quarterly reports [NASA-CR-150591] 18 p0282 A78-21591
- ### SYSTEMS ANALYSIS
- Photovoltaic system design and analysis application to a shopping center 17 p0022 A78-11013
- The potential for application of energy storage capacity on electric utility systems in the United States. II 17 p0030 A78-11087
- Systems analysis of space manufacturing from nonterrestrial materials [IAF PAPER 77-72] 17 p0080 A78-15930
- 'T-System' - Proposal of a new concept heat transport system [AIAA 78-444] 19 p0319 A78-35623
- Contribution to the global analysis of an energy system - Optimum operation of solar electric-energy production --- French thesis 19 p0336 A78-38068
- Establishment of design and performance requirements using cost and systems analysis --- for commercial fusion power plant 19 p0346 A78-39793
- Daily input modelling for solar collectors and systems 19 p0383 A78-42890
- Space station systems analysis study. Part 3: Documentation. Volume 7: SCB alternate EPS evaluation, task 10 [NASA-CR-151535] 17 p0109 A78-10185
- Diagnostic assessment for advanced power systems [SAND-77-8216] 17 p0121 A78-11509
- Three-region world dynamics of fossil/hydrogen energy system 18 p0239 A78-16427
- Preliminary system analysis of a fixed mirror solar power central station [EPRI-EE-434(6-77)] 18 p0241 A78-16452
- Systems approach to solar heating and cooling systems [CONF-770359-1] 18 p0242 A78-16455
- Central Data Processing System (CDPS) user's manual: Solar heating and cooling program [NASA-CR-150580] 18 p0283 A78-21595
- Energy systems analysis and development [BRL-22969] 18 p0286 A78-21633
- Systems studies of coal conversion processes using a reference simulator [FE-2275-A] 19 p0390 A78-22480
- Solar total energy; large scale experiment. No. 2, phase 2: Conceptual design [TID-27995] 19 p0428 A78-25618
- Thermochemical energy storage systems: A review [SAND-77-8051] 19 p0460 A78-27557
- Circuit and magnetic analysis for a system of Faraday rotator coils driven by a two-spool, four-rotor homopolar generator [CONF-771029-119] 19 p0467 A78-27927
- ### SYSTEMS COMPATIBILITY
- Assessment of storage systems - The device utility interface --- energy technology 17 p0009 A78-10730
- A feasibility study of a combined wind-solar system for space and domestic hot water heating 17 p0052 A78-11319
- Solar energy and large building HVAC systems - Are they compatible --- Heating, Ventilating and Air Conditioning 17 p0078 A78-15408
- ### SYSTEMS ENGINEERING
- Lens-mirror combinations with maximal concentration --- evaluated for solar energy applications 17 p0001 A78-10170
- Solar-electrical systems - Theory and applications 17 p0009 A78-10731
- Some results of research carried out at the Soviet U-02 and U-25 open-cycle MHD facilities 17 p0009 A78-10734
- A long-term solution to fossil fuel depletion --- biomass energy conversion technology assessment 17 p0010 A78-10739
- Solar central electric power generation - A baseline design 17 p0010 A78-10742
- Finite size corrections for a reflector-collector system 17 p0043 A78-11227
- Theoretical analysis and design - A solar powered ammonia/water absorption air conditioning system 17 p0046 A78-11246
- Large-scale thermal energy storage using sodium hydroxide /NaOH/ 17 p0051 A78-11309
- Residential photovoltaic prototype system definition study 17 p0054 A78-11338
- Design options in solar total energy systems 17 p0055 A78-11346
- Engineering cost estimates for solar technologies 17 p0058 A78-11365
- Marshall Space Flight Center development program for solar heating and cooling systems 17 p0058 A78-11368
- Parabolic collector for total energy systems application 17 p0059 A78-11376
- Optimal design methodology for a wind power system 17 p0070 A78-13847
- Solar challenges to consulting engineers --- on optimization of solar collector performance for heating and cooling applications 18 p0181 A78-24757
- Solar energy in office and industrial buildings 18 p0181 A78-24760
- Solar design and installation experience --- pyramidal optics for use in residential buildings 18 p0181 A78-24761
- Synthesis of organic compounds from carbon dioxide in land plants --- energy farm design and solar energy conversion efficiency limits 18 p0208 A78-28361
- Economic design of wind electric systems [IEEE PAPER F 77 679-4] 18 p0219 A78-30197
- NMSU - Casa del Sol of the future 18 p0232 A78-32114
- Engineering of wind energy systems 18 p0234 A78-32423
- Molten salt energy storage system - A feasibility study 19 p0296 A78-33119
- Design and calculated performance and cost of the ECAS Phase II open cycle MHD power generation system [ASME PAPER 77-WA/ENER-5] 19 p0297 A78-33143
- An outline for optimizing and evaluating proposed OTEC systems --- Ocean Thermal Energy Conversion 19 p0304 A78-33333
- Studies of biofouling in Ocean Thermal Energy Conversion plants 19 p0305 A78-33342
- Potential of open cycle OTEC - A general survey --- Ocean Thermal Energy Conversion 19 p0305 A78-33347
- Optimization models for the economic design of wind power systems 19 p0314 A78-34934
- Fundamentals of wind energy --- Book 19 p0341 A78-38972
- THX - A new facility --- Tandem Mirror Experiment fusion reactor design 19 p0347 A78-39805
- System design for the new THX machine --- Tandem Mirror Experiment 19 p0349 A78-39888
- System engineering and design of a pulsed homopolar generator power supply for the Texas Experimental Tokamak 19 p0351 A78-39921
- Tritium handling trade studies and design options for the GA/ANL THS --- The Next Step tokamak 19 p0355 A78-39983
- The OMEGA fusion laser system 19 p0359 A78-40221

- Focusing systems for high energy glass lasers
19 p0360 A78-40224
- Design of a non-tracking solar heat
concentrator/collector system
19 p0371 A78-42113
- Design of a non-tracking concentrator which will
distribute sunlight in a uniform manner over a
flat receiving surface
19 p0371 A78-42114
- Solar energy for industrial processes - A
simplified design method
19 p0383 A78-42891
- Solar power, satellite. System definition study.

Two-dimensional temperature distribution in a ceramic-based electrode --- for MHD channels
18 p0173 A78-22806
An estimate of the impact of OTEC operation on the vertical distribution of heat in the Gulf of Mexico
19 p0302 A78-33317
Study of liquid-metal heat pipes characteristics at start-up and operation under gravitation
[AIAA 78-434] 19 p0318 A78-35614
The natural circulation solar heater-models with linear and nonlinear temperature distributions
19 p0369 A78-42064
Indoor test for thermal performance evaluation on life sciences engineering (air) solar collector
[NASA-CR-150665] 19 p0420 N78-25547
- TEMPERATURE EFFECTS**
Temperature dependence of the photovoltaic performance of Si cells under blue, white and near-bandgap irradiation
17 p0012 A78-10909
Infrared spectral emittance profiles of spectrally selective solar absorbing layers at elevated temperatures
17 p0070 A78-13907
Thermomigration of silicon wafers in a solar furnace
17 p0084 A78-16837
An approach for determining the impact of peak coolant temperature on fusion reactor size and electricity costs
[ASME PAPER 77-HT-73] 17 p0090 A78-17501
Isoprenoid hydrocarbons produced by thermal alteration of *Nostoc muscorum* and *Rhodospseudomonas spheroides*
18 p0167 A78-22008
Energy characteristics of an MHD generator cycle with internal cooling of the channel
18 p0172 A78-22531
Investigation of the temperature dependence of the electrical conductivity of the working fluid of large MHD generators
18 p0194 A78-27136
Anomalous temperature dependence observed on the photovoltage of Se-based amorphous thin film-SnO₂ heterostructures
18 p0222 A78-30644
Heat pipe mirrors for high power lasers
[AIAA 78-391] 19 p0317 A78-35586
Hydrothermal alteration in active geothermal fields
19 p0339 A78-38770
Blanket structure design for JAERI Experimental Fusion Reactor
19 p0357 A78-40041
Temperature dependence of flatband potentials at semiconductor-electrolyte interfaces --- in solar cells
19 p0362 A78-40531
Oil shale retorting - Effects of particle size and heating rate on oil evolution and intraparticle oil degradation
19 p0367 A78-41521
Effects of temperature on the performance of silicon solar cells
19 p0371 A78-42117
- TEMPERATURE GRADIENTS**
Power from the oceans' thermal gradients
17 p0006 A78-10652
Thermophotovoltaic cells for solar energy conversion
18 p0205 A78-28169
Air conditioning using ocean thermal gradients
19 p0376 A78-42160
- TEMPERATURE MEASUREMENT**
Time and space resolved temperature measurements of a limiter in a Tokamak discharge using an infra red camera
17 p0041 A78-11200
Chemical geothermometers and mixing models for geothermal systems
17 p0062 A78-11491

SUBJECT INDEX

TEXTILES

Geothermal reservoir temperatures estimated from the oxygen isotope compositions of dissolved sulfate and water from hot springs and shallow drillholes 17 p0062 A78-11492

Temperature sheaths on probes or electrodes in MHD plasmas 19 p0336 A78-38108

Energy flux and surface temperature measurements at surfaces in the DITE tokamak 19 p0377 A78-42205

Use of aerial thermography in Canadian energy conservation programs 17 p0149 N78-14566

TEMPERATURE PROFILES

Preparation of a coal conversion systems technical data book [FE-2286-21] 19 p0398 N78-23591

TENNESSEE

The application of LANDSAT-1 imagery for monitoring strip mines in the new river watershed in northeast Tennessee, part 2 [E78-10032] 17 p0125 N78-12506

TENSILE TESTS

Dynamic oil shale fracture experiments [PB-269258/0] 17 p0122 N78-11559

TERNARY ALLOYS

Ternary compound thin film solar cells-2 [PB-270029/2] 17 p0121 N78-11515

TERRAIN

Comparison of calculated and observed characteristics of plumes from two coal-fired power plants located in complex terrain 18 p0167 A78-21821

Ambient air quality in complex terrain 18 p0167 A78-21833

TERRAIN ANALYSIS

Mathematical modelling of topographic effects on wind energy systems 18 p0169 A78-22228

Wind tunnel simulation of the influence of two dimensional ridges on wind speed and turbulence --- for windpower generator site selection in hilly terrain 18 p0169 A78-22231

Significance of the space imagery for studies of the petroleum platform areas --- in Lower Volga region 19 p0313 A78-34877

A simplified physics airflow model for evaluating wind power sites in complex terrain 19 p0340 A78-38791

The application of LANDSAT-1 imagery for monitoring strip mines in the new river watershed in northeast Tennessee, part 2 [E78-10032] 17 p0125 N78-12506

TEST FACILITIES

The battery energy storage test /BEST/ facility - Its purposes and description 17 p0029 A78-11079

Testing of flat-plate air heaters according to ASHRAE Standard 93-77 17 p0042 A78-11220

Results of experiments with heliostats for central receiver power plants 17 p0053 A78-11326

A MHD simulation test facility for investigating the thermal properties of a slag/seed coated radiant boiler and superheater for a 2000 Mwt MHD power plant [ASME PAPER 77-HT-64] 17 p0090 A78-17496

Solar thermal test facility 18 p0216 A78-29227

An experimental facility for wind engineering research [AIAA 78-813] 18 p0234 A78-32367

TFTR Toroidal Field coil design --- Tokamak Fusion Test Reactor 19 p0345 A78-39785

The coil winder for the magnet of the Mirror Fusion Test Facility 19 p0350 A78-39901

Dual 30 kA, HVDC interrupter test facility --- for fusion reactors 19 p0353 A78-39959

Using computer graphics to analyze the placement of neutral-beam injectors for the Mirror Fusion Test Facility 19 p0357 A78-40026

Facility for the testing of the TFTR prototype neutral beam injector --- Tokamak Fusion Test Reactor 19 p0357 A78-40049

A 400 kW high temperature solar test facility 19 p0384 A78-42894

Conceptual design of a battery Energy Storage Test (BEST) facility [EPRI-255-TR-2] 17 p0143 N78-13597

Ford-EPA emission laboratory correlation study [PB-270699/2] 17 p0145 N78-13631

EPA-BMW correlation program [PB-270559/8] 17 p0145 N78-13632

The ERDA/LeRC photovoltaic systems test facility [NASA-TM-73787] 17 p0157 N78-15059

Sims Prototype System 2 test results: Engineering analysis [NASA-CR-150544] 18 p0263 N78-19604

Methodology for site selection of a solar total energy large scale experiment [SAND-77-0248] 18 p0277 N78-20644

ERDA Geothermal Component Test Facility (GCTF), East Mesa, Imperial Valley, California. Test operations management plan [TID-28010] 19 p0397 N78-23577

DOE LeRC photovoltaic systems test facility [NASA-TM-78923] 19 p0443 N78-26549

Master control and data system for the 5MW solar thermal test facility [SAND-78-0205C] 19 p0460 N78-27562

TEST STANDS

An Early Ocean Test Platform Conversion --- for thermal energy conversion 19 p0300 A78-33302

An Early Ocean Test Platform for testing cycle components --- in Ocean Thermal Energy Conversion 19 p0300 A78-33303

TEST VEHICLES

General safety considerations of the Ohio DOT electric vehicle [SAE PAPER 780160] 19 p0307 A78-33376

Test and evaluation of 23 electric vehicles for state-of-the-art assessment [SAE PAPER 780290] 19 p0307 A78-33382

TESTS

Ocean thermal Energy Conversion (OTEC) test facilities study program, volume 1 [SAN/1156-77/1-VOL-1] 17 p0120 N78-11507

TEXAS

On the relation between insolation and climatological variables. III - The relation between normal incidence solar intensity, total insolation, and weather at Fort Hood, Texas. IV - Construction of a model year of solar intensity and climate 19 p0322 A78-35781

Strategic petroleum reserve: Byron Mound salt dome, draft supplement [PB-270108/4] 17 p0119 N78-11256

Strategic petroleum reserve: Final environmental impact statement for Kleer Mine [FES-77-2] 19 p0387 N78-22439

Strategic petroleum reserve. Texoma group salt domes. Draft environmental impact statement. Volume 1: West Hackberry expansion, Black Bayou, Vinton, Big Hill [FEA/S-77/323-VOL-1] 19 p0390 N78-22487

Strategic petroleum reserve. Texoma group salt domes. Draft environmental impact statement. Volume 2, appendices A and B: West Hackberry expansion, Black Bayou, Vinton, Big Hill [FEA/S-77/323-VOL-2] 19 p0391 N78-22488

Strategic petroleum reserve. Texoma group salt domes. Draft environmental impact statement. Volume 4, appendices D-S: West Hackberry expansion, Black Bayou, Vinton, Big Hill [FEA/S-77/323-VOL-4] 19 p0391 N78-22490

Solar total energy; large scale experiment. Phase 2: Fort Hood, Texas. [TID-18040] 19 p0429 N78-25630

Homopolar generator development at the University of Texas [ORO-5594-7] 19 p0467 N78-27922

TEXTILES

Feasibility evaluation: Solar heated textile process water [SRO-0885-75/1] 19 p0428 N78-25621

TEXTURES

TEXTURES

- Processing ramifications of textured surfaces ---
of silicon wafers for solar cells 17 p0016 A78-10949

THEMATIC MAPPING

- Mapping offshore oil leases --- interactive
computer graphics [LA-UR-77-2892] 19 p0456 W78-27500

THERMAL ABSORPTION

- Mass and energy transfer in a hot liquid energy
storage system 17 p0050 A78-11302
- Fundamental studies of direct contact latent heat
energy storage 17 p0051 A78-11306

- Selective absorption of solar energy in granular
metals - The role of particle shape 19 p0369 A78-41910

- Thermal performance of honeywell double covered
liquid solar collector [NASA-CR-150505] 18 p0249 W78-17472

- Site dependent factors affecting the economic
feasibility of solar powered absorption cooling [NASA-CR-150533] 18 p0255 W78-18524

- Indoor test for thermal performance evaluation of
the Solaron (air) solar collector [NASA-CR-150572] 18 p0268 W78-19652

THERMAL BATTERIES

- Study of diffusion processes in low-temperature
thermal elements --- for solar energy conversion 19 p0326 A78-36135

- Output power and lifetime of high-voltage,
low-temperature thermoelectric batteries 19 p0330 A78-36854

- European developments in the Na/S high temperature
battery for automobile propulsion and energy storage [AD-A042541] 17 p0120 W78-11501

- High energy density pelletized aluminum chloride
thermal batteries. Part 2: Cathode screening [AD-A043659] 17 p0120 W78-11502

THERMAL COMFORT

- Energy conservation and thermal comfort in a New
York City high rise office building 19 p0311 A78-34380

THERMAL CONDUCTIVITY

- Downhole measurements of thermal conductivity in
geothermal reservoirs [ASME PAPER 77-PET-23] 17 p0076 A78-15079

- Techniques for reducing thermal conduction and
natural convection heat losses in annular
receiver geometries --- for solar collectors 19 p0294 A78-33029

- Investigation of the effective thermal
conductivity of metal-fiber wicks in
low-temperature heat pipes 19 p0308 A78-33573

- A variable conductance heat pipe for terrestrial
applications [AIAA 78-377] 19 p0317 A78-35578

- Technical applications of heat pipes [AIAA 78-396] 19 p0318 A78-35589

- Classical diffusion in large-aspect toroidal plasmas 19 p0382 A78-42482

THERMAL CONTROL COATINGS

- Analytical investigation of thermal barrier
coatings for advanced power generation
combustion turbines [ASME PAPER 77-WA/ENR-13] 19 p0298 A78-33151

- Converter of solar radiation to thermal energy
designed on the basis of coaxial evacuated
tubular elements with multilayer and selective
coatings 19 p0335 A78-37946

THERMAL CYCLING TESTS

- Sea thermal power cycles 19 p0306 A78-33348

THERMAL DEGRADATION

- Fuels from wood waste 18 p0198 A78-27810
- Thermal deformations of solar concentrators 19 p0335 A78-37945

- Oil shale retorting - Effects of particle size and
heating rate on oil evolution and intraparticle
oil degradation 19 p0367 A78-41521

SUBJECT INDEX

THERMAL DIFFUSION

- An estimate of the impact of OTEC operation on the
vertical distribution of heat in the Gulf of
Mexico 19 p0302 A78-33317

- Dynamic models of house heating based on
equivalent thermal parameters 19 p0456 W78-27517

THERMAL DIFFUSIVITY

- Heat transfer in a dense layer at large Biot numbers 19 p0335 A78-37912

THERMAL DISSOCIATION

- The thermodynamics of a fuel cell aggregate
involving thermal-catalytic methanol decomposition 17 p0074 A78-14497

- Use of solar energy for direct and two-step water
decomposition cycles 17 p0080 A78-16048

- High temperature, stable, spectrally selective
solar absorbers for thermochemical hydrogen
production 17 p0080 A78-16049

Marine thermic energy and the combination of solar, radiative and aeolian energies
19 p0328 A78-36623

Solar thermal heating systems: Technical aspects and economic limits /2nd revised edition/ --- German book
19 p0328 A78-36650

Converter of solar radiation to thermal energy designed on the basis of coaxial evacuated tubular elements with multilayer and selective coatings
19 p0335 A78-37946

Investigation of the dynamics of melting processes in a solar furnace
19 p0336 A78-37949

Application of solar energy to a solvent reclamation system
19 p0338 A78-38426

Research and Product Development programme in the area of solar thermal energy
19 p0370 A78-42108

Assessment of high temperature nuclear energy storage systems for the production of intermediate and peak-load electric power [ORNL/TM-5821]
17 p0115 N78-10588

Survey of the applications of solar thermal energy systems to industrial process heat. Volume 1: Summary
17 p0153 N78-14656

Integration of solar thermal power plants into electric utility systems
17 p0154 N78-14666

Integration of solar thermal power plants into electric utility systems
17 p0154 N78-14667

Technical and economic assessment of phase change and thermochemical advanced Thermal Energy Storage (TES) systems. Volume 2: Phase change TES sizing computer program
17 p0162 N78-15586

Technical and economic assessment of phase change and thermochemical advanced Thermal Energy Storage (TES) systems. Volume 3: Thermochemical TES sizing computer program
17 p0162 N78-15587

Technical and economic assessment of phase change and thermochemical advanced thermal energy storage (TES) systems. Volume 4: Solar Power Plant Operation, analysis computer program
18 p0242 N78-16462

Thermal energy storage
18 p0255 N78-18520

Analysis of requirements for accelerating the development of geothermal energy resources in California
18 p0256 N78-18528

Ocean thermal energy conversion: Legal, political, and institutional aspects
18 p0261 N78-18568

Trenton ICES, volume 1, phase 1
18 p0287 N78-21639

Molten salt thermal energy storage systems
19 p0405 N78-24618

Solar total energy system, large scale experiment, Shenandoah, Georgia. Volume 2, Section 3: Facility concept design
19 p0409 N78-24672

Solar total energy system, large scale experiment, Shenandoah, Georgia, volume 3
19 p0409 N78-24673

Solar pilot plant, phase 1, preliminary design report. Volume 2, book 2: Central receiver optical model users manual, CDBL item 2
19 p0424 N78-25583

Solar pilot plant, phase 1, preliminary design report. Volume 2, book 3: Dynamic simulation model and computer program descriptions, CDBL item 2
19 p0424 N78-25584

Solar pilot plant, phase 1, preliminary design report. Volume 3: Collector subsystem, CDBL item 2
19 p0424 N78-25585

Solar pilot plant, phase 1, preliminary design report. Volume 6: Electrical power generation; master control subsystems; balance of plant CDBL item 2
19 p0424 N78-25586

Heat extraction system of the Perm thermal electric power plant
19 p0426 N78-25599

Commercial applications of solar total energy systems
19 p0427 N78-25613

A collection of Stirling engine reports from General Motors' research, 1958 to 1970. Part 7: Thermal energy storage and publication list, 7.1 Thermal energy storage, 7.2 List of general motors Stirling engine publications
19 p0440 N78-26326

Thermal energy storage for road vehicle propulsion
19 p0440 N78-26329

Thermal energy storage Stirling engine power plants 1: Calculated heat transfer and pressure drop across ground power unit heater assemblies
19 p0440 N78-26330

Analysis of the failure of the nickel tank used for LiOH thermal energy storage for the Calvair automobile
19 p0440 N78-26332

Thermal energy storage--Stirling engine power plants 2. Calculated energy transfer rates from solidifying lithium fluoride to a plain-tube heater
19 p0440 N78-26334

Dynamic models of falling film evaporators for ocean thermal energy conversion plants
19 p0447 N78-26591

Proceedings of the Alternate Energy Systems Seminar [NASA-CR-157255]
19 p0457 N78-27522

Geothermal systems
19 p0457 N78-27524

Solar thermal systems
19 p0457 N78-27526

Utilization of waste heat in trucks for increased fuel economy
19 p0458 N78-27532

Molten-salt thermal-energy storage systems
19 p0460 N78-27556

THERMAL EXPANSION
High temperature heat pipes for terrestrial applications
19 p0318 A78-35615

Patent application. Variable-volume engine --- using natural heat sources
19 p0408 N78-24660

THERMAL FATIGUE
Analysis of the thermal fatigue induced by DNB oscillations in the MDAC Rocketdyne pilot and commercial plant solar receiver designs
19 p0431 N78-25642

THERMAL INSTABILITY
Electrical and thermal instabilities and their suppression in thermally equilibrium HED plasma
18 p0192 A78-26622

THERMAL INSULATION
Heat losses from solar energy absorbers enclosed in glass tubes
17 p0044 A78-11234

Thermal mass and headwalls in two new buildings --- for solar energy storage
17 p0048 A78-11276

Construction physics for solar houses
17 p0071 A78-14094

Thermal-engineering preliminaries for the retrofitting of old houses to solar-energy utilization
18 p0213 A78-28583

Refractory periclase materials and means of using them in high-temperature power plants
19 p0328 A78-36566

Poikoidal field coil design for a fusion-fission breeder reactor
19 p0354 A78-39977

THERMAL MAPPING
Thermal surveillance of active volcanoes using the LANDSAT-1 data collection system. Part 3: Heat discharge from Mount St. Helens, Washington
19 p0387 N78-22435

Thermal surveillance of active volcanoes using the LANDSAT-1 data collection system. Part 4: Lassen volcanic region
19 p0394 N78-23499

- Thermal surveillance of active volcanoes using the LANDSAT-1 data collection system. Part 5: Electronic thermal sensor and data collection platform technology [E78-10124] 19 p0394 N78-23500
- THERMAL POLLUTION**
Re-circulating power, unit costs and thermal pollution of fusion power stations 18 p0189 A78-26372
Remote monitoring of the Gravelly Run thermal plume at Hopewell and the thermal plume at the Surry nuclear power plant on the James River 19 p0313 A78-34905
- THERMAL PROTECTION**
Blanket structure design for JAERI Experimental Fusion Reactor 19 p0357 A78-40041
Protection of walls from hard disruptions in large tokamaks 19 p0379 A78-42214
- THERMAL RADIATION**
Thermophotovoltaic systems for electrical energy conversion 17 p0023 A78-11031
- THERMAL REACTORS**
A fluidized bed solar reactor - A thermochemical application 18 p0165 A78-20623
- THERMAL RESISTANCE**
The analysis, design and thermal performance testing of a heat pipe flat plate collector 17 p0042 A78-11214
Direct heat pipe cooling of semiconductor devices [AIAA 78-450] 19 p0319 A78-35626
- THERMAL RESOURCES**
ROCKBED - A computer program for thermal storage 17 p0050 A78-11304
- THERMAL SIMULATION**
A MHD simulation test facility for investigating the thermal properties of a slag/seed coated radiant boiler and superheater for a 2000 MWT MHD power plant [ASME PAPER 77-HT-64] 17 p0090 A78-17496
Indoor test for thermal performance evaluation of the Solaron (air) solar collector [NASA-CR-150572] 18 p0268 N78-19652
- THERMAL STABILITY**
New materials for coal liquefaction --- catalysts 18 p0190 A78-26581
Investigation of gas-controlled cryogenic heat pipes 18 p0221 A78-30495
A plausible scheme to improve stability, life and efficiency of thermoelectric energy converters 19 p0373 A78-42134
- THERMAL STRESSES**
Stress response investigations related to in-situ gasification of coal [ASME PAPER 77-PET-25] 17 p0077 A78-15083
- THERMIONIC CONVERTERS**
Electron emission from nickel-alloy surfaces in cesium vapor 18 p0188 A78-26112
Experiments with enhanced mode thermionic converters 18 p0218 A78-29636
Thermionic emission from electrodes with raised surfaces in a thermionic converter 18 p0224 A78-31011
Thermionic energy conversion topping system --- utilization of waste energy from steam generators [ASME PAPER 77-WA/ENER-6] 19 p0297 A78-33144
Optimization of the parameters of a Knudsen thermionic converter with Cs-Ba filler 19 p0340 A78-38933
The problem of optimizing the output characteristics of an ideal thermionic converter 19 p0341 A78-38934
ERDA/NASA advanced thermionic technology program [COO-3056-20] 17 p0120 N78-11504
Advanced Thermionic Technology Program [NASA-CR-155299] 17 p0143 N78-13599
ERDA/NASA advanced thermionic technology program [NASA-CR-157117] 19 p0409 N78-24674
Lithium and potassium heat pipes for thermionic converters [NASA-TM-78946] 19 p0441 N78-26390
Performance of a thermionic converter module utilizing emitter and collector heat pipes [NASA-TM-78941] 19 p0454 N78-27174
- THERMIONIC EMISSION**
Thermionic emission from electrodes with raised surfaces in a thermionic converter 18 p0224 A78-31011
- THERMIONIC EMITTERS**
Investigation of the thermionic emission of some advanced cathode materials 19 p0328 A78-36563
Lithium and potassium heat pipes for thermionic converters [NASA-TM-78946] 19 p0441 N78-26390
Performance of a thermionic converter module utilizing emitter and collector heat pipes [NASA-TM-78941] 19 p0454 N78-27174
- THERMIONIC POWER GENERATION**
Investigation of the electrical characteristics of low-temperature thermionic power generators 18 p0227 A78-31338
Performance and cost evaluation for a thermionic topping power plant [ASME PAPER 77-WA/ENER-7] 19 p0297 A78-33145
ERDA/NASA advanced thermionic technology program [COO-3056-20] 17 p0120 N78-11504
Advanced Thermionic Technology Program [NASA-CR-155299] 17 p0143 N78-13599
High-temperature, high-power-density thermionic energy conversion for space [NASA-TM-73844] 17 p0147 N78-13890
Optimize out-of-core thermionic energy conversion for nuclear electric propulsion [NASA-TM-73892] 18 p0252 N78-17856
High temperature heat pipe research at NASA Lewis Research Center [NASA-TM-78832] 19 p0393 N78-23384
- THERMISTORS**
Thermal surveillance of active volcanoes using the LANDSAT-1 data collection system. Preface and part 1: The Surtsey, Iceland, temperature data relay experiment via LANDSAT-1 --- Lassen volcanic region, California, Surtsey, Iceland and Mt. St. Helens and Mt Baker, Washington [E78-10121] 19 p0394 N78-23498
- THERMOCHEMICAL PROPERTIES**
Status of the DOE/STOR/-sponsored national program on hydrogen production from water via thermochemical cycles 18 p0217 A78-29331
- THERMOCHEMISTRY**
Chemical geothermometers and mixing models for geothermal systems 17 p0062 A78-11491
Combustion --- Book 17 p0080 A78-15951
Thermodynamics of thermochemical cycles in the decomposition of water 17 p0098 A78-18833
Thermochemical hydrogen production - Engineering efficiency and economics 17 p0099 A78-18834
Design and evaluation of thermochemical cycles - The work performed at J.R.C. Ispra establishment 17 p0099 A78-18835
Chemistry of thermochemical cycles from United States hydrogen programme - Thermochemical hydrogen production: Chemistry and thermochemical efficiency --- for hydrogen production 17 p0100 A78-18849
Comparison of the costs of producing hydrogen by electrolysis and by nuclear-based thermochemistry 17 p0101 A78-18850
Entropy production, efficiency, and economics in the thermochemical generation of synthetic fuels. I - The hybrid sulfuric acid process 18 p0174 A78-22867
Entropy production, efficiency, and economics in the thermochemical generation of synthetic fuels. II - The methanol water splitting cycle 18 p0174 A78-22868
Biomass - Progress and plans --- fermentation, thermochemical conversion and methane production 18 p0182 A78-24764
Solar production of hydrogen 18 p0201 A78-27868
Thermochemical energy transport costs for a distributed solar power plant 19 p0312 A78-34515

SUBJECT INDEX

THERMODYNAMIC PROPERTIES

Water dissociation by a thermochemical cycle - A thermodynamic analysis of principles and efficiencies 19 p0340 A78-38893

Thermochemistry of the reactions of the metals Nb, V, and Mo with the residual gases of a vacuum 19 p0379 A78-42227

Experimental and theoretical investigation of thermochemical hydrogen production 19 p0383 A78-42859

Investigation of sulfur based thermochemical cycles for hydrogen production by water decomposition 17 p0123 N78-12160

Technical and economic assessment of phase change and thermochemical advanced Thermal Energy Storage (TES) systems. Volume 2: Phase change TES sizing computer program [EPRI-EM-256-VOL-2] 17 p0162 N78-15586

Technical and economic assessment of phase change and thermochemical advanced Thermal Energy Storage (TES) systems. Volume 3: Thermochemical TES sizing computer program [EPRI-EM-256-VOL-3] 17 p0162 N78-15587

Kinetics of thermochemical decomposition of hydrogen sulfide for the purpose of generating hydrogen 18 p0247 N78-17166

Status of European thermochemical hydrogen programs [IA-UR-77-2985] 19 p0446 N78-26583

Molten carbonate fuel cell research at OENL. 2: Theoretical and experimental transport studies, thermochemistry, and electron microscopy. [ORNL/TM-6168/V2] 19 p0448 N78-26601

Thermochemical energy storage systems: A review [SAND-77-8051] 19 p0460 N78-27557

THERMODYNAMIC CYCLES

The Gas Turbine HTGR plant with a binary cycle 17 p0029 A78-11083

Theoretical modeling of an ammonia/water absorption cycle with solar energy storage 17 p0046 A78-11250

A novel gas adsorption cycle for solar thermal power generation 17 p0052 A78-11323

Application of direct contact heat exchangers in geothermal systems [ASME PAPER 77-HT-3] 17 p0089 A78-17478

Thermodynamics of thermochemical cycles in the decomposition of water 17 p0098 A78-18833

Steady metal combustor as a closed thermal energy source 18 p0233 A78-32141

Steam bottoming plants for combined cycles 19 p0296 A78-33102

Alternative automobile engines 19 p0367 A78-41466

Solar energy operated oscillating heat engine 19 p0376 A78-42162

The thermochemical dissociation of water 17 p0123 N78-12163

THERMODYNAMIC EFFICIENCY

Analysis of closed cycle Brayton systems for solar electric power generation 17 p0053 A78-11324

Some results of an experimental study of the Stirling engine --- in solar energy systems 17 p0064 A78-12391

Heat optimization for solar power plants - Concentration of radiation and the temperature of the working medium 17 p0064 A78-12392

Heat pump application in houses 17 p0068 A78-13452

The thermodynamics of a fuel cell aggregate involving thermal-catalytic methanol decomposition 17 p0074 A78-14497

Pulverized coal-pressure gasification with air as a topping stage for the combined gas/steam turbine process 17 p0074 A78-14498

Collection properties of generalized light concentrators 17 p0080 A78-16093

Thermochemical hydrogen production - Engineering efficiency and economics 17 p0099 A78-18834

Some problems in the operational analysis of a hydrogen-fueled gas turbine 18 p0186 A78-25637

Thermal optimization of compact solar water heaters 18 p0206 A78-28172

Experimental and theoretical analysis of Wankel engine performance [SAE PAPER 780416] 19 p0308 A78-33388

Some results of an experimental investigation of a Stirling engine --- in solar energy systems 19 p0331 A78-36868

Thermal optimization of solar power plants - Radiation concentration and working-fluid temperature 19 p0332 A78-36869

Design of high efficiency flat plate solar collectors for space and water heating [ASME PAPER 78-DE-7] 19 p0345 A78-39776

A high thermal efficiency X-ray energy conversion scheme for advanced fusion reactors 19 p0354 A78-39978

Mechanical and thermal design of a gas-cooled fusion blanket module 19 p0357 A78-40040

Performance characteristics of compressed air energy storage systems 19 p0364 A78-40823

A suggestion for improving the heat transfer from solar heaters 19 p0374 A78-42146

A 400 kW high temperature solar test facility 19 p0384 A78-42894

A thermodynamic analysis of a solar-powered jet refrigeration system 17 p0118 N78-11154

Indoor test for thermal performance evaluation of Libbey-Owens-Ford solar collector --- using a solar simulator [NASA-CR-150508] 18 p0249 N78-17474

Analysis of data and results for the round-robin flat-plate collector test program [PB-275576/7] 18 p0289 N78-21655

Indoor test for thermal performance evaluation on the Sunworks (air) solar collector [NASA-CR-150666] 19 p0405 N78-24613

Outdoor thermal efficiency evaluation of the Ying solar collector [NASA-CR-150675] 19 p0405 N78-24614

Development of an improved high efficiency thin silicon solar cell [NASA-CR-157058] 19 p0408 N78-24654

THERMODYNAMIC EQUILIBRIUM

Electrical and thermal instabilities and their suppression in thermally equilibrium MHD plasma 18 p0192 A78-26622

Catalytic gasification of coal with high-pressure steam 18 p0227 A78-31497

Thermodynamic phase stability diagrams for the analysis of corrosion reactions in coal gasification/combustion atmospheres [EPRI-PP-539] 19 p0445 N78-26574

THERMODYNAMIC PROPERTIES

Method for taking account of the effect of chemical kinetics on the thermodynamic properties of the working fluid in a supersonic MHD generator 18 p0168 A78-22137

Thermal properties of battery systems 18 p0233 A78-32232

Selection of the thermal modes of operation for the reactor/condenser system of electrochemical current generators 19 p0315 A78-35091

Thermal optical surface properties and high-temperature solar energy conversion [AIAA PAPER 78-903] 19 p0324 A78-36021

Determination of the thermodynamic parameters of a thermal compressor --- for solar energy conversion 19 p0331 A78-36856

Stationary and dynamic behavior of heat pipes 19 p0364 A78-40864

Development of working fluid thermodynamic properties information for geothermal cycles; phase 1 [ORO-5249-1] 17 p0143 N78-13600

Coso geothermal corrosion studies [AD-A045511] 17 p0147 N78-13681

- Characteristics and combustion of future hydrocarbon fuels --- aircraft fuels [NASA-TN-78865] 19 p0403 N78-24370
- Physics underlying improved efficiency of high-low-junction emitter silicon solar cells [SAND-77-1610C] 19 p0410 N78-24685
- Heat pipes, volume 2. Citations from the engineering index data base [NTIS/PS-78/0303] 19 p0417 N78-25382
- A collection of Stirling engine reports from General Motors' research, 1958 to 1970. Part 2: Stirling cycle analysis and engine design studies [GMR-2690-PT-2] 19 p0428 N78-26262
- THERMODYNAMICS**
- Reversible thermodynamics of the airlift pump 18 p0235 A78-32503
- Variational irreversible thermodynamics of heat and mass transfer in porous solids - New concepts and methods 19 p0313 A78-34603
- Study of the thermodynamics of coal gasification 19 p0337 A78-38200
- Thermodynamic potential for the anodic dissolution of n-type semiconductors - A crucial factor controlling durability and efficiency in photoelectrochemical cells and an important criterion in the selection of new electrode/electrolyte systems 19 p0344 A78-39465
- Thermodynamics and energy policy [ORAU/LEA(M)-77-18] 18 p0287 N78-21643
- Thermodynamic analysis of a tin-steamed LHMHD system [AD-A052395] 19 p0409 N78-24669
- Heat pipes, volume 3. Citations from the engineering index data base [NTIS/PS-78/0304] 19 p0417 N78-25383
- THERMOELECTRIC COOLING**
- Investigation of an ejector heat pump 17 p0124 N78-12361
- THERMOELECTRIC GENERATORS**
- The evening out of hot junction temperatures in solar thermoelectric generators by a disk method 17 p0106 A78-20423
- Experimental study of temperature fields in liquids in the steady state regime --- for solar thermoelectric generator cooling 18 p0166 A78-21030
- Indices and areas of application of gas-turbine-driven thermal power plants 18 p0193 A78-27096
- Utilisation of solar energy by thermoelectric generators 19 p0373 A78-42133
- A plausible scheme to improve stability, life and efficiency of thermoelectric energy converters 19 p0373 A78-42134
- Selenide isotope generators [CONF-770302-1] 17 p0114 N78-10581
- Solar thermoelectric generators [NASA-CR-157097] 19 p0407 N78-24645
- Prediction of thermoelectric battery power and voltage for a 15 year lifetime HB-75 mW (B) battery [GA-A-14718] 19 p0446 N78-26576
- THERMOELECTRIC MATERIALS**
- On some new criteria of efficiency of thermoelectric materials 17 p0106 A78-20200
- The role of macrorelief of semiconductor branches during their commutation in thermoelements --- semiconductor-metal contacts for thermoelectric solar batteries 18 p0187 A78-25736

THERMONUCLEAR REACTIONS

- Thermo-nuclear fusion study by glass laser 'Gekko II' 19 p0362 A78-40384
- Thermo-nuclear fusion plasma produced by CO2 laser 19 p0362 A78-40385

THERMOPHYSICAL PROPERTIES

- Rock properties for thermal energy storage systems in the 0 to 500 C range 17 p0051 A78-11308
- Two-dimensional temperature distribution in a ceramic-based electrode --- for MHD channels 18 p0173 A78-22806
- Design and operational influences on thermal performance of 'Solaris' solar collector [ASME PAPER 77-WA/SOL-2] 19 p0299 A78-33190
- High-temperature materials for MHD generators --- Russian book 19 p0328 A78-36551

THERMOPILES

- Output power and lifetime of high-voltage, low-temperature thermoelectric batteries 19 p0330 A78-36854

THERMOPLASTIC FILMS

- Performance of Loran vs. ordinary glass as glazing materials for flat-plate solar collectors 17 p0042 A78-11219

THERMOSIPHONS

- Experimental investigation and computer modeling of a solar natural circulation system 17 p0044 A78-11236
- Analytical and experimental study of thermosiphon solar water heaters 17 p0045 A78-11237
- Installation package maxi-therm S-101 heating module [NASA-CR-150512] 18 p0274 A78-20602
- Preliminary design package for maxi-therm heat exchanger module [NASA-CR-150620] 19 p0389 A78-22473

THETA PINCH

- Plasma stabilization requirements of the Reference Theta-Pinch Reactor /BTPB/ 17 p0041 A78-11193
- Measurement of a theta-pinch plasma by holographic interferometry 18 p0192 A78-26624
- Production of fusion energy by vortex structure compression 19 p0338 A78-38419
- Finite Larmor radius equations in an arbitrary near-theta pinch geometry 19 p0362 A78-42491

THICK FILMS

- Application of thick-film technology to solar cell fabrication 17 p0015 A78-10947

THICKNESS

- Coil thickness gauge using ERAS techniques, part 1 --- radiofrequency resonance absorption [NASA-CR-150625] 18 p0273 A78-20573

THIN FILMS

- Fabrication and characterization of solar cells using dendritic silicon thin films grown on alumina ceramic 17 p0013 A78-10916
- Efficiency calculations for thin film polycrystalline semiconductor Schottky barrier solar cells 17 p0013 A78-10920
- High performance, inexpensive solar cell process capable of a high degree of automation 17 p0015 A78-10944
- The relationships between preparation parameters, operating characteristics and physical processes in Cu₂S-CdS thin film solar cells 17 p0017 A78-10971
- An automatable integrated thin film solar cell array 17 p0017 A78-10972
- Variation of short-circuit current spectral response with Cu₂-x/S composition in thin film Cu₂-x/S/CdS photovoltaic cells 17 p0017 A78-10973
- Characteristics of chalcocite /Cu₂x/S/ films produced by different methods and some properties of solar cells made from such films 17 p0018 A78-10977
- The formation of Cu₂S thin films for CdS solar cells by sulfurization of copper with thiourea 17 p0018 A78-10980

CdS sprayed thin films - Electrical and optical properties 17 p0018 A78-10981

Thin film heterojunction and homojunction solar cells utilizing I-III-VI₂ ternary compound semiconductors 17 p0018 A78-10984

Indium phosphide films deposited by cylindrical magnetron reactive sputtering 17 p0019 A78-10987

Solar cells using Schottky barriers on amorphous silicon 17 p0025 A78-11045

Inversion layer silicon solar cells with MIS contact grids 17 p0026 A78-11049

Experimental study of the interface properties of MOS tunnel devices 17 p0026 A78-11053

Improved GaAs solar cells with very thin junctions 17 p0026 A78-11057

High efficiency thin window Ga_{1-x}Al_x/As/GaAs solar cells 17 p0027 A78-11065

Rheotaxy for large grain thin film solar cell fabrication 17 p0027 A78-11067

Thin film CrO₂/x/ selective absorbers stable above 500 C 17 p0045 A78-11239

Low cost, high efficiency solar cells using indium-tin oxide on semiconductor /OSOS/ solar cells 17 p0054 A78-11334

Silicon films as selective absorbers for solar energy conversion 17 p0070 A78-13905

Solar cells for terrestrial applications 17 p0083 A78-16826

Improvements in the design of solar selective thin film absorbers 18 p0168 A78-22018

Thin Pt and Pd silicide Schottky barriers for silicon solar cells 18 p0171 A78-22267

Thin-film black-white coatings for the receivers of solar energy installations 18 p0215 A78-28897

Thermoelectric power of tin films at low temperatures 18 p0217 A78-29427

Anomalous temperature dependence observed on the photovoltage of Se-based amorphous thin film-SnO₂ heterostructures 18 p0222 A78-30644

Polycrystalline thin film CdS/CdTe solar cells 18 p0225 A78-31210

Increases in energy conversion efficiency for thin-film polycrystalline CdS/Cu₂S photovoltaic cells 18 p0228 A78-31730

The influence of interface states and energy barriers on the efficiency of heterojunction solar cells 19 p0309 A78-34008

Cu₂x/S/CdS thin-film solar cells using chemically sprayed CdS films 19 p0309 A78-34009

American Vacuum Society, National Symposium, 24th, and Conference on Microbalance Techniques, 15th, Boston, Mass., November 8-11, 1977, Proceedings 19 p0324 A78-36030

Optical properties of selectively absorbing metal/insulator composite films 19 p0324 A78-36032

Structure and morphology of chemical-sprayed CdS films 19 p0325 A78-36036

Thin film CdS-CuI heterojunction photocells 19 p0333 A78-37260

Photoelectric properties of CdS thin films obtained by vacuum evaporation from the heterogeneous CdS-Cr₂O₃ system 19 p0333 A78-37261

Technology of Cu₂S-CdS solar cells - German state-of-the-art 19 p0373 A78-42127

Ternary compound thin film solar cells-2 [PB-270029/2] 17 p0121 A78-11515

THIN PLATES

SUBJECT INDEX

Indium phosphide/cadmium sulfide thinfilm
terrestrial solar cells
[ALO/3717-1] 19 p0462 N78-27581

THIN PLATES
Development of an improved high efficiency thin
silicon solar cell
[NASA-CR-157058] 19 p0408 N78-24654

THIN WALLED SHELLS
The mechanical structure of the Joint European Torus
17 p0040 A78-11182

THRUST LOADS
Ball to separator contact forces in angular
contact ball bearings under thrust and radial
loads
[NASA-CR-2976] 18 p0281 N78-21469

THRUST MEASUREMENT
Tutorial, test measurement accuracy --- for gas
turbine engine performance
17 p0088 A78-17409
Thrust computing system applications to increase
engine life and provide fuel conservation
18 p0227 A78-31311

THYRISTORS
The new electric locomotives
18 p0179 A78-24378

TIDEPower
Status report on the alternative energy sources
17 p0061 A78-11489
The earth as a solar heat engine --- windpower
utilization, ocean thermal conversion, tidal
power, waterwave power and biomass conversion
18 p0223 A78-30745
Unconventional energy sources. A select
bibliography
[NCWTD-CHDST-BIB-6] 17 p0150 N78-14626

TILTING ROTORS
Effects of rotor location, coning, and tilt on
critical loads in large wind turbines
18 p0267 N78-19636

TIME DEPENDENCE
A Fokker-Planck analysis of photovoltaic systems
18 p0173 A78-22841
Time dependent study of eddy current loss in a
superconducting composite --- for Tokamak
toroidal field coils
19 p0355 A78-40007

TIME MEASUREMENT
Minority carrier lifetime measurement of silicon
solar cell
19 p0335 A78-37903

TIME RESPONSE
Thin silicon film p-i-n photodiodes with internal
reflection
18 p0205 A78-28142

TIN
Thermoelectric power of tin films at low
temperatures
18 p0217 A78-29427
Thermodynamic analysis of a tin-steamed LMHD system
[AD-A052395] 19 p0409 N78-24669

TIN OXIDES
Degradation of SnO₂/Si heterojunction solar cells
17 p0027 A78-11063
Low cost, high efficiency solar cells using
indium-tin oxide on semiconductor /OSOS/ solar
cells
17 p0054 A78-11334
Anomalous temperature dependence observed on the
photovoltage of Se-based amorphous thin
film-SnO₂ heterostructures
18 p0222 A78-30644
Electrical and photovoltaic characteristics of
indium-tin oxide/silicon heterojunctions
19 p0315 A78-35282
SnO₂/Si solar cells - Heterostructure of
Schottky-barrier or MIS-type device
19 p0338 A78-38550

TIP DRIVEN ROTORS
Performance characteristics of
concentrator-augmented Savonius wind rotors
17 p0094 A78-18092

TITANIUM
Compatibility studies for the
ammonia-titanium-seawater system as related to
Ocean Thermal Energy Conversion
19 p0305 A78-33345

Friction and wear of selected metals and alloys in
sliding contact with AISI 440 C stainless steel
in liquid methane and in liquid natural gas
[NASA-TP-1150] 18 p0273 N78-20512
Some rate and modeling studies on the use of
iron-titanium hydride as an energy storage
medium for electric utility companies
[BNL-50667] 19 p0409 N78-24676

TITANIUM ALLOYS
Metal hydride development program at Brookhaven
National Library
[BNL-23574] 19 p0461 N78-27568

TITANIUM CHLORIDES
Development of a Ti/Fe redox couple flow battery
system
19 p0388 N78-22458

TITANIUM OXIDES
Radiative cooling of TiO₂ white paint
18 p0206 A78-28171
New TiO_x-MIS and SiO₂-MIS silicon solar cells
19 p0313 A78-34847
Temperature dependence of flatband potentials at
semiconductor-electrolyte interfaces --- in
solar cells
19 p0362 A78-40531

TOKAMAK DEVICES
Controllable homopolar motor-generator energy
storage for application in a fusion power reactor
17 p0007 A78-10680
Doublet IIA experiments --- plasma cross sections
in Tokamak fusion reactor
17 p0011 A78-10776
Shaping and compression experiments in a Tokamak
17 p0011 A78-10778
Reconnection of field lines and disruptive
instability in Tokamaks
17 p0011 A78-10796
Reactor costs and maintenance, with reference to
the Culham Mark II conceptual Tokamak reactor
design
17 p0011 A78-10872
Neutral beam injector research and development
work in the USA
17 p0012 A78-10878
Vacuum pumping for controlled thermonuclear reactors
17 p0038 A78-11163
Aspects of safety and reliability of
superconducting magnet systems for fusion power
reactors
17 p0038 A78-11167
The UWMAK-II study and magnet design
17 p0038 A78-11169
Poloidal field for a 1.7 MA Tokamak - Comparison
between an iron core and an air core transformer
17 p0039 A78-11170
The transformer design for a proposed technical
feasibility Tokamak reactor
17 p0039 A78-11171
Design, construction and operation of the DITE
divertor field system --- Divertor Injection
Tokamak Experiment
17 p0039 A78-11175
Studies on design and tests of superconductors for
Tokamaks
17 p0039 A78-11176
The practical feasibility of a bundle divertor for
a Tokamak power reactor
17 p0041 A78-11188
Technical limitations on conceptual Tokamak
reactors. II
17 p0041 A78-11194
Time and space resolved temperature measurements
of a limiter in a Tokamak discharge using an
infra red camera
17 p0041 A78-11200
Large Tokamak power supplies - A survey of
problems and solutions
17 p0041 A78-11205
Energy optimization of a cycled Tokamak
17 p0087 A78-17133
An approach for determining the impact of peak
coolant temperature on fusion reactor size and
electricity costs
[ASME PAPER 77-HT-73] 17 p0090 A78-17501
Tokamak fusion power reactors

17 p0104 A78-19827
- Efficiency of Fresnel lens solar collector
18 p0232 A78-32113
- A simulated comparison of the useful energy gain in a fixed and a fully tracking flat plate collector
19 p0323 A78-35800
- TRACTORS**
Solar energy for tractors
19 p0376 A78-42168
- TRADEOFFS**
Cost/benefit tradeoffs for reducing the energy consumption of the commercial air transportation system
[NASA-CR-137925] 17 p0109 A78-10035
- TRANSFER FUNCTIONS**
Experimental transfer function analysis of a dissipative and a reactive mode --- instability in magnetic mirror plasma
19 p0381 A78-42267
- TRANSFER ORBITS**
Propulsion options for orbital transfers in cis-lunar space
18 p0204 A78-27931
- TRANSFORMERS**
Poloidal field for a 1.7 MA Tokamak - Comparison between an iron core and an air core transformer
17 p0039 A78-11170
- The transformer design for a proposed technical feasibility Tokamak reactor
17 p0039 A78-11171
- Power conditioning systems for high-power, airborne, pulsed applications
18 p0174 A78-23412

TRANSIENT HEATING

Time and space resolved temperature measurements of a limiter in a Tokamak discharge using an infra red camera

17 p0041 A78-11200

The OPEC program at Carnegie-Mellon University - Heat transfer research and power cycle transient modeling --- Ocean Thermal Energy Conversion

19 p0304 A78-33335

TRANSIENT LOADS

Study of the performance of flat plate collectors in the transient regime

19 p0384 A78-42892

TRANSIENT RESPONSE

Electromagnetic processes in ac/dc power converters. II - Symmetrical transient processes in power converters. III - Nonsymmetrical transient processes

18 p0217 A78-29625

An integral equation method to calculate the transient behaviour of a photovoltaic solar cell

19 p0292 A78-32695

Transient response to three-phase faults on a wind turbine generator [NASA-TM-78902]

19 p0442 A78-26542

TRANSISTOR CIRCUITS

Influence of the effect of storage on models of power cell dynamics

17 p0103 A78-19486

Pulse battery charger employing 1000 ampere transistor switches

18 p0231 A78-31974

Properties of a collectorless motor fed from a three-phase current-source

18 p0235 A78-32430

Transistor inverters for satellite onboard networks of higher power

19 p0365 A78-40865

TRANSIT SATELLITES

Positioning and navigation by satellite --- for marine operations

[AIAA 77-1553]

17 p0069 A78-13684

TRANSIT TIME

TMP heating studies on Petula Tokamak --- Transit Time Magnetic Pumping

19 p0354 A78-39969

TRANSITION FLOW

Influence of the nonuniformity of the field of force on the flow in an MHD channel

18 p0216 A78-28951

TRANSITION METALS

Silicon solar cells from transition metal doped Czochralski and web crystals

17 p0013 A78-10922

Deactivation of hydrodesulfurization catalysts under coal liquids. II - Loss of hydrogenation activity due to adsorption of metallics

18 p0203 A78-27920

Materials for fuel cells

[PB-269518/7]

17 p0113 A78-10573

TRANSITION TEMPERATURE

Increasing the resources of jet fuels

17 p0062 A78-11699

TRANSMISSION EFFICIENCY

Hydrogen transmission - The significance of efficiency --- in comparison with conventional electric power system

17 p0009 A78-10736

TRANSMISSION LINES

Superconducting power transmission line materials research and conductor development

[SAN/0326-1]

19 p0416 A78-25342

TRANSMISSIONS (MACHINE ELEMENTS)

Optimal control of flywheel hybrid transmissions

[ASME PAPER 77-WA/AUT-3]

18 p0229 A78-31828

TRANSMITTANCE

Re-evaluation of flat plate solar panels in use for twenty years

17 p0043 A78-11225

An approximate equation for predicting the solar transmittance of transparent honeycombs --- flat plate collector efficiency

17 p0044 A78-11231

A correction procedure for separating direct and diffuse insolation on a horizontal surface

17 p0105 A78-19839

TRANSMITTER RECEIVERS

Supervisory and transmission system for the control of atmospheric pollution in areas surrounding thermoelectric plants

17 p0065 A78-12936

Solar power satellite system definition study, Part 3

[NASA-CR-151673]

18 p0272 A78-20164

TRANSMUTATION

Transmutation doping of silicon solar cells

17 p0137 A78-13539

TRANSPARENCY

Design factors for transparent conducting layers in solar cells

17 p0027 A78-11064

A study of the differential spectral absorption flat-plate solar collectors

17 p0048 A78-11275

TRANSPORT AIRCRAFT

Adaptation for economization, or adaptation for the economization of energy --- in transport aircraft design and operation

17 p0063 A78-12030

Energy savings - The viewpoint of an aircraft manufacturer

17 p0063 A78-12031

Current and future fuels for transport aircraft

17 p0096 A78-18669

The challenge of advanced fuel-conservative aircraft - A manufacturer's view

[AIAA PAPER 78-362]

18 p0178 A78-24034

Canadian Symposium on Energy Conserving Transport Aircraft, Ottawa, Canada, October 3, 4, 1977, Proceedings

18 p0226 A78-31301

The NASA Aircraft Energy Efficiency Program

18 p0226 A78-31302

Fuel saving potential of Mach 0.8 twin engine prop-fan transports

18 p0226 A78-31306

Fuel efficiency - Where we are heading in the design of future jet transports

18 p0226 A78-31307

The Liquid Hydrogen Option for the Subsonic Transport: A status report

[NASA-TM-74089]

17 p0109 A78-10306

Fuel conservation merits of advanced turboprop transport aircraft

[NASA-CR-152096]

18 p0279 A78-21095

Studies of advanced transport aircraft

[NASA-TM-78697]

19 p0413 A78-25047

CTOL transport technology, 1978 --- conferences

[NASA-CP-2036-PT-1]

19 p0453 A78-27046

Overview of NASA CTOL program

19 p0453 A78-27047

TRANSPORT PROPERTIES

Thermochemical energy transport costs for a distributed solar power plant

19 p0312 A78-34515

Sulfur budget of a power plant plume

19 p0366 A78-41275

Transport processes in Teflon-bonded fuel cell electrodes

17 p0135 A78-13524

Heat pipe development

[NASA-CR-156669]

18 p0238 A78-16327

Solar heat transport fluids for solar energy collection systems: A collection of quarterly reports

[NASA-CR-150560]

18 p0274 A78-20606

TRANSPORT THEORY

Transport calculations for a wall-confined liner-compressed plasma

19 p0380 A78-42258

TRANSPORTATION

Transportation in America's future: Potentials for the next half century. Part 2. Transportation forecasts

[PB-270468/2]

17 p0129 A78-12909

Transportation in America's future: Potentials for the next half century. Part 1: Societal

[PB-270467/4]

17 p0129 A78-12910

Effects of Energy Constraints on Transportation Systems

TURBOMACHINERY

- The Netherlands National Research Programme on
Wind Energy 18 p0209 A78-28553
- TURBOPROP AIRCRAFT**
Adaptation for economization, or adaptation for
the economization of energy --- in transport
aircraft design and operation 17 p0063 A78-12030
- TURBOPROP ENGINES**
Review of the development of small- and
medium-capacity gas turbines at the Motoren- und
Turbinen Union [DGLR PAPER 77-061] 17 p0096 A78-18702
Organic compounds in turbine combustor exhaust
[AD-A045582] 17 p0129 A78-13065
- TURBULENCE EFFECTS**
Computer aided aerogenerator analysis and
performance 18 p0169 A78-22229
- TURBULENT DIFFUSION**
Particulate deposition in direct fired HHD air
preheaters [ASME PAPER 77-HT-65] 17 p0090 A78-17497
- TURBULENT FLOW**
Stratified turbulence modeling for the near field
external flow --- application to Ocean Thermal
Energy Conversion plants 19 p0302 A78-33316
- TURBULENT HEAT TRANSFER**
A numerical solution to the unsteady,
quasi-three-dimensional, turbulent heat transfer
problem in an HHD channel [ASME PAPER 77-HT-90] 17 p0091 A78-17506
- TWISTING**
Blade twist, droop snoot, and forward spars --- in
windmill blades 18 p0234 A78-32421
- TWO DIMENSIONAL FLOW**
Two-dimensional electrical effects in a frame-type
HHD channel 17 p0103 A78-19269
Lift on a rotating porous cylinder --- with
application to wind power generation 18 p0167 A78-21633
G2H, a two-dimensional diffusion time scale
tokamak code 18 p0231 A78-32066
- TWO FLUID MODELS**
Study of a collisional plasma rotating between two
cylinders 19 p0293 A78-32718
- TWO PHASE FLOW**
Two phase working fluids in solar collectors
[ATAA PAPER 78-354] 18 p0178 A78-24030
Modeling fluidized bed combustion 18 p0230 A78-31959
Experiments on and design of low-cost aluminum
heat exchangers for OTEC plant ships 19 p0304 A78-33339
Broadlands - A gas-dominated geothermal field 19 p0330 A78-36825
Babcock and Wilcox's experience with two-phase
flow mixtures of coal and gas 17 p0132 A78-13254
Two-phase working fluids for the temperature range
50 to 350 C [NASA-CR-135255] 18 p0238 A78-16329
Experimental two-phase liquid-metal
magnetohydrodynamic generator program [AD-A046951] 18 p0240 A78-16444
Synthoil hydrodynamics [COO-0056-4] 18 p0273 A78-20473
Two-phase Hartmann flows in the HHD generator
configuration [AD-A051450] 19 p0401 A78-23927
Studies on two-phase flow mixing pertaining to
liquid-metal magnetohydrodynamic power generation
[CONF-771098-1] 19 p0452 A78-26933

Assistance from energy developers: A negotiating guide for communities [ERDA-77-90] 19 p0463 N78-27588

URBAN RESEARCH

Proposal for the production and seasonal storage of hot water to heat a city 17 p0083 A78-16833

Energy-politics alternatives for the urban region of Munich until 1985 17 p0093 A78-17950

A study of the energy consequences of alternative transport policies in intercity freight markets 18 p0258 N78-18547

Energy requirements for municipal pollution control facilities [PB-276989/1] 19 p0401 N78-24003

URBAN TRANSPORTATION

Achievements of scientific and technological progress in the development of transport and its energetics in the USSR 17 p0073 A78-14131

Paratransit prospects - Filling a gap 17 p0084 A78-16848

Piat electric city car prototype [EVC PAPER 7755] 17 p0085 A78-16926

Electric levitated inter-city vehicles [EVC PAPER 7782] 17 p0085 A78-16928

The Copper Electric Town Car - Recent developments [EVC PAPER 7756] 17 p0086 A78-16934

Electric vehicle test and evaluation program of the U.S. Postal Service
[EVC PAPER 7747] 17 p0086 A78-16935

Electric utility fleet applications of electric vehicles
[EVC PAPER 7751] 17 p0086 A78-16940

Environmental and energy considerations for electric vehicles in urban use
[EVC PAPER 7753] 17 p0086 A78-16941

Prototype testing of a rotary current train in the Berlin transit system
18 p0194 A78-27171

The electric way ahead for road transport
19 p0292 A78-32652

An overview of aerospace gas turbine technology of relevance to the development of the automotive gas turbine engine
[SAE PAPER 780075] 19 p0306 A78-33364

Electric vehicles in Germany - Present and future
[SAE PAPER 780087] 19 p0307 A78-33368

General safety considerations of the Ohio DOT electric vehicle
[SAE PAPER 780160] 19 p0307 A78-33376

Large buses and the Townobile electric city transit system
[SAE PAPER 780293] 19 p0308 A78-33385

Decreasing on-board fuel consumption in heat engine/battery electric hybrids by battery depletion
[SAE PAPER 780295] 19 p0308 A78-33386

Electric-flywheel vehicle for postal service applications
[SAE PAPER 780297] 19 p0308 A78-33387

The role of advanced transit in the implementation of the polycentric city concept
19 p0329 A78-36697

Investigations concerning direct-current operated local-traffic vehicles with low reactive effects
19 p0365 A78-40866

Alternative concepts for underground rapid transit systems, executive summary
[PB-270102/7] 17 p0123 N78-11894

Priority treatment for high occupancy vehicles: Project status report --- bus and carpool lanes
[PB-270529/1] 17 p0129 N78-12907

A study of efficiency indicators of urban public transportation systems
[PB-270940/0] 17 p0147 N78-13970

Magic Carpet evaluation study
[PB-271214/9] 17 p0148 N78-13975

Assessment of battery buses
[PB-271321/2] 17 p0148 N78-13976

Flywheel propulsion simulation
[PB-272259/3] 17 p0149 N78-14426

Costs and energy efficiency of a dual-mode system
[PB-272714/7] 18 p0246 N78-16936

Baseline tests of the Zagato Elcar electric passenger vehicle
[NASA-TN-73764] 18 p0252 N78-17934

The energy efficiency of urban transit systems
18 p0258 N78-18541

Intercity rail energy intensity for passenger movement
18 p0258 N78-18546

Urban applications and energy impacts of future electric cars
18 p0259 N78-18552

Energy intensity of various transportation modes
18 p0260 N78-18555

Near-term electric vehicle program, phase 1
[SAN/1295-1] 18 p0273 N78-20448

UBETHANES

Research of low cost wind generator rotors
18 p0267 N78-19639

USER MANUALS (COMPUTER PROGRAMS)

Central Data Processing System (CDPS) user's manual: Solar heating and cooling program
[NASA-CR-150580] 18 p0283 N78-21595

Systems studies of coal conversion processes using a reference simulator
[PE-2275-4] 19 p0390 N78-22480

PVSS: A photovoltaic system simulation program manual
[SAND-77-0814] 19 p0398 N78-23593

Computer program for design and performance analysis of navigation-aid power systems program documentation. Volume 2: User's manual
[AD-A047356] 19 p0409 N78-24667

USER REQUIREMENTS

Electric vehicles in the Bell System
[EVC PAPER 7752] 17 p0086 A78-16931

Coal technology - Users' viewpoint
18 p0181 A78-24755

UTILITIES

Assessment of storage systems - The device utility interface --- energy technology
17 p0009 A78-10730

Optimum peak-shaving mix for electric utilities
17 p0009 A78-10737

Energy from solid waste - Appraisal of alternatives
17 p0011 A78-10746

Solar photovoltaic conversion electric utility point of view and development role
17 p0021 A78-11008

The potential for application of energy storage capacity on electric utility systems in the United States. II
17 p0030 A78-11087

Economic analysis of wind generation and energy storage for electric utility systems
17 p0031 A78-11100

Superconducting energy storage development for electric utility systems
17 p0032 A78-11109

The impact of solar central electric technology on the regulated utility
17 p0033 A78-11119

The use of wind power by electric utilities
17 p0051 A78-11311

Solar hybrid repowering
17 p0055 A78-11343

Impact of domestic solar heating systems utilizing off peak storage on electric utilities
17 p0055 A78-11344

Preferred residential solar heating and cooling systems compatible with electric utility operation
17 p0055 A78-11345

An off-peak energy storage concept for electric utilities. II - The water battery concept
17 p0068 A78-13449

Electric utility applications of fabric filters --- for pollution control
17 p0073 A78-14155

An electrochemically regenerative hydrogen-chlorine energy storage system for electric utilities
17 p0095 A78-18412

Cost-effective electricity rates - A stronger incentive to rational energy use
18 p0176 A78-23919

Re-circulating power, unit costs and thermal pollution of fusion power stations
18 p0189 A78-26372

Wind energy program of the Danish government and the Danish electric power concerns
18 p0209 A78-28554

Cogeneration --- single site simultaneous electricity/heat generation
18 p0216 A78-29226

Electricity generation by utilities - 1974 nationwide emissions estimates
19 p0320 A78-35701

Design study of wind turbines 50 kW to 3000 kW for electric utility applications. Volume 1: Summary report
[NASA-CR-134934] 17 p0125 N78-12529

Projected 1977 - 1978 winter electric load-supply situation, contiguous United States
[PB-276269/8] 18 p0285 N78-21621

The long-run incremental cost of electric utilities
[PB-276082/5] 18 p0289 N78-21660

Performance potential of combined cycles integrated with low-Btu gasifiers for future electric utility applications
[NASA-TN-73775] 19 p0395 N78-23557

V

VACUUM APPARATUS

Vacuum vessel and pumping system of the J.E.T. experiment --- Joint European Torus
17 p0038 A78-11164

VACUUM CHAMBERS

Molecular-beam epitaxy in space
17 p0103 A78-19472

SUBJECT INDEX

VISCOUS DAMPING

Constructing the vacuum vessel for J.E.T. /Joint European Torus/ 19 p0352 A78-39947

Thermochemistry of the reactions of the metals Nb, V, and Mo with the residual gases of a vacuum 19 p0379 A78-42227

VACUUM DEPOSITION

Vacuum deposited polycrystalline silicon solar cells 17 p0013 A78-10921

American Vacuum Society, National Symposium, 24th, and Conference on Microbalance Techniques, 15th, Boston, Mass., November 8-11, 1977, Proceedings 19 p0324 A78-36030

Structure and morphology of chemical-sprayed Cds films 19 p0325 A78-36036

Photoelectric properties of Cds thin films obtained by vacuum evaporation from the heterogeneous Cds.Cr2O3 system 19 p0333 A78-37261

VACUUM EFFECTS

Performance analysis and experience for flat plate collector with absorber operating in a vacuum 17 p0042 A78-11215

Experimental evaluation of a fixed collector employing vee-through concentrator and vacuum tube receivers 19 p0295 A78-33030

A road map to space products --- extraterrestrial manufactured products for Earth use [AAS 77-239] 19 p0329 A78-36716

VACUUM PUMPS

Vacuum pumping for controlled thermonuclear reactors 17 p0038 A78-11163

Vacuum vessel and pumping system of the J.E.T. experiment --- Joint European Torus 17 p0038 A78-11164

Controlled nuclear fusion, a challenge to the engineer. II - Systems for fuel supply and fuel removal, plasma heating, and vacuum generation 18 p0195 A78-27700

TMX - A new facility --- Tandem Mirror Experiment fusion reactor design 19 p0347 A78-39805

VACUUM SYSTEMS

TFTR vacuum system --- Tokamak Fusion Test Reactor 19 p0325 A78-36046

Engineering features of ISI-B --- Tokamak reactor design 19 p0347 A78-39802

VALUE ENGINEERING

Oil and gas replacement cost: Development and production. Volume 2: Exhibits [TID-28043/2] 19 p0418 A78-25515

VALVES

Report of survey of valve industry capabilities [CONF-771145-2] 19 p0393 A78-23440

VANES

Betz type limitation of vortex wind machines 17 p0093 A78-18090

VAPOR DEPOSITION

Controlling open circuit voltage in silicon Schottky /HIS/ solar cells 17 p0025 A78-11043

An optimum thickness indicator for evaporating metals on Schottky barrier solar cells 18 p0182 A78-24967

Solar cells from zone-refined metallurgical silicon 18 p0219 A78-30190

Possible selective solar photothermal absorber - Ni dendrites formed on Al surfaces by the CVD of Ni/CO/4 18 p0221 A78-30302

Thickness dependence of structural and electrical properties of Cds films for solar cells 19 p0325 A78-36035

VAPOR PHASES

Vapor-phase-epitaxial growth, processing and performance of AlAs-GaAs heterojunction solar cells 17 p0026 A78-11055

VAPOR PRESSURE

Models for calculating density and vapor pressure of geothermal brines 18 p0206 A78-28249

Solar powered Rankine cycle/vapor compression cycle modeling and performance prediction 19 p0295 A78-33036

Modeling of Rankine cycle/vapor compression cycle cooling systems for solar energy applications 18 p0282 A78-21587

VAPORIZERS

Fuel vaporization - Economy with reduced exhaust emission 18 p0221 A78-30366

Liquid hydrogen flash vaporizer --- for aircraft fuel systems [NASA-CASE-LAR-12159-1] 17 p0120 A78-11260

VAPORIZING

Heat transfer for solar energy utilization 18 p0200 A78-27855

Devolatilization and desulfurization of Iowa coal 17 p0125 A78-12525

VARIABLE CYCLE ENGINES

Solar-powered global aerospace transportation [AIAA PAPER 78-689] 19 p0293 A78-32761

Patent application. Variable-volume engine --- using natural heat sources [NASA-TM-75094] 19 p0408 A78-24660

VARIABLE GEOMETRY STRUCTURES

The variable geometry vertical axis windmill 18 p0170 A78-22241

Patent application. Variable-volume engine --- using natural heat sources [NASA-TM-75094] 19 p0408 A78-24660

VARIATIONAL PRINCIPLES

Variational irreversible thermodynamics of heat and mass transfer in porous solids - New concepts and methods 19 p0313 A78-34603

VEGETATION

Introductory workshops on remote sensing as related to geological problems in Georgia [E78-10152] 19 p0455 A78-27482

VEHICLES

Vehicle gas turbine with ceramic recuperative heat exchanger 19 p0311 A78-34486

VELOCITY DISTRIBUTION

Reference wind speed statistics for wind turbine design 17 p0051 A78-11313

A note on vertical extrapolation formulas for Weibull velocity distribution parameters --- of wind 18 p0234 A78-32413

VENEZUELA

The determinants of the demand for residual fuel oil in the U.S. east coast market, 1960-1976 --- Venezuelan exports [AD-A051131] 19 p0403 A78-24372

VENTILATION

Solar energy and large building HVAC systems - Are they compatible --- Heating, Ventilating and Air Conditioning 17 p0078 A78-15408

Net energy analysis model for the evaluation of a solar heating, ventilation and air conditioning system [AD-A047433] 18 p0251 A78-17487

Estimating the energy conservation potential of ventilation control through weather data analysis [PB-273949/8] 18 p0261 A78-18655

VERTICAL DISTRIBUTION

An estimate of the impact of OTEC operation on the vertical distribution of heat in the Gulf of Mexico 19 p0302 A78-33317

VISCOELASTICITY

Recent advances in engineering science; Proceedings of the Fourteenth Annual Meeting, Lehigh University, Bethlehem, Pa., November 18-16, 1977 19 p0360 A78-40301

VISCOPLASTICITY

Coal extrusion in the plastic state 17 p0132 A78-13256

VISCOSITY

Viscosity of coal-derived liquids 19 p0363 A78-40595

VISCOUS DAMPING

Damping of radial oscillation of a toroidal pinch plasma 18 p0192 A78-26708

VISCOUS DRAG

Windmills with diffuser effect induced by small tipvanes

18 p0171 A78-22245

VOLATILITY

Flame stabilization of low volatile fuels

17 p0079 A78-15832

The evolution of pollutants during the rapid devolatilization of coal

[PB-278496/5] 19 p0466 N78-27617

VOLCANOES

Stable isotopic studies of Japanese geothermal systems

17 p0062 A78-11493

Volcanoes as a source of geothermal energy

17 p0067 A78-13346

Thermal surveillance of active volcanoes using the LANDSAT-1 data collection system. Part 3: Heat discharge from Mount St. Helens, Washington

[E78-10122] 19 p0387 N78-22435

Thermal surveillance of active volcanoes using the LANDSAT-1 data collection system. Preface and part 1: The Surtsey, Iceland, temperature data relay experiment via LANDSAT-1 --- Lassen volcanic region, California, Surtsey, Iceland and Mt. St. Helens and Mt Baker, Washington

[E78-10121] 19 p0394 N78-23498

Thermal surveillance of active volcanoes using the LANDSAT-1 data collection system. Part 4: Lassen volcanic region

[E78-10123] 19 p0394 N78-23499

Thermal surveillance of active volcanoes using the LANDSAT-1 data collection system. Part 5: Electronic thermal sensor and data collection platform technology

[E78-10124] 19 p0394 N78-23500

VOLCANOLOGY

Landsat detection of hydrothermal alteration in the Mogal Canyon Cauldron, New Mexico

17 p0075 A78-14815

The effect of dike intrusion on free convection in conduction-dominated geothermal reservoirs

19 p0369 A78-42080

Exploration for geothermal energy on Oahu, Hawaii

[AD-A046954] 18 p0241 N78-16445

VOLT-AMPERE CHARACTERISTICS

Temperature dependence of the photovoltaic performance of Si cells under blue, white and near-bandgap irradiation

17 p0012 A78-10909

High intensity solar cell

17 p0023 A78-11028

A data acquisition system for in situ measurements of terrestrial photovoltaic array performance

17 p0023 A78-11029

MIS solar cell calculations

17 p0024 A78-11039

A contribution to Schottky barrier solar cell theory

17 p0025 A78-11041

Controlling open circuit voltage in silicon Schottky /MIS/ solar cells

17 p0025 A78-11043

An analysis of optimum loading conditions for P-N junction solar cells

17 p0030 A78-11092

Solar panels BPX47A for terrestrial applications

17 p0071 A78-13984

A simple measurement of absolute solar-cell efficiency

17 p0079 A78-15850

Thin Pt and Pd silicide Schottky barriers for silicon solar cells

18 p0171 A78-22267

On the theory of homojunction and heterojunction solar cells

18 p0192 A78-26616

The operation of the semiconductor-insulator-semiconductor /SIS/ solar cell theory

18 p0192 A78-26717

Analysis of electrolyte shunt currents in fuel cell power plants

18 p0219 A78-30188

Solar cells from zone-refined, metallurgical silicon

18 p0219 A78-30190

Observations of anisotropic diffused layer sheet resistance in EPG silicon ribbon solar cells --- Edge-defined Film-fed Growth

18 p0223 A78-30648

Thermionic emission from electrodes with raised surfaces in a thermionic converter

18 p0224 A78-31011

Polycrystalline thin film CdS/CdTe solar cells

18 p0225 A78-31210

Theoretical analysis of a novel MPN gallium arsenide Schottky barrier solar cell

18 p0227 A78-31385

Two-dimensional analysis for Cu_x/S-CdS solar cells with nonuniform skin region

18 p0228 A78-31726

On the fill factor of solar cells --- volt-ampere characteristics

19 p0292 A78-32691

Junction potentials of strongly illuminated n⁺/p-p⁺/solar cells

19 p0292 A78-32693

Preliminary results on the conversion of laser energy into electricity

19 p0313 A78-34631

Sunstations --- calibrated silicon solar cell for insolation measurement

19 p0314 A78-34933

Photo-galvano-voltaic cell - A new approach to the use of solar energy

19 p0333 A78-37174

Photoelectric properties of CdS thin films obtained by vacuum evaporation from the heterogeneous CdS.Cr₂O₃ system

19 p0333 A78-37261

Frequency limitations of transferred electron devices related to quality of contacts

19 p0334 A78-37468

Solar cell behaviour under variable surface recombination velocity and proposal of a novel structure

19 p0334 A78-37469

Temperature sheaths on probes or electrodes in HED plasmas

19 p0336 A78-38108

A model for the current-voltage curve of photoexcited semiconductor electrodes

19 p0343 A78-39457

Voltage protection scheme for MG sets used to drive inductive energy storage systems --- Motor-Generator sets for Tokamaks

19 p0353 A78-39961

Microprocessor-based solar cell measurement system

19 p0365 A78-40919

Evaporated CdS film based heterojunction solar cells

19 p0372 A78-42122

Measurement of material parameters that limit the open-circuit voltage in P-N-junction silicon solar cells

17 p0136 N78-13532

Radiation tests of SEP solar cells

17 p0138 N78-13548

VOLTAGE CONVERTERS (DC TO DC)

Influence of the effect of storage on models of power cell dynamics

17 p0103 A78-19486

A theory of control for a class of electronic power processing systems: Energy-storage dc-to-dc converters

18 p0262 N78-19382

VOLTAGE GENERATORS

Controllable homopolar motor-generator energy storage for application in a fusion power reactor

17 p0007 A78-10680

Development of inductive storage for generation of high voltage pulses

17 p0007 A78-10699

The evolution of pulsed power --- voltage generator fusion reactor applications

17 p0008 A78-10709

VOLTAGE REGULATORS

Voltage-regulation requirements in power-supply centers in the case of nonuniform user-loads

18 p0189 A78-26265

Design and test of a series switch/regulator system for a 40-kV, 80-A, 10-ms, neutral-beam power supply

19 p0353 A78-39965

VORTEX GENERATORS

A practical approach to vortex augmentation of wind turbines

17 p0052 A78-11315

Betz type limitation of vortex wind machines

WASTE UTILIZATION

SUBJECT INDEX

Utilization of waste heat from electric power generation 17 p0031 A78-11095

Solar energy utilization and resource recovery application in space heating 17 p0031 A78-11104

Feasibility of integrated ocean thermal gradient-nuclear plants for the production of electrical power 17 p0032 A78-11110

Hazardous wastes and energy recovery 17 p0032 A78-11112

Modular incinerator energy recovery systems - The Siloam Springs experience 17 p0033 A78-11114

Materials and energy from refuse; Proceedings of the First International Symposium, Antwerp, Belgium, October 21, 22, 1976 17 p0036 A78-11140

The Andco-Torrax process - A slagging pyrolysis solid waste conversion system 17 p0036 A78-11142

Partial oxidation of refuse using the Purox system 17 p0036 A78-11143

Energy recovery from municipal and industrial waste 17 p0037 A78-11146

Refuse incineration with heat recovery - Typical design and practical experience 17 p0037 A78-11147

Energy from refuse - Theoretical and practical results 17 p0037 A78-11149

Refuse energy in the United States - Two generations of steam generating waterwall incinerators 17 p0037 A78-11150

Combined refuse and sludge incineration 17 p0037 A78-11151

Heat transfer from a horizontal plate facing upward to superposed liquid-layers with change of phase [ASME PAPER 76-WA/HT-1] 17 p0076 A78-15057

Combustion treatment of smoke and odors of industrial origin - Energy recovery 17 p0082 A78-16475

Constraining the energy gobbler --- industrial waste heat recovery techniques 17 p0096 A78-18674

Basis of cheap energy --- economic nuclear-thermal energy distribution systems 17 p0102 A78-19244

The construction of long-distance thermal-energy supply systems in Mannheim within the framework of a demonstration project 17 p0102 A78-19245

Unconventional types of power-heat coupling 17 p0102 A78-19246

The block heating power station - Characteristics and first experience 17 p0103 A78-19247

Utilization of exhaust-gas heat from gas turbine power plants 17 p0103 A78-19525

Comparison of two government reports as to their approaches to recycling 17 p0106 A78-20248

Energy from wastes - An overview of present technologies and programs 18 p0197 A78-27803

Production of low-Btu gas from wastes, using molten salts 18 p0197 A78-27804

Pipeline gas from solid wastes by the Syngas recycling process 18 p0197 A78-27805

The nature of pyrolytic oil from municipal solid waste 18 p0197 A78-27806

Utilization of energy from organic wastes through fluidized-bed combustion 18 p0198 A78-27813

Procedures for the production of hydrogen from natural gas and oil fractions 18 p0209 A78-28475

Cogeneration --- single site simultaneous electricity/heat generation 18 p0216 A78-29226

Energy recovery by the incineration of solid waste - Development, present status, and experiences in Germany /James Clayton Lecture/ 18 p0221 A78-30373

Energy savings from solid urban waste disposal systems in Italy 18 p0228 A78-31744

Technologies for the utilization of waste energy 18 p0232 A78-32116

Steam bottoming plants for combined cycles 19 p0296 A78-33102

Thermionic energy conversion topping system --- utilization of waste energy from steam generators [ASME PAPER 77-WA/ENER-6] 19 p0297 A78-33144

Performance and cost evaluation for a thermionic topping power plant [ASME PAPER 77-WA/ENER-7] 19 p0297 A78-33145

Refuse without imperfection - Refuse combustion with combined sediment processing 19 p0316 A78-35297

Technical applications of heat pipes [AIAA 78-396] 19 p0318 A78-35589

Tritium systems preliminary design for TNS --- Tokamak Next Step with fuel reprocessing 19 p0346 A78-39798

Direct energy conversion of exhaust fusion plasma by magnetic deflection 19 p0348 A78-39815

Symbiotic system of a fusion and a fission reactor with very simple fuel reprocessing 19 p0380 A78-42257

Technology evaluation of Army-scale waste-to-energy systems [AD-A042578] 17 p0112 N78-10567

Prospects for the utilization of waste heat in large scale district heating systems [BNL-22559] 17 p0152 N78-14651

Environmental assessment of waste-to-energy processes: Source assessment document [PB-272646/1] 17 p0163 N78-15956

European waste-to-energy systems: Case study of the thermal complex of Toulouse-Le Mirail (France) [CONS/2103-1] 18 p0245 N78-16932

Waste heat utilization. Citations from the NTIS data base [NTIS/PS-78/0294] 19 p0433 N78-25661

Waste heat utilization, volume 3. Citations from the engineering index data base [NTIS/PS-78/0296] 19 p0433 N78-25662

Waste heat utilization, volume 2. Citations from the engineering index data base [NTIS/PS-78/0295] 19 p0433 N78-25663

Power plant reject heat utilization: An assessment of the potential for wide-scale implementation [ORNL/TM-5841] 19 p0449 N78-26613

Overcoming institutional barriers to solid waste utilization as an energy source --- electric power plants [HCP/L50172-01] 19 p0452 N78-27005

Overcoming institutional barriers to solid waste utilization as an energy source: Executive summary --- electric power plants [HCP/L50172-02] 19 p0453 N78-27006

Subsurface waste-heat storage: Experimental study [ORO-5003-1] 19 p0459 N78-27554

Environmental effects of burning solid waste as fuel [IS-M-124] 19 p0466 N78-27637

WASTE UTILIZATION

Present status and research needs in energy recovery from wastes; Proceedings of the Conference, Oxford, Ohio, September 19-24, 1976 17 p0005 A78-10626

Quality and characteristics of steam produced from wastes 17 p0005 A78-10630

Densified refuse derived fuels - An alternative concept 17 p0005 A78-10634

Experience with burning industrial wastes in steam-generating and high-temperature heat recovery systems 17 p0006 A78-10636

Overcoming obstacles to energy recovery from industrial wastes 17 p0006 A78-10637

ROEMHC subscript R Burner - High ash solid fuel combustion system 17 p0032 A78-11111

SUBJECT INDEX

WASTE WATER

The environmental effects and economic costs of solid waste energy recovery 17 p0033 A78-11113

Biomass as an energy mechanism 17 p0033 A78-11116

Clean fuels from biomass and wastes; Proceedings of the Second Symposium, Orlando, Fla., January 25-28, 1977 17 p0033 A78-11120

Biomass and wastes as energy resources - Update 17 p0033 A78-11121

Energy and materials from the forest biomass 17 p0034 A78-11126

Trees as a renewable energy resource 17 p0034 A78-11127

Utilization of waste cellulose for production of chemical feedstocks via acid hydrolysis --- Conversion to glucose 17 p0035 A78-11129

Rotary kiln gasification of biomass and municipal wastes 17 p0035 A78-11130

Pyrolysis of solid wastes for production of gaseous fuels and chemical feedstocks 17 p0035 A78-11131

Ammonia synthesis gas and petrochemicals from cattle feedlot manure 17 p0035 A78-11132

Chicago's new refuse disposal installation 17 p0035 A78-11133

Syngas process converts waste to SNG 17 p0035 A78-11134

Operating experience with large scale digestion of urban refuse with sewage sludge 17 p0036 A78-11136

Two-phase anaerobic digestion --- for synthane-from-waste conversion 17 p0036 A78-11137

Environmental impact of solid waste and biomass conversion-to-energy processes 17 p0036 A78-11139

Materials and energy from refuse; Proceedings of the First International Symposium, Antwerp, Belgium, October 21, 22, 1976 17 p0036 A78-11140

The Garrett pyrolysis process 17 p0036 A78-11141

Methane production from waste 17 p0037 A78-11144

Prospects of materials and energy from refuse in India 17 p0037 A78-11145

Combination of refuse incineration with electric power generation 17 p0037 A78-11148

Biomass and waste production as energy resources - Update 17 p0063 A78-12222

Mobilization and impacts of bio-gas technologies 17 p0067 A78-13345

A solid waste package deal - Energy and materials from garbage 17 p0092 A78-17671

Bioconversion: Fuels from biomass --- Book 18 p0167 A78-21700

Energy from municipal refuse 18 p0182 A78-24763

Emissions of trace elements from the combined firing of coal and RDF in a utility boiler --- Refuse-Derived Fuel [APCA PAPER 77-37,6] 18 p0185 A78-25404

Experience at Edmonton /GLC/ of generating electricity using refuse as fuel 18 p0186 A78-25504

Comparing the Ames and St. Louis resource recovery projects 18 p0186 A78-25700

Biogasification using NaOH treated pig faeces 18 p0194 A78-27550

Fuels from waste --- Book 18 p0197 A78-27801

A wealth of waste - A shortage of energy --- organic wastes for fuel conversion in U.S. 18 p0197 A78-27802

Production of low-Btu gas from wastes, using molten salts 18 p0197 A78-27804

The conversion of feedlot wastes into pipeline gas 18 p0197 A78-27807

Fuels and chemicals from crops 18 p0197 A78-27808

The production of oil from wood waste 18 p0198 A78-27809

Fuels from wood waste 18 p0198 A78-27810

Pyrolytic gasification of Kraft black liquors 18 p0198 A78-27811

Methanol production from organic waste 18 p0198 A78-27812

Fuel gas production from selected biomass via anaerobic fermentation 18 p0208 A78-28366

Multi-stage digestion of municipal solid waste to fuel gas 18 p0218 A78-29868

The biogas facility at Benediktbeuern 18 p0221 A78-30323

Fluidized bed combustion of coal and waste materials --- Book 19 p0309 A78-33803

Refuse-derived fuel wins out over oil and coal at new industrial power plant 19 p0315 A78-34974

The significance of domestic refuse recycling for raw material requirements and energy consumption of the nonferrous metals industry 19 p0332 A78-36945

Waste pyrolysis - Alternative fuel source 19 p0333 A78-37172

Energy for agriculture and the gasification of crop residues 19 p0368 A78-41815

Crop residues as energy sources - Assessing the cost and energy feasibility of direct firing 19 p0368 A78-41818

A study of biochemical fuel cells utilizing animal and kitchen waste as fuel 19 p0374 A78-42137

Energy and protein production from pulp mill wastes [COO-2983-3] 17 p0157 N78-14952

Metals in the combustible fraction of municipal solid waste [PB-272946/5] 18 p0245 N78-16499

European waste-to-energy systems. An overview [CONS/2103-6] 18 p0245 N78-16931

European waste-to-energy systems: Case study of Munich: Munich North IA and IB, Munich North II, Munich South IV and V [CONS/2103-4] 18 p0245 N78-16933

European waste-to-energy systems: Case study of Koersor, Denmark [CONS/2103-3] 18 p0246 N78-16934

European waste-to-energy systems: Case study of Geneva-Cheneviers (Switzerland) [CONS/2103-2] 18 p0246 N78-16935

Fuel gas production from animal waste, phase 1 [COO-2991-17] 18 p0280 N78-21321

Market analysis of recovered materials and energy from solid waste, executive summary [PB-277143/4] 19 p0392 N78-22979

Energy and protein production from pulp mill wastes [COO-2983-6] 19 p0428 N78-25617

Solid waste utilization: Pyrolysis [ANL/CES/TE-77-15] 19 p0435 N78-26038

Overcoming institutional barriers to solid waste utilization as an energy source --- electric power plants [HCP/L50172-01] 19 p0452 N78-27005

Overcoming institutional barriers to solid waste utilization as an energy source: Executive summary --- electric power plants [HCP/L50172-02] 19 p0453 N78-27006

Utilization of waste heat in trucks for increased fuel economy [NASA-CR-157292] 19 p0458 N78-27532

WASTE WATER

Ozonation of coal gasification plant wastewater 18 p0222 A78-30560

Cyanide removal from petroleum refinery wastewater using powdered activated carbon [PB-270862/6] 17 p0146 N78-13650

Kinetic model for predicting the composition of chlorinated water discharged from power plant cooling systems [CONF-771070-1] 19 p0411 N78-24695

Ultrafiltration and hyperfiltration of phenolic compounds in coal gasification wastewater streams 19 p0435 N78-26007

WASTES

Characterization of substances in products, effluents and wastes from synthetic fuel development processes
[BNWL-2224] 19 p0410 N78-24683

WATER

Thermodynamics of thermochemical cycles in the decomposition of water 17 p0098 A78-18833

Characteristics of water-emulsion fuels --- combustion of hydrocarbon emulsions 17 p0102 A78-18949

High efficiency water electrolysis in alkaline solution --- for hydrogen production 19 p0311 A78-34400

The use of oxygen/water for removal of sulfur from coals 19 p0320 A78-35694

Water dissociation by a thermochemical cycle - A thermodynamic analysis of principles and efficiencies 19 p0340 A78-38893

The thermochemical dissociation of water 17 p0123 N78-12163

Solar energy commercialization at the state level: The Florida solar energy water heater program [PB-270158/9] 17 p0128 N78-12551

Parametric study of rock pile thermal storage for solar heating and cooling phase 1 [NASA-CR-155336] 17 p0138 N78-13552

Intermediate standards for solar domestic hot water systems/HUD initiative [PB-271758/5] 17 p0139 N78-13563

Water pulsejet Research --- for quantitative understanding of McHugh cycle [AD-A046533] 17 p0158 N78-15497

Prototype solar heating and hot water systems [NASA-CR-150592] 18 p0275 N78-20612

Preliminary design package for solar hot water system [NASA-CR-150617] 18 p0283 N78-21603

Application of solar energy to the supply of industrial process hot water: Preliminary design and performance report. Volume 1: Technical report [SAN/1218-3-VOL-1] 19 p0422 N78-25569

Feasibility evaluation: Solar heated textile process water [SRO-0885-75/1] 19 p0428 N78-25621

Nationwide assessment of water quantity impacts of the National Energy Plan. Volume 1: Summary and conclusions [ORNL/TM-6098-VOL-1] 19 p0442 N78-26524

Preliminary design package for Sunspot Domestic Hot Water Heating System [NASA-CR-150605] 19 p0456 N78-27518

WATER CIRCULATION

The first 'solar hotel' in Germany 17 p0072 A78-14096

The external flow induced by an Ocean Thermal Energy Conversion /OTEC/ power plant 19 p0302 A78-33319

Performance study of spray-type solar water heater 19 p0374 A78-42147

WATER CONSUMPTION

Energy and water --- energy resources correlation with fresh water availability 18 p0175 A78-23562

Water in synthetic fuel production: The technology and alternatives --- Book 19 p0365 A78-41000

Water conservation and pollution control in coal conversion processes [PB-269568/2] 17 p0128 N78-12556

A linear programming model for assessing the regional impacts of energy development on water resources [PB-273022/4] 18 p0251 N78-17491

Long-term availability of water resources for energy development in the central United States [CONF-7710101-5] 19 p0397 N78-23584

WATER COOLED REACTORS

What comes after oil and gas - Development trends offered by energy sources 18 p0223 A78-30709

Design of the TEXT toroidal and poloidal field coils --- Texas fusion plasma research tokamak 19 p0345 A78-39790

Thermal-mechanical design of a 150-mA, direct-current, 400-keV accelerator for production of 14-MeV neutrons 19 p0357 A78-40032

WATER DEPTH

West Antarctic ice sheet and CO2 greenhouse effect - A threat of disaster 18 p0175 A78-23492

WATER EROSION

Corrosion fatigue of 5086-H34 aluminum in sea water --- for ocean thermal energy conversion 19 p0305 A78-33344

WATER FLOW

Solar pond 18 p0200 A78-27860

Stratified turbulence modeling for the near field external flow --- application to Ocean Thermal Energy Conversion plants 19 p0302 A78-33316

The Mist Flow OTEC Plant --- convective lift to achieve hydraulic head in Ocean Thermal Energy Conversion 19 p0306 A78-33352

Engineering analysis and testing of water-trickle solar collectors [ORO-4927-77/1] 18 p0242 N78-16461

Hetering low-quality steam-water flows [UCRL-52271] 18 p0263 N78-19455

WATER INJECTION

North Stanley polymer demonstration project [COO-0029-1] 19 p0394 N78-23539

Pilot demonstration-enhanced oil recovery by micellar-polymer waterflooding Bell Creek Field [COO-4207-14] 19 p0418 N78-25510

WATER LOSS

Photosynthetic and water efficiency of Salsola pestifer --- tumbleweeds for biomass energy production 17 p0056 A78-11352

WATER MANAGEMENT

Coal gasification and water resources development 17 p0097 A78-18775

Energy and water --- energy resources correlation with fresh water availability 18 p0175 A78-23562

Conference proceedings: A critical economic balance: Water, land, energy, people [PB-274089/2] 18 p0253 N78-17944

Analyses of methods for the determination of water availability for energy development [FPA/G-77/059] 18 p0282 N78-21580

WATER POLLUTION

Comparison of levels of trace elements extracted from fly ash and levels found in effluent waters from a coal-fired power plant 17 p0001 A78-10062

Analysis of petroleum type hydrocarbons in marine samples using gas chromatography and mass spectrometry 17 p0065 A78-12844

Oil in the ocean - Circumstances control its impact 17 p0087 A78-17262

A study of the formation of unpumpable residues of crude oil on tankers for the purpose of preventing marine pollution 17 p0093 A78-18050

Kinetics of chemical processes involved in the decontamination of seawater with respect to oil hydrocarbons 18 p0193 A78-26818

The detection of hydrocarbon sheets on the sea 18 p0209 A78-28395

Remote monitoring of the Gravelly Run thermal plume at Hopewell and the thermal plume at the Surry nuclear power plant on the James River 19 p0313 A78-34905

Water conservation and pollution control in coal conversion processes [PB-269568/2] 17 p0128 N78-12556

Cyanide removal from petroleum refinery wastewater using powdered activated carbon [PB-270862/6] 17 p0146 N78-13650

Consequences of new energy patterns [PB-273259/2] 18 p0244 N78-16474

Chemical and physical properties of refined petroleum products [PB-277100/4] 18 p0279 N78-21312

SUBJECT INDEX

WINDMILLS (WINDPOWERED MACHINES)

Wind tunnel simulation of the influence of two dimensional ridges on wind speed and turbulence --- for windpower generator site selection in hilly terrain 18 p0169 A78-22231

WVU wind energy concentrators 18 p0171 A78-22244

Experimental and analytical studies of the aerodynamic performance of windmills [AIAA PAPER 78-277] 18 p0172 A78-22612

Applications of wind tunnels to investigations of wind-engineering problems [AIAA 78-812] 18 p0233 A78-32366

An experimental facility for wind engineering research [AIAA 78-813] 18 p0234 A78-32367

Diffuser augmentation of wind turbines 19 p0312 A78-34512

Experimental analysis of a straight bladed Darrieus wind turbine 19 p0361 A78-40365

Wind tunnel performance data for two- and three-bucket Savonius rotors 19 p0364 A78-40822

The Lebest Wind Turbine - Laboratory tests and data analysis 19 p0364 A78-40824

WIND TUNNELS

Energetic evaluation of the hybrid tunnel principle and possibilities of efficiency improvement --- wind/tow tunnel combination 18 p0246 A78-17011

WIND VANES

Effects of rotor location, coning, and tilt on critical loads in large wind turbines 17 p0107 A78-20476

Windmills with diffuser effect induced by small tipvanes 18 p0171 A78-22245

WIND VARIATIONS

Solar and wind power - Some meteorological aspects 17 p0094 A78-18325

How wind variability affects the potential power available from wind generators 18 p0235 A78-32504

Methods of attenuating wind turbine ac generator output variations 18 p0266 A78-19632

WIND VELOCITY

Reference wind speed statistics for wind turbine design 17 p0051 A78-11313

Specific output of windmills - A discovery 17 p0078 A78-15783

Solar and wind induced external coefficients - Solar collectors 18 p0165 A78-20625

Economic design of wind electric systems [IEEE PAPER P 77 679-4] 18 p0219 A78-30197

The production of electricity from the wind - A preliminary feasibility study for Greece 18 p0231 A78-32049

A note on vertical extrapolation formulas for Weibull velocity distribution parameters --- of wind 18 p0234 A78-32413

How wind variability affects the potential power available from wind generators 18 p0235 A78-32504

Toroidal accelerator rotor platforms for wind energy conversion 18 p0235 A78-32505

Probability models of wind velocity magnitude and persistence 19 p0314 A78-34935

Determination of optimum arrays of wind energy conversion devices 19 p0364 A78-40821

New details on wind power climatology [SAND-77-0696C] 17 p0163 A78-15657

WIND VELOCITY MEASUREMENT

Flow field analysis 18 p0265 A78-19623

WINDMILLS (WINDPOWERED MACHINES)

Control and dynamic analysis of a wind energy conversion and storage system operating at constant velocity ratio 17 p0028 A78-11076

The use of wind power by electric utilities 17 p0051 A78-11311

Optimum and near-optimum blade configurations for high speed wind turbines 17 p0051 A78-11314

Wind energy techniques of the past and present --- windmill design 17 p0072 A78-14103

Specific output of windmills - A discovery 17 p0078 A78-15783

Generation of electricity from the wind 17 p0080 A78-16053

Betz type limitation of vortex wind machines 17 p0093 A78-18090

Vortex augmentation of wind energy --- aerodynamic surface design for energy conversion efficiency 17 p0094 A78-18091

Performance characteristics of concentrator-augmented Savonius wind rotors 17 p0094 A78-18092

Design parameters affecting the performance of resistance-type, vertical-axis windrotors - An experimental investigation 17 p0094 A78-18093

Speed polar of a wind turbine powered cargo boat 17 p0094 A78-18094

Selected wind tunnel test results for the Darrieus wind turbine 17 p0094 A78-18099

Potential of wind as an energy source in Iran 17 p0094 A78-18223

The use of built form to enhance the output of wind collectors 17 p0107 A78-20478

Wind power limitations associated with vortices [AIAA PAPER 78-278] 18 p0166 A78-20785

Lift on a rotating porous cylinder --- with application to wind power generation 18 p0167 A78-21633

Computer aided aerogenerator analysis and performance 18 p0169 A78-22229

A study on the use of windmills in Singapore 18 p0169 A78-22230

The variable geometry vertical axis windmill 18 p0170 A78-22241

A low cost windmill rotor 18 p0170 A78-22242

WVU wind energy concentrators 18 p0171 A78-22244

Windmills with diffuser effect induced by small tipvanes 18 p0171 A78-22245

Wind power installations for water pumping in developing countries 18 p0171 A78-22247

The regulation, storage, and conversion of wind produced electrical energy at the level of a few hundred watts 18 p0171 A78-22248

Experimental and analytical studies of the aerodynamic performance of windmills [AIAA PAPER 78-277] 18 p0172 A78-22612

Performance of counter- and corotating arrays of Savonius turbines --- windpowered machines 18 p0188 A78-26113

Wind energy converter and mechanical energy converters - Matching and control 18 p0211 A78-28564

Twind wind mill --- blade and tower design 18 p0211 A78-28570

Harnessing the wind --- review of wind turbine machines 18 p0216 A78-29222

On vortex wind power [ASME PAPER 77-WA/PE-20] 18 p0218 A78-30035

The effect of hub fairings on wind turbine rotor performance 18 p0219 A78-30039

The aerodynamic efficiency of windmills 18 p0229 A78-31834

How to build wind wheels: Construction and calculation --- German book 18 p0231 A78-32075

Momentum theory and flow states for windmills 18 p0234 A78-32420

Blade twist, droop snoot, and forward spars --- in windmill blades 18 p0234 A78-32421

PERSONAL AUTHOR INDEX

ENERGY / A Continuing Bibliography (Issue 19)

OCTOBER 1978

Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The issue, page and accession numbers are located beneath and to the right of the title, e.g., 17 p0138 N78-13552. Under any one author's name the accession numbers are arranged in sequence with the /AA accession numbers appearing first.

A

- ABDEL-AAL, H. K.**
Solar energy prospects in Saudi Arabia
19 p0345 A78-39671

CORPORATE SOURCE INDEX

ENERGY / A Continuing Bibliography (Issue 19)

OCTOBER 1978

Typical Corporate Source Index Listing

The title of the document is used to provide a brief description of the subject matter. The issue, page number and NASA or AIAA accession number are included in each entry to assist the user in locating the abstract in the abstract section of an individual supplement of *Energy*. If applicable, a report number is also included as an aid in identifying the document.

A

- ACADEMY OF SCIENCES (USSR), MOSCOW.**

CONTRACT NUMBER INDEX

ENERGY / A Continuing Bibliography (Issue 19)

OCTOBER 1978

Typical Contract Number Index Listing

Listings in this index are arranged alphanumerically by contract number. Under each contract number, the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order with the IAA accession numbers appearing first. The accession number denotes the number by which the citation is identified in either the IAA or STAR section. Preceding the accession number are the issue and page number in the particular supplement in which the citation may be found.

REPORT/ACCESSION INDEX

ENERGY / A Continuing Bibliography (Issue 19)

OCTOBER 1978

Typical Report/Accession Number Index Listing

Listings in this index are arranged alphanumerically by report number. The issue and page number indicate the actual Supplement and page where the citation may be located. The accession number denotes the number by which the citation is identified. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche. A plus sign (+) indicates a document that cannot be microfiched but for which one-to-one facsimile is available.

PUBLIC COLLECTIONS OF NASA DOCUMENTS

DOMESTIC

NASA distributes its technical documents and bibliographic tools to eleven special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

CALIFORNIA

University of California, Berkeley

COLORADO

University of Colorado, Boulder

DISTRICT OF COLUMBIA

Library of Congress

GEORGIA

Georgia Institute of Technology, Atlanta

ILLINOIS

The John Crerar Library, Chicago

MASSACHUSETTS

Massachusetts Institute of Technology, Cambridge

MISSOURI

Linda Hall Library, Kansas City

NEW YORK

Columbia University, New York

OKLAHOMA

University of Oklahoma, Bizzell Library

PENNSYLVANIA

Carnegie Library of Pittsburgh

WASHINGTON

University of Washington, Seattle

NASA publications (those indicated by an "*" following the accession number) are also received by the following public and free libraries:

CALIFORNIA

Los Angeles Public Library

San Diego Public Library

COLORADO

Denver Public Library

CONNECTICUT

Hartford Public Library

MARYLAND

Enoch Pratt Free Library, Baltimore

MASSACHUSETTS

Boston Public Library

MICHIGAN

Detroit Public Library

MINNESOTA

Minneapolis Public Library

MISSOURI

Buffalo and Erie County Public Library

Rochester Public Library

New York Public Library

OHIO

Akron Public Library

Cincinnati Public Library

Cleveland Public Library

Dayton Public Library

Toledo Public Library

TENNESSEE

Memphis Public Library

TEXAS

Dallas Public Library

Fort Worth Public Library

WASHINGTON

Seattle Public Library

WISCONSIN

Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 750 Third Avenue, New York, New York 10017.

EUROPEAN

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. By virtue of arrangements other than with NASA, the British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy of microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "*" and "#", from: ESA - Space Documentation Service, European Space Agency, 8-10 rue Mario-Nikis, 75738 Paris CEDEX 15, France.
